SUMMARY

- The committee passed the following action items which will be presented to the Park Board for consideration and approval:
 - Approval of the Green Area Maintenance Pilot Project Agreement with the City of Spokane Public Works subject to modifications discussed in the meeting be incorporated into the final agreement – consent agenda item
 - Corbin Park Sport Court Renovation/Ditches Unlimited Change Order 1 (\$22,004.38 plus tax) – consent agenda item
 - Washington State Grant Applications/several projects (no cost) – consent agenda item
- Bob Scarfo provided an update of the progress on the proposed Memory Garden.

The next regularly scheduled Land Committee meeting is set for 3:30 p.m. Wed. May 01, 2024.

MINUTES

The meeting was called to order at 3:31 p.m. by committee chair Greta Gilman.

Public Comments:

1. Jeff Lambert, Friends of the Bluff, spoke in favor of the [Thorpe Rd. trust land transfer](#). He stated there are 35 applications from various agencies for the Dept. of Natural Resources (DNR). The properties would have to be bought out by the State of WA and transferred to the various agencies. The Thorpe Rd. property has been public since the Washington Territory became a state. The DNR has considered selling this parcel to a private developer to build 800 homes. There are 4 selection criteria: ecological factor (which Jeff said needed to be polished up before the July advisory committee presentation), community support (which Jeff is working on), community benefit (which is the letter Parks is preparing), and economic benefits to the community (which is more difficult and needs to be polished). In addition, [Karen Mobley](#), community volunteer for Spokane Urban Nature, emailed her support, citing the high priority in the master plan for the preservation of natural habitats for many unique wildlife and vegetation. [Carol Landa-McVicker](#) also emailed her support and would like to keep the open spaces as the area grows in population.
2. Cynthia Parker commented on the purpose and necessity of a [memory garden](#) in Spokane. It should offer peace, beauty and quiet where they are safe, is easy walkable, fenced and gated. She spoke of how her loved ones with dementia enjoyed the ability to work in garden and it was the highlight of their day. Jean Kinden works with aging and long-term care individuals who have needs which have not been addressed. She feels it should be in a neighborhood where both north and south area residents can easily access. Bill Heaton is chairman of the Land Use committee. He emphasized the people benefitting from a memory garden are people (taxpayers) who have spent their lives contributing to the neighborhood and because of declining mental health are now begin shut out or walled off from the community for no fault of their own. Mr. Scarfo's memory garden tears down those walls, allowing the aging population to again enjoy the outdoors without fear. Rhonda Spangler, a geriatric care provider, sees loved ones struggle to find activities in the area for people who have difficulty understanding the environment, irritability, and anxiety. A memory garden is also a unique environment for caregivers to connect. The garden also elicits responses from non-verbal individuals, sparking long-term, joyful memories. The memory garden is also an ideal haven for individuals with autism and traumatic brain injury.

Action items:

1. [Approval of the Green Area Maintenance Pilot Project Agreement with the City of Spokane Public Works](#) – Al Vorderbrueggen/Carl Strong

Greta expressed concern that the agreement is too broad. Al reminded the committee that as a pilot program, this will most likely be changed again in 18 months. He stated that Parks can only provide the level of service and maintenance to which they receive funds. This project cannot and will not affect the Park fund. After speaking with several department heads, the Park Operations is best suited to handle this project. Carl pointed out that Operations would manage the Green Area Maintenance no differently than they handle the parks when it comes to illegal dumping and encampments, where the Homeless Outreach Team/Code Enforcement are brought in. Greta indicated she would like to have more clarification in the fourth paragraph as to which properties are included. Carl Strong stated the "green spaces" are listed in Exhibit A. Greta suggested changing "green spaces" to "green areas pursuant to Exhibit A". Kevin suggested further simplifying to read "WHEREAS, Public Works has traditionally maintained the properties in Exhibit A". The committee agreed to rewrite section 2.2. The agreement will be passed around this week for revision and the motion will be changed to accommodate these revisions.

Motion #1 – Greta Gilman moved to recommend the Green Area Maintenance Pilot Project Agreement with the City of Spokane Public Works subject to modifications discussed in the meeting be incorporated into the final agreement (modifications have to do with the wording of the agreement, not with the intent of the agreement).

Sally Lodato seconded. The motion passed unanimously (4-0 vote – Doug Kelley was unavailable for the vote).

The committee agreed to present this recommendation as a consent agenda item on the April 11 Park Board meeting agenda.

2. [Corbin Park Sport Court Renovation/Ditches Unlimited Change Order 1 \(\\$22,004.38 plus tax\)](#) – Berry Ellison

Berry showed the progress so far, which included a short reinforced concrete wall along the south and north side perimeter wall to hold up the fence. After inspection he realized the sidewalls are deteriorating. Although the scope of work does not include the side walls, he worked with the contractor on a plan to build up the curbs along the south side, which was within the 10% cost adjustment already agreed upon. During the negotiation, they agreed upon site protection since work was interrupted over winter. They agreed to pay for one of the three months of site protection mats (50 mats @ \$3,750/mo). Also due to the additional work, Berry would like to request a no-cost extension through June 31, although they are hoping to have a July 4th opening.

Motion #2 – Greta Gilman moved to recommend Corbin Park Sport Court Renovation/Ditches Unlimited Change Order 1 (\$22,004.38 plus tax)

Kevin Brownlee seconded. The motion passed unanimously (5-0 vote).

The committee agreed to present this recommendation as a consent agenda item on the April 11 Park Board meeting agenda.

3. [Washington State Grant Applications/several projects \(no cost\)](#) – Nick Hamad

- a. There are three projects: Meadowglen Park development (acquired in 1985), Coeur d'Alene (CdA) Park playground, and the trust land transfer for the Thorpe Rd. property.
- b. Meadowglen, 14 acres of undeveloped property at the north end of the City limits near Indian Trail identified as a first-tier project in the master plan. Provided the levy passes, the \$7-8M development funding has been allocated. There is a desire to augment \$1-1.5M through a WA State Recreation and Conservation Office (RCO) grant. This development would benefit the 650 +/- residences without easy access to a park.
- c. CdA Park in Brown's Addition was recently denied a request for state funding. The playground has been identified as the third adverse in the park system. Parks would like to propose an RCO grant for renovations for this facility as well, which would include the playground, restrooms, and handicap accessibility. The funding for this project has also been allocated provided the levy passes.
- d. The 192-acre DNR owned Thorpe Rd. property is located near the southwest corner of the City limits. Although this has been defined as a third-tier project, however the state legislature would fund this transfer at no cost to Parks. There is heavy residential building in this area and Parks would prefer to secure this land now. The application was submitted in the fall however, Parks would like to follow up with a Letter of Resolution from the Director of Spokane Parks and Recreation indicating the need for natural land and recreation in that location, rather than being absorbed with residential properties.

- e. Greta clarified that by approving this action item, the committee is approving staff putting in efforts to write the grant applications on the first two items and providing a Letter of Resolution from the Director in for the trust land transfer. Nick reminded the committee that if these applications are approved, Park Board would then need to take more action to then develop and/or renovate these properties. He also stated that if the levy does not pass, the two existing park projects could be done in phases, which is how the grant applications will be written.

Motion #3 – Greta Gilman moved to recommend Washington State Grant Applications/several projects (no cost)

Kevin Brownlee seconded. The motion passed unanimously (5-0 vote).

The committee agreed to present this recommendation as a consent agenda item on the April 11 Park Board meeting agenda.

