Adjournment: The next PC meeting will be held on Wednesday, March 10, 2021
Plan Commission Meeting Information
Wednesday, February 24, 2021

In order to comply with public health measures and Governor Inslee’s *Stay Home, Stay Safe* order, the Plan Commission meeting will be held on-line.

Members of the general public are encouraged to join the on-line meeting using the following information:

**Meeting Password:** PlanCommission

**Meeting Number (access code):** 146 443 9763

**Join Webex Meeting Online:** [JOIN MEETING](#)

Tap to join from a mobile device (attendees only):

+1-408-418-9388,,1464439763## United States Toll

**Join by phone:** +1-408-418-9388 United States Toll

**Global call-in numbers:**

[https://spokanecity.webex.com/spokanecity/globalcallin.php?MTID=m514c2d4fc1d4af7864559443420dee7b](https://spokanecity.webex.com/spokanecity/globalcallin.php?MTID=m514c2d4fc1d4af7864559443420dee7b)

**Join from a video system or application:** Dial 1464439763@spokanecity.webex.com

You can also dial 173.243.2.68 and enter your meeting number.

**Join using Microsoft Lync or Microsoft Skype for Business Dial:**

Dial 1464439763.spokanecity@lync.webex.com

---

**How to participate in virtual public testimony:**

Sign up to give testimony by clicking on the button below. This will take you to an online google form where you can select the hearing item on which you wish to give testimony.

[**SIGN UP**](#)

The form will be **open until 1:00 p.m.** on February 24, 2021. Hearings begin at 4:00 p.m. When it is your turn to testify, Plan Commission President will call your name and you can begin your testimony.

Please note that public comments will be taken during the meeting, but the public is encouraged to continue to submit their comments or questions in writing to:

Louis Meuler at [plancommission@spokanecity.org](mailto:plancommission@spokanecity.org)

The audio proceedings of the Plan Commission meetings will be recorded, with digital copies made available upon request.
Spokane Plan Commission - Draft Minutes
February 10, 2021
Webex Teleconference
Meeting Minutes: Meeting called to order at 2:00 PM by Todd Beyreuther

Attendance:
- Voting Commission Members Present: Todd Beyreuther (President), Greg Francis (Vice President), Michael Baker, Thomas Sanderson, Carole Shook, Sylvia St. Clair, Jo Anne Wright, Clifford Winger
- Commission Members Not Present: Diana Painter (resigned)
- Non-voting members present: Council Member Kinnear, Mary Winkes (Community Assembly Liaison)
- Quorum Present: yes
- Staff Members Present: Louis Meuler, Jackie Churchill, Kevin Picanco, Maren Murphy, Colin Quinn-Hurst

Public Comment:
None

Briefing Session:
Minutes from the January 21 and January 27 meetings approved unanimously.

1. City Council Liaison Report - Lori Kinnear
   - CM Kinnear discussed the City Council’s 100 Day Plan. She specifically mentioned housing topics that the Council would like to address and urged the Plan Commission to review the presentation from the previous Urban Experience meeting that also discussed housing in Spokane.

2. Community Assembly Liaison Report - Mary Winkes
   - None.

3. Commission President Report - Todd Beyreuther
   - President Beyreuther announced that Diana Painter has resigned from the Plan Commission. He also reiterated that he would like the Plan Commission to take some time to discuss recent updates from State Legislature regarding energy and climate change.

4. Transportation Subcommittee Report - Clifford Winger
   - Mr. Winger reported that the Plan Commission Transportation Subcommittee voted Mary Winkes as Vice Chair. He also brought up a concern regarding the rule which stipulates which City Council member should be the PCTS City Council Liaison and suggested it should be changed. Mr. Winger also reported on 6 Year Street Program and the Ray-Freya Alternatives project were discussed at the last PCTS meeting.

5. Secretary Report - Louis Meuler
   - Mr. Meuler reported that the Planning Director and Division Director are in the process of being recruited. He also announced that Michael Baker has been reappointed for another full (4-year) term to the Plan Commission.

President Beyreuther formed a subcommittee to meet and interview Plan Commission applicants. The Subcommittee will include Commissioners Jo Anne Wright, Sylvia St. Clair, and Todd Beyreuther.
Board Business:
1. Plan Commission Work Program
   - Presentation provided by Plan Commission
   - Questions asked and answered
   - Discussion ensued

Workshop(s):
1. 5th Ave. Initiative
   - Presentation provided by Maren Murphy
   - Questions asked and answered
   - Discussion ensued

2. 6 Year Street Program Update Review Workshop
   - Presentation provided by Kevin Picanco
   - Questions asked and answered
   - Discussion ensued

3. Housing Action Plan Update
   - Presentation provided by Maren Murphy
   - Questions asked and answered
   - Discussion ensued

4. Transit Oriented Development Project
   - Presentation provided by Jason Graf
   - Questions asked and answered
   - Discussion ensued

Meeting Adjourned at 5:12 PM

Next Plan Commission Meeting scheduled for Wednesday, February 24, 2021
Subject
The City of Spokane is preparing a Housing Action Plan to increase housing options that meet the needs of residents at all income levels. The planning process follows a data-driven, community-informed approach with a focus on equity built on inclusive outreach and engagement with residents, partners, and City leaders. The outcome will be a coordinated vision that focuses attention, builds community support, and promotes accountability for enacting change.

Topic of Workshop
Project staff have begun the process of reviewing recommendations and possible solutions as outlined by the Washington Department of Commerce in the Guidance for Developing a Housing Action Plan: https://www.commerce.wa.gov/serving-communities/growth-management/growth-management-topics/planning-for-housing/.
Staff will share draft priorities and strategies related to housing options, housing supply, affordable housing, homeownership, and partnerships to engage the Plan Commission in discussion and input.

Project Update and Upcoming Public Engagement
The City completed two community surveys on housing experiences and issues: one focusing on residents of the City of Spokane and one focusing on people who work in Spokane and live outside the City. Staff also completed a draft displacement risk assessment to better understand who and where residents are at risk of displacement due to redevelopment. This builds on previous engagement efforts with interviews and stakeholder roundtables in Fall 2020. The City has also been communicating updates with emails, press, social media outreach, and blog posts. Project staff have also been reviewing the Comprehensive Plan for consistency and to identify gaps that will help further meet housing goals.

Please review the Housing Action Plan project page materials and presentations: https://my.spokanecity.org/housing/spokane-housing-action-plan/

Background
In 2019, the WA Legislature passed RCW 36.70A.600 (formerly E2SHB 1923) to incentivize cities to increase urban residential capacity and density by completing recommended actions or a housing action plan. The legislation emphasizes the need to increase housing supply for all income levels, and encourages cities to prioritize the creation of affordable, inclusive neighborhoods. Certain non-project actions are not subject to SEPA appeal if completed prior to April 1, 2021 (see RCW 36.70A.600).

Plan Commission Consideration:
When available, a Housing Action Plan draft will be reviewed by the Plan Commission and then forwarded to the City Council for consideration of adoption by resolution in spring 2021.

Proposed Station Locations

• Connect Spokane FR 6.0
  Stop Spacing and Placement
  • 1/4-1/2 mile spacing
• Preliminary, may shift based on:
  • Land use study
  • Available right-of-way
Transit Performance: Routes north of the “Y”

• Connecting to Whitworth University matters

• The capacity at Hastings Park & Ride may be a limiting factor

• A new park and ride at Farwell Road may be desirable in the future

• Likely a phased project
2040 Traffic/Transit Modeling - Screenlines

• Across the region, traffic volumes increase over existing conditions

• Traffic volumes on north-south arterials decrease with the NSC accommodating growth in all alternatives

• Build alternatives reduce vehicular traffic volume on Division Street
  • Increase in transit ridership
  • Movement of regional trips to the NSC
  • 30,000-38,000 local vehicle trips/day maintained on Division

• Average travel time and speeds on Division Street remain relatively stable
2040 Traffic Modeling – PM Congestion

No Build  Center-running  Side-running A  Side-running B  Side-running C
Public Engagement Activities

• Online Open House – January 18 thru February 22
• Postcard mailing to all property owners, addresses and taxpayers within 1/8 mile of the corridor
• Virtual open house – 7 pm on Thursday, February 11
• Direct contact to targeted property owners and businesses along the corridor
## Upcoming Actions

| Locally Preferred Alternative | • Defines alignment, mode and general station locations  
| | • To be adopted by STA Board Resolution (target: Mar. 18)  
| | • Seek concurrence by City Council and inclusion in update to Metropolitan Transportation Plan |
| Corridor Development Plan | • Documentation of study process and data, public outreach and implementation road map  
| | • To be approved by STA Board of Directors (target: Apr. 15) |
| **DivisionConnects** Phase II | • Develop a vision for land use and multimodal changes in support of and response to Division BRT  
| | • Study will be led by SRTC and STA, WSDOT, City of Spokane will continue as core stakeholders and will continue through early 2022 |
| Division BRT PE & NEPA Scoping | • Procure needed services and conduct preliminary engineering and scope the necessary federal and state environmental reviews  
| | • Scope of work and authorization for RFQ to be approved by P&D Committee (target: May 5) |
Phase II Project Schedule: 2021-2022

• Transition from transit + multimodal analysis to land use analysis
• How do land uses respond to changing transportation environment?
• Continue refinement of multimodal connectivity
• Final study deliverables in early 2022

Subject
The Shoreline Master Program (SMP) Periodic Review is state mandated and led by the City of Spokane in close collaboration with Dept of Ecology. This project is narrowly focused to achieve City SMP compliance with changes to state legislation concerning Shorelines. This is an SMP Periodic Review - not an Update. The project page can be found on the City website: https://my.spokanecity.org/projects/shoreline-master-program-periodic-update/.

Background
The City of Spokane is undertaking a periodic review of its Shoreline Master Program (SMP), as required by the Washington State Shoreline Management Act (SMA) (RCW 90.58). The Shoreline Management Act was created by citizen referendum in 1972, and includes the goals, policies, and regulations that govern land use and activities within the City limits. The Shoreline Management Act requires each Shoreline Master Program be reviewed on an eight-year schedule established by the Legislature (RCW 90.58.080). Spokane's shoreline jurisdiction includes Spokane River and Latah Creek through the City; their associated wetlands and floodplains; and land within the 200-foot buffer zone of these waterbodies. The last Shoreline Master Program update was done in 2011. The City is scheduled to complete this latest periodic review by June 30, 2021.

Shoreline Master Programs are local land-use policies and regulations that guide use of Washington shorelines to protect natural resources for future generations, provide for public access to public water and shores, and plan for water-dependent uses. Washington Department of Ecology is required to maintain a checklist that includes review elements. The checklist helps counties, cities, and towns determine what to review and where each applicable issue is addressed in the Shoreline Master Program. Our updated Shoreline Master Program will:

- comply with Department of Ecology applicable laws and guidelines;
- be consistent with our comprehensive plan and development regulations;
- respond to changed circumstances, new information, or improved data; and
- allow appropriate use and enjoyment of our shorelines and protect our shoreline ecosystem.

This periodic review will not re-evaluate the ecological baseline that was established as part of the last Shoreline Master Program update; change shoreline jurisdiction or environment designations; or result in changes to the comprehensive plan.

Planning Services has opted for the Joint State-Local 30-day Public Comment Period provided by WAC 173-26-104. This allows for a shorter timeline overall while completing SMP Periodic Review Plan Commission Hearing February 24, 2021 For more information please contact Melissa Wittstruck, Planner II, mwittstruck@spokanecity.org
Ecology review and legislative approvals. Notification of the comment period was published in the Spokesman-Review on December 22, 2020 and January 5, 2021, emailed to distribution lists of agencies and parties of interest along with SEPA Determination of Non-Significance, and coordinated with separate notification by Dept. of Ecology.

A Plan Commission hearing on the proposed amendments is scheduled on February 24, 2021. There will be several future opportunities for public comment as the project moves towards legislative approval both in the City and jointly with WA Dept of Ecology.

When the proposal does move forward to City Council an additional 30-day public comment period will be opened. This more extensive notification and comment period will be in addition to statutorily required notice. The importance of City of Spokane shorelines to the public is well-documented and at this time, many public processes have been adapted to meet Covid-19 pandemic restrictions. The benefits of public feedback merit additional notice and time for the public to respond.

**Action**

Plan Commission review and deliberation, with recommendation including findings and conclusions forwarded to City Council for hearing to be scheduled.

Attachments:
- Draft proposed amendments for compliance with applicable state laws and Department of Ecology guidelines.
- Draft Periodic Review Checklist.
- Joint 30-day Public Comment Period Records
Title 17A Administration
Chapter 17A.020 Definitions
Section 17A.020.040 "D" Definitions

A. Day.
   A calendar day. A time period expressed in a number of days is computed by excluding the first
day and including the last day. When an act to be done requires a City business day, and the last
day by which the act may be done is not a City business day, then the last day to act is the
following business day.

B. Debris Flow.
   Slow moving, sediment gravity flow composed of large rock fragments and soil supported and
carried by a mud-water mixture.

C. Debris Slide.
   A shallow landslide within rock debris with the slide usually occurring within a relatively narrow
zone.

D. “Decibel (dB)” means the measure of sound pressure or intensity.

E. Dedication.
   The deliberate appropriation of land, or an easement therein, by its owner for any general and
public uses, reserving to the owner no rights other than those that are compatible with the full
exercise and enjoyment of the public uses for which the property has been devoted, and
accepted for such use by or on behalf of the public. The intention to dedicate shall be evidenced
by the owner by the presentment for filing of a final plat, short plat, or binding site plan showing
the dedication thereon or by dedication deed to the City. The acceptance by the public shall be
evidenced by the approval of such plat, short plat, binding site plan, or at the City’s option, by
the City recording such dedication deed with the Spokane County auditor.

F. Degraded Wetland.
   A wetland altered through impairment of some physical or chemical property which results in
reduction of one or more wetland functions and values.

G. Demolition or Partial Demolition.
   The destruction, removal, or relocation, in whole or in part, of a building or structure or a
significant feature of a building or structure that is of important historical character. Demolition
(or partial demolition) does not include the removal of past additions for the express purpose of
restoration of a structure to its historic appearance, form, or function. Demolition (or partial
demolition) does not include the destruction or removal of portions of a building or structure
that are not significant to defining its historic character. This exclusion is valid so long as the
demolition is done as part of a design review application approved pursuant to chapter 17C.040
SMC.

H. Density.
   The number of housing units per acre as permitted by the zoning code.

I. Denuded.
   Land that has had the natural vegetative cover or other cover removed leaving the soil exposed
to mechanical and chemical weathering.

J. Department.
   Any of the departments of engineering services, planning services, fire department, or parks and
recreation for which responsibility has been assigned by charter or code for administration.

K. Design Departure.
   Any change that is sought to modify or waive a design requirement (R) or waive a design...
presumption (P) contained within the design standards. The design departure process is found in chapter 17G.030 SMC, Design Departures.

L. Design Guidelines.
A set of design parameters for development which apply within a design district, sub-district, or overlay zone. The guidelines are adopted public statements of intent and are used to evaluate the acceptability of a project's design.

M. Design Review Board.
The design review board is defined in chapter 4.13 SMC. The design review board was previously named design review committee. Any reference to design review committee is the same as a reference to the design review board.

N. Designation.
The declaration of a building, district, object, site, or structure as a landmark or historic district.

O. Desired Character.
The preferred and envisioned character (usually of an area) based on the purpose statement or character statement of the base zone, overlay zone, or plan district. It also includes the preferred and envisioned character based on any adopted subarea plans or design guidelines for an area.

P. Detailed Site Plan.
A general site plan to which the following detailed information has been added:
1. Natural vegetation, landscaping, and open spaces.
2. Ingress, egress, circulation, parking areas, and walkways.
3. Utility services.
4. Lighting.
5. Signs.
6. Flood plains, waterways, wetlands, and drainage.
7. Berms, buffers, and screening devices; and
8. Such other elements as required in this chapter.

Q. Developable Area.
Land outside of a critical area and associated buffer including wetlands, fish and wildlife habitat conservation areas, riparian habitat area, landslide areas, steep slope areas, floodplain, floodway, shallow flooding, channel migration zone, and associated buffers, or any other restricted area on a particular piece of property.

R. Development.
1. Any proposed land use, zoning, or rezoning, comprehensive plan amendment, annexation, subdivision, short subdivision, planned unit development, planned area development, conditional use permit, special use permit, shoreline development permit, or any other property development action permitted or regulated by the Spokane Municipal Code.
"Development" for shoreline regulations shall be defined by WAC 173-27-030(6) as amended to read “Development” means a use consisting of the construction or exterior alteration of structures; dredging; drilling; dumping; filling; removal of any sand, gravel, or minerals; bulkheading; driving of piling; placing of obstructions; or any project of a permanent or temporary nature which interferes with the normal public use of the surface of the waters overlying lands subject to the act at any stage of water level. "Development" does not include dismantling or removing structures if there is no other associated development or redevelopment.
S. Development Activity – Floodplain.
   Any manmade change to improved or unimproved real estate, including but not limited to
   buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling
   operations or storage of equipment or materials located within the area of special flood hazard.

T. Development Approval.
   Any recommendation or approval for development required or permitted by this code.

U. Development Codes.
   The state-adopted codes, boiler and pressure vessel, building, electrical, elevator, fire,
   mechanical, plumbing, and related publications adopted by the City, along with other provisions
   of this code that relate to private access to, use and obstruction of public right-of-way, and
   engineering standards that relate to private construction of public utilities and facilities.

V. Development Permit.
   Any permit issued by the City authorizing construction, including a building permit, conditional
   use permit, substantial development permit, or other permit required by the City.

W. Development Plan, Site.
   The final site plan that accompanied a recommendation or approval for development permitted
   by this code and that may identify standards for bulk and location of activities, infrastructure
   and utilities specific to the development.

X. Dike.
   An artificial embankment placed at a stream mouth or delta area to hold back sea water for
   purposes of creating and/or protecting arable land from flooding.

Y. Direct Impact.
   An impact upon public facilities that has been identified as a direct consequence or result of a
   proposed development.

Z. Directional.
   Any of the four basic compass directions, abbreviated as follows: N, S, E, W, SE, NE, SW, NW
   shall also be considered as a directional. A directional is placed in front of the root roadway
   name.

AA. Directional Sign.
   See SMC 17C.240.015.

BB. Director.
   The administrative official of the department responsible for compliance with this code, the
   development codes, and the land use codes. These include the director of building services,
   director of engineering services, and the director of planning services.

CC. Discharge (n).
   In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means runoff,
   excluding offsite flows, leaving a proposed development through overland flow, built
   conveyance systems, or infiltration facilities.

DD. Discharge (v).
   In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means any disposal,
   injection, dumping, spilling, pumping, emitting, emptying, leaching, or placing of any material so
   that such material enters and exits from the MS4 or from any other publicly owned or operated
   drainage system that conveys storm water. The term includes other verb forms, where
   applicable.

EE. Discharger.
   In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means any person
   that discharges to the City's MS4 or any other publicly owned or operated drainage system that
   conveys, manages, or disposes of stormwater flows.
FF. District.
A geographically definable area, urban or rural, small or large, possessing a significant concentration, linkage, or continuity of buildings, objects, sites, and/or structures united by past events or aesthetically by plan or physical development.