Discussion Items:

1. **Memory Garden Pilot Project Progress Update / Manito Park (no cost)** – Nick Hamad
 - a. Many people came to the meeting in support of the memory garden. Kevin Brownlee emphasized this was only a discussion item and no action would be taken at this meeting. To recap, Bob Scarfo last visited the Land Committee in October of 2023 with a recommendation to place a memory garden in Manito Park. The committee is in support of a memory garden in Spokane, however, he was given a number of things to retool and revisit. Today he is bringing an update.
 - b. Bob reintroduced himself, a registered landscape architect, Debby Dodds, a dementia focused gerontologist, and Adriano Eva, Wellness & Life Enrichment Program Supervisor with Spokane Park as the team steering this project. The first of only eight public memory gardens in the country is in Portland, OR. He would like to see this as a pilot project, with the anticipation of more in the future. An estimation based on State and national statistics, the potential target population is 37,150, which includes caregivers. There is value in a memory garden for the caregivers as a respite from the 25-hour day. It reduces a person's isolation, providing opportunities for socialization, as well as numerous physical and mental health benefits. Bob provided examples of ornamental fencing which would provide a safe enclosure, blending into nature, which could reduce the patient's fear. He emphasized the wide range of design possibilities, both natural and architectural. He mentioned that although water features may provide stunning winter memories, they may prove to be troublesome.
 - c. There were eight possible prime locations based on several favors which were further assessed and ranked with Manito and Comstock being number 1 & 2. After walking the site at Manito, four sites were assessed: west of the Helen Keller Memorial, which had parking limitations; 17th, which would require too much grading and tree removal; Tekoa near the playground, which would be too noisy; and the old zoo site on Loop Dr., potentially the best location. Nick pointed out that the upper Loop Dr. was an area used as a dumping ground for pond muck and would be a good opportunity to restore this site. There would be a good location just east of the proposed garden site for parking with enough room for 5-6 cars and a large van.
 - d. The next phases are to continue meeting with area senior centers, involving them in the process. He will be looking back at funding sources and identifying deadlines. He indicated he and Debbie would fund the design process then hand the project off to the City. Something that would be very beneficial is focus groups with both caregivers and those with dementia. Nick stated that the Friends of Manito are aware and are supportive of the project, however, have not written an official letter of support. However, they were concerned with too much

competition with their fundraising project for the pollinator garden so timing would need to be considered. Kevin reminded the group rather than focusing on the unknown, to focus on what was solved, which was the issue of access and parking.

Standing Reports

Adjournment: The meeting was adjourned at 4:59 p.m.

The next regularly scheduled Land Committee meeting is set for 3:30 p.m. Wed. May 01, 2024.

[CAUTION - EXTERNAL EMAIL - Verify Sender]

Park Board, Staff, and Interested Parties,

This email is in SUPPORT of the trust land transfer of the Washington Department of Natural Resources Thorp Road Property to the City of Spokane for the purpose of park and natural area. Please pass the resolution which will be before the Land Committee today.

I am a community volunteer for the group Spokane Urban Nature which works to advocate for natural areas within and near the environs of Spokane. I am a regular, almost daily, urban walker. I have walked in almost every park and piece of undeveloped land in Spokane. This is a choice spot for walking within the city limits of Spokane. This is a has a terrific view to the west.

It's an area which is near to housing and yet to be built housing (I think this is over 3,000 lots permitted). The area is short of parks and recreational spaces and the Latah Valley needs more open space and park access for its residents. This is a perfect spot for the creation of a community park with a large area left to be a bio-diverse natural area. I have hiked this area – clearly it is used by moose, deer, a broad range of smaller mammals, birds, and it has a wide variety of native vegetation.

The Spokane Parks Master Plan demonstrates that the residents of the city place high priority on natural areas and for preservation of habitat within the urban core. The Spokane Sustainability Action Plan places emphasis on the access to natural lands. Our community is excited about protecting open space. We have strong volunteer support for this kind of place.

I know that there are many community organizations weighing in on the support of this transfer and I add my voice to this effort.

Thank you for your consideration.

Sincerely

Karen R. Mobley (she/her)
Artist, Writer, Art Consultant

I support the resolution that provides:

A RESOLUTION supporting the Thorpe Road Property Application to the Washington State Trust Land Transfer Program

As our residential neighborhoods expand and the City grows, it is important to keep open spaces for people to recreate and experience natural areas within our city limits. Please support this transfer.

Thank you,

Carol

INTERDEPARTMENTAL AGREEMENT BETWEEN PUBLIC WORKS AND
PARKS & RECREATION DEPARTMENT REGARDING GREEN AREA
MAINTENANCE PILOT PROGRAM

THIS AGREEMENT is between the City of Spokane, Public Works Division, on behalf of the Water, Wastewater Management and Streets departments, located at Second Floor City Hall, 808 W. Spokane Falls Blvd, Spokane, Washington 99201, hereafter referred to as "Public Works" and the City of Spokane, Parks and Recreation Department, whose address is Fifth Floor City Hall, 808 W. Spokane Falls Boulevard, Spokane, Washington 99201, herein after referred to as "Parks".

WHEREAS, the City of Spokane ("City") owns and operates a Water-Wastewater Utility pursuant to chapter 35.67 RCW and other applicable laws. Public Works operates the Water-Wastewater Utility as a separate system and enterprise; and

WHEREAS, Public Works also manages the Street Department, which generally is responsible for managing the City's street system, which encompasses much of the public right of way; and

WHEREAS, Public Works has traditionally maintained open, non-developed, green areas located within the public right of way, including traffic medians, stormwater management facilities, and related facilities ("Green Areas"); and

WHEREAS, the City, through its Park Board, operates a Park and Recreation Department ("Parks") pursuant to the Spokane City Charter and manages thousands of acres of open/green space; and

WHEREAS, the Parks Department has expertise in managing and maintaining Green Areas and is well-suited to take on responsibilities for maintenance of Green Areas located within the right of way, gaining efficiencies of scale by consolidating this work with its regular park operations and maintenance activities; and

WHEREAS, currently there are hundreds of locations city wide that are designated Green Areas and are being maintained by various Public Works departments; and

WHEREAS, the City is committed to maintaining these spaces for the benefit of the citizens in the most cost-effective and efficient manner possible; and

WHEREAS, Public Works spends an inordinate amount of time to manage and maintain these Green Areas and its resources are better spent elsewhere; and

WHEREAS, coordination and consolidation of the individual Green Areas provides for efficiencies of scale and greatly benefits all Public Works Departments, to include Water, Wastewater, Streets and Parks Departments, along with the citizens of the City of Spokane; and

WHEREAS, the Parties have negotiated terms and conditions to transfer the responsibility for caring for these facilities to Parks, outlined herein:

NOW THEREFORE, the Parties mutually agree as follows:

1. PARTIES: The Parties understand they are all part of the same municipal corporation, and, though they operate as independent departments and divisions of the City and are subject to separate budgetary and legal requirements and procedures, they desire to reflect their relationship most efficiently through this Interdepartmental Agreement. The Public Works on behalf of Water, Wastewater and Streets is represented by the Director of Public Works. Parks is represented by the Park Board acting through the Parks Director.
2. PURPOSE: The purpose of this MOU is to establish the terms and conditions for:
 - 2.1 Establishing a maintenance program to maintain the Green Areas which are generally located within the public right of way to include without limitation program plan development, project management, mowing, clean up, weed control, tree care, edging maintenance, irrigation, etc.
 - 2.2 Green Areas are defined to include without limitation those areas which are generally open, non-developed, and green areas located within the public right of way, or contemporaneous to public right of way, including traffic medians, stormwater management facilities, and other such related facilities.
3. DURATION: This Interdepartmental Agreement shall be effective upon final signature and shall remain in effect through December 31, 2025. This period is considered a pilot period. Within six (6) months prior to expiration of the pilot period, the Parties agree to review the effectiveness of this Agreement and determine if a permanent agreement should be developed.
4. TERMS:

4.1 Parks will be responsible for maintenance of Green Areas pursuant to Attachment "A", to the extent the payment and resources provided by Public Works allows for the duration of this Agreement. In the event there are insufficient resources to cover the maintenance of the items in Attachment "A", the Parties will mutually agree in writing to the maintenance prioritization of the identified spaces.