GG. Disturbance Area.
In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means an area where soils are exposed or disturbed by development, both existing and proposed. The disturbance area includes staging and storage areas, structures, and areas needed for vehicle access and maneuvering.

HH. Dock.
All platform structures or anchored devices in or floating upon water bodies to provide moorage for pleasure craft or landing for water-dependent recreation.

II. Documented Habitat.
Habitat classified by state or federal agencies as critical to the survival of endangered or threatened or sensitive animal, fish, or plant species.

JJ. Domestic Animal.
1. Large Domestic Animals.
   a. Animals including, but not limited to, horses, donkeys, burros, llamas, alpacas, bovines, goats, sheep, swine, and other animals or livestock of similar size and type.
   b. Young of horses, mules, donkeys, burros, and llamas under one year in age.
   c. Bovines under ten months in age.
   d. Sheep, goats, and swine under three months in age are not included when counting large animals.

2. Small Domestic Animals.
   a. Fowl including, but not limited to, chickens, guinea hens, geese, ducks, turkeys, pigeons, and other fowl not listed or otherwise defined.
   b. Mink, chinchilla, nutria, gnawing animals in general, and other animals of similar size and type.
   c. Small livestock are defined as:
      i. swine- breeds include miniature Vietnamese, Chinese or oriental pot-bellied pigs (sus scrofa vittatus),
      ii. other small pig breeds such as Kunekune, Choctaw, and Guinea hogs,
      iii. all breeds of goats excluding mature large meat breeds such as Boers, and
      iv. all breeds of sheep excluding mature large meat breeds such as Suffolk or Hampshire sheep.
      v. No horned rams shall be permitted as a small livestock.
      vi. Under no circumstance shall a small livestock exceed thirty-six inches shoulder height or one hundred and fifty pounds in weight.
   d. Young small animals, livestock or fowl under three months in age are not included when counting small animal, livestock or fowl.

KK. Drainage Ditch.
An artificially created watercourse constructed to drain surface or ground water. Ditches are graded (man-made), channels installed to collect and convey runoff from fields and roadways. Ditches may include irrigation ditches, waste ways, drains, outfalls, operational spillways, channels, stormwater runoff facilities, or other wholly artificial watercourses, except those that
directly result from the modification to a natural watercourse. Ditches channels that support fish are considered to be streams.

LL. Dredge Spoil.
The material removed by dredging.

MM. Dredging.
The removal, displacement, and disposal of unconsolidated earth material such as silt, sand, gravel, or other submerged material from the bottom of water bodies; maintenance dredging and other support activities are included in this definition.

NN. Drift Cell.
Or “drift sector” or “littoral cell” means a particular reach of marine shore in which littoral drift may occur without significant interruption and which contains any natural sources of such drift and also accretion shore forms created by such drift.

OO. Driveway.
An all-weather surface driveway structure as shown in the standard plans.

PP. Duplex.
A building that contains two primary dwelling units on one lot. The units must share a common wall or common floor/ceiling.

QQ. Dwelling Unit.
A building, or a portion of a building, that has independent living facilities including provisions for sleeping, cooking, and sanitation, and that is designed for residential occupancy by a group of people. Buildings with more than one set of cooking facilities are considered to contain multiple dwelling units unless the additional cooking facilities are clearly accessory, such as an outdoor grill.

Title 17A Administration
Chapter 17A.020 Definitions
Section 17A.020.060 "F" Definitions

A. Facade.
All the wall planes of a structure as seen from one side or view. For example, the front facade of a building would include all of the wall area that would be shown on the front elevation of the building plans.

B. Facade Easement.
A use interest, as opposed to an ownership interest, in the property of another. The easement is granted by the owner to the City or County and restricts the owner’s exercise of the general and natural rights of the property on which the easement lies. The purpose of the easement is the continued preservation of significant exterior features of a structure.

C. Facility and Service Provider.
The department, district, or agency responsible for providing the specific concurrency facility.

D. Factory-built Structure.
1. “Factory-built housing” is any structure designed primarily for human occupancy, other than a mobile home, the structure or any room of which is either entirely or substantially prefabricated or assembled at a place other than a building site.
2. “Factory-built commercial structure” is a structure designed or used for human habitation or human occupancy for industrial, educational, assembly, professional, or commercial purposes, the structure or any room of which is either entirely or substantially prefabricated or assembled at a place other than a building site.
E. Fair Market Value.
The open market bid price for conducting the work, using the equipment and facilities, and purchase of the goods, services, and materials necessary to accomplish the development. This would normally equate to the cost of hiring a contractor to undertake the development from start to finish, including the cost of labor, materials, equipment and facility usage, transportation and contractor overhead, and profit. The fair market value of the development shall include the fair market value of any donated, contributed, or found labor, equipment, or materials.

F. Fascia Sign.
See SMC 17C.240.015.

G. Feasible (Shoreline Master Program).
1. For the purpose of the shoreline master program, means that an action, such as a development project, mitigation, or preservation requirement, meets all of the following conditions:
   a. The action can be accomplished with technologies and methods that have been used in the past in similar circumstances, or studies or tests have demonstrated in similar circumstances that such approaches are currently available and likely to achieve the intended results;
   b. The action provides a reasonable likelihood of achieving its intended purpose; and
   c. The action does not physically preclude achieving the project’s primary intended legal use.
2. In cases where these guidelines require certain actions, unless they are infeasible, the burden of proving infeasibility is on the applicant.
3. In determining an action’s infeasibility, the reviewing agency may weigh the action’s relative public costs and public benefits, considered in the short- and long-term time frames.

H. Feature.
To give special prominence to.

I. Feeder Bluff.
Or “erosional bluff” means any bluff (or cliff) experiencing periodic erosion from waves, sliding, or slumping, and/or whose eroded sand or gravel material is naturally transported (littoral drift) via a driftway to an accretion shoreform; these natural sources of beach material are limited and vital for the long-term stability of driftways and accretion shoreforms.

J. Fill.
The addition of soil, sand, rock, gravel, sediment, earth retaining structure, or other material to an area waterward of the ordinary high-water mark in wetlands, or on shorelands in a manner that raises the elevation or creates dry land.

K. Financial Guarantee.
A secure method, in a form and in an amount both of which are acceptable to the city attorney, providing for and securing to the City the actual construction and installation of any improvements required in connection with plat and/or building permit approval within a period specified by the City, and/or securing to the City the successful operation of the improvements for two years after the City’s final inspection and acceptance of such improvements. There are two types of financial guarantees under chapter 17D.020 SMC, Financial Guarantees: Performance guarantee and performance/warranty retainer.

L. Fish Habitat.
A complex of physical, chemical, and biological conditions that provide the life-supporting and
reproductive needs of a species or life stage of fish. Although the habitat requirements of a species depend on its age and activity, the basic components of fish habitat in rivers, streams, ponds, lakes, estuaries, marine waters, and near-shore areas include, but are not limited to, the following:

1. Clean water and appropriate temperatures for spawning, rearing, and holding.
2. Adequate water depth and velocity for migrating, spawning, rearing, and holding, including off-channel habitat.
3. Abundance of bank and in-stream structures to provide hiding and resting areas and stabilize stream banks and beds.
4. Appropriate substrates for spawning and embryonic development. For stream- and lake-dwelling fishes, substrates range from sands and gravel to rooted vegetation or submerged rocks and logs. Generally, substrates must be relatively stable and free of silts or fine sand.
5. Presence of riparian vegetation as defined in this program. Riparian vegetation creates a transition zone, which provides shade and food sources of aquatic and terrestrial insects for fish.
6. Unimpeded passage (i.e., due to suitable gradient and lack of barriers) for upstream and downstream migrating juveniles and adults.

M. Flag.
   See SMC 17C.240.015.

N. Float.
   A floating platform similar to a dock that is anchored or attached to pilings.

O. Flood Insurance Rate Map or FIRM.
   The official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the City.

P. Flood Insurance Study (FIS).
   The official report provided by the Federal Insurance Administration that includes flood profiles, the Flood Boundary-Floodway Map, and the water surface elevation of the base flood.

Q. Flood or Flooding.
   A general and temporary condition of partial or complete inundation of normally dry land areas from:
   1. The overflow of inland waters; or
   2. The unusual and rapid accumulation of runoff of surface waters from any source.

R. Flood-proofing.
   Structural provisions, changes, adjustments, or a combination thereof, to buildings, structures, and works in areas subject to flooding in order to reduce or eliminate the damages from flooding to such development and its contents, as well as related water supplies and utility facilities.

S. Floodway.
   ((The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. As defined under Section 90.58.030 RCW, or as amended.)) The area, as identified in the shoreline master program, that either: (a) has been established in federal emergency management agency flood insurance rate maps or floodway maps; or (b) consists of those portions of a river valley lying streamward from the outer limits of a watercourse upon which flood waters are carried during periods of flooding that occur with reasonable regularity, although not necessarily annually, said floodway being identified, under normal condition, by changes in surface soil conditions or changes in types or quality of vegetative ground cover.
condition, topography, or other indicators of flooding that occurs with reasonable regularity, although not necessarily annually. Regardless of the method used to identify the floodway, the floodway shall not include those lands that can reasonably be expected to be protected from flood waters by flood control devices maintained by or maintained under license from the federal government, the state, or a political subdivision of the state.

T. Floor Area.
The total floor area of the portion of a building that is above ground. Floor area is measured from the exterior faces of a building or structure. Floor area does not include the following:

1. Areas where the elevation of the floor is four feet or more below the lowest elevation of an adjacent right-of-way.
2. Roof area, including roof top parking.
3. Roof top mechanical equipment.
4. Attic area with a ceiling height less than six feet nine inches.
5. Porches, exterior balconies, or other similar areas, unless they are enclosed by walls that are more than forty-two inches in height, for fifty percent or more of their perimeter; and
6. In residential zones, FAR does not include mechanical structures, uncovered horizontal structures, covered accessory structures, attached accessory structures (without living space), detached accessory structures (without living space).

U. Floor Area Ratio (FAR).
The amount of floor area in relation to the amount of site area, expressed in square feet. For example, a floor area ratio of two to one means two square feet of floor area for every one square foot of site area.

V. Focused Growth Area.
Includes mixed-use district centers, neighborhood centers, and employment centers.

W. Frame Effect.
A visual effect on an electronic message sign applied to a single frame to transition from one message to the next. This term shall include, but not be limited to scrolling, fade, and dissolve. This term shall not include flashing.

X. Freestanding Sign.
See SMC 17C.240.015

Y. Frontage.
The full length of a plot of land or a building measured alongside the road on to which the plot or building fronts. In the case of contiguous buildings individual frontages are usually measured to the middle of any party wall.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article II. Administration: Part II. Administrative Authority and Legal Provisions
Section 17E.060.110 Shoreline Master Program Amendments

A. The City may initiate an amendment to these shoreline regulations according to the procedures prescribed in ((WAC 173-26-090 to WAC 173-26-160)) WAC 173-26.

B. The City shall conduct a public hearing in accordance with chapter 17G.020 SMC on any amendment proposed.
C. Any person or agency may conduct an amendment to the SMP consistent with both chapter 17G.020 SMC and WAC 173-26.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article II. Administration: Part II. Administrative Authority and Legal Provisions
Section 17E.060.150 Reference to Plans, Regulations, or Information Sources

Where the shoreline regulations reference any RCW, WAC, or other local, state, or federal law or regulation, or (any) source of information, the most recent adopted amendment or adopted current edition shall apply.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article IV. Shoreline Permits and Exemptions
Section 17E.060.290 Shoreline Substantial Development Permit

A. Purpose.
   To ensure that substantial development within the shoreline area is accomplished in a manner that protects the shoreline ecology consistent with the comprehensive plan and the Shoreline Management Act, this section establishes criteria for determining the process and conditions under which a shoreline substantial development permit may be acted upon by the director.

B. A shoreline substantial development permit is subject to the specific review procedure established in chapter 17G.060 SMC, Land Use Application Procedures, and the conditions which may be imposed to assure compliance with all applicable regulations. A request for a shoreline substantial development permit use may be disapproved if the director finds the shoreline development is inconsistent with these shoreline regulations, the comprehensive plan or the Shoreline Management Act.

C. No use, modification, or development, except for those listed in SMC 17E.060.300, Use, Modifications, and Developments Exempt from Shoreline Substantial Development Permit Requirement, shall be undertaken in the shoreline jurisdiction without first obtaining a shoreline substantial development permit from the director. Substantial developments include any development with which the total cost or fair market value, whichever is higher, does exceed ((five thousand seven hundred eighteen dollars or)) seven thousand forty seven dollars ($7,047) or the adjusted amount per WAC 173-27-040, or if such development does materially interfere with the normal public use of the water or shorelines of the state. The dollar threshold established in this subsection must be adjusted for inflation by the office of financial management every five years, beginning July 1, 2007, based upon changes in the consumer price index during that time period. The office of financial management must calculate the new dollar threshold and transmit it to the office of the code reviser for publication in the Washington State Register at least one month before the new dollar threshold is to take effect. For the purposes of determining whether or not a permit is required, the total cost or fair market value shall be based on the value of use, modification, or development that is occurring on shorelines of the state as defined in RCW 90.58.030(2)(c). The total cost or fair market value of the development shall include the fair market value of any donated, contributed or found
D. Where a substantial development is proposed which would be partly within and partly outside of the shoreline jurisdiction, a shoreline substantial development permit shall be required for the entire development.

E. An application for a shoreline substantial development permit for a limited utility extension or for the construction of a bulkhead or other measures to protect a single-family residence and its appurtenant structures from shoreline erosion shall be subject to all of the requirements of these shoreline regulations and shall follow the time period for public comment in SMC 17G.060.130, Public Comment Period. For purposes of this section, a limited utility extension means the extension of a utility service that:

1. is categorically exempt under chapter 43.21C RCW for one or more of the following: Natural gas, electricity, telephone, water, or sewer;
2. will serve an existing use in compliance with these shoreline regulations; and
3. will not extend more than two thousand five hundred linear feet within the shoreline jurisdiction.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article IV. Shoreline Permits and Exemptions
Section 17E.060.300 Uses, Modifications, and Developments Exempt or Excepted from Shoreline Substantial Development Permit Requirement

A. Application and Interpretation of Exemptions.

1. Exemptions shall be construed narrowly. Only those uses, modifications, or developments that meet the precise terms of one or more of the listed exemptions may be exempt from the shoreline substantial development permit process.

2. An exemption from the shoreline substantial development permit process is not an exemption from compliance with the Shoreline Management Act or provisions of these shoreline regulations, or from any other regulatory requirements. To be authorized, all uses, modifications, and developments must be consistent with the policies and regulations of the entire SMP and the Act.

3. Pursuant to WAC 173-27-160, a use, modification, or development that is listed as a shoreline conditional use pursuant to these shoreline regulations or is an unlisted use, must obtain a shoreline conditional use permit even though the use, modification, or development does not require a shoreline substantial development permit.

4. When a use, modification, or development is proposed that does not comply with the bulk, dimensional and performance standards of these shoreline regulations, such use, modification, or development can only be authorized by approval of a shoreline variance pursuant to SMC 17E.060.330, Shoreline Variance Permit, and SMC 17E.060.340, Procedures.

5. The burden of proof that a development or use is exempt from the permit process is on the applicant.
6. If any part of a proposed use, modification, or development is not eligible for exemption, then a shoreline substantial development permit is required for the entire proposed project.

7. All permits or statements of exemption issued for a use, modification, or development within the shoreline jurisdiction shall include written findings approved by the director, including compliance with bulk and dimensional standards and policies and regulations of the entire SMP. The director may attach conditions to the approval of exempt uses, modifications, or developments as necessary to assure consistency of the project with the Act and these shoreline regulations.

8. The department of ecology must approve all exemptions requiring permits from the U.S. Army Corps of Engineers section 10 permit under the Rivers and Harbors Act, and any project involving a section 404 permit under the Clean Water Act.

9. Use, modifications, and developments proposed within the shoreline jurisdiction may require permits from other governmental agencies other than the department of ecology.

B. Exemptions.

The following shall not be considered substantial development and are exempt from obtaining a shoreline substantial development permit from the director:

1. Any use, modification, or development of which the total cost or fair market value, whichever is higher, does not exceed ((five thousand dollars)) seven thousand forty seven dollars ($7,047) as of September 2, 2017 or the adjusted amount per WAC 173-27-040 determined by the office of financial management periodically for inflation, if such use, modification, or development does not materially interfere with the normal public use of the water or shorelines of the state. The total cost or fair market value of the use, modification, or development shall include the fair market value of any donated, contributed, or found labor, equipment, or materials.

2. Normal maintenance or repair of existing structures or developments, including damage by accident, fire or elements. “Normal maintenance” means those usual acts to prevent a decline, lapse, or cessation from a lawfully established state comparable to its original condition, including but not limited to its size, shape, configuration, location, and external appearance, within twelve months after decay or partial destruction, except where repair causes substantial adverse effects to shoreline resources or environment. Replacement of a structure or development may be authorized as repair where such replacement is the common method of repair for the type of structure or development and the replacement structure or development is comparable to the original structure or development including but not limited to its size, shape, configuration, location and external appearance and the replacement does not cause substantial adverse effects to shoreline resources or environment.

3. Construction of the normal protective bulkhead common to single-family residences. A “normal protective bulkhead” means those structural and nonstructural developments installed at or near, and parallel to, the ordinary high-water mark for the sole purpose of protecting an existing single-family residence and appurtenant structures from loss or damage by erosion. A normal protective bulkhead is not exempt if constructed for the purpose of creating dry land. When a vertical wall is being constructed or reconstructed, not more than one cubic yard of fill per one foot of wall may be used as backfill. When
an existing bulkhead is being repaired by construction of a vertical wall fronting the existing wall, it shall be constructed no further waterward of the existing bulkhead than is necessary for construction of new footings. When a bulkhead has deteriorated such that an ordinary high-water mark has been established by the presence and action of water landward of the bulkhead, then the replacement bulkhead must be located at or near the actual ordinary high-water mark. Beach nourishment and bioengineered erosion control projects may be considered a normal protective bulkhead when any structural elements are consistent with the above requirements and when the project has been approved by the State department of fish and wildlife.

4. Emergency construction necessary to protect property from damage by the elements. An emergency means an unanticipated and imminent threat to public health, safety or the environment which requires immediate action within a time too short to allow full compliance with these shoreline regulations. Emergency construction does not include development of new permanent protective structures where none previously existed. Where new protective structures are deemed by the director to be the appropriate means to address the emergency situation, upon abatement of the emergency situation the new structure shall be removed or any permit which would have been required, absent an emergency, pursuant to chapter 90.58 RCW or these shoreline regulations shall be obtained. All emergency construction shall be consistent with the policies of chapter 90.58 RCW and the entire SMP. As a general matter, flooding or other seasonal events that can be anticipated and may occur but that are not imminent are not an emergency.

5. Construction and practices normal or necessary to maintain existing farming and irrigation activities, including agricultural service roads and utilities in the Latah Creek shoreline jurisdiction presently zoned for agricultural use.

6. Construction or modification, by or under the authority of the coast guard or a designated port management authority, of navigational aids such as channel markers and anchor buoys.

7. Construction on shorelands by an owner, lessee, or contract purchaser of a single-family residence for their own use or for the use of their family, which residence does not exceed a height of thirty-five feet above average grade level and which meets all requirements of the state agency having jurisdiction thereof or the City of Spokane, other than requirements imposed pursuant to chapter 90.58 RCW. “Single-family residence” means a detached dwelling designed for and occupied by one family including those structures and developments within a contiguous ownership which are normal appurtenance. An “appurtenance” is necessarily connected to the use and enjoyment of a single-family residence and is located landward of the ordinary high-water mark and the perimeter of a wetland. On a statewide basis, normal appurtenances include a garage, deck, driveway, utilities, fences, and grading which does not exceed two hundred fifty cubic yards and which does not involve placement of fill in any wetland or waterward of the ordinary high-water mark. Construction authorized under this exemption shall be located landward of the ordinary high-water mark.

8. Construction of a dock, including a community dock, designed for pleasure craft only, for the private noncommercial use of the owner, lessee, or contract purchaser of single-family and multiple-family residences. A dock is a landing and moorage facility for
watercraft and does not include recreational decks, storage facilities, or other appurtenances. ((The fair market value of the dock shall not exceed ten thousand dollars, but if subsequent construction having a fair market value exceeding two thousand five hundred dollars occurs within five years of a completion of the prior construction, the subsequent construction shall be considered a substantial development for the purpose of these shoreline regulations.)) This exemption applies if either:

1. In fresh waters the fair market value of the dock does not exceed:
   a. Twenty-two thousand five hundred dollars ($22,500) for docks that are constructed to replace existing docks, are of equal or lesser square footage than the existing dock being replaced; or
   b. Eleven thousand two hundred ($11,200) dollars for all other docks constructed in fresh waters.

   However, if subsequent construction occurs within five years of completion of the prior construction, and the combined fair market value of the subsequent and prior construction exceeds the amount specified above, the subsequent construction shall be considered a substantial development for the purpose of this chapter.

9. Operation, maintenance, or construction of canals, waterways, drains, reservoirs, or other facilities that now exist or are hereafter created or developed as a part of an irrigation system for the primary purpose of making use of system waters, including return flow and artificially stored groundwater for the irrigation of lands.

10. The marking of property lines or corners on state-owned lands, when such marking does not significantly interfere with normal public use of the surface of the water.

11. Operation and maintenance of any system of dikes, ditches, drains, or other public facilities existing on September 8, 1975, which were created, developed, or utilized primarily as a part of an agricultural drainage or diking system.

12. Any project with a certification from the governor pursuant to chapter 80.50 RCW.

13. Site exploration and investigation activities that are prerequisite to preparation of an application for development authorization under these shoreline regulations if:
   a. the activity does not interfere with the normal public use of the surface waters;
   b. the activity will have no significant adverse impact on the environment, including but not limited to fish, wildlife, fish or wildlife habitat, water quality, and aesthetic values;
   c. the activity does not involve the installation of any structure and, upon the completion of the activity, the vegetation and land configuration of the site are restored to conditions existing before the activity;
   d. a private entity seeking development authorization under this section first posts a performance bond or provides other evidence of financial responsibility to the City of Spokane to ensure that the site will be restored to preexisting conditions; and
   e. the activity is not subject to the permit requirements of RCW 90.58.550.
14. The process of removing or controlling aquatic noxious weeds, as defined in RCW 17.26.020, through the use of an herbicide or other treatment methods applicable to weed control that are recommended by a final environmental impact statement published by the department of agriculture or the department of ecology jointly with other state agencies under chapter 43.21C RCW.

15. Watershed restoration projects as defined in chapter 17A.020 SMC and RCW 89.08.460. The City of Spokane shall review the projects for consistency with these shoreline regulations pursuant to procedures in chapter 17G.060 SMC. No fee may be charged for accepting and processing requests for exemption for watershed restoration projects as used in this section.

16. A public or private project that is designed to improve fish or wildlife habitat or fish passage when all of the following apply:
   a. The project has been approved in writing by the department of fish and wildlife.
   b. The project has received hydraulic project approval (HPA) by the department of fish and wildlife pursuant to chapter 77.55 RCW; and
   c. The City of Spokane has determined that the project is substantially consistent with these shoreline regulations. The City shall make such determination and provide it by letter to the project proponent.

17. All other uses, modifications, and developments exempted by WAC 173-27-040.

C. Exceptions
   Developments not required to obtain shoreline permits or local reviews. Requirements to obtain a Substantial Development Permit, Conditional Use Permit, Variance, letter of exemption, or other review to implement the Shoreline Management Act do not apply to the following:
   1. Remedial actions. Pursuant to RCW 90.58.355, any person conducting a remedial action at a facility pursuant to a consent decree, order, or agreed order issued pursuant to chapter 70.105D RCW, or to the department of ecology when it conducts a remedial action under chapter 70.105D RCW.
   2. Boatyard improvements to meet NPDES permit requirements. Pursuant to RCW 90.58.355, any person installing site improvements for storm water treatment in an existing boatyard facility to meet requirements of a national pollutant discharge elimination system storm water general permit.
   3. WSDOT facility maintenance and safety improvements. Pursuant to RCW 90.58.356, Washington State Department of Transportation projects and activities meeting the conditions of RCW 90.58.356 are not required to obtain a Substantial Development Permit, Conditional Use Permit, Variance, letter of exemption, or other local review.
   4. Projects consistent with an environmental excellence program agreement pursuant to RCW 90.58.045.
   5. Projects authorized through the Energy Facility Site Evaluation Council process, pursuant to chapter 80.50 RCW.
The following are subject to the design review board process. Shoreline design review is subject to
the procedures established in chapter 17G.030 SMC, chapter 17G.040 SMC, and SMC
17G.060.060.

1. Shoreline development by a public agency.
2. Shoreline development on public property.
3. Shoreline development requiring a shoreline conditional use permit.
4. Other types of shoreline permits may also require review by the design review board at
the request of the director.

B. Administrative Design Review.
Projects not included in subsection (A) above shall follow procedures for design standards
administration in SMC 17E.060.800.)

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VI. Environment Designations and Requirements for Modifications and Uses in Specific
Environments: Part II. Modifications and Uses in Specific Environments
Section 17E.060.690 Shoreline Primary Use

A. In addition to this section, shoreline uses are subject to the regulations in Article V, Part I,
General Requirements for Shoreline Use.
B. Refer to SMC 17E.060.300 for uses and activities that are exempt from obtaining a shoreline
substantial development permit. An exemption from the shoreline substantial development
permit process is not an exemption from compliance with the Shoreline Management Act or
provisions of these Shoreline Regulations, or from any other regulatory requirements. To be
authorized, all uses and activities must be consistent with the policies and regulations of the
entire SMP and the Act.
C. To be permitted in the Shoreline Jurisdiction, a use must be permitted in both the shoreline
environment and the underlying zone in which it is located.
D. Uses not listed in Table 17E.060-4 or Title 17C may only be authorized as a conditional use.
E. Legend for Table 17E.06-4:

1. Permitted Uses – “P”
   Uses permitted are listed in Table 17E.060-4 with a “P”. These uses are allowed if they
   comply with the development standards of these Shoreline Regulations and Title 17C. A
   shoreline substantial development permit or an exemption from such permit is
   required, pursuant to SMC 17E.060.290 and SMC 17E.060.300.
2. Limited Uses – “L”
   Uses allowed that are subject to limitations are listed in Table 17E.060-4 with an “L”. These uses are allowed if they comply with the limitations as listed in the footnotes
   following the table and the development standards of these Shoreline Regulations
   and title 17C SMC. A shoreline substantial development permit or an exemption from
   such permit is required.
3. Conditional Uses – “CU”
   Uses that are allowed if approved through the shoreline conditional use review process
   are listed in Table 17E.06-4 with a “CU.” These uses are allowed provided they comply
with the conditional use approval criteria for that use, the development standards of these Shoreline Regulations and Title 17C. Uses listed with a “CU” that also have a footnote number in the table are subject to the standards cited in the footnote.

4. Uses Not Permitted – “N”
   Uses listed in Table 17E.060-4 with an “N” are not permitted. Existing uses in categories listed as not permitted are subject to the standards in Chapter 17C.210 SMC, Land Use Standards Non Conforming Situations, and SMC 17E.060.380, Nonconforming Structures and Uses.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VII. Shoreline Development Standards by District: Part II. Shoreline Development Standards
Section 17E.060.770 Visual Access Setback

A. Purpose.
   To preserve views of the river corridor and the scenic environment along the river from the public street system.

B. Visual access shall be achieved by setting buildings back a minimum of fifteen feet from property lines adjacent to public rights-of-way that intersect the shoreline jurisdiction.

C. The following shall apply in the visual access setback:
   1. No structures shall be allowed over a height of thirty-six inches; and
   2. Vegetative landscaping shall be allowed.

**Maximum Structure Height by Shoreline District[^6][^7]**

| Distance from OHWM |  
|-------------------|---------|
| 0 feet - 75 feet   | 30 feet |
| Greater than 75 feet - 100 feet | 40 feet | 40 feet |
| Greater than 100 feet - 200 feet | Alternative 1 = 55 feet | Alternative 2 = 55 feet base with a Skinny Tower - 150 feet total height (See Shoreline Tall Building Standards for Alternative 2) | 35 feet |

**Public Access Pathway Width**

<table>
<thead>
<tr>
<th>Public Access Pathway Width</th>
<th>Minimum of 10 feet[^8]</th>
</tr>
</thead>
</table>

**Notes:**

1. Within the shoreline districts, the most restrictive development standards of both the underlying zone and the shoreline district apply.

2. See the shoreline buffers map to determine the buffer width within the shoreline jurisdiction.

3. Buildings shall be set back at least fifteen feet from property lines adjacent to public rights-of-way that intersect the shoreline district. This does not apply to structures below grade.

4. See SMC 17E.060.770 for exceptions.

5. See SMC 17E.060.800 for pedestrian views and access for large buildings over three hundred feet.
[6] No structures are allowed within the shoreline buffer and structure setback.

[7] No structure shall exceed thirty-five feet above average grade level within the shoreline jurisdiction that will obstruct the view of a substantial number of residences on or adjoining such shorelines except where the SMP or underlying zoning does not prohibit such development and only when overriding considerations of the public interest will be served. See SMC 17E.060.290(Y), Physical and Visual Public Access.

[8] Public access pathways within a shoreline buffer shall not exceed ten feet in width.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VII. Shoreline Development Standards by District: Part II. Shoreline Development Standards
Section 17E.060.790 Pedestrian Views and Access for Large Buildings

A. Purpose.
   To limit the length and mass of large buildings within the shoreline jurisdiction and to provide ground level access between the shoreline and the landward side of the building.

B. At a maximum interval of three hundred feet of structure that is generally parallel to the river, there shall be a clear visual and pedestrian penetration at the ground level from a public street to the river corridor.

C. The visual and pedestrian penetration shall not be less than thirty feet wide and shall meet the requirements of SMC 17E.060.290, Physical and Visual Access, and Article VIII, Design Standards ((and Guidelines)) Specific to Shoreline Districts.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards ((and Guidelines)) Specific to Shoreline Districts
Section 17E.060.800 Design Standards Administration

A. Purpose.
   To help ensure that development compliments the unique and fragile character of the shoreline through careful consideration and implementation of site development and building design concepts.

B. The downtown, campus, and great gorge shoreline districts are subject to the shoreline design standards ((and guidelines)) in addition to the underlying design standards in Title 17C SMC. The downriver, Latah Creek, and Upriver Districts are subject to the underlying design standards in Title 17C SMC.
C. All projects must address pertinent design standards (and guidelines). A determination of consistency with the standards (and guidelines) will be made by the director (following a design review process). Design standards are in the form of requirements (R), presumptions (P), and considerations (C). Regardless of which term is used, an applicant must address each (guideline) design criteria. An applicant may seek to deviate from eligible standards (and guidelines) through the design departure process pursuant to chapter 17G.030 SMC, Design Departures.

1. Requirements (R).
   Requirements are mandatory in that they contain language that is not discretionary, such as “shall,” “must,” and “will.” Requirements must be satisfied by any plan prior to building permit approval. An applicant may seek a deviation from certain requirements through the design departure process, chapter 17G.030 SMC. Requirements are listed with an (R) after the standard.

2. Presumptions (P).
   Presumptions are (guideline) design criteria that are meant to be applied, but with some flexibility. Presumptions indicate that the City is open to design features that are equal to, or better than, that stated—so long as the purpose is satisfied. A submitted plan is incomplete and will be rejected if it does not demonstrate that the presumptive elements have been in some way incorporated or overcome. Presumptions are listed with a (P) after the standard.

   a. Overcoming a Presumption.
      A presumption that may be unsuitable for a given project may be waived if an applicant can demonstrate to the director that there is a good reason why the presumption is inappropriate. The director may approve an alternative that achieves the intent of the presumption. At the discretion of the applicant, or in rare cases, the director may refer the permit to the design review board. A referral from the director would be in those cases where the complexity of the project and/or the cumulative impacts of deviations result in the project no longer meeting the overall intent of the design standards and the comprehensive plan.

   b. Appropriate ways to overcome a presumption include:
      i. demonstrating that for a specific project the underlying design principles will not be furthered by the application of the presumption;
      ii. showing that another design principle is enhanced by not applying the presumption;
      iii. demonstrating an alternative method for achieving the intent of the presumption; and
      iv. explaining the unique site factors that make the presumption unworkable, such as lot size and shape, slope, natural vegetation, drainage, or characteristics of adjacent development, which are identified through their use of materials, colors, building mass and form, and landscaping.

   Note: Increases in the cost of development will not be an acceptable reason to waive a (guideline) design standard or determine that a design standard is inappropriate.
3. Considerations (C).
Design ((guidelines)) criteria listed as considerations are features and concepts that an applicant should consider in preparing a plan. Their omission is not grounds for rejecting a plan, but their inclusion or recognition is encouraged and may assist in overcoming certain presumptions and in gaining acceptance for a plan. Considerations are listed with a (C) after the standard.

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards ((and Guidelines)) Specific to Shoreline Districts
Section 17E.060.810 ((Standards and Guidelines)) Design Standards Applying to Downtown, Campus, and Great Gorge Districts

A. Shoreline Relationships.
   1. Public Access
      a. Purpose.
         To meet a basic objective of the Shoreline Management Act for public access to the shoreline.
      b. When public access is required, it shall be provided pursuant to SMC 17E.060.290. (R)
      c. Visual access shall be achieved by setting buildings back at least fifteen feet from property lines adjacent to public rights-of-way that intersect the shoreline jurisdiction. (R)
      d. A pathway connecting to the nearest public right-of-way is the preferred type of public access. (P)
e. Physical access pathways shall be a minimum of ten feet clear width. (R)

f. The use of pervious materials is recommended for pedestrian surfaces (including pathways and patios) to absorb stormwater run-off. Options include permeable interlocking unit pavers, porous concrete, or porous asphalt. (C)

g. To prevent invasive weeds from colonizing along pathways in the shoreline buffer area, the design of any pathway shall include finished edges. Exposed gravel shoulders shall not be allowed in this area. Soil disturbance shall be minimized during construction and any disturbed soils shall be replanted consistent with native plant colonies in the immediate vicinity. (R)

h. Signs shall be installed to indicate that the pathway is open to the public and the hours during which the public can access the pathway. (R)

2. Site Design.

a. Urban Green Streets and Urban Pathways.

   i. Street Trees and Planting Strips.

      A. Purpose.
      To supplement the urban forest with new trees and planting as development and redevelopment occur.

      B. New development shall include street trees, installed in planting strips located between the curb and sidewalk. To promote tree health in order to gain the benefits associated with trees, consider opportunities when designing streets and sidewalks to provide as much uncompacted soil as possible. Designs shall allow for positive root growth using sustainable solutions that involve innovative means of structural support for the walking surface. (R)

      C. Planting strips shall be at least five feet wide and planted with ground cover or native grasses. (R)

      D. Native trees, such as evergreens, are encouraged when adequate space is available. (C)
ii. Urban Green Streets and Urban Pathways.

A. Purpose.
   To have streets add to the environmental quality of the shoreline environment.

B. Streets within the shoreline jurisdiction shall be planted with a variety of trees, shrubs and ground cover. (R)

C. Techniques for capturing and filtering stormwater run-off shall be incorporated into the design of streets, sidewalks, planting strips, and pathways. (R)

D. Permeable pavement options are encouraged on pedestrian surfaces. These may include permeable interlocking unit pavers, porous concrete, or porous asphalt. (C)

E. Alternatives to standard curbs and planting strips are encouraged to reduce concentrated storm water flowing into landscaped areas. (C)
iii. Overlooks in Public Development.

A. Purpose.
   To make the public aware of the rich history and environmental systems associated with the river and the shoreline.
B. Along streets, pathways or within public parks, overlooks should be provided where views of historic and aesthetic features or landmarks of the river are available. (C)

C. Methods, such as signs, should be used to describe aspects of the river, such as geology, hydrology, history, or native cultures. Interpretations can be literal (pictures and words) or symbolic (artwork, shapes, colors, inlays). (C)

b. Overlooks in Private Development.
   i. Purpose.
      To encourage private development to incorporate features that help people understand the setting.
   ii. Along pathways and public spaces, overlooks should be provided where views of the river are available. (C)
   iii. Methods should be used to describe aspects of the river, such as geology, hydrology, history, or native cultures. Interpretations can be literal (pictures and words) or symbolic (artwork, shapes, colors, inlays). (C)

   i. Purpose.
      To encourage site design to make use of state of the art techniques.
   ii. Site design shall reflect nationally recognized Best Management Practices with respect to paving, erosion control, infiltration and filtration, retention and detention, and surface water quality. (R)
   iii. A shoreline construction site plan indicating how construction BMP’s will be applied on shoreline sites during construction shall be required, pursuant to SMC 17E.060.260. (R)

d. Low Impact Development (LID).
   i. Purpose.
      To encourage site design techniques that protects the environment and water resources by considering the site’s pre-existing hydrologic conditions.
   ii. A site plan and shoreline construction site plan shall be required that indicate ways of minimizing impact on existing features, pursuant to SMC 17G.060.070 and SMC 17E.060.260. (R)
   iii. Site design consistent with LID principles is encouraged. Examples of LID techniques include site design to retain existing trees and vegetation, impervious surface reduction, rain gardens, retention swales, permeable paving, green roofs, rain barrels, and downspout connections to planters. (C)
B. Site Development.