4.2 Maintenance of Green Areas pursuant to Attachment "A" shall include without limitation the following: program plan development; project management, mowing, clean up, weed control, tree care, edging maintenance, fertilizing, landscaping, irrigation system maintenance, etc.

4.3 Public Works also agrees to pay for water used at Green Areas pursuant to Attachment "A".

4.4 New Green Areas which are constructed and intended to be maintained pursuant to this Agreement will be agreed to by both Parties, at which time, the Parties will determine whether there are any additional costs for maintenance. The list of locations contained in Attachment "A" shall be updated on at least an annual basis. Public Works will identify those locations at the project conception and upon completion provide Parks with written information.

4.5 Parks with the park planning department, will establish uniform standards for landscape commensurate with the area's intended use. Parks will work with Public Works to ensure that ongoing maintenance and operations are considered prior to project start of any new Green Areas that are intended to be added to Parks responsibility under this Agreement.

5. PAYMENT: As consideration for the terms outlined herein, the Parties agree that Public Works shall fund annually the sum not to exceed ONE MILLION ONE HUNDRED THOUSAND Dollars (\$1,100,000) for Parks to maintain the Green Areas listed in Exhibit "A". Any modification of this amount shall be in writing, signed by both Parties.

Parks will provide invoices to Public Works on a monthly basis to support this payment. On an annual basis, the Parties shall review, evaluate and adjust as necessary.

6. INDEMNIFICATION:

6.1 Public Works shall indemnify and hold harmless Parks, its employees and agents for any loss, claim or action to which they may be put by reason of this Agreement, except to the extent Parks, its employees and agents are determined to have acted negligently.

6.2 Parks shall indemnify and hold harmless Public Works, its employees and agents for any loss, claim or action to which they may be put by reason of this Agreement except to the extent Public Works, its employees and agents are determined to have acted negligently.

- 7. ENTIRE MOU: This MOU contains the entire understanding of the Parties, and there are no other promises or conditions in any other Agreement whether oral or written concerning the subject matter of this MOU. This MOU supersedes any prior written or oral MOU or arrangement between the Parties.
- 8. AMENDMENT: This MOU may only be modified or amended in writing, if the writing is signed by all Parties.
- 9. SEVERABILITY: If any portions of this MOU will be held to be invalid or unenforceable for any reason, the remaining provisions will continue to be valid and enforceable. If a court finds that any provision of this MOU is invalid or unenforceable but that by limiting such provision it would become valid and enforceable, then such provision will be deemed to be written, construed, and enforced as so limited.

Item title: (Use exact language noted on the agenda)	Corbin Park Sport Court Renovation with Ditches Unlimited, Inc for \$22,004.38 (plus applicable taxes)		
Begin/end dates	Begins: 04/11/2024	Ends: 07/31/2024	<input type="checkbox"/> 06/01/2525
Background/history:			
Corbin Sport Court Renovation was halted in late October 2023 due to weather conditions. The remaining work will start in April and continue through June in time for public use by the Independence Day holiday.			
Some poor existing conditions on site were found to require additional excavation and re-engineering of post footings and reinforced concrete flatwork. Park Staff was successful in negotiating a revised scope of work at the lowest possible price and within the 10% contingency allotted to the project.			
Park Staff believe the proposed improvement modifications are necessary and will result in value added to the project.			
Motion wording:			
Move to approve Change Order One for Corbin Park Sport Court Renovation with Ditches Unlimited in the amount of \$22,004.38 (plus applicable taxes) from Park Capital Funds.

Construction Change Directive

Project Name:	<u>Corbin Park Sports Court Renovation</u>	CCD No:	<u>1</u>
		Date:	<u>10/16/2023</u>
Owner:	<u>City of Spokane Parks & Recreation</u>		
Contractor:	<u>Ditches Unlimited, Inc</u>	Architect/Eng:	<u>SPVV Landscape Architects</u>

When signed by the Owner and received by the Contractor this document become effective IMMEDIATELY as a Construction Change Directive (CCD), and the Contractor shall proceed with the change(s) described below:

Description: Excavate south edge of project to accommodate 36”thk x 18”dia fence posts and change mow curb dimensions to be 6”thk x 12”wide on turf side and 16”wide on asphalt side of fenceline. Compact earth to 95% in 8” lifts.

Justification: Added mow curb thickness for long-term durability and consistency with adjacent curbs.

1. This CCD will be performed (*Lump Sum*,) with Not to Exceed pricing as follows: (Contractor shall provide T&M sheets for all labor, materials and equipment at a minimum of a weekly basis).
2. The Contract Time is proposed to (remain unchanged). The proposed adjustment, if any, is (an increase of 0 days) (a decrease of 0 days).

The Contractor is to submit pricing within 15 day of this authorization, if not already submitted. This Change and Cost will be incorporated into a Change Order once the cost is finalized and accepted.

Applicant Resolution/Authorization

Organization Name (sponsor) City of Spokane Parks and Recreation Division

Resolution No. or Document Name N/A

Project(s) Number(s), and Name(s) Meadowglen Park Neighborhood Park Construction

This resolution/authorization authorizes the person(s) identified below (in Section 2) to act as the authorized representative/agent on behalf of our organization and to legally bind our organization with respect to the above Project(s) for which we seek grant funding assistance managed through the Recreation and Conservation Office (Office).

WHEREAS, grant assistance is requested by our organization to aid in financing the cost of the Project(s) referenced above;

NOW, THEREFORE, BE IT RESOLVED that:

1. Our organization has applied for or intends to apply for funding assistance managed by the Office for the above "Project(s)."
2. Our organization authorizes the following persons or persons holding specified titles/positions (and subsequent holders of those titles/positions) to execute the following documents binding our organization on the above projects:

Grant Document	Name of Signatory or Title of Person Authorized to Sign
Grant application (submission thereof)	Jason Conley, Interim Director, Spokane Parks & Recreation
Project contact (day-to-day administering of the grant and communicating with the RCO)	Nicholas Hamad, Park planning and Development Manager Spokane Parks and Recreation
RCO Grant Agreement (Agreement)	Jason Conley, Interim Director, Spokane Parks and Recreation
Agreement amendments	Jason Conley, Interim Director, Spokane Parks and Recreation
Authorizing property and real estate documents (Notice of Grant, Deed of Right or Assignment of Rights if applicable). These are items that are typical recorded on the property with the county.	Jason Conley, Interim Director, Spokane Parks and Recreation

The above persons are considered an "authorized representative(s)/agent(s)" for purposes of the documents indicated. Our organization shall comply with a request from the RCO to provide documentation of persons who may be authorized to execute documents related to the grant.

3. Our organization has reviewed the sample RCO Grant Agreement on the Recreation and Conservation Office's WEB SITE at: <https://rco.wa.gov/wp-content/uploads/2019/06/SampleProjAgreement.pdf>. We understand and acknowledge that if offered an agreement to sign in the future, it will contain an indemnification and legal venue stipulation and other terms and conditions substantially in the form contained in the sample Agreement and that such terms and conditions of any signed Agreement shall be legally binding on the sponsor if our representative/agent enters into an Agreement on our behalf. The Office reserves the right to revise the Agreement prior to execution.
4. Our organization acknowledges and warrants, after conferring with its legal counsel, that its authorized representative(s)/agent(s) have full legal authority to act and sign on behalf of the organization for their assigned role/document.
5. Grant assistance is contingent on a signed Agreement. Entering into any Agreement with the Office is purely voluntary on our part.
6. Our organization understands that grant policies and requirements vary depending on the grant program applied to, the grant program and source of funding in the Agreement, the characteristics of the project, and the characteristics of our organization.
7. Our organization further understands that prior to our authorized representative(s)/agent(s) executing any of the documents listed above, the RCO may make revisions to its sample Agreement and that such revisions could include the indemnification and the legal venue stipulation. Our organization accepts the legal obligation that we shall, prior to execution of the Agreement(s), confer with our authorized representative(s)/agent(s) as to any revisions to the project Agreement from that of the sample Agreement. We also acknowledge and accept that if our authorized representative(s)/agent(s) executes the Agreement(s) with any such revisions, all terms and conditions of the executed Agreement shall be conclusively deemed to be executed with our authorization.
8. Any grant assistance received will be used for only direct eligible and allowable costs that are reasonable and necessary to implement the project(s) referenced above.
9. [for Recreation and Conservation Funding Board Grant Programs Only] If match is required for the grant, we understand our organization must certify the availability of match at least one month before funding approval. In addition, our organization understands it is responsible for supporting all non-cash matching share commitments to this project should they not materialize.
10. Our organization acknowledges that if it receives grant funds managed by the Office, the Office will pay us on only a reimbursement basis. We understand reimbursement basis means that we will only request payment from the Office after we incur grant eligible and allowable costs and pay them. The Office may also determine an amount of retainage and hold that amount until all project deliverables, grant reports, or other responsibilities are complete.
11. [for Acquisition Projects Only] Our organization acknowledges that any property acquired with grant assistance must be dedicated for the purposes of the grant in perpetuity unless otherwise agreed to in writing by our organization and the Office. We agree to dedicate the property in a signed "Deed of Right" for fee acquisitions, or an "Assignment of Rights" for other than fee acquisitions (which documents will be based upon the Office's standard versions of those documents), to be recorded on the title of the property with the county auditor. Our organization acknowledges that any property

acquired in fee title must be immediately made available to the public unless otherwise provided for in policy, the Agreement, or authorized in writing by the Office Director.

12. [for Development, Renovation, Enhancement, and Restoration Projects Only–If our organization owns the project property] Our organization acknowledges that any property owned by our organization that is developed, renovated, enhanced, or restored with grant assistance must be dedicated for the purpose of the grant in perpetuity unless otherwise allowed by grant program policy, or Office in writing and per the Agreement or an amendment thereto.
13. [for Development, Renovation, Enhancement, and Restoration Projects Only–If your organization DOES NOT own the property] Our organization acknowledges that any property not owned by our organization that is developed, renovated, enhanced, or restored with grant assistance must be dedicated for the purpose of the grant as required by grant program policies unless otherwise provided for per the Agreement or an amendment thereto.
14. [Only for Projects located in Water Resources Inventory Areas 1-19 that are applying for funds from the Critical Habitat, Natural Areas, State Lands Restoration and Enhancement, Riparian Protection, or Urban Wildlife Habitat grant categories; Aquatic Lands Enhancement Account; or the Puget Sound Acquisition and Restoration program, or a Salmon Recovery Funding Board approved grant] Our organization certifies the following: the Project does not conflict with the Puget Sound Action Agenda developed by the Puget Sound Partnership under RCW 90.71.310.
15. This resolution/authorization is deemed to be part of the formal grant application to the Office.
16. Our organization warrants and certifies that this resolution/authorization was properly and lawfully adopted following the requirements of our organization and applicable laws and policies and that our organization has full legal authority to commit our organization to the warranties, certifications, promises and obligations set forth herein.

This resolution/authorization is signed and approved on behalf of the resolving body of our organization by the following authorized member(s):

CITY OF SPOKANE PARK BOARD

RESOLUTION

A RESOLUTION supporting the Thorpe Road Property Application to the Washington State Trust Land Transfer Program

WHEREAS, under the City Charter, the Spokane Park Board has exclusive jurisdiction and control over city park land and facilities located within and outside the City of Spokane, and

WHEREAS, the Park Board is empowered by the City Charter to lay out, establish, purchase, procure, accept, and have the care, management control and improvement of, all parks and grounds used for park purposes, all boulevards, connecting parks and structures thereon, and all parkways; and

WHEREAS, there is an identified geographic 'gap' in park land and service within the Southwest portion of the City of Spokane, particularly within the Grandview/Thorpe neighborhood South of W. Thorpe Rd. and West of Highway 195; and

WHEREAS, substantial residential development is proposed within the Grandview/Thorpe neighborhood, and no mandatory impact fees or park land dedication is required for new residential developments, further necessitating the addition of public park lands within the area; and

WHEREAS, Parks is not sufficiently funded to be able to acquire and or develop new park lands in this area; and

WHEREAS, the Washington State Department of Natural Resources (DNR) owns approximately 192 acres of natural land (Thorpe Property) within the Grandview/Thorpe neighborhood which it intends to surplus; and

WHEREAS, the Thorpe Property is identified as 'potential open space' in the City of Spokane Land Use Plan; and

WHEREAS, DNR manages a special program, titled the Trust Land Transfer (TLT) program, intended to 'keep special places in public ownership' using funding appropriated by the Washington State Legislature, which may enable the DNR property to be maintained as public open space at no up-front cost to Parks; and

WHEREAS, Parks received support letters from several non-profit and neighborhood groups interested in Parks acquiring the Thorpe Property through the TLT program; and

WHEREAS, Parks submitted an initial letter of intent and application to the 2025-2027 TLT program for the Thorpe Property in September of 2023; and

WHEREAS, Parks desires submit a resolution to DNR further supporting the acquisition of the Thorpe Property via the TLT program; and

WHEREAS, Parks anticipates accepting the Thorpe Property if acquired through the TLT program, as acquiring additional park land in District 2 is identified as a third-tier priority goal in the adopted park and natural lands master plan. ; and

NOW, THEREFORE,

BE IT RESOLVED by the City of Spokane Park Board to support the 'Thorpe Road Property' application to the Washington State Department of Natural Resources Trust Land Transfer Program in the 2025-2027 biennium.

ADOPTED BY THE PARK BOARD ON _____

Background/history:			
<p>Providing update to regarding citizen progress made regarding future development as a 'memory garden pilot project'.</p> <p>After land committee in fall of 2023, project advocates re-assessed potential project locations to incorporate park board comments, including better access to parking and potential to improve underutilized portions of manito and/or other parks. Advocates also conducted additional outreach to community groups to gather feedback and letters of support for proposed garden. Project advocates would like to update the park board on recent progress and future intention to seek project funding via grants and donations to fund the garden, and provide opportunity for board comment.</p>

Let's Introduce a
Public Memory Garden
to Spokane as a Pilot Project

What is a Memory Garden?

- A Memory Garden celebrates and is specifically designed for people living with dementia & their caregivers and provides enjoyment for those with Autism and their caregivers.
- A Memory Garden is a destination where anyone, any age, find rest and relief from the pressures of daily life.
- A Memory Garden is just about the Only Place a Caregiver can truly relax.
- A Memory Garden is not a Memorial Garden.