1. Vegetation Conservation/Tree Preservation.
   a. Purpose.
      To maintain vegetative cover that holds slopes, filters run-off and provides habitat.
   b. There shall be no net loss of vegetative cover within the shoreline jurisdiction. (R)
   c. At least twenty-five percent of existing healthy “significant trees” (over six-inches in caliper) as identified by a qualified professional and shown on a shoreline construction site plan shall be retained when a site is developed. Design and construction methods shall ensure the protection and health of retained trees during construction. (R)
   d. Within the designated shoreline buffers, native vegetation shall be preserved. Lawns shall not extend into this area. (R)
   e. Vegetation that is removed for development purposes shall be replaced on site. Alternatively, if a qualified professional determines that is not feasible, the applicant shall contribute an amount equal to replacing the vegetation on site to a shoreline restoration fund to be used to restore identified restoration sites pursuant to the City of Spokane shoreline restoration plan. (R)
2. Clearing and Grading.
   a. Purpose.
      To carefully control the effects of land disturbance so that the natural systems immediately adjacent to the river are protected.
   b. Site design shall identify measures to protect the shoreline buffer from disturbance both during construction and throughout occupancy. (R)
   c. Limited removal of noxious species of non-native plants shall be allowed so that native species can thrive, pursuant to SMC 17E.060.270, Vegetation Replacement Plan. (R)
   d. Altering the natural flow of water to the river shall not be allowed, except during construction to prevent the flow of sediments or chemicals into the river. (R)

C. Building Design.
   1. Sustainability.
      a. Purpose.
         To encourage new development to embody sustainable features.
      b. New development within the shoreline should be designed to reflect criteria for at least LEED Certification, if not higher. (C)
   2. Green Roofs.
      a. Purpose.
         To encourage innovative, sustainable elements in new roofs.
      b. New commercial development should consider the appropriateness of incorporating green roof technology as a possible option to capture, retain, and filter rainwater. (C)
      a. Purpose.
         To ensure building design that complements and blends with the natural character of the shoreline environment.
      b. Buildings shall incorporate a variety of features to reduce their bulk and scale. At least two of the following shall be employed (R):
i. Bay windows.
ii. Visible roofs such as pitched, sloped, curved, angled.
iii. Deep off-sets of facades.
iv. Projecting elements creating shadow lines.
v. Terraces or balconies

c. The upper floor(s) of building shall incorporate at least one of the following features (R):
   i. A visible roof: Pitched, sloped, peaked, curved, angled.
   ii. A stepping back of the top floor(s) by at least five feet.
   iii. An overhanging roof form.
   iv. A distinct change of materials on the upper floor(s).
D. Signs.
Signs within the shoreline jurisdiction shall be regulated pursuant to chapter 17C.240 SMC. (R)

E. Lighting – Cut-off.

1. Purpose.
To prevent glare and spillover.

2. All site lighting, including parking lot lighting, shall be directed downward, using internal or external cut-off methods and must be contained on site. (R)

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards (and Guidelines) Specific to Shoreline Districts
Section 17E.060.820 (Standards and Guidelines) Design Standards Specific to the Downtown District
A. Shoreline Relationships – Human Activity.

1. Purpose.
To recognize that people’s relationship to the river and anticipated uses in each district will inform the design of the built environment. Downtown is an intense urban environment where people and views of the falls create much of the interest in being there. New development along the riverfront that will facilitate desired activities is encouraged. These include shopping, dining, walking, biking, jogging, people watching, viewing the falls, and learning the stories of the river through interpretive displays.

2. Along the river, new buildings shall provide at least three of the following (R):
   a. Outdoor seating or opportunities for outdoor dining.
   b. Building entry from the river side.
   c. Benches along pedestrian trail.
   d. Outdoor balconies.
   e. Public plaza with seating.
   g. Public art.
   h. Opportunities for outdoor vending such as food or bicycle rental.

B. Streets, Sidewalks, and Trails – Pedestrian Pathways.

1. Purpose.
To result in an urban pathway design reflecting the form and intensity of adjacent development, as well as a higher level of pedestrian activity.

2. Pedestrian pathways shall be at least ten feet wide. (R)

3. Pedestrian pathways shall be lighted either from nearby buildings or from pedestrian-scaled fixtures. (R)
4. Seating should be provided at intervals. (C)

C. Site Design.

1. Landscape Character Protection.
   a. Purpose.
   To ensure that development along the shoreline enhances the natural character of the river and falls including its geologic features and native vegetation.
   b. Parking and service areas shall be located so they are screened from views along the shoreline, from opposite shorelines, and from bridges. (R)

2. Pervious Plazas and Spaces.
   a. Purpose.
   To create a system of spaces integrated with the ecological systems of the shoreline.
   b. Development shall include one or more of the following (R):
      i. Open spaces.
      ii. Courtyards.
      iii. Plazas.
      iv. Forecourts; or
      v. Other public spaces that allow for a seamless connection between streets and various uses.
   c. Surfacing of these spaces shall allow for the capture of rainwater and filtration into a natural cleansing system of vegetation and sub-grade materials. (R)
3. Impervious Surfaces.
   a. Purpose.
      To reduce stormwater runoff rates and volumes, while recognizing that the
downtown area will have more intense development and more hard surfaces
than other districts.
   b. New development shall include at least ten percent pervious surfaces. This may
be accomplished by using one or a combination of the following (R):
      i. At-grade planted areas.
ii. Permeable paving systems in pedestrian surfaces such as pedestrian walkways or plazas.

iii. Green roofs.

iv. Each existing significant tree (over six inches caliper and in good health) protected during design and construction may reduce the total required pervious surface requirement by one percent per tree. The required pervious surface shall not be reduced to less than five percent. For example, an applicant retaining two significant trees shall be required to provide eight percent pervious surfaces; an applicant retaining six significant trees shall be required to provide five percent pervious surfaces. Please note that all landscape requirements shall be met regardless of pervious surface requirements.

c. Stormwater runoff from impervious surfaces shall be directed to treatment or detention areas. For non-pollution generating impervious surfaces (generally this includes most surfaces not traveled on by automobiles) this may include one or a combination of the following as approved by director of engineering services (R):

   i. Stormwater planters.

   ii. Tree box filters.

   iii. Water features.

   iv. Landscaped areas including swales or rain gardens.

   v. Cistern for later on-site irrigation.
vi. Other options as approved by engineering services.

d. Raised curbs are discouraged in parking lots so that stormwater runoff can drain naturally into City approved percolation areas rather than be directed into a concentrated flow. At grade curb alternatives to finished asphalt edges are encouraged. (C)

4. Planting Palette.

a. Purpose.
   To protect, enhance and restore native vegetation along the shorelines, while recognizing the more urban nature of vegetation in the downtown area.

b. It is recognized that within downtown, there will likely be a somewhat more manicured and formal use of plantings to frame buildings, streets and spaces. However, landscape designs that rely upon lawns requiring fertilizers and herbicides, or vegetation that is highly consumptive of water should be avoided. (C)
c. Lawns should be limited to areas where a green walking surface is necessary and desirable, in picnic areas for example. Plants should be chosen for year round interest and grouped according to their water needs for good water efficiency. Drought tolerant species and native plantings are highly encouraged. Native trees, shrubs and groundcover plants should dominate the landscape. (C)

D. Building Design.

1. Character Related to the Setting.
   a. Purpose.
      To ensure that new buildings are complementary or visually subordinate to the natural splendor of the river and falls, including its geologic features and native vegetation.
   b. The dramatic nature of the river and the falls define the image of downtown Spokane in a way unlike any other city. Therefore, new buildings should respect the importance of this magnificent and unique centerpiece by not attempting to compete with it visually. Buildings should be designed with respect to location, form and color, so that the river continues to be the emphasis. (C)
   c. Building facades should also incorporate elements that strengthen the natural setting, such as local stone, bay windows, fine-grained articulation, lower floors that frame public spaces, surrounding vegetation. The preference is to have buildings that seem like a built extension of rock, embankments, and outcroppings. (C)

2. Building Orientation.
   a. Purpose.
      To ensure that buildings along the shoreline have two public faces – one along the street, the other along the riverfront.
   b. While it is expected that buildings will be primarily oriented toward public streets, there shall also be features such as windows, secondary entries, balconies, and public spaces that are oriented to the river. (R)

3. Ground Floor Animation.
   a. Purpose.
      To ensure that buildings take advantage of their unique shoreline setting and contribute to the vitality and activity of downtown.
   b. The ground floor of buildings shall incorporate a combination of at least three of the following features (R):
      i. Windows covering more than thirty percent of the ground level façade facing the shoreline.
      ii. Windows covering more than thirty percent of the ground level façade facing the street.
      iii. Masonry or stone covering the ground level façade and producing a “plinth” effect.
iv. Ground level details such as accent lighting, decorative medallions, and canopies.

v. Sculpture, bas relief murals, art worked into paved surfaces.

vi. Retail uses, such as cafes and restaurants, bike rental, and brew pubs.

vii. Publicly accessible gardens, courtyards, or plazas.

E. Lighting – Dark Sky.

1. Purpose.
   To reduce glare and spillover from lighting associated with parking lots or buildings.

2. All lighting shall be directed downwards, with cut-off designs that prevent light from being cast horizontally or upward. (R)

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards ((and Guidelines)) Specific to Shoreline Districts
Section 17E.060.830 ((Standards and Guidelines)) Design Standards Specific to the Campus District

A. Shoreline Relationships – Human Activity.

1. Purpose.
   To recognize that people’s relationship to the river and anticipated uses in the Campus district will inform the design of the built environment. The Campus district is an area in which passive recreation is interwoven with academic, commercial, residential, and light industrial functions. New development along the riverfront should contribute to the campus-like setting, focus attention on the river as a community asset, and improve the natural aesthetics for recreational activities. These include rowing, bicycling, walking, observing birds/wildlife, and learning the stories of the river through interpretive displays.

2. New buildings shall provide at least two of the following waterward (R):
   a. Outdoor seating areas.
   b. Benches along pedestrian trail.
c. Outdoor balconies and decks.

d. Public plazas or courtyards with seating.

e. Public viewpoint with interpretive signs.

f. Public art.

B. Streets, Sidewalks, and Trails – Pedestrian Pathways.

1. Purpose.
To result in a pathway design reflecting the form and intensity of adjacent development, as well as the moderate level of pedestrian activity.

2. Pedestrian pathways shall be at least ten feet wide. (R)

3. Lighting shall be provided, either from nearby buildings or from pedestrian-scaled fixtures. (R)

4. Seating should also be provided at intervals. (C)

C. Site Design.

1. Landscape Character Protection.
   a. Purpose.
   To protect, restore, and enhance the natural character of the river, including its geologic features and native vegetation.

   b. Within the Campus district, it is expected that there will be a soft, more “naturalistic” approach to landscape design. Developments will be loosely arranged on the landscape, with a considerable amount of planting, including ground covers, understory, and trees. However, landscape designs that include large lawn areas requiring fertilizers and herbicides, or vegetation that is highly consumptive of water, should be avoided. (C)

   c. Native vegetation should predominate. (C)

2. Impervious Surfaces.
   a. Purpose.
   To recognize that the campus area will have more open development that can allow for pervious surfaces.

   b. Development shall incorporate ways of capturing and filtering run-off so that when it reaches the river, it has been moderately cleaned. This shall be accomplished through creative designs of courtyards, greens, planting areas, parking lots, roof scuppers, and other features. New development shall achieve at least fifteen percent pervious surfaces on the site. The installation of “green roofs” can substitute for ground level treatment. (R)

3. Pervious Surfaces.
   a. Purpose.
   To create a system of spaces integrated with the ecological systems of the shoreline.

   b. Development shall include one or more of the following (R):
i. Open spaces.
ii. Landscaped courtyards.
iii. Plazas.
iv. Greenways.
v. Pathways; or
vi. Other spaces that allow for a seamless connection between streets and various uses.

c. Surfacing of these spaces shall allow for the capture of rainwater and filtration into a natural cleansing system of vegetation and sub-grade materials. (R)

4. Planting Palette.

a. Purpose.
   To recognize the softer landscape of campus settings.

b. Native plant material is strongly encouraged, with non-natives being an occasional exception. Campus settings typically involve a more “natural” array of plantings, rather than a manicured or formal arrangement. However, there may be some locations where specimen trees and formal configurations of plantings are appropriate, such as framing a public space or a building entrance. (C)

5. Rain Gardens.

a. Purpose.
   To incorporate innovative methods of capturing and filtering run-off, as a part of the overall campus site design and landscaping.

b. Rain gardens should be integrated into planting strips along streets, as well as in public spaces and general landscaped areas. (C)

c. Rain gardens shall not be adjacent to or within parking lots if it is determined that they will harm the aquifer. (R)

D. Building Design – Character Related to the Setting.

1. Purpose.
   To ensure that new buildings are complementary or visually subordinate to the natural splendor of the river and falls including its geologic features and native vegetation.

2. Building design should not attempt to compete with the natural beauty of the river and the shoreline. Buildings should incorporate materials and colors that will be restrained and blend with native rock and vegetation. (C)

E. Lighting – Dark Sky.

1. Purpose.
   To reduce glare and spillover from lighting associated with parking lots or buildings.

2. All lighting shall be directed downwards, with cut-off designs that prevent light from being cast horizontally or upward. (R)
3. Building walls shall not be washed with light, nor shall high intensity security lighting be used to flood an area with light. (R)

4. Parking lots shall be lighted with fixtures less than twenty two feet in height. Single, high masts with multiple fixtures shall not be allowed. (R)

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards ((and Guidelines)) Specific to Shoreline Districts
Section 17E.060.840 ((Standards and Guidelines)) Design Standards Specific to the Great Gorge District

A. Shoreline Relationships – Human Activity.

1. Purpose.
   To recognize that people’s relationship to the river and anticipated uses in the Great Gorge district will inform the design of the built environment. The Great Gorge district is a rugged area of steep bluffs, fast water, native plants and wildlife. Passive recreational opportunities are interwoven with residential uses. New development along the riverfront that maintains the natural character of the river gorge as a backdrop for recreation activities is encouraged. These include walking, bicycling, fishing, kayaking, rafting, observing birds/wildlife, and learning the stories of the river through interpretive displays.

2. Along the river, new buildings shall provide at least two of the following (R):
   a. Outdoor seating areas.
   b. Benches along pedestrian trail.
   c. Outdoor balconies and decks.
   d. Public viewpoint with interpretive signs.
   e. Public art.

B. Streets, Sidewalks and Trails – Pedestrian Pathways.

1. Purpose.
   To result in a pathway design, reflecting the mostly residential, lower intensity of adjacent development, as well as the modest level of pedestrian activity.

2. Pedestrian pathways shall be at least ten feet wide. (R)

C. Site Design.

1. Landscape Character Protection.
   a. Purpose.
      To protect, restore, and enhance the natural character of the river including its geologic features and native vegetation.

   b. Within the Great Gorge district, it is expected that there will be a very soft, open, informal, “naturalistic” approach to landscape design that reinforces the shoreline environment. Developments will be loosely arranged on the landscape, with a considerable amount of planting, including ground covers,
understory, and trees. Landscape designs that include large lawn areas requiring fertilizers and herbicides, or vegetation that is highly consumptive of water should be avoided. (C)

c. Native vegetation should predominate. (C)

d. If buildings require exposed pilings for support on hillsides, the ground under the building shall be planted with shade tolerant plantings. Exposed soil shall not be allowed. (R)

e. Exposed pilings should be colored to blend with native rock and the pilings and open space should be screened by tall vegetation. (C)

2. Impervious Surfaces.

a. Purpose.
   To recognize that the Great Gorge area will have more open development that can allow for more pervious surfaces.

b. Development shall incorporate ways of capturing and filtering run-off so that when it reaches the river, it has been moderately cleaned. This shall be accomplished through creative designs of courtyards, greens, planting areas, parking lots, and roof scuppers and other features. Generally, new development shall attempt to achieve at least twenty percent pervious surfaces on the site. The installation of “green roofs” can substitute for ground level treatment. (R)

3. Pervious Surfaces.

a. Purpose.
   To create a system of spaces integrated with the ecological systems of the shoreline.

b. Development shall include one or more of the following (R):
   i. Open spaces.
   ii. Landscaped courtyards.
   iii. Greenways.
   iv. Pathways; or
   v. Other spaces that allow for a seamless connection between streets and various uses.

c. Surfacing of these spaces shall allow for the capture of rainwater and filtration into a natural cleansing system of vegetation and sub-grade materials. (R)

4. Planting Palette

a. Purpose.
   To recognize the dramatic natural landscape of the Great Gorge setting.

b. Native plant material is strongly encouraged. Non-native, ornamental trees requiring large amounts of water and maintenance are strongly discouraged. Landscape designs should reflect a “natural” array of plantings, rather than a manicured or formal arrangement. However, there may be a few locations
where specimen trees and formal configurations of plantings are appropriate, such as framing a public space or a building entrance. (C)

5. Rain Gardens.
   a. Purpose.
      To incorporate innovative methods of capturing and filtering run-off.
   b. Rain gardens should be integrated into planting strips along streets, as well as in exterior landscaped spaces. (C)
   c. Rain gardens shall not be adjacent to or within parking lots if it is determined that they will harm the aquifer. (R)

D. Building Design – Character Related to the Setting.
   1. Purpose.
      To ensure that new buildings are complementary or visually subordinate to the natural splendor of the river and falls, including its geologic features and native vegetation.
   2. Building design should not attempt to compete with the natural beauty of the river and the shoreline. It is expected that buildings will incorporate materials and colors that will be restrained and blend with native rocks and vegetation. (C)
E. Lighting – Dark Sky.

1. Purpose.
   To reduce glare and spillover from lighting associated with parking lots or buildings.

2. All lighting shall be directed downwards, with cut-off designs that prevent light from being cast horizontally or upward. (R)

3. Building walls shall not be washed with light, nor shall high intensity security lighting be used to flood an area with light. (R)

4. Parking lots shall be lighted with fixtures less than 22 feet in height. Single, high masts with multiple fixtures shall not be allowed. (R)

Title 17E Environmental Standards
Chapter 17E.060 Shoreline Regulations
Article V. General Requirements for Shoreline Use and Modifications: Part III. Nonconforming Shoreline Situations
Section 17E.060.380 Nonconforming Uses and Structures

A. Definition.
   Nonconforming development is a shoreline use or structure that was lawfully constructed or established prior to the effective date of the Act, the SMP, or these shoreline regulations, or amendments thereto, but which does not conform to present regulations or standards of these shoreline regulations or the policies of the Act.

B. In accordance with the requirements of this section, structures that were legally established prior to the SMP or these shoreline regulations, or amendments thereto, and are used for a conforming use but which are nonconforming with regard to setbacks, buffers or yards, area, bulk, height, or density may be maintained and repaired and may be enlarged or expanded provided that said enlargement does not increase the extent of nonconformity by further encroaching upon or extending into areas where construction or use would not be allowed for new development or uses.

C. A nonconforming structure which is moved any distance must be brought into conformance with the applicable shoreline regulations and the Act.

D. If a nonconforming structure is damaged to an extent not exceeding seventy-five percent of the replacement cost of the original structure, it may be reconstructed to those configurations existing immediately prior to the time the structure was damaged, provided that application is made for the permits necessary to restore the structure within six months of the date the damage occurred, all permits are obtained, and the restoration is completed within two years of permit issuance, except that nonconforming single-family residences, manufactured homes, and mobile homes may be reconstructed regardless of the extent of damage so long as application is made within the times required by this subsection.
E. The replacement, expansion, or enlargement of nonconforming residential buildings (including single-family residences, manufactured homes, and mobile homes) shall achieve no net loss of shoreline ecological functions pursuant to SMC 17E.060.210 and adhere to the mitigation sequencing requirements in SMC 17E.060.220.

F. Existing nonconforming residential buildings may be replaced within the existing footprint upon approval of a shoreline substantial development permit.

G. For the replacement of manufactured homes and mobile homes, a greater building footprint than existed prior to replacement may be allowed in order to accommodate the conversion of single-wide manufactured homes to double-wide manufactured homes, upon approval of a shoreline conditional use permit.