OF NOTE: Washington's only Public Memory Garden is in Seattle while Spokane, as the medical hub for the entire Inland Northwest has no such health amenity.

What Makes a Memory Garden?

- Enclosed on all sides; enclosing features integrated with garden.
- Personal Security: gated entry with childproof gate latch.
- Circular walks to accommodate meandering.
- Features laid out to allow overview of entire garden.
- Caregiver can see their charge wherever they are.
- Socializing as a Community Member; reducing isolation.
- Garden features play with individual's senses.
- As a non-pharmacological support for dementia, health benefits for both carer and cared for include UV Vitamin D, Reduced anxiety, Fewer meds, Better appetite, Sleeping better; and Caregiver respite.

RE: Letter of Support, Memory Garden

Greetings,

We are writing in support of the memory garden pilot project in Manito Park championed by Bob Scarfo, Debby Dodds, and Adriano Eva. This kind of space is needed in Spokane because it will give care partners space to relax while ensuring their loved ones' safety, provide a safe space for people living with dementia to interact with nature in public, and contribute to Spokane as a dementia-friendly community.

Spokane has an urgent, growing need for respite for care partners. In our daily support work and as members of the Spokane Regional Dementia Friendly Community, we regularly interact with people who are living with dementia, caring for someone living with dementia, or working with people living with dementia. One of the running themes that we hear over and over again is that there is not enough respite care in Spokane. Caring for someone living with dementia is more than a full-time job, especially in the later stages when people living with dementia often need continuous care to ensure their safety. With the current workforce shortage, especially in the healthcare sector, many care partners find it difficult to fulfill even basic needs like grocery shopping, getting a haircut or going to their own healthcare appointments.

A public memory garden would give care partners space to both enjoy nature and relax with the peace of mind that their loved one is safe. They could meet with friends or other care partners in this garden, allowing the person with dementia to wander without worrying that they might get lost. It's hard to overstate how comforting such a space could be for an exhausted care partner.

When someone starts to experience dementia symptoms like memory loss, personality changes or difficulty with problem-solving, one common reaction is to isolate so that no one sees these symptoms. People living with dementia frequently stay away from social gatherings, church, work, and other social interactions so that they can keep their diagnosis or symptoms hidden. Likewise, care partners often encourage their loved ones to stay home so that they won't "cause a scene" or be hurt by others' reactions.

With the rising number of people living with dementia in Spokane, creating and maintaining inclusive, safe spaces for people living with dementia and their care partners is critical to reduce

1222 N. Post St. | Spokane, WA 99201 | TEL [REDACTED] | FAX [REDACTED]

ADVOCACY. ACTION. ANSWERS.

SERVING: Northern Ferry, Pend Oreille, Spokane, Stevens & Whitman counties

isolation and support care partners. Many factors go into making a space safe for people living with dementia. While criteria for a safe space can vary from person to person and even moment to moment, there are a few common trends. For example, people living with dementia often feel more comfortable with fewer distractions like loud noises, crowds of people and intersecting sounds.

Establishing a Memory Garden that anyone can use would be a significant step toward making Spokane feel safe and welcoming for people living with dementia in Spokane. We would eventually love to see memory gardens in many public parks across Spokane, especially in underserved communities. However, we think that Manito Park is the best place to start this pilot project because it has spacious areas that are away from distractions like playgrounds and traffic, public restrooms that could be close to the memory garden, and several parking areas.

We hope that you consider this as the beginning, not the end, of a much-needed shift to make Spokane a more inclusive and inviting place for people living with dementia and their care partners.

If you have any questions, I would encourage you to reach out to our staff that are active and engaged in the Spokane Regional Dementia Friendly efforts: Bethany Osgood, Planning and Resource Director, at [REDACTED] and Tara Hill Matthews, Dementia Resource Catalyst, at [REDACTED].

Sincerely,

Lynn Kimball
Executive Director

November 1, 2023

To whom it may concern,

I am writing to express the Alzheimer's Association Washington and North Idaho Chapter's wholehearted support for the establishment of a public garden dedicated to people living with Alzheimer's and other dementia. This initiative would not only be a valuable addition to our city but also a compassionate and inclusive space that can significantly improve the lives of those affected by dementia..

Alzheimer's disease and other forms of dementia have a profound impact on individuals and their families, often leading to feelings of isolation and a reduced quality of life. Creating a specialized garden designed to cater to the unique needs of those living with dementia would serve as a haven for relaxation, stimulation, and socialization. In Spokane, 75% of those living with memory loss live at home and do not have memory gardens they can access in private facilities. Given that neighborhoods and downtowns are not designed for people living with dementia, there are very few places they and their caregivers can visit to enjoy socializing, the benefits of nature, and caregiver respite.

The Association believes that investing in a public garden for individuals with Alzheimer's and other dementia is not only a compassionate endeavor but also a means to raise awareness and promote understanding about these conditions in our community. By offering a serene and accommodating environment, we can provide respite and connection to those in need.

Sincerely,

Meghan Means | Director of Programs & Services

To Whom It May Concern:

This email is written in support of the development of a memory garden in Spokane. As a long time provider, volunteer and advocate for the elderly and handicapped in eastern Washington I believe a memory garden would be a valuable asset to the Spokane community and those residents who are experiencing the symptoms of detention. The City of Spokane has made great strides in becoming a dementia friendly the addition of a memory garden would be one more wonderful step in making the Spokane area a great place for those suffering from dementia.

Thank you for your consideration of this project.

Subject: need for a memory garden

Hi Bob,

I'm writing to share how important the creation of a memory garden is in Manito Park.

My Dad has dementia and when I learned about the possibility of having a safe and nurturing place to take him, I was so excited! I can't tell you what a treat and relief it would be to have such a space to take my Dad. No place like this exists, and it would be a huge a draw for Manito Park and even for Spokane.

Please keep me posted on how I can be helpful in making this happen.

Warm regards,

Brent

Bob Scarfo

Spokane, WA 99203

Hello Bob,

I am writing in support of a publicly accessible Memory Garden in Spokane for those living with a host of different memory loss issues, as well as their caregivers. During my work with the library's Memory Café (a weekly meeting for those with dementia and their caregivers to socialize) we frequently hear from participants that they would like to spend more time outside and surrounded by nature.

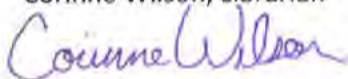

When a friend or partner with dementia begins their decline, it can be overwhelming for a caregiver to commit to a simple hiking trail or picnic in the woods. Sometimes this is due to the misconception that the disease means you can no longer enjoy the activities you used to in a public space, or the fear that your partner may become moody or uncooperative in an isolated area, or the time it takes to reach a natural area that is likely on the outskirts of town or overly crowded. During one Memory Café, couples even requested a virtual tour through state parks on our TV screens because they could pretend to be surrounded by nature as we did a gardening related indoor activity, but it's not the same. Memory Café's first group field trip was to a tour of a fish hatchery, and they were thrilled to be out in the sunshine together enjoying a walkable area where they could interact with streams and fish and enjoy a light breeze. The Spokane community desperately needs publicly accessible, peaceful outdoor community spaces, and does not yet have one that welcomes those with dementia directly. A garden would be easily accessible and recognizable as a gathering space for those who have not yet found a dementia community.

There were 300,000 unpaid dementia caregivers in Washington state last year (2022), and the number of people developing dementia continues to increase as a large generation ages and the diseases' cure remains unknown. The waiting list to be officially diagnosed with dementia in Spokane is typically over six months long because specialists cannot keep pace with demand. The number of people over 65 with Alzheimer's alone, not counting the other 70+ forms of dementia, is projected to be 140,000 in Washington state by 2025. 75% of people with dementia live at home, and their caregivers desperately need a break. I believe an opportunity to be outdoors in a dedicated quiet space would help the wellbeing of both caregivers and those with dementia immensely. A Memory Garden would send a clear message that those with dementia belong out in our community appreciating flowers, seeing friends, and enjoying the last years of their lives, not locked away to decline. Best of all, it could be utilized by other members of the public, such as veterans or those struggling with depression, who might benefit from a place of solitude and beauty.

I believe you're uniquely suited to make this happen as a licensed landscape architect who has connections in the dementia community. The Friends of Manito are well known for their ability to keep gardens beautiful, and with their support, I'm confident a garden in the Manito area would be a success as well as a resource for dementia groups located on the South Hill. I would like to see additional Memory Gardens implemented across the area, notably in Spokane Valley and the West Plains. Please let me know if there is anything the library can do to support your endeavors.

Sincerely,

Corinne Wilson, Librarian

Bob:

Thanks for taking the time to tell me about your efforts to bring a public memory garden to Spokane. I completely support your efforts and hope it becomes a reality soon.

Other than the garden supporting the health and wellbeing of people with dementia, and people with autism, and their caregivers, two things you mentioned caught my interest. First, I'm glad to hear a couple of the recently retired city council members felt it should be considered a pilot project. Second, I was very interested in the work you put into the development of the park site selection assessment tool. I didn't realize you've been talking with experts in places like Scotland, Australia, and New Zealand.

Given the rapidly growing part of our population developing various forms of dementia, I sincerely hope the Park Board sees the goodness in your efforts and your success enables at least one more to be located in another part of the city.

Sincerely,

Dan Butler

Re: Spokane's First Memory Garden

Greetings,

I am pleased to write this letter to strongly support the design and development of a Memory Garden in Spokane. I speak on behalf of our OHANA board of directors and design team, a diverse group which includes disability advocates and nonprofit leaders, housing design and development professionals, educators, and elected officials. In general, we work to build inclusive housing and neighborhoods that support and welcome people of all ages, abilities, incomes and backgrounds.

For the many who do and will experience various forms of dementia, public outdoor spaces designed to reduce anxiety and promote peace and belonging are hard to come by. The pilot memory garden proposed by Bob Scarfo and Debby Dodds will be a place of solace and rejuvenation for people living not only with dementia but with autism and other forms of neurodiversity, as well for their caregivers and companions.

As Spokane's most notable destination park, OHANA also agrees that Manito Park is the best first site to demonstrate the value of memory parks to citizens across the region. This will undoubtedly be the first of many, as we learn how to incorporate inclusive, sensory sensitive design into all of our built environments.

Sincerely,

Great idea to design and build a memory garden in Spokane.

I'm Elaine M. Gibbs.
Reside in District 1.

I'm looking for work. If you have specific positions you are looking for assistance with, please let me know. Would be nice to work on a project with such great meaning.

Bob Scarfo [REDACTED]

Fri, Mar 8, 2024 at 8:54 AM

To: E M Gibbs [REDACTED]

Elaine, I appreciate your support of the Memory Garden idea. I'm sorry but I'm not in a position to hire anyone. My project partner and I are waiting for a final decision to be made regarding where the garden will be placed so we can start writing grants to fund our work.

Send me a resume or short summary of what you could bring to a project like this.

Best I can do for now. Best of luck,
Bob

Bob:

I wholeheartedly support your efforts to introduce a Memory Garden to the City of Spokane. I think it's important to communicate with the Park Board about the opportunity to get aboard a growing movement that the WA State legislature embraces.

I coordinate and manage activities set in Seattle's Memory Garden, known as Maude's Garden at the Memory Hub, led by the University of Washington's Memory and Brain Wellness Center. Instead of speaking to the need for more memory gardens across the state, I thought I would share testimonials from people who have experienced our memory garden and let them speak to the value of what you are striving to accomplish in Spokane.

Below are insights and quotes from people and my own observations. As a caveat, I'll say that the value of Maude's Garden is very attached to the Memory Hub, a dementia-friendly community center, as people who participate in Memory Hub programs and events held in the garden are the ones who give quotes that I record. I am not always there when people from the public come by to explore plants, meditate on the benches, and have lunch at the tables.

Over six million Americans live with Alzheimer's-type dementia. It is becoming a social and policy imperative for cities to become more age- and dementia-friendly. In fact, the [WA State Dept. of Social and Health Services' Dementia Action Collaborative \(DAC\)](#), developed the Alzheimer's State Plan to recommend that the WA State legislature support initiatives to improve dementia care, early diagnosis, and awareness, including building dementia-capable and friendly communities to prepare from the coming increase in people living with memory loss and caregivers—by supporting people in early stages in staying physically active. Because of the DAC's work, the WA State legislature funded Dementia Friends WA, and \$100,000 state dollars now supports Dementia Friends WA expansion, in an effort to increase acceptance and awareness and empower families to seek care sooner in every region of WA State.

In our view, this momentum and legislative buy-in is validating the larger reason why a Memory Garden can bring value to a community. A Memory Garden is **one example** of what an age- and dementia-friendly community is all about. In a dementia-friendly community, people living with memory loss deserve to feel like they have opportunities to be social and included in the public sphere. Having a memory garden is a way to make people living with memory loss and their friends and family feel like they belong and access experiences that improve their welling. It really is a social imperative, specifically in WA State.

Here are some observations from me, and some quotes.

- Watching what happens during the Garden Discovery Program, when we ask what everyone is noticing in the garden, is incredibly validating. There are people who have been silent and speak very little in social scenes—and then start talking in full, meaningful sentences about the garden. It is as if the garden is a catalyst for helping someone feel like they can express themselves and that their opinion will be valued by others in a safe environment.

- We have given feedback forms at the end of every 3-session Garden Discovery Program. In every batch people, virtually all caregivers and the people living with memory loss (who take the survey together) mark either "Greatly increased" or "Increased slightly" on statements: My sense of calm and relaxation....My sense of accomplishment and self-esteem, my sense of community connection, My sense of connection to nature...

- The garden has become the site of the annual Garden of Inspiration art show, where we invite everyone in the Memory Hub community to create art inspired by gardens. This has been a raging success and simply is another way to create opportunities for people living with memory loss and to encourage and recognize their creativity and talents—and show the wider community that people living with memory loss have many gifts to offer.

- One program at the Memory Hub, the Elderwise Day program, makes use of the program everyday, rain or shine. Participants and staff of this program are always remarking on how the garden is a healing environment, and constant inspiration for their group conversations and artwork. The garden also provides opportunities for them to take care of hummingbird feeders and do small cleanup projects.

- In all, a Memory Garden can bring possibilities to a community in a general sense in becoming a dementia-friendly community. It's a space in which support groups can be held, art shows can happen, volunteers can work. It's also a place that provides a safe and accessible natural environment for people who are mobility impaired, or use a wheelchair, or need lots of places to sit. It's a place where people who often feel alone or can no longer participate in activities they once did, can feel like there is a place made just for them. I also notice that cities (at least in my small view) fund sensory gardens for children. So why not follow the same reasoning for people living with memory loss?

Here are some quotes from participants living with dementia who take part in programs in Maude's garden.

"The garden put me at ease"

"I love the sense of community, even though I don't know everyone. The help here is enlightening."