H. Existing nonconforming single-family residences may be enlarged or expanded in conformance with applicable bulk and dimensional standards upon approval of a shoreline conditional use permit and by conformance with the following requirements:

1. An expansion or enlargement to the main structure or the addition of a normal appurtenance as defined in WAC 173-27-040(2)(g) and chapter 17A.020 SMC, Definitions, to the main structure shall only be accomplished by addition of space:
   a. above the main structure’s building footprint; and/or
   b. onto or behind that side of the main structure which is the farthest away from the ordinary high-water mark.

2. If the requirements in SMC 17E.060.380((F))H((3))1(a) and (b) cannot be accomplished without causing significant harm to shoreline vegetation or other shoreline ecological functions, the director may require additional site analysis to determine if an alternative location for the
expansion or enlargement of the structure is feasible.

I. Existing residential buildings have a change in use to another legal, conforming use shall conform to the buffer and structure setback requirements and all other requirements of the entire SMP and Title 17C SMC, Land Use Standards.

J. A use which is listed as a conditional use but which existed prior to adoption of these shoreline regulations or any amendment thereto, and for which a conditional use permit has not been obtained, shall be considered a nonconforming use.

K. A structure for which a variance has been issued shall be considered a legal nonconforming structure, and the requirements of this section shall apply as they apply to preexisting nonconformities.

L. A structure which is being or has been used for a nonconforming use shall not be used for a different nonconforming use, except as provided below, and only upon the approval of a shoreline conditional use permit.
   1. No reasonable alternative conforming use is practical.
   2. The proposed use will be is as consistent with the policies and provisions of the Act and these shoreline regulations and as compatible with the uses in the area as the preexisting use; and
   3. In addition, such conditions may be attached to the permit as are deemed necessary to assure compliance with the above findings, the requirements of these shoreline regulations and the policies in the Act and to assure that the use will not become a nuisance or a hazard.

M. If a nonconforming use is discontinued for twelve consecutive months or for twelve months during any two-year period, the nonconforming rights shall expire and any subsequent use shall be conforming.

N. An undeveloped lot, tract, parcel, site, or division of land which was established in accordance with local and state subdivision requirements prior to the effective date of the Act or the applicable shoreline regulations but which does not conform to the present lot size standards may be developed if permitted by other land use regulations of the City so long as such development conforms to all other requirements of the applicable shoreline regulations and the Act.
SHORELINE MASTER PROGRAM PERIODIC REVIEW

Periodic Review Checklist

This document is intended for use by counties, cities and towns subject to the Shoreline Management Act (SMA) to conduct the “periodic review” of their Shoreline Master Programs (SMPs). This review is intended to keep SMPs current with amendments to state laws or rules, changes to local plans and regulations, and changes to address local circumstances, new information or improved data. The review is required under the SMA at RCW 90.58.080(4). Ecology’s rule outlining procedures for conducting these reviews is at WAC 173-26-090.

This checklist summarizes amendments to state law, rules and applicable updated guidance adopted between 2007 and 2019 that may trigger the need for local SMP amendments during periodic reviews.

How to use this checklist
See the associated Periodic Review Checklist Guidance for a description of each item, relevant links, review considerations, and example language.

At the beginning of the periodic review, use the review column to document review considerations and determine if local amendments are needed to maintain compliance. See WAC 173-26-090(3)(b)(i).

Ecology recommends reviewing all items on the checklist. Some items on the checklist prior to the local SMP adoption may be relevant.

At the end of your review process, use the checklist as a final summary identifying your final action, indicating where the SMP addresses applicable amended laws, or indicate where no action is needed. See WAC 173-26-090(3)(d)(ii)(D), and WAC 173-26-110(9)(b).

Local governments should coordinate with their assigned Ecology regional planner for more information on how to use this checklist and conduct the periodic review.

<td>2019</td>
<td>OFM adjusted the <strong>cost threshold for building freshwater docks</strong></td>
<td>SMC Section 17E.060.300 item B-8 outlines the cost threshold for a permit exemption when building a freshwater dock</td>
<td>Amend the section and all others with dollar amounts to reflect the new dollar thresholds and periodic cost reviews established by OFM and referred to in ECY requirements:</td>
</tr>
</tbody>
</table>

(XX) Construction of a dock, including a community dock, designed for pleasure craft only, for the private noncommercial use of the owner, lessee, or contract purchaser of single-family and multiple-family residences. A dock is a landing and moorage facility for watercraft and does not include recreational decks, storage facilities or other appurtenances. This exception applies if either:

(i) In salt waters, the fair market value of the dock does not exceed two thousand five hundred dollars; or

(ii) In fresh waters the fair market value of the dock does not exceed:

(A) twenty-two thousand five hundred dollars ($22,500) for docks that are constructed to replace existing docks, are of equal or lesser square footage than the existing dock being replaced; or

(B) Eleven thousand two hundred ($11,200) dollars for all other docks constructed in fresh waters.

However, if subsequent construction occurs within five years of completion of the prior construction, and the combined fair market value of the subsequent and prior construction exceeds the amount specified above, the subsequent construction shall be considered a substantial development for the purpose of this chapter.

ORDINANCE NO. _____________

AN ORDINANCE relating to Shoreline Master Program Periodic Review amending Spokane Municipal Code (SMC) Title 17A Administration, Chapter 17A.020 Definitions, Sections 17A.020.040(R)(2) "D" Definitions and Section 17A.020.060(S) "F" Definitions, Title 17E, Chapter 17E.060, Article II, Part II sections 17E.060.110 and 17E.060.150, Article IV 17E.060.290, 17E.060.300, 17E.060.340, Article VI Part II 17E.060.690, Article VII Part II 17E.060.770, 17E.060.790, Article VIII 17E.060.800, 17E.060.810, 17E.060.820, 17E.060.830, 17E.060.840, and Article V Part III 17E.060.380.

WHEREAS, the Shoreline Master Program (SMP) Periodic Review (PR) is state mandated and led by the City of Spokane in close collaboration with Dept of Ecology. This project is narrowly focused to achieve City SMP compliance with changes to state legislation concerning Shorelines; and

WHEREAS, authority for the periodic review is based on Washington’s Shoreline Management Act (Ch. 90.58 RCW) and related rules. These amendments were developed by the City to comply with WAC 173-26-090, which requires all local governments to review their SMPs on an eight-year schedule set in state law and revise it if necessary; and

WHEREAS, the periodic review ensures the SMP keeps up with changes in state laws, changes in other local jurisdictions' plans and regulations, and other changed circumstances; and

WHEREAS, the City elected to use the optional joint review process to combine the local and Ecology comment periods, as allowed under WAC 173-26-104. No additional comment period occurs during the state review process, however additional city review and comment periods have been provided. Comments provided to the City of Spokane are reviewed by both the City and Ecology; and

WHEREAS, a State Environmental Protection Act (SEPA) Determination of Non-Significance was issued by Planning Services on December 23, 2020 and a 14-day comment period commenced January 5 - January 19, 2021. No comments were received during the comment period.

WHEREAS, the City SMP was reviewed against Dept of Ecology Periodic Review checklist as required; analysis submitted to Ecology. Necessary amendments were identified, and the Draft Amendment Proposal prepared, shared with agencies for review, and uploaded online. An email database of interested parties is maintained for regular communications. Information on the Periodic Review was presented to the public, neighboring jurisdictions, and partner agencies in two virtual Open House sessions via Webex on December 1, 2020. The Community Assembly was briefed on December 3, 2020.

SMP Periodic Review Ordinance format Draft Plan Commission hearing February 24, 2021
City Council Urban Experience February 8, 2021
WHEREAS, a notice of Joint Public Comment Period with Ecology and City of Spokane was published in the Spokesman-Review December 23 and January 5; the comment period commenced January 5 - February 5, 2021 and all comments were recorded, responded to, and provided to Ecology. Ecology provided separate notification.

WHEREAS, this periodic review does not re-evaluate the ecological baseline established as part of the last SMP update, 2011; change shoreline jurisdiction or environment designations; or result in changes to the comprehensive plan.

WHEREAS, Plan Commission hearing legal notices were published in the Spokesman-Review February 10 and February 17, 2021; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2019 (b) Spokane is not one of the 9 jurisdictions with shoreline permitting for Dredged Material Management Program sites and 2019 (c) Spokane has no marine appellation waters; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2017(d), 2017 (e), 2017(f), 2017(g), 2017(h), 2017(i), and 2017(j) as these items are codified in Spokane Municipal Code chapter 17E, consistent with state law, or not required local amendments as active state policy; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2016(a) as SMC 17E.060.300 incorporates ADA compliance RCW 90.58 by reference, and 2016(b) with critical areas updates 2014,

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2015(a) is an optional amendment and not included in this action; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2014(a) is not applicable to City of Spokane as SMC 17E.060.570(F) prohibits over-water residences; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2012(a) as SMP appeal procedures follow RCW 90.58 as amended;

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2011(a) SMC 17E,070.030 outlines the requirement for wetland delineation to use the Federal Manual for Identifying and Delineating Jurisdictional Wetlands; 2011(b) is not applicable to City of Spokane as no saltwater shorelines exist in the jurisdiction; 2011(c) SMC 17E.060.570 prohibits over-water residences; 2011(d) SMC
17E.060.380 identifies and regulates non-conforming structures consistent with state law; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2010(a) SMC 17E.060.170 includes RCW 90.58 and associated WACS by reference - all provision for critical areas that area not consistent with RCW and WAC are void; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2009(a) the City of Spokane does not include this optional provision which is available without adoption; 2009(b) SMC 17E.070.140 allows wetland mitigation banking consistent with state rules; and 2009(c) moratoria procedures are not required to be included in the SMP and the RCW itself is relied upon; and

WHEREAS, after review, finding of adequacy is entered for the following SMP Periodic Review Checklist items 2007(a) SMC 17A.020.060 adopts the associated RCW definition of floodway be reference; 2007(b) Shoreline lists and maps are included in SMC 17E.060.060, no new shorelines with state jurisdiction are present; and 2007(c) SMC 17E.060.300 includes, by reference, the exemptions provided under WAC 173.27.040

WHEREAS, the City Council adopts the recitals set forth herein as its findings and conclusions in support of its amendments to the Spokane Municipal Code as cited; --

Now, Therefore, The City of Spokane does ordain:

Section 1. That Title 17A, chapter 17A.020, section 17A.020.040 “D” Definitions is amended:

A. Day.
   A calendar day. A time period expressed in a number of days is computed by excluding the first day and including the last day. When an act to be done requires a City business day, and the last day by which the act may be done is not a City business day, then the last day to act is the following business day.

B. Debris Flow.
   Slow moving, sediment gravity flow composed of large rock fragments and soil supported and carried by a mud-water mixture.

C. Debris Slide.
   A shallow landslide within rock debris with the slide usually occurring within a relatively narrow zone.

D. “Decibel (dB)” means the measure of sound pressure or intensity.

E. Dedication.
   The deliberate appropriation of land, or an easement therein, by its owner for any general and public uses, reserving to the owner no rights other than those that are compatible with the full exercise and enjoyment of the public uses for which the property has been devoted, and
accepted for such use by or on behalf of the public. The intention to dedicate shall be evidenced by the owner by the presentment for filing of a final plat, short plat, or binding site plan showing the dedication thereon or by dedication deed to the City. The acceptance by the public shall be evidenced by the approval of such plat, short plat, binding site plan, or at the City’s option, by the City recording such dedication deed with the Spokane County auditor.

F. Degraded Wetland.
A wetland altered through impairment of some physical or chemical property which results in reduction of one or more wetland functions and values.

G. Demolition or Partial Demolition.
The destruction, removal, or relocation, in whole or in part, of a building or structure or a significant feature of a building or structure that is of important historical character. Demolition (or partial demolition) does not include the removal of past additions for the express purpose of restoration of a structure to its historic appearance, form, or function. Demolition (or partial demolition) does not include the destruction or removal of portions of a building or structure that are not significant to defining its historic character. This exclusion is valid so long as the demolition is done as part of a design review application approved pursuant to chapter 17C.040 SMC.

H. Density.
The number of housing units per acre as permitted by the zoning code.

I. Denuded.
Land that has had the natural vegetative cover or other cover removed leaving the soil exposed to mechanical and chemical weathering.

J. Department.
Any of the departments of engineering services, planning services, fire department, or parks and recreation for which responsibility has been assigned by charter or code for administration.

K. Design Departure.
Any change that is sought to modify or waive a design requirement (R) or waive a design presumption (P) contained within the design standards. The design departure process is found in chapter 17G.030 SMC, Design Departures.

L. Design Guidelines.
A set of design parameters for development which apply within a design district, sub-district, or overlay zone. The guidelines are adopted public statements of intent and are used to evaluate the acceptability of a project’s design.

M. Design Review Board.
The design review board is defined in chapter 4.13 SMC. The design review board was previously named design review committee. Any reference to design review committee is the same as a reference to the design review board.

N. Designation.
The declaration of a building, district, object, site, or structure as a landmark or historic district.

O. Desired Character.
The preferred and envisioned character (usually of an area) based on the purpose statement or character statement of the base zone, overlay zone, or plan district. It also includes the preferred and envisioned character based on any adopted subarea plans or design guidelines for an area.

P. Detailed Site Plan.
A general site plan to which the following detailed information has been added:

1. Natural vegetation, landscaping, and open spaces.
2. Ingress, egress, circulation, parking areas, and walkways.
3. Utility services.
4. Lighting.
5. Signs.
6. Flood plains, waterways, wetlands, and drainage.
7. Berms, buffers, and screening devices; and
8. Such other elements as required in this chapter.

Q. Developable Area.
Land outside of a critical area and associated buffer including wetlands, fish and wildlife habitat conservation areas, riparian habitat area, landslide areas, steep slope areas, floodplain, floodway, shallow flooding, channel migration zone, and associated buffers, or any other restricted area on a particular piece of property.

R. Development.
1. Any proposed land use, zoning, or rezoning, comprehensive plan amendment, annexation, subdivision, short subdivision, planned unit development, planned area development, conditional use permit, special use permit, shoreline development permit, or any other property development action permitted or regulated by the Spokane Municipal Code.
“Development” for shoreline regulations shall be defined by WAC 173-27-030(6) as amended to read “Development” means a use consisting of the construction or exterior alteration of structures; dredging; drilling; dumping; filling; removal of any sand, gravel, or minerals; bulkheading; driving of piling; placing of obstructions; or any project of a permanent or temporary nature which interferes with the normal public use of the surface of the waters overlying lands subject to the act at any stage of water level. "Development" does not include dismantling or removing structures if there is no other associated development or redevelopment.

S. Development Activity – Floodplain.
Any manmade change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials located within the area of special flood hazard.

T. Development Approval.
Any recommendation or approval for development required or permitted by this code.

U. Development Codes.
The state-adopted codes, boiler and pressure vessel, building, electrical, elevator, fire, mechanical, plumbing, and related publications adopted by the City, along with other provisions of this code that relate to private access to, use and obstruction of public right-of-way, and engineering standards that relate to private construction of public utilities and facilities.

V. Development Permit.
Any permit issued by the City authorizing construction, including a building permit, conditional use permit, substantial development permit, or other permit required by the City.

W. Development Plan, Site.
The final site plan that accompanied a recommendation or approval for development permitted by this code and that may identify standards for bulk and location of activities, infrastructure and utilities specific to the development.
X. **Dike.**

An artificial embankment placed at a stream mouth or delta area to hold back sea water for purposes of creating and/or protecting arable land from flooding.

Y. **Direct Impact.**

An impact upon public facilities that has been identified as a direct consequence or result of a proposed development.

Z. **Directional.**

Any of the four basic compass directions, abbreviated as follows: N, S, E, W, SE, NE, SW, NW shall also be considered as a directional. A directional is placed in front of the root roadway name.

AA. **Directional Sign.**

See SMC 17C.240.015.

BB. **Director.**

The administrative official of the department responsible for compliance with this code, the development codes, and the land use codes. These include the director of building services, director of engineering services, and the director of planning services.

CC. **Discharge (n).**

In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means runoff, excluding offsite flows, leaving a proposed development through overland flow, built conveyance systems, or infiltration facilities.

DD. **Discharge (v).**

In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means any disposal, injection, dumping, spilling, pumping, emitting, emptying, leaching, or placing of any material so that such material enters and exits from the MS4 or from any other publicly owned or operated drainage system that conveys storm water. The term includes other verb forms, where applicable.

EE. **Discharger.**

In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means any person that discharges to the City's MS4 or any other publicly owned or operated drainage system that conveys, manages, or disposes of stormwater flows.

FF. **District.**

A geographically definable area, urban or rural, small or large, possessing a significant concentration, linkage, or continuity of buildings, objects, sites, and/or structures united by past events or aesthetically by plan or physical development.

GG. **Disturbance Area.**

In the context of chapter 17D.090 SMC or chapter 17D.060 SMC, this term means an area where soils are exposed or disturbed by development, both existing and proposed. The disturbance area includes staging and storage areas, structures, and areas needed for vehicle access and maneuvering.

HH. **Dock.**

All platform structures or anchored devices in or floating upon water bodies to provide moorage for pleasure craft or landing for water-dependent recreation.

II. **Documented Habitat.**

Habitat classified by state or federal agencies as critical to the survival of endangered or threatened or sensitive animal, fish, or plant species.

JJ. **Domestic Animal.**

1. **Large Domestic Animals.**
a. Animals including, but not limited to, horses, donkeys, burros, llamas, alpacas, bovines, goats, sheep, swine, and other animals or livestock of similar size and type.

b. Young of horses, mules, donkeys, burros, and llamas under one year in age.

c. Bovines under ten months in age.

d. Sheep, goats, and swine under three months in age are not included when counting large animals.

2. Small Domestic Animals.

a. Fowl including, but not limited to, chickens, guinea hens, geese, ducks, turkeys, pigeons, and other fowl not listed or otherwise defined.

b. Mink, chinchilla, nutria, gnawing animals in general, and other animals of similar size and type.

c. Small livestock are defined as:
   i. swine- breeds include miniature Vietnamese, Chinese or oriental pot-bellied pigs (Sus scrofa vittatus),
   ii. other small pig breeds such as Kunekune, Choctaw, and Guinea hogs,
   iii. all breeds of goats excluding mature large meat breeds such as Boers, and
   iv. all breeds of sheep excluding mature large meat breeds such as Suffolk or Hampshire sheep.
   v. No horned rams shall be permitted as a small livestock.
   vi. Under no circumstance shall a small livestock exceed thirty-six inches shoulder height or one hundred and fifty pounds in weight.

d. Young small animals, livestock or fowl under three months in age are not included when counting small animal, livestock or fowl.

KK. Drainage Ditch.

An artificially created watercourse constructed to drain surface or ground water. Ditches are graded (man-made), channels installed to collect and convey runoff from fields and roadways. Ditches may include irrigation ditches, waste ways, drains, outfalls, operational spillways, channels, stormwater runoff facilities, or other wholly artificial watercourses, except those that directly result from the modification to a natural watercourse. Ditches channels that support fish are considered to be streams.

LL. Dredge Spoil.

The material removed by dredging.

MM. Dredging.

The removal, displacement, and disposal of unconsolidated earth material such as silt, sand, gravel, or other submerged material from the bottom of water bodies; maintenance dredging and other support activities are included in this definition.