It's nice to get out." At first, I was self-conscious and not knowing what to expect. But then, I saw things I hadn't seen before and it was satisfying.

Not just OK, but, like, a lot."

"I came here once before. Now I'm addicted."

"It was nice to slow down and observe things."

"It changed my way of thinking."

"It was so nice to be creative."

"It was wonderful to spend time with my mother."

"Today was about noticing what we otherwise wouldn't have—the vibrant greens...drink it up"

"Just the colors...I love being here."

"I came in anxious and this is calming"

"It's nice having this time to spend with my Mom."

The tranquility of nature is so inspiring.

These thoughts bring up a big point. While a Memory Garden can bring the benefits of socialization, sensory/emotional stimulation, and physical activity; or a place to cope and manage one's grief—I understand that is likely not enough to uniquely justify a memory garden for a city. Because what makes

a garden therapeutic specifically for dementia, rather than some other population? The answer is that a memory provides opportunities and activities that suit the needs of people living with memory loss and help them to interact and be involved with the garden. If at all possible, when your memory garden becomes a reality, do consider including Spokane's horticultural therapist in the development of **activities and therapeutic opportunities.**

I would also recommend supervising a volunteer living with early memory loss in the maintenance of the garden. Side note, I have more people (not patients, but people with love of gardening) than I can handle contacting me and asking if they can volunteer in Maude's Garden, so you could frame it as a community engagement project.

Wishing you and Debby Dodds the best of luck. We here would be more than happy to talk further with you as your project moves along,

Genevieve Wanucha, MS
Communications Specialist, UW Memory and Brain Wellness Center
Maude's Garden Project Lead, The Memory Hub

Hi all,

Below I share some insights and quotes from people and my own observations. As a caveat, I'll say that the value of Maude's Garden is very attached to the Memory Hub, as people who participate in our programs and events held in the garden are the ones who give quotes that I record. I am not always there when people from the public come by to explore plants and meditate on the benches and have lunch at the tables.

- That brings up a big point here—while a Memory Garden can bring the benefits of socialization, sensory/emotional stimulation, and physical activity; or a place to cope and manage one's grief—I understand that is likely not enough to uniquely justify a memory garden for city. Because what makes a garden therapeutic specifically for dementia, rather than some other population? And how do you ensure that visitors are getting those benefits in the garden? For us at the Memory Hub, we have always known that the most important part of a memory garden is how it provides **activities and therapeutic opportunities** for our population (that's in the formal definition of a therapeutic memory garden from AHA), so it is ideal if your garden leadership team can ensure that there is a mechanism to hire or offer volunteer opportunities for interested people to run art programs, support groups, horticultural therapy programs, or maybe nature/herb classes(?) specifically tailored for people living with dementia/and/or care partners.
 - I would also recommend supervising a volunteer living with early memory loss in the maintenance of the garden. Side note, I have more people (not patients, but people with love of gardening) than I can handle contacting me and asking if they can volunteer in Maude's Garden, so you could frame it as a community engagement project.
- And stick with me here, but I feel like this background could help your case: Over six million Americans live with Alzheimer's-type dementia (insert figure for how many in your area), and it is becoming a social and policy imperative for cities to become more age- and dementia-friendly. In fact, the [WA State Dept. of Social and Health Services' Dementia Action Collaborative](#), developed the Alzheimer's State Plan to, in part, recommend to the WA State legislature to support initiatives to improve dementia care, early diagnosis, and awareness, including building dementia-capable and friendly communities to prepare from the coming increase in people living with memory loss and caregivers—by supporting people in early stages in staying physically active. Because of the DAC's work, the WA State legislature funded Dementia Friends WA (which Katie now manages, as you know) and \$100,000 state dollars now supports Dementia Friends WA expansion, in an effort to increase acceptance and awareness and empower families to seek care sooner, ect. All this is on Pg 41 in the [current Alz State Plan](#).
 - In our view, all this momentum and legislative buy-in is validating the larger reason why a Memory Garden can bring value to a community. A Memory Garden is **one example** of what an age- and dementia-friendly community is all about. In a dementia-friendly community, people living with memory loss deserve to feel like they have opportunities to be social and included in the public sphere. Having a memory garden is a way to make people living with memory loss and their friends and family feel like they belong and access experiences that improve their welling. It really is a social imperative, specifically in WA State.
 - Also, have you reached out to the Portland Memory Garden for advice?

Here are some observations from me, and some quotes. We have not formally collected testimonials yet.

-Watching what happens during the Garden Discovery Program, when we ask what everyone is noticing in the garden, is incredibly validating, as there are people who have been silent and speak very little in social scenes—and then start talking in full, meaningful sentences about the garden. It is as if the garden is a catalyst for helping someone feel like they can express themselves and that their opinion will be valued by others in a safe environment.

Hi Tara,

I wanted to let you know that I reached out to Genevieve Wanucha, who coordinates and manages our Memory Garden (Maude's Garden) regarding the testimonials for Bob. She had mentioned speaking with Bob last year about the Memory Garden in Spokane. I was hoping for a little clarification around what type of testimonials Bob is looking for exactly? I have cc'd Genevieve.

Thank you!

Hello Bob,

Thank you for all your efforts towards making the Memory Garden a reality! It will benefit not just the Spokane regional area but all of eastern Washington and beyond.

During my forty five year career as a Registered Nurse, I opened a new 120 bed Assisted Living Facility with a 60 bed Memory Care Unit. We had an outdoor secure area that was a memory care garden and our residents loved it. I retired as the Risk Manager for a company that owned 37 Skilled Nursing Facilities. It was my great honor to serve our residents by ensuring they received the best care possible. I say this so people will understand how well aware I am of the benefits of a Memory Garden.

My husband's mother died at age 72 from Alzheimer's and we only wish a garden like this could have been available for her.

On behalf of my husband Dan, and myself, please know you have our complete support.

Best Regards,

Karen and Dan Giebel

Good Morning Bob Scarfo,

I am Karen Kiessling, a member of the Planning and Management Council of Aging and Long Term Care of Eastern Washington and also a member of the Washington State Council on Aging, appointed by Governor Inslee to represent the Eastern Side of Washing State. I represent Whitman County on the Aging and Long Term Care board.

Those identifiers are vitally important in my message of strong support for your work in Spokane to create a Memory Garden there, for all citizens to enjoy but most especially to member of the community and visitors who suffer from memory impairment and their caregivers who keep them safe and content.

I am truly excited about this project as I feel sure it will be of importance to our state. When you have successfully created this safe and happy place in Spokane it will become a pattern that can be followed throughout our state, in towns large and small. I have every hope and expectation that Pullman will find a place to create a memory garden.

I know you are designing a tool needed to help evaluate and measure the very best space for such a place. I am eager to see your design document. Most of all I want to visit your completed place of tranquility, of memory, of peace and of hope for the richest possible life all of us can live.

We know that there is a veritable tsunami of seniors in future years in our state. The need for such a garden just grows daily. Now is the time to move forward with this plan and put it into place with the greatest dispatch. If there is any way to hurry forward this Spokane project, I hope you will do so. Please let me know if I can help.

Thank you for your dedication to the garden, for your skill and ability to make it come to life. We need it. We desire it. We want to see it come into being. And we want to visit it as soon as it is available for us to do so.

Good wishes, Godspeed with your work.