NN. Drift Cell.

Or “drift sector” or “littoral cell” means a particular reach of marine shore in which littoral drift may occur without significant interruption and which contains any natural sources of such drift and also accretion shore forms created by such drift.

OO. Driveway.

An all-weather surface driveway structure as shown in the standard plans.

PP. Duplex.

A building that contains two primary dwelling units on one lot. The units must share a common wall or common floor/ceiling.
QQ. Dwelling Unit.
A building, or a portion of a building, that has independent living facilities including provisions for sleeping, cooking, and sanitation, and that is designed for residential occupancy by a group of people. Buildings with more than one set of cooking facilities are considered to contain multiple dwelling units unless the additional cooking facilities are clearly accessory, such as an outdoor grill.

Section 2. That SMC section 17A.020.060 “F” Definitions is amended:

A. Facade.
All the wall planes of a structure as seen from one side or view. For example, the front facade of a building would include all of the wall area that would be shown on the front elevation of the building plans.

B. Facade Easement.
A use interest, as opposed to an ownership interest, in the property of another. The easement is granted by the owner to the City or County and restricts the owner’s exercise of the general and natural rights of the property on which the easement lies. The purpose of the easement is the continued preservation of significant exterior features of a structure.

C. Facility and Service Provider.
The department, district, or agency responsible for providing the specific concurrency facility.

D. Factory-built Structure.
1. “Factory-built housing” is any structure designed primarily for human occupancy, other than a mobile home, the structure or any room of which is either entirely or substantially prefabricated or assembled at a place other than a building site.
2. “Factory-built commercial structure” is a structure designed or used for human habitation or human occupancy for industrial, educational, assembly, professional, or commercial purposes, the structure or any room of which is either entirely or substantially prefabricated or assembled at a place other than a building site.

E. Fair Market Value.
The open market bid price for conducting the work, using the equipment and facilities, and purchase of the goods, services, and materials necessary to accomplish the development. This would normally equate to the cost of hiring a contractor to undertake the development from start to finish, including the cost of labor, materials, equipment and facility usage, transportation and contractor overhead, and profit. The fair market value of the development shall include the fair market value of any donated, contributed, or found labor, equipment, or materials.

F. Fascia Sign.
See SMC 17C.240.015.

G. Feasible (Shoreline Master Program).
1. For the purpose of the shoreline master program, means that an action, such as a development project, mitigation, or preservation requirement, meets all of the following conditions:
   a. The action can be accomplished with technologies and methods that have been used in the past in similar circumstances, or studies or tests have demonstrated in similar circumstances that such approaches are currently available and likely to achieve the intended results;
b. The action provides a reasonable likelihood of achieving its intended purpose;
and

c. The action does not physically preclude achieving the project’s primary intended legal use.

2. In cases where these guidelines require certain actions, unless they are infeasible, the burden of proving infeasibility is on the applicant.

3. In determining an action’s infeasibility, the reviewing agency may weigh the action’s relative public costs and public benefits, considered in the short- and long-term time frames.

H. Feature.
To give special prominence to.

I. Feeder Bluff.
Or “erosional bluff” means any bluff (or cliff) experiencing periodic erosion from waves, sliding, or slumping, and/or whose eroded sand or gravel material is naturally transported (littoral drift) via a driftway to an accretion shoreform; these natural sources of beach material are limited and vital for the long-term stability of driftways and accretion shoreforms.

J. Fill.
The addition of soil, sand, rock, gravel, sediment, earth retaining structure, or other material to an area waterward of the ordinary high-water mark in wetlands, or on shorelands in a manner that raises the elevation or creates dry land.

K. Financial Guarantee.
A secure method, in a form and in an amount both of which are acceptable to the city attorney, providing for and securing to the City the actual construction and installation of any improvements required in connection with plat and/or building permit approval within a period specified by the City, and/or securing to the City the successful operation of the improvements for two years after the City’s final inspection and acceptance of such improvements. There are two types of financial guarantees under chapter 17D.020 SMC, Financial Guarantees:
Performance guarantee and performance/warranty retainer.

L. Fish Habitat.
A complex of physical, chemical, and biological conditions that provide the life-supporting and reproductive needs of a species or life stage of fish. Although the habitat requirements of a species depend on its age and activity, the basic components of fish habitat in rivers, streams, ponds, lakes, estuaries, marine waters, and near-shore areas include, but are not limited to, the following:

1. Clean water and appropriate temperatures for spawning, rearing, and holding.
2. Adequate water depth and velocity for migrating, spawning, rearing, and holding, including off-channel habitat.
3. Abundance of bank and in-stream structures to provide hiding and resting areas and stabilize stream banks and beds.
4. Appropriate substrates for spawning and embryonic development. For stream- and lake-dwelling fishes, substrates range from sands and gravel to rooted vegetation or submerged rocks and logs. Generally, substrates must be relatively stable and free of silts or fine sand.
5. Presence of riparian vegetation as defined in this program. Riparian vegetation creates a transition zone, which provides shade and food sources of aquatic and terrestrial insects for fish.
6. Unimpeded passage (i.e., due to suitable gradient and lack of barriers) for upstream and downstream migrating juveniles and adults.

M. Flag.
   See SMC 17C.240.015.

N. Float.
   A floating platform similar to a dock that is anchored or attached to pilings.

O. Flood Insurance Rate Map or FIRM.
   The official map on which the Federal Insurance Administration has delineated both the areas of special flood hazards and the risk premium zones applicable to the City.

P. Flood Insurance Study (FIS).
   The official report provided by the Federal Insurance Administration that includes flood profiles, the Flood Boundary-Floodway Map, and the water surface elevation of the base flood.

Q. Flood or Flooding.
   A general and temporary condition of partial or complete inundation of normally dry land areas from:
   1. The overflow of inland waters; or
   2. The unusual and rapid accumulation of runoff of surface waters from any source.

R. Flood-proofing.
   Structural provisions, changes, adjustments, or a combination thereof, to buildings, structures, and works in areas subject to flooding in order to reduce or eliminate the damages from flooding to such development and its contents, as well as related water supplies and utility facilities.

S. Floodway.
   (The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than one foot. As defined under Section 90.58.030 RCW, or as amended.) The area, as identified in the shoreline master program, that either: (a) has been established in federal emergency management agency flood insurance rate maps or floodway maps; or (b) consists of those portions of a river valley lying streamward from the outer limits of a watercourse upon which flood waters are carried during periods of flooding that occur with reasonable regularity, although not necessarily annually, said floodway being identified, under normal condition, by changes in surface soil conditions or changes in types or quality of vegetative ground cover condition, topography, or other indicators of flooding that occurs with reasonable regularity, although not necessarily annually. Regardless of the method used to identify the floodway, the floodway shall not include those lands that can reasonably be expected to be protected from flood waters by flood control devices maintained by or maintained under license from the federal government, the state, or a political subdivision of the state.

T. Floor Area.
   The total floor area of the portion of a building that is above ground. Floor area is measured from the exterior faces of a building or structure. Floor area does not include the following:
   1. Areas where the elevation of the floor is four feet or more below the lowest elevation of an adjacent right-of-way.
   2. Roof area, including roof top parking.
   3. Roof top mechanical equipment.
   4. Attic area with a ceiling height less than six feet nine inches.
5. Porches, exterior balconies, or other similar areas, unless they are enclosed by walls that are more than forty-two inches in height, for fifty percent or more of their perimeter; and
6. In residential zones, FAR does not include mechanical structures, uncovered horizontal structures, covered accessory structures, attached accessory structures (without living space), detached accessory structures (without living space).

U. Floor Area Ratio (FAR).
The amount of floor area in relation to the amount of site area, expressed in square feet. For example, a floor area ratio of two to one means two square feet of floor area for every one square foot of site area.

V. Focused Growth Area.
Includes mixed-use district centers, neighborhood centers, and employment centers.

W. Frame Effect.
A visual effect on an electronic message sign applied to a single frame to transition from one message to the next. This term shall include, but not be limited to scrolling, fade, and dissolve. This term shall not include flashing.

X. Freestanding Sign.
See SMC 17C.240.015

Y. Frontage.
The full length of a plot of land or a building measured alongside the road on to which the plot or building fronts. In the case of contiguous buildings individual frontages are usually measured to the middle of any party wall.

Section 3. That Title 17E, chapter 17E.060 Article II: Part II Section 17E.060.110 is amended:

A. The City may initiate an amendment to these shoreline regulations according to the procedures prescribed in WAC 173-26.

B. The City shall conduct a public hearing in accordance with chapter 17G.020 SMC on any amendment proposed.

C. Any person or agency may conduct an amendment to the SMP consistent with both chapter 17G.020 SMC and WAC 173-26.

Section 4. That SMC 17E.060 Article II: Part II 17E.060.160 is amended:

Where the shoreline regulations reference any RCW, WAC, or other local, state, or federal law or regulation, or any source of information, the most recent adopted amendment or adopted current edition shall apply.

Section 5. That SMC chapter 17E.060 Article IV section 17E.060.290 is amended:

A. Purpose.
To ensure that substantial development within the shoreline area is
accomplished in a manner that protects the shoreline ecology consistent with the comprehensive plan and the Shoreline Management Act, this section establishes criteria for determining the process and conditions under which a shoreline substantial development permit may be acted upon by the director.

B. A shoreline substantial development permit is subject to the specific review procedure established in chapter 17G.060 SMC, Land Use Application Procedures, and the conditions which may be imposed to assure compliance with all applicable regulations. A request for a shoreline substantial development permit use may be disapproved if the director finds the shoreline development is inconsistent with these shoreline regulations, the comprehensive plan or the Shoreline Management Act.

C. No use, modification, or development, except for those listed in SMC 17E.060.300, Use, Modifications, and Developments Exempt from Shoreline Substantial Development Permit Requirement, shall be undertaken in the shoreline jurisdiction without first obtaining a shoreline substantial development permit from the director. Substantial developments include any development with which the total cost or fair market value, whichever is higher, does exceed ((five-thousand seven hundred eighteen dollars or)) seven thousand forty seven dollars ($7,047) or the adjusted amount per WAC 173-27-040, or if such development does materially interfere with the normal public use of the water or shorelines of the state. The dollar threshold established in this subsection must be adjusted for inflation by the office of financial management every five years, beginning July 1, 2007, based upon changes in the consumer price index during that time period. The office of financial management must calculate the new dollar threshold and transmit it to the office of the code reviser for publication in the Washington State Register at least one month before the new dollar threshold is to take effect. For the purposes of determining whether or not a permit is required, the total cost or fair market value shall be based on the value of use, modification, or development that is occurring on shorelines of the state as defined in RCW 90.58.030(2)(c). The total cost or fair market value of the development shall include the fair market value of any donated, contributed or found labor, equipment or materials.

D. Where a substantial development is proposed which would be partly within and partly outside of the shoreline jurisdiction, a shoreline substantial development permit shall be required for the entire development.

E. An application for a shoreline substantial development permit for a limited utility extension or for the construction of a bulkhead or other measures to protect a single-family residence and its appurtenant structures from shoreline erosion shall be subject to all of the requirements of these shoreline regulations and shall follow the time period for public comment in SMC 17G.060.130, Public Comment
Period. For purposes of this section, a limited utility extension means the extension of a utility service that:

1. is categorically exempt under chapter 43.21C RCW for one or more of the following: Natural gas, electricity, telephone, water, or sewer;
2. will serve an existing use in compliance with these shoreline regulations; and
3. will not extend more than two thousand five hundred linear feet within the shoreline jurisdiction.

Section 6. That SMC chapter 17E.060 Article IV section 17E.060.300 is amended:

Section 17E.060.300 Uses, Modifications, and Developments Exempt or Exceptioned from Shoreline Substantial Development Permit Requirement

A. Application and Interpretation of Exemptions.

1. Exemptions shall be construed narrowly. Only those uses, modifications, or developments that meet the precise terms of one or more of the listed exemptions may be exempt from the shoreline substantial development permit process.

2. An exemption from the shoreline substantial development permit process is not an exemption from compliance with the Shoreline Management Act or provisions of these shoreline regulations, or from any other regulatory requirements. To be authorized, all uses, modifications, and developments must be consistent with the policies and regulations of the entire SMP and the Act.

3. Pursuant to WAC 173-27-160, a use, modification, or development that is listed as a shoreline conditional use pursuant to these shoreline regulations or is an unlisted use, must obtain a shoreline conditional use permit even though the use, modification, or development does not require a shoreline substantial development permit.

4. When a use, modification, or development is proposed that does not comply with the bulk, dimensional and performance standards of these shoreline regulations, such use, modification, or development can only be authorized by approval of a shoreline variance pursuant to SMC 17E.060.330, Shoreline Variance Permit, and SMC 17E.060.340, Procedures.

5. The burden of proof that a development or use is exempt from the permit process is on the applicant.

6. If any part of a proposed use, modification, or development is not eligible for exemption, then a shoreline substantial development permit is required for the entire proposed project.
7. All permits or statements of exemption issued for a use, modification, or development within the shoreline jurisdiction shall include written findings approved by the director, including compliance with bulk and dimensional standards and policies and regulations of the entire SMP. The director may attach conditions to the approval of exempt uses, modifications, or developments as necessary to assure consistency of the project with the Act and these shoreline regulations.

8. The department of ecology must approve all exemptions requiring permits from the U.S. Army Corps of Engineers section 10 permit under the Rivers and Harbors Act, and any project involving a section 404 permit under the Clean Water Act.

9. Use, modifications, and developments proposed within the shoreline jurisdiction may require permits from other governmental agencies other than the department of ecology.

B. Exemptions.

The following shall not be considered substantial development and are exempt from obtaining a shoreline substantial development permit from the director:

1. Any use, modification, or development of which the total cost or fair market value, whichever is higher, does not exceed ((five thousand dollars)) seven thousand forty seven dollars ($7,047) as of September 2, 2017 or the adjusted amount per WAC 173-27-040 determined by the office of financial management periodically for inflation, if such use, modification, or development does not materially interfere with the normal public use of the water or shorelines of the state. The total cost or fair market value of the use, modification, or development shall include the fair market value of any donated, contributed, or found labor, equipment, or materials.

2. Normal maintenance or repair of existing structures or developments, including damage by accident, fire or elements. “Normal maintenance” means those usual acts to prevent a decline, lapse, or cessation from a lawfully established state comparable to its original condition, including but not limited to its size, shape, configuration, location, and external appearance, within twelve months after decay or partial destruction, except where repair causes substantial adverse effects to shoreline resources or environment. Replacement of a structure or development may be authorized as repair where such replacement is the common method of repair for the type of structure or development and the replacement structure or development is comparable to the original structure or development including but not limited to its size, shape, configuration, location and external appearance and the replacement does not cause substantial adverse effects to shoreline resources or environment.
3. Construction of the normal protective bulkhead common to single-family residences. A “normal protective bulkhead” means those structural and nonstructural developments installed at or near, and parallel to, the ordinary high-water mark for the sole purpose of protecting an existing single-family residence and appurtenant structures from loss or damage by erosion. A normal protective bulkhead is not exempt if constructed for the purpose of creating dry land. When a vertical wall is being constructed or reconstructed, not more than one cubic yard of fill per one foot of wall may be used as backfill. When an existing bulkhead is being repaired by construction of a vertical wall fronting the existing wall, it shall be constructed no further waterward of the existing bulkhead than is necessary for construction of new footings. When a bulkhead has deteriorated such that an ordinary high-water mark has been established by the presence and action of water landward of the bulkhead, then the replacement bulkhead must be located at or near the actual ordinary high-water mark. Beach nourishment and bioengineered erosion control projects may be considered a normal protective bulkhead when any structural elements are consistent with the above requirements and when the project has been approved by the State department of fish and wildlife.

4. Emergency construction necessary to protect property from damage by the elements. An emergency means an unanticipated and imminent threat to public health, safety or the environment which requires immediate action within a time too short to allow full compliance with these shoreline regulations. Emergency construction does not include development of new permanent protective structures where none previously existed. Where new protective structures are deemed by the director to be the appropriate means to address the emergency situation, upon abatement of the emergency situation the new structure shall be removed or any permit which would have been required, absent an emergency, pursuant to chapter 90.58 RCW or these shoreline regulations shall be obtained. All emergency construction shall be consistent with the policies of chapter 90.58 RCW and the entire SMP. As a general matter, flooding or other seasonal events that can be anticipated and may occur but that are not imminent are not an emergency.

5. Construction and practices normal or necessary to maintain existing farming and irrigation activities, including agricultural service roads and utilities in the Latah Creek shoreline jurisdiction presently zoned for agricultural use.

6. Construction or modification, by or under the authority of the coast guard or a designated port management authority, of navigational aids such as channel markers and anchor buoys.

7. Construction on shorelands by an owner, lessee, or contract purchaser of a single-family residence for their own use or for the use of their family, which residence does not exceed a height of thirty-five feet above average
grade level and which meets all requirements of the state agency having jurisdiction thereof or the City of Spokane, other than requirements imposed pursuant to chapter 90.58 RCW. “Single-family residence” means a detached dwelling designed for and occupied by one family including those structures and developments within a contiguous ownership which are normal appurtenance. An “appurtenance” is necessarily connected to the use and enjoyment of a single-family residence and is located landward of the ordinary high-water mark and the perimeter of a wetland. On a statewide basis, normal appurtenances include a garage, deck, driveway, utilities, fences, and grading which does not exceed two hundred fifty cubic yards and which does not involve placement of fill in any wetland or waterward of the ordinary high-water mark. Construction authorized under this exemption shall be located landward of the ordinary high-water mark.

8. Construction of a dock, including a community dock, designed for pleasure craft only, for the private noncommercial use of the owner, lessee, or contract purchaser of single-family and multiple-family residences. A dock is a landing and moorage facility for watercraft and does not include recreational decks, storage facilities, or other appurtenances. ((The fair market value of the dock shall not exceed ten thousand dollars, but if subsequent construction having a fair market value exceeding two thousand five hundred dollars occurs within five years of a completion of the prior construction, the subsequent construction shall be considered a substantial development for the purpose of these shoreline regulations.)) This exemption applies if either:

   a. In fresh waters the fair market value of the dock does not exceed:
      1. Twenty-two thousand five hundred dollars ($22,500) for docks that are constructed to replace existing docks, are of equal or lesser square footage than the existing dock being replaced; or
      2. Eleven thousand two hundred ($11,200) dollars for all other docks constructed in fresh waters.

   However, if subsequent construction occurs within five years of completion of the prior construction, and the combined fair market value of the subsequent and prior construction exceeds the amount specified above, the subsequent construction shall be considered a substantial development for the purpose of this chapter.

9. Operation, maintenance, or construction of canals, waterways, drains, reservoirs, or other facilities that now exist or are hereafter created or developed as a part of an irrigation system for the primary purpose of making use of system waters, including return flow and artificially stored groundwater for the irrigation of lands.
10. The marking of property lines or corners on state-owned lands, when such marking does not significantly interfere with normal public use of the surface of the water.

11. Operation and maintenance of any system of dikes, ditches, drains, or other public facilities existing on September 8, 1975, which were created, developed, or utilized primarily as a part of an agricultural drainage or diking system.

12. Any project with a certification from the governor pursuant to chapter 80.50 RCW.

13. Site exploration and investigation activities that are prerequisite to preparation of an application for development authorization under these shoreline regulations if:
   a. the activity does not interfere with the normal public use of the surface waters;
   b. the activity will have no significant adverse impact on the environment, including but not limited to fish, wildlife, fish or wildlife habitat, water quality, and aesthetic values;
   c. the activity does not involve the installation of any structure and, upon the completion of the activity, the vegetation and land configuration of the site are restored to conditions existing before the activity;
   d. a private entity seeking development authorization under this section first posts a performance bond or provides other evidence of financial responsibility to the City of Spokane to ensure that the site will be restored to preexisting conditions; and
   e. the activity is not subject to the permit requirements of RCW 90.58.550.

14. The process of removing or controlling aquatic noxious weeds, as defined in RCW 17.26.020, through the use of an herbicide or other treatment methods applicable to weed control that are recommended by a final environmental impact statement published by the department of agriculture or the department of ecology jointly with other state agencies under chapter 43.21C RCW.

15. Watershed restoration projects as defined in chapter 17A.020 SMC and RCW 89.08.460. The City of Spokane shall review the projects for consistency with these shoreline regulations pursuant to procedures in chapter 17G.060 SMC. No fee may be charged for accepting and processing requests for exemption for watershed restoration projects as used in this section.

16. A public or private project that is designed to improve fish or wildlife habitat or fish passage when all of the following apply:
a. The project has been approved in writing by the department of fish and wildlife.

b. The project has received hydraulic project approval (HPA) by the department of fish and wildlife pursuant to chapter 77.55 RCW; and

c. The City of Spokane has determined that the project is substantially consistent with these shoreline regulations. The City shall make such determination and provide it by letter to the project proponent.

17. All other uses, modifications, and developments exempted by WAC 173-27-040.

C. Exceptions

Developments not required to obtain shoreline permits or local reviews. Requirements to obtain a Substantial Development Permit, Conditional Use Permit, Variance, letter of exemption, or other review to implement the Shoreline Management Act do not apply to the following:

1. Remedial actions. Pursuant to RCW 90.58.355, any person conducting a remedial action at a facility pursuant to a consent decree, order, or agreed order issued pursuant to chapter 70.105D RCW, or to the department of ecology when it conducts a remedial action under chapter 70.105D RCW.

2. Boatyard improvements to meet NPDES permit requirements. Pursuant to RCW 90.58.355, any person installing site improvements for storm water treatment in an existing boatyard facility to meet requirements of a national pollutant discharge elimination system storm water general permit.

3. WSDOT facility maintenance and safety improvements. Pursuant to RCW 90.58.356, Washington State Department of Transportation projects and activities meeting the conditions of RCW 90.58.356 are not required to obtain a Substantial Development Permit, Conditional Use Permit, Variance, letter of exemption, or other local review.

4. Projects consistent with an environmental excellence program agreement pursuant to RCW 90.58.045.

5. Projects authorized through the Energy Facility Site Evaluation Council process, pursuant to chapter 80.50 RCW.

Section 7. That chapter 17E.060 Article IV section 17E.060.340 is amended:
review is subject to the procedures established in chapter 17G.030 SMC, chapter 17G.040 SMC, and SMC 17G.060.060.

1. Shoreline development by a public agency.
2. Shoreline development on public property.
3. Shoreline development requiring a shoreline conditional use permit.
4. Other types of shoreline permits may also require review by the design review board at the request of the director.

B. Administrative Design Review.
Projects not included in subsection (A) above shall follow procedures for design standards administration in SMC 17E.060.800.)

Section 8. That chapter 17E.060 Article VI: Part II section 17E.060.690 is amended:

A. In addition to this section, shoreline uses are subject to the regulations in Article V, Part I, General Requirements for Shoreline Use.
B. Refer to SMC 17E.060.300 for uses and activities that are exempt from obtaining a shoreline substantial development permit. An exemption from the shoreline substantial development permit process is not an exemption from compliance with the Shoreline Management Act or provisions of these Shoreline Regulations, or from any other regulatory requirements. To be authorized, all uses and activities must be consistent with the policies and regulations of the entire SMP and the Act.
C. To be permitted in the Shoreline Jurisdiction, a use must be permitted in both the shoreline environment and the underlying zone in which it is located.
D. Uses not listed in Table 17E.060-4 or Title 17C may only be authorized as a conditional use.
E. Legend for Table 17E.060-4:
   1. Permitted Uses – “P”
      Uses permitted are listed in Table 17E.060-4 with a “P”. These uses are allowed if they comply with the development standards of these Shoreline Regulations and Title 17C. A shoreline substantial development permit or an exemption from such permit is required, pursuant to SMC 17E.060.290 and SMC 17E.060.300.
   2. Limited Uses – “L”
      Uses allowed that are subject to limitations are listed in Table 17E.060-4 with an “L”. These uses are allowed if they comply with the limitations as listed in the footnotes following the table and the development standards of these Shoreline Regulations and title 17C SMC. A shoreline substantial development permit or an exemption from such permit is required.
   3. Conditional Uses – “CU”
      Uses that are allowed if approved through the shoreline conditional use review process are listed in Table 17E.06-4 with a “CU.” These uses are...
allowed provided they comply with the conditional use approval criteria for that use, the development standards of these Shoreline Regulations and **Title 17C**. Uses listed with a “CU” that also have a footnote number in the table are subject to the standards cited in the footnote.

4. **Uses Not Permitted – “N”**

   Uses listed in Table 17E.060-4 with an “N” are not permitted. Existing uses in categories listed as not permitted are subject to the standards in Chapter **17C.210 SMC**, Land Use Standards Non Conforming Situations, and **SMC 17E.060.380**, Nonconforming Structures and Uses.

**Section 9. That chapter 17E.060 Article VII: Part II section 17E.060.770 is amended:**

A. Purpose.

To preserve views of the river corridor and the scenic environment along the river from the public street system.

B. Visual access shall be achieved by setting buildings back a minimum of fifteen feet from property lines adjacent to public rights-of-way that intersect the shoreline jurisdiction.
C. The following shall apply in the visual access setback:

1. No structures shall be allowed over a height of thirty-six inches; and
2. Vegetative landscaping shall be allowed.

### Public Access Pathway Width

| Public Access Pathway Width | Minimum of 10 feet[^8] |

### Notes:

1. Within the shoreline districts, the most restrictive development standards of both the underlying zone and the shoreline district apply.

2. See the [shoreline buffers map](#) to determine the buffer width within the shoreline jurisdiction.

3. Buildings shall be set back at least fifteen feet from property lines adjacent to public rights-of-way that intersect the shoreline district. This does not apply to structures below grade.

4. See SMC 17E.060.770 for exceptions.

5. See SMC 17E.060.800 for pedestrian views and access for large buildings over three hundred feet.
[6] No structures are allowed within the shoreline buffer and structure setback.

[7] No structure shall exceed thirty-five feet above average grade level within the shoreline jurisdiction that will obstruct the view of a substantial number of residences on or adjoining such shorelines except where the SMP or underlying zoning does not prohibit such development and only when overriding considerations of the public interest will be served. See SMC 17E.060.290(Y), Physical and Visual Public Access.

[8] Public access pathways within a shoreline buffer shall not exceed ten feet in width.

Section 10. That chapter 17E.060 Article VII: Part II section 17E.060.790 is amended:

A. Purpose.
   To limit the length and mass of large buildings within the shoreline jurisdiction and to provide ground level access between the shoreline and the landward side of the building.

B. At a maximum interval of three hundred feet of structure that is generally parallel to the river, there shall be a clear visual and pedestrian penetration at the ground level from a public street to the river corridor.

The visual and pedestrian penetration shall not be less than thirty feet wide and shall meet the requirements of SMC 17E.060.290, Physical and Visual Access, and Article VIII, Design Standards ((and Guidelines)) Specific to Shoreline Districts.

Section 11. That chapter 17E.060 Article VIII 17E.060.800 is amended:

Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards ((and Guidelines)) Specific to Shoreline Districts
Section 17E.060.800 Design Standards Administration

A. Purpose.
   To help ensure that development compliments the unique and fragile character of the shoreline through careful consideration and implementation of site development and building design concepts.

B. The downtown, campus, and great gorge shoreline districts are subject to the shoreline design standards ((and guidelines)) in addition to the underlying design standards in Title 17C SMC. The downriver, Latah Creek, and Upriver Districts
are subject to the underlying design standards in Title 17C SMC.

C. All projects must address pertinent design standards (and guidelines). A determination of consistency with the standards (and guidelines) will be made by the director (following a design review process). Design standards are in the form of requirements (R), presumptions (P), and considerations (C). Regardless of which term is used, an applicant must address each (guideline) design criteria. An applicant may seek to deviate from eligible standards (and guidelines) through the design departure process pursuant to chapter 17G.030 SMC, Design Departures.

1. Requirements (R).
Requirements are mandatory in that they contain language that is not discretionary, such as “shall,” “must,” and “will.” Requirements must be satisfied by any plan prior to building permit approval. An applicant may seek a deviation from certain requirements through the design departure process, chapter 17G.030 SMC. Requirements are listed with an (R) after the standard.

2. Presumptions (P).
Presumptions are (guidelines) design criteria that are meant to be applied, but with some flexibility. Presumptions indicate that the City is open to design features that are equal to, or better than, that stated—so long as the purpose is satisfied. A submitted plan is incomplete and will be rejected if it does not demonstrate that the presumptive elements have been in some way incorporated or overcome. Presumptions are listed with a (P) after the standard.

   a. Overcoming a Presumption.
   A presumption that may be unsuitable for a given project may be waived if an applicant can demonstrate to the director that there is a good reason why the presumption is inappropriate. The director may approve an alternative that achieves the intent of the presumption. At the discretion of the applicant, or in rare cases, the director may refer the permit to the design review board. A referral from the director would be in those cases where the complexity of the project and/or the cumulative impacts of deviations result in the project no longer meeting the overall intent of the design standards and the comprehensive plan.

   b. Appropriate ways to overcome a presumption include:
      i. demonstrating that for a specific project the underlying design principles will not be furthered by the application of the presumption;
      ii. showing that another design principle is enhanced by not applying the presumption;
iii. demonstrating an alternative method for achieving the intent of the presumption; and

iv. explaining the unique site factors that make the presumption unworkable, such as lot size and shape, slope, natural vegetation, drainage, or characteristics of adjacent development, which are identified through their use of materials, colors, building mass and form, and landscaping.

Note: Increases in the cost of development will not be an acceptable reason to waive a design standard or determine that a design standard is inappropriate.

3. Considerations (C).

Design criteria listed as considerations are features and concepts that an applicant should consider in preparing a plan. Their omission is not grounds for rejecting a plan, but their inclusion or recognition is encouraged and may assist in overcoming certain presumptions and in gaining acceptance for a plan. Considerations are listed with a (C) after the standard.

Section 12. That chapter 17E.060 Article VIII section 17E.060.810 is amended:

Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards Specific to Shoreline Districts
Section 17E.060.810 Design Standards Applying to Downtown, Campus, and Great Gorge Districts

A. Shoreline Relationships.
   1. Public Access
      a. Purpose.
         To meet a basic objective of the Shoreline Management Act for public access to the shoreline.
      b. When public access is required, it shall be provided pursuant to SMC 17E.060.290. (R)
      c. Visual access shall be achieved by setting buildings back at least fifteen feet from property lines adjacent to public rights-of-way that intersect the shoreline jurisdiction. (R)
d. A pathway connecting to the nearest public right-of-way is the preferred type of public access. (P)

e. Physical access pathways shall be a minimum of ten feet clear width. (R)

f. The use of pervious materials is recommended for pedestrian surfaces (including pathways and patios) to absorb stormwater runoff. Options include permeable interlocking unit pavers, porous concrete, or porous asphalt. (C)

g. To prevent invasive weeds from colonizing along pathways in the shoreline buffer area, the design of any pathway shall include finished edges. Exposed gravel shoulders shall not be allowed in this area. Soil disturbance shall be minimized during construction and any disturbed soils shall be replanted consistent with native plant colonies in the immediate vicinity. (R)

h. Signs shall be installed to indicate that the pathway is open to the public and the hours during which the public can access the pathway. (R)

2. Site Design.
   a. Urban Green Streets and Urban Pathways.
      i. Street Trees and Planting Strips.
         A. Purpose.
            To supplement the urban forest with new trees and planting as development and redevelopment occur.
B. New development shall include street trees, installed in planting strips located between the curb and sidewalk. To promote tree health in order to gain the benefits associated with trees, consider opportunities when designing streets and sidewalks to provide as much uncompacted soil as possible. Designs shall allow for positive root growth using sustainable solutions that involve innovative means of structural support for the walking surface. (R)

C. Planting strips shall be at least five feet wide and planted with ground cover or native grasses. (R)

D. Native trees, such as evergreens, are encouraged when adequate space is available. (C)

ii. Urban Green Streets and Urban Pathways.

A. Purpose.
To have streets add to the environmental quality of the shoreline environment.

B. Streets within the shoreline jurisdiction shall be planted with a variety of trees, shrubs and ground cover. (R)
C. Techniques for capturing and filtering stormwater run-off shall be incorporated into the design of streets, sidewalks, planting strips, and pathways. (R)

D. Permeable pavement options are encouraged on pedestrian surfaces. These may include permeable interlocking unit pavers, porous concrete, or porous asphalt. (C)

E. Alternatives to standard curbs and planting strips are encouraged to reduce concentrated storm water flowing into landscaped areas. (C)

iii. Overlooks in Public Development.
A. Purpose.
To make the public aware of the rich history and environmental systems associated with the river and the shoreline.

B. Along streets, pathways or within public parks, overlooks should be provided where views of historic and aesthetic features or landmarks of the river are available. (C)

C. Methods, such as signs, should be used to describe aspects of the river, such as geology, hydrology, history, or native cultures. Interpretations can be literal (pictures and words) or symbolic (artwork, shapes, colors, inlays). (C)

b. Overlooks in Private Development.
   i. Purpose.
      To encourage private development to incorporate features that help people understand the setting.

   ii. Along pathways and public spaces, overlooks should be provided where views of the river are available. (C)

   iii. Methods should be used to describe aspects of the river, such as geology, hydrology, history, or native cultures.

i. Purpose.
   To encourage site design to make use of state of the art techniques.

ii. Site design shall reflect nationally recognized Best Management Practices with respect to paving, erosion control, infiltration and filtration, retention and detention, and surface water quality. (R)

iii. A shoreline construction site plan indicating how construction BMP’s will be applied on shoreline sites during construction shall be required, pursuant to SMC 17E.060.260. (R)

d. Low Impact Development (LID).

i. Purpose.
   To encourage site design techniques that protects the environment and water resources by considering the site’s pre-existing hydrologic conditions.

ii. A site plan and shoreline construction site plan shall be required that indicate ways of minimizing impact on existing features, pursuant to SMC 17G.060.070 and SMC 17E.060.260. (R)

iii. Site design consistent with LID principles is encouraged. Examples of LID techniques include site design to retain existing trees and vegetation, impervious surface reduction, rain gardens, retention swales, permeable paving, green roofs, rain barrels, and downspout connections to planters. (C)
B. Site Development.
   1. Vegetation Conservation/Tree Preservation.
      a. Purpose.
         To maintain vegetative cover that holds slopes, filters run-off and
         provides habitat.
      b. There shall be no net loss of vegetative cover within the shoreline
         jurisdiction. (R)
      c. At least twenty-five percent of existing healthy “significant trees”
         (over six-inches in caliper) as identified by a qualified professional
         and shown on a shoreline construction site plan shall be retained
         when a site is developed. Design and construction methods shall
         ensure the protection and health of retained trees during
         construction. (R)
      d. Within the designated shoreline buffers, native vegetation shall be
         preserved. Lawns shall not extend into this area. (R)
      e. Vegetation that is removed for development purposes shall be
         replaced on site. Alternatively, if a qualified professional determines
         that is not feasible, the applicant shall contribute an amount equal
         to replacing the vegetation on site to a shoreline restoration fund to
         be used to restore identified restoration sites pursuant to the City of
         Spokane shoreline restoration plan. (R)
2. Clearing and Grading.
   a. Purpose.
      To carefully control the effects of land disturbance so that the natural systems immediately adjacent to the river are protected.
   b. Site design shall identify measures to protect the shoreline buffer from disturbance both during construction and throughout occupancy. (R)
   c. Limited removal of noxious species of non-native plants shall be allowed so that native species can thrive, pursuant to SMC 17E.060.270, Vegetation Replacement Plan. (R)
   d. Altering the natural flow of water to the river shall not be allowed, except during construction to prevent the flow of sediments or chemicals into the river. (R)

C. Building Design.
   1. Sustainability.
      a. Purpose.
         To encourage new development to embody sustainable features.
      b. New development within the shoreline should be designed to reflect criteria for at least LEED Certification, if not higher. (C)

   2. Green Roofs.
      a. Purpose.
         To encourage innovative, sustainable elements in new roofs.
      b. New commercial development should consider the appropriateness of incorporating green roof technology as a possible option to capture, retain, and filter rainwater. (C)

a. **Purpose.**
   To ensure building design that complements and blends with the natural character of the shoreline environment.

b. **Buildings shall incorporate a variety of features to reduce their bulk and scale.** At least two of the following shall be employed (R):
   i. Bay windows.
   ii. Visible roofs such as pitched, sloped, curved, angled.
   iii. Deep off-sets of facades.
   iv. Projecting elements creating shadow lines.
   v. Terraces or balconies

c. **The upper floor(s) of building shall incorporate at least one of the following features (R):**
   i. A visible roof: Pitched, sloped, peaked, curved, angled.
   ii. A stepping back of the top floor(s) by at least five feet.
   iii. An overhanging roof form.
   iv. A distinct change of materials on the upper floor(s).
D. Signs.
Signs within the shoreline jurisdiction shall be regulated pursuant to chapter 17C.240 SMC. (R)

E. Lighting – Cut-off.
   1. Purpose.
      To prevent glare and spillover.
   2. All site lighting, including parking lot lighting, shall be directed downward, using internal or external cut-off methods and must be contained on site. (R)

Section 13. That chapter 17E.060 Article VIII section 17E.060.820 is amended:
Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards (and Guidelines) Specific to Shoreline Districts
Section 17E.060.820 (Standards and Guidelines) Design Standards Specific to the Downtown District

A. Shoreline Relationships – Human Activity.

1. Purpose.
   To recognize that people’s relationship to the river and anticipated uses in each district will inform the design of the built environment. Downtown is an intense urban environment where people and views of the falls create much of the interest in being there. New development along the riverfront that will facilitate desired activities is encouraged. These include shopping, dining, walking, biking, jogging, people watching, viewing the falls, and learning the stories of the river through interpretive displays.

2. Along the river, new buildings shall provide at least three of the following (R):
   a. Outdoor seating or opportunities for outdoor dining.
   b. Building entry from the river side.
   c. Benches along pedestrian trail.
   d. Outdoor balconies.
   e. Public plaza with seating.
   g. Public art.
   h. Opportunities for outdoor vending such as food or bicycle rental.
B. Streets, Sidewalks, and Trails – Pedestrian Pathways.

1. Purpose.
To result in an urban pathway design reflecting the form and intensity of adjacent development, as well as a higher level of pedestrian activity.