Karen Kiessling
Pullman, Washington
Mayor, City of Pullman, 1976-1980
Whitman County Representative, Aging and Long Term Care
Eastern Washington Representative, Wa State Council on Aging

To: Bob Scarfo [REDACTED]

For the Members of The Park Board Land Committee,
I encourage you to support building a Public Memory Garden within the City of Spokane's park system.
I used to own and operate an Adult Family Home in Spokane that specialized in dementia care.
I also was involved in the care of my mother when she died of dementia.
So, from both a professional and personal perspective, I can attest to the value the proposed Public Memory Garden will have for both the members of our community who have dementia and their caregivers.
Thank you sincerely,
Kent Moline
Chair, Planning and Management Council, Aging and Long Term Care of Eastern Washington

Hey Bob,

I am writing to express my full support for the creation of a Memory Garden in Spokane. I want to thank you and all those involved for you're amazing work on making this idea a reality. I understand how challenging it can be to care for someone suffering from dementia. The few moments of respite that a Memory Garden would provide can have an incredibly positive impact on both the patient and the caregiver. Dementia doesn't only affect the person suffering from it, but their entire network of support, including their family, loved ones and caregivers. We owe it to our community to provide a safe place where people can take a few moments of relief for themselves.

Again, I want to thank you for the work you've been doing, and let you know that I'll be supporting you in any way I can.

Lili Navarrete

Dear Park Board Members,

I wish to offer my support of the proposed pilot project for a memory garden in a Spokane City Park. As a former Spokane City Council member and Council President I am aware of the needs of our community and how much our residents treasure our parks.

Because a memory garden is specifically designed for people living with dementia and their caregivers it adds another dimension to the diverse individuals who use our park system.

This would be a first for Spokane which serves as a hub for the Inland Northwest. The goodwill it would generate among people over 60 and their caregivers would be immense. In addition, the design criteria could also serve the unique qualities of people with autism and their caregivers.

The site selection by the Parks staff and the volunteer committee of Manito Park is a perfect location for such a space.

Please consider this another long-term benefit that our parks system contributes to our region and vote in favor of passing this on to the full Park Board for consideration.

Sincerely,
Lori Kinnear

Hello Bob,

My friend, Debby Dodds, shared a message regarding the possibility of creating a memory garden in Spokane. I support this endeavor and believe that such a space would benefit both caregivers and those with dementia. I think beauty has a healing effect for all people, and an enclosed garden would provide an opportunity for beauty, relaxation, and enjoyment. I endorse this venture!

Sincerely,

Lynne Emenegger

Greetings Bob,

I am writing in support of a Public Memory Garden in Spokane. It is a joy to see a city consider the well-being of all families, including those with members living with dementia. I've seen the remarkable impact of peaceful outdoor space on persons with memory loss. Imagine an outdoor space where they could safely be with family members and friends and experience the healing power of nature. A public memory garden is truly an outdoor haven for everyone.

Thank you, Bob, for leading this effort on behalf of all citizens of our community.

RE: Proposed Memory Garden at Manito Park

Dear Spokane Parks and Recreation Officials and other interested parties:

I am writing in support of the proposed memory garden plans for Manito Park to be constructed at the former zoo site. The site is located away from traffic which will make it appropriate for this endeavor. Persons with dementia or cognitive impairments need a quiet environment in order to maintain their function.

Furthermore, we as a community will benefit by having a place where we can take our loved ones. I speak from experience; my mother had dementia. One of my last memories of time spent with her was when I wheeled her into our garden, and I picked a flower for her. She smelled it and for a moment her smile returned. Then she leaned over and pulled a flower, smelled it and gave it to me, a daughter whose name she could no longer recall. At that point I knew that a mother's love was still there.

From a professional standpoint, I have been involved with the environmental and care planning for persons with memory loss. The organizations I worked with when planning a housing environment for Alzheimer's patients always included a garden with colorful plants, trees, benches, and a walking path. Both our residents and families enjoyed time together there.

We are fortunate to have the expertise of Bob Scarfo, PhD, to plan and execute this garden. He has been a professor of landscape architecture at Washington State University. He has studied how persons with Alzheimer's disease and other cognitive impairment respond in a memory garden.

Finally, a memory garden will provide a public relations opportunity for Manito Park, the Parks and Recs. Department, and Spokane.

I urge you to bring the memory garden to fruition.

Sincerely,

Marty Johnston, RN, MBA, PhD.

Hello,

I am writing to put my unreserved support behind the memory garden pilot project in Manito Park championed by Bob Scarfo, Debby Dodds and Adriano Eva. This is desperately needed in Spokane because it will give care partners space to relax while ensuring their loved one's safety, provide a safe space for people living with dementia to interact with nature in public, and contribute to Spokane as a dementia-friendly community.

Spokane has a growing, urgent need for respite for care partners. As the Dementia Resource Catalyst at Aging & Long Term Care of Eastern Washington (ALTCEW) and a member of the Spokane Regional Dementia Friendly Community, I regularly interact with people who are living with dementia, caring for someone living with dementia, or working with people living with dementia (PLWD). One of the running themes that I hear over and over again is that there is not enough respite care in Spokane. Caring for someone living with dementia is more than a full-time job, especially in the later stages when PLWD often need 24-hour care to ensure their safety. With the current workforce shortage, especially in the healthcare sector, many care partners find it difficult to fulfill even basic needs like grocery shopping, getting a haircut or going to their own healthcare appointments.

A public memory garden would give care partners space to both enjoy nature and relax with the peace of mind that their loved one is safe. They could meet with friends or other care partners in this garden, allowing the person with dementia to wander without worrying that they might get lost. It's hard to overstate how comforting such a space could be for an exhausted care partner.

When someone starts to experience dementia symptoms like memory loss, personality changes or difficulty with problem-solving, one common reaction is to isolate so that no one sees these symptoms. People living with dementia frequently stay away from social gatherings, church, work, etc. so that they can keep their diagnosis or symptoms hidden. Likewise, care partners often encourage their loved ones to stay home so that they won't "cause a scene" or be hurt by others' reactions.

It's our responsibility to create and maintain inclusive, safe spaces for PLWD and their care partners throughout Spokane to encourage people living with dementia to remain in our community. Many factors go into making a space safe for people living with dementia. While criteria for a safe space can vary from person to person and even moment to moment, there are a few common trends. For example, people living with dementia often feel more comfortable with fewer distractions like loud noises, crowds of people and intersecting sounds.

Establishing a Memory Garden that anyone can use would be a significant step to making Spokane feel safe and welcoming for people living with dementia in Spokane. I would eventually love to see memory

gardens in many public parks across Spokane, especially in underserved communities. However, I think that Manito Park is the best place to start this pilot project because it has significant space, more large areas that are away from distractions like playgrounds and traffic, public restrooms that could be close to the memory garden, and several parking areas.

I hope that you consider this as the beginning, not the end, of a much-needed shift to make Spokane a more inclusive and inviting place for people living with dementia and their care partners.

Sincerely,

Tara Hill Matthews
Dementia Resource Catalyst

12:13 PM (3 minutes ago)

to me

Bob

Thanks for sharing the plans for the memory garden! I am wholly in favor of the project, and like the idea of having the initial garden in Manito Park. The location is great for access for all of the senior living communities in the area, and it's an inherently wonderful spot. As you know, my role in Providence includes working with Hospice, Home Health and PACE (Program of All-inclusive Care for the Elderly). We care for many patients with dementia and support their families and other caregivers, and a spot like this where folks can safely enjoy the amenities of a garden environment would be tremendously helpful for all concerned. My experience is that folks with dementia get a lot of benefit from time in pleasant and stress-free environments. The fact that both the patients and their caregivers can share in the enjoyment is a plus.

Please let me know if there is any way I can help support this project!