2. Pedestrian pathways shall be at least ten feet wide. (R)

3. Pedestrian pathways shall be lighted either from nearby buildings or from pedestrian-scaled fixtures. (R)

4. Seating should be provided at intervals. (C)

C. Site Design.

1. Landscape Character Protection.
   a. Purpose.
      To ensure that development along the shoreline enhances the natural character of the river and falls including its geologic features and native vegetation.
   
   b. Parking and service areas shall be located so they are screened from views along the shoreline, from opposite shorelines, and from bridges. (R)

2. Pervious Plazas and Spaces.
   a. Purpose.
      To create a system of spaces integrated with the ecological systems of the shoreline.
   
   b. Development shall include one or more of the following (R):
      i. Open spaces.
      ii. Courtyards.
      iii. Plazas.
      iv. Forecourts; or
      v. Other public spaces that allow for a seamless connection between streets and various uses.

   c. Surfacing of these spaces shall allow for the capture of rainwater and filtration into a natural cleansing system of vegetation and sub-grade materials. (R)
3. Impervious Surfaces.
   
a. Purpose.
   To reduce stormwater runoff rates and volumes, while recognizing that the downtown area will have more intense development and more hard surfaces than other districts.
b. New development shall include at least ten percent pervious surfaces. This may be accomplished by using one or a combination of the following (R):

   i. At-grade planted areas.
   ii. Permeable paving systems in pedestrian surfaces such as pedestrian walkways or plazas.
   iii. Green roofs.
   iv. Each existing significant tree (over six inches caliper and in good health) protected during design and construction may reduce the total required pervious surface requirement by one percent per tree. The required pervious surface shall not be reduced to less than five percent. For example, an applicant retaining two significant trees shall be required to provide eight percent pervious surfaces; an applicant retaining six significant trees shall be required to provide five percent pervious surfaces. Please note that all landscape requirements shall be met regardless of pervious surface requirements.

c. Stormwater runoff from impervious surfaces shall be directed to treatment or detention areas. For non-pollution generating impervious surfaces (generally this includes most surfaces not traveled on by automobiles) this may include one or a combination of the following as approved by director of engineering services (R):

   i. Stormwater planters.
   ii. Tree box filters.
   iii. Water features.
   iv. Landscaped areas including swales or rain gardens.
   v. Cistern for later on-site irrigation.
vi. Other options as approved by engineering services.

![Diagram of rain gardens with native plantings integrated into an urban streetscape.]

- Raised curbs are discouraged in parking lots so that stormwater runoff can drain naturally into City approved percolation areas rather than be directed into a concentrated flow. At grade curb alternatives to finished asphalt edges are encouraged. (C)

4. Planting Palette.

   a. Purpose.
   To protect, enhance and restore native vegetation along the shorelines, while recognizing the more urban nature of vegetation in the downtown area.

   b. It is recognized that within downtown, there will likely be a somewhat more manicured and formal use of plantings to frame buildings, streets and spaces. However, landscape designs that
rely upon lawns requiring fertilizers and herbicides, or vegetation that is highly consumptive of water should be avoided. (C)

c. Lawns should be limited to areas where a green walking surface is necessary and desirable, in picnic areas for example. Plants should be chosen for year round interest and grouped according to their water needs for good water efficiency. Drought tolerant species and native plantings are highly encouraged. Native trees, shrubs and groundcover plants should dominate the landscape. (C)

D. Building Design.

1. Character Related to the Setting.
   a. Purpose.
      To ensure that new buildings are complementary or visually subordinate to the natural splendor of the river and falls, including its geologic features and native vegetation.
   
      b. The dramatic nature of the river and the falls define the image of downtown Spokane in a way unlike any other city. Therefore, new buildings should respect the importance of this magnificent and unique centerpiece by not attempting to compete with it visually. Buildings should be designed with respect to location, form and color, so that the river continues to be the emphasis. (C)
   
      c. Building facades should also incorporate elements that strengthen the natural setting, such as local stone, bay windows, fine-grained articulation, lower floors that frame public spaces, surrounding vegetation. The preference is to have buildings that seem like a built extension of rock, embankments, and outcroppings. (C)

2. Building Orientation.
   a. Purpose.
      To ensure that buildings along the shoreline have two public faces – one along the street, the other along the riverfront.

      b. While it is expected that buildings will be primarily oriented toward public streets, there shall also be features such as windows, secondary entries, balconies, and public spaces that are oriented to the river. (R)

3. Ground Floor Animation.
   a. Purpose.
      To ensure that buildings take advantage of their unique shoreline setting and contribute to the vitality and activity of downtown.

      b. The ground floor of buildings shall incorporate a combination of at least three of the following features (R):
i. Windows covering more than thirty percent of the ground level façade facing the shoreline.

ii. Windows covering more than thirty percent of the ground level façade facing the street.

iii. Masonry or stone covering the ground level façade and producing a “plinth” effect.

iv. Ground level details such as accent lighting, decorative medallions, and canopies.

v. Sculpture, bas relief murals, art worked into paved surfaces.

vi. Retail uses, such as cafes and restaurants, bike rental, and brew pubs.

vii. Publicly accessible gardens, courtyards, or plazas.

E. Lighting – Dark Sky.

1. Purpose.
   To reduce glare and spillover from lighting associated with parking lots or buildings.

2. All lighting shall be directed downwards, with cut-off designs that prevent light from being cast horizontally or upward. (R)

Section 14. That chapter 17E.060 Article VIII section 17E.060.830 is amended:

Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards (and Guidelines) Specific to Shoreline Districts
Section 17E.060.830 (Standards and Guidelines) Design Standards Specific to the Campus District

A. Shoreline Relationships – Human Activity.

1. Purpose.
   To recognize that people’s relationship to the river and anticipated uses in
the Campus district will inform the design of the built environment. The Campus district is an area in which passive recreation is interwoven with academic, commercial, residential, and light industrial functions. New development along the riverfront should contribute to the campus-like setting, focus attention on the river as a community asset, and improve the natural aesthetics for recreational activities. These include rowing, bicycling, walking, observing birds/wildlife, and learning the stories of the river through interpretive displays.

2. New buildings shall provide at least two of the following waterward (R):
   a. Outdoor seating areas.
   b. Benches along pedestrian trail.
   c. Outdoor balconies and decks.
   d. Public plazas or courtyards with seating.
   e. Public viewpoint with interpretive signs.
   f. Public art.

B. Streets, Sidewalks, and Trails – Pedestrian Pathways.

   1. Purpose.
      To result in a pathway design reflecting the form and intensity of adjacent development, as well as the moderate level of pedestrian activity.

   2. Pedestrian pathways shall be at least ten feet wide. (R)

   3. Lighting shall be provided, either from nearby buildings or from pedestrian-scaled fixtures. (R)

   4. Seating should also be provided at intervals. (C)

C. Site Design.

   1. Landscape Character Protection.

      a. Purpose.
         To protect, restore, and enhance the natural character of the river, including its geologic features and native vegetation.

      b. Within the Campus district, it is expected that there will be a soft, more “naturalistic” approach to landscape design. Developments will be loosely arranged on the landscape, with a considerable amount of planting, including ground covers, understory, and trees. However, landscape designs that include large lawn areas requiring fertilizers and herbicides, or vegetation that is highly consumptive of water, should be avoided. (C)

      c. Native vegetation should predominate. (C)

   2. Impervious Surfaces.
a. Purpose.
To recognize that the campus area will have more open development that can allow for pervious surfaces.

b. Development shall incorporate ways of capturing and filtering run-off so that when it reaches the river, it has been moderately cleaned. This shall be accomplished through creative designs of courtyards, greens, planting areas, parking lots, roof scuppers, and other features. New development shall achieve at least fifteen percent pervious surfaces on the site. The installation of “green roofs” can substitute for ground level treatment. (R)

3. Pervious Surfaces.

a. Purpose.
To create a system of spaces integrated with the ecological systems of the shoreline.

b. Development shall include one or more of the following (R):
   i. Open spaces.
   ii. Landscaped courtyards.
   iii. Plazas.
   iv. Greenways.
   v. Pathways; or
   vi. Other spaces that allow for a seamless connection between streets and various uses.

c. Surfacing of these spaces shall allow for the capture of rainwater and filtration into a natural cleansing system of vegetation and sub-grade materials. (R)

4. Planting Palette.

a. Purpose.
To recognize the softer landscape of campus settings.

b. Native plant material is strongly encouraged, with non-natives being an occasional exception. Campus settings typically involve a more “natural” array of plantings, rather than a manicured or formal arrangement. However, there may be some locations where specimen trees and formal configurations of plantings are appropriate, such as framing a public space or a building entrance. (C)

5. Rain Gardens.
a. Purpose.
To incorporate innovative methods of capturing and filtering run-off, as part of the overall campus site design and landscaping.

b. Rain gardens should be integrated into planting strips along streets, as well as in public spaces and general landscaped areas. (C)

c. Rain gardens shall not be adjacent to or within parking lots if it is determined that they will harm the aquifer. (R)

D. Building Design – Character Related to the Setting.

1. Purpose.
To ensure that new buildings are complementary or visually subordinate to the natural splendor of the river and falls including its geologic features and native vegetation.

2. Building design should not attempt to compete with the natural beauty of the river and the shoreline. Buildings should incorporate materials and colors that will be restrained and blend with native rock and vegetation. (C)

E. Lighting – Dark Sky.

1. Purpose.
To reduce glare and spillover from lighting associated with parking lots or buildings.

2. All lighting shall be directed downwards, with cut-off designs that prevent light from being cast horizontally or upward. (R)

3. Building walls shall not be washed with light, nor shall high intensity security lighting be used to flood an area with light. (R)

4. Parking lots shall be lighted with fixtures less than twenty two feet in height. Single, high masts with multiple fixtures shall not be allowed. (R)

Section 15. That chapter 17E.060 Article VIII section 17E.060.840 is amended:

Chapter 17E.060 Shoreline Regulations
Article VIII. Design Standards ((and Guidelines)) Specific to Shoreline Districts
Section 17E.060.840 ((Standards and Guidelines)) Design Standards Specific to the Great Gorge District

A. Shoreline Relationships – Human Activity.

1. Purpose.
To recognize that people’s relationship to the river and anticipated uses in the Great Gorge district will inform the design of the built environment. The Great Gorge district is a rugged area of steep bluffs, fast water, native plants and wildlife. Passive recreational opportunities are interwoven with residential uses. New development along the riverfront that maintains the
natural character of the river gorge as a backdrop for recreation activities is encouraged. These include walking, bicycling, fishing, kayaking, rafting, observing birds/wildlife, and learning the stories of the river through interpretive displays.

2. Along the river, new buildings shall provide at least two of the following (R):
   a. Outdoor seating areas.
   b. Benches along pedestrian trail.
   c. Outdoor balconies and decks.
   d. Public viewpoint with interpretive signs.
   e. Public art.

B. Streets, Sidewalks and Trails – Pedestrian Pathways.
   1. Purpose.
      To result in a pathway design, reflecting the mostly residential, lower intensity of adjacent development, as well as the modest level of pedestrian activity.
   2. Pedestrian pathways shall be at least ten feet wide. (R)

C. Site Design.
   1. Landscape Character Protection.
      a. Purpose.
         To protect, restore, and enhance the natural character of the river including its geologic features and native vegetation.
      b. Within the Great Gorge district, it is expected that there will be a very soft, open, informal, “naturalistic” approach to landscape design that reinforces the shoreline environment. Developments will be loosely arranged on the landscape, with a considerable amount of planting, including ground covers, understory, and trees. Landscape designs that include large lawn areas requiring fertilizers and herbicides, or vegetation that is highly consumptive of water should be avoided. (C)
      c. Native vegetation should predominate. (C)
      d. If buildings require exposed pilings for support on hillsides, the ground under the building shall be planted with shade tolerant plantings. Exposed soil shall not be allowed. (R)
      e. Exposed pilings should be colored to blend with native rock and the pilings and open space should be screened by tall vegetation. (C)
   2. Impervious Surfaces.
a. Purpose.
   To recognize that the Great Gorge area will have more open development that can allow for more pervious surfaces.

b. Development shall incorporate ways of capturing and filtering run-off so that when it reaches the river, it has been moderately cleaned. This shall be accomplished through creative designs of courtyards, greens, planting areas, parking lots, and roof scuppers and other features. Generally, new development shall attempt to achieve at least twenty percent pervious surfaces on the site. The installation of “green roofs” can substitute for ground level treatment. (R)

3. Pervious Surfaces.
   a. Purpose.
      To create a system of spaces integrated with the ecological systems of the shoreline.

   b. Development shall include one or more of the following (R):
      i. Open spaces.
      ii. Landscaped courtyards.
      iii. Greenways.
      iv. Pathways; or
      v. Other spaces that allow for a seamless connection between streets and various uses.

   c. Surfacing of these spaces shall allow for the capture of rainwater and filtration into a natural cleansing system of vegetation and sub-grade materials. (R)

4. Planting Palette
   a. Purpose.
      To recognize the dramatic natural landscape of the Great Gorge setting.

   b. Native plant material is strongly encouraged. Non-native, ornamental trees requiring large amounts of water and maintenance are strongly discouraged. Landscape designs should reflect a “natural” array of plantings, rather than a manicured or formal arrangement. However, there may be a few locations where specimen trees and formal configurations of plantings are appropriate, such as framing a public space or a building entrance. (C)

5. Rain Gardens.
a. Purpose.
   To incorporate innovative methods of capturing and filtering run-off.

b. Rain gardens should be integrated into planting strips along streets, as well as in exterior landscaped spaces. (C)

c. Rain gardens shall not be adjacent to or within parking lots if it is determined that they will harm the aquifer. (R)

D. Building Design – Character Related to the Setting.

1. Purpose.
   To ensure that new buildings are complementary or visually subordinate to the natural splendor of the river and falls, including its geologic features and native vegetation.

2. Building design should not attempt to compete with the natural beauty of the river and the shoreline. It is expected that buildings will incorporate materials and colors that will be restrained and blend with native rocks and vegetation. (C)
E. Lighting – Dark Sky.

1. Purpose.
   To reduce glare and spillover from lighting associated with parking lots or buildings.

2. All lighting shall be directed downwards, with cut-off designs that prevent light from being cast horizontally or upward. (R)

3. Building walls shall not be washed with light, nor shall high intensity security lighting be used to flood an area with light. (R)

4. Parking lots shall be lighted with fixtures less than 22 feet in height. Single, high masts with multiple fixtures shall not be allowed. (R)

Section 16. That chapter 17E.060 Article V Part III section 17E.060.380 is amended:

A. Definition.
   Nonconforming development is a shoreline use or structure that was lawfully constructed or established prior to the effective date of the Act, the SMP, or these shoreline regulations, or amendments thereto, but which does not conform to present regulations or standards of these shoreline regulations or the policies of the Act.

B. In accordance with the requirements of this section, structures that were legally established prior to the SMP or these shoreline regulations, or amendments thereto, and are used for a conforming use but which are nonconforming with regard to setbacks, buffers or yards, area, bulk, height, or density may be maintained and repaired and may be enlarged or expanded provided that said enlargement does not increase the extent of nonconformity by further encroaching upon or extending into areas where construction or use would not be allowed for new development or uses.

C. A nonconforming structure which is moved any distance must be brought into conformance with the applicable shoreline regulations and the Act.

D. If a nonconforming structure is damaged to an extent not exceeding seventy-five percent of the replacement cost of the original structure, it may be reconstructed to those configurations existing immediately prior to the time the structure was damaged, provided that application is made for the permits necessary to restore the structure within six months of the date the damage occurred, all permits are obtained, and the restoration is completed within two years of permit issuance, except that nonconforming single-family residences, manufactured homes, and mobile homes may be reconstructed regardless of the extent of damage so long as
application is made within the times required by this subsection.

E. The replacement, expansion, or enlargement of nonconforming residential buildings (including single-family residences, manufactured homes, and mobile homes) shall achieve no net loss of shoreline ecological functions pursuant to SMC 17E.060.210 and adhere to the mitigation sequencing requirements in SMC 17E.060.220.

F. Existing nonconforming residential buildings may be replaced within the existing footprint upon approval of a shoreline substantial development permit.

G. For the replacement of manufactured homes and mobile homes, a greater building footprint than existed prior to replacement may be allowed in order to accommodate the conversion of single-wide manufactured homes to (double-wide) manufactured homes, upon approval of a shoreline conditional use permit.

H. Existing nonconforming single-family residences may be enlarged or expanded in conformance with applicable bulk and dimensional standards upon approval of a shoreline conditional use permit and by conformance with the following requirements:

1. An expansion or enlargement to the main structure or the addition of a normal appurtenance as defined in WAC 173-27-040(2)(g) and chapter 17A.020 SMC, Definitions, to the main structure shall only be accomplished by addition of space:
   a. above the main structure’s building footprint; and/or
   b. onto or behind that side of the main structure which is the farthest away from the ordinary high-water mark.
2. If the requirements in SMC 17E.060.380((F))H((3))1(a) and (b) cannot be accomplished without causing significant harm to shoreline vegetation or other shoreline ecological functions, the director may require additional site analysis to determine if an alternative location for the expansion or enlargement of the structure is feasible.

I. Existing residential buildings have a change in use to another legal, conforming use shall conform to the buffer and structure setback requirements and all other requirements of the entire SMP and Title 17C SMC, Land Use Standards.

J. A use which is listed as a conditional use but which existed prior to adoption of these shoreline regulations or any amendment thereto, and for which a conditional use permit has not been obtained, shall be considered a nonconforming use.

K. A structure for which a variance has been issued shall be considered a legal nonconforming structure, and the requirements of this section shall apply as they apply to preexisting nonconformities.

L. A structure which is being or has been used for a nonconforming use shall not be used for a different nonconforming use, except as provided below, and only upon the approval of a shoreline conditional use permit.
   1. No reasonable alternative conforming use is practical.
   2. The proposed use will be is as consistent with the policies and provisions of the Act and these shoreline regulations and as compatible with the uses in the area as the preexisting use; and
   3. In addition, such conditions may be attached to the permit as are deemed necessary to assure compliance with the above findings, the requirements...
of these shoreline regulations and the policies in the Act and to assure that the use will not become a nuisance or a hazard.

M. If a nonconforming use is discontinued for twelve consecutive months or for twelve months during any two-year period, the nonconforming rights shall expire and any subsequent use shall be conforming.

N. An undeveloped lot, tract, parcel, site, or division of land which was established in accordance with local and state subdivision requirements prior to the effective date of the Act or the applicable shoreline regulations but which does not conform to the present lot size standards may be developed if permitted by other land use regulations of the City so long as such development conforms to all other requirements of the applicable shoreline regulations and the Act.

PASSED by the City Council on __________________________.

I returned a call to Mark Gauthier, UCUT wildlife biologist, this morning at 10 AM. Marc has not yet prepared comments on the SMP PR documents but wanted to check in on the project scope as well as future City of Spokane SMP update (more extensive). We discussed the narrow scope of the current periodic review (seeking compliance with state legislative changes). Also the opportunity to address broader concerns from the wildlife biologist purview for future efforts being welcome comments as well. I emphasized the invitation to broadly disseminate the online project page links and proposed scheduling for the city periodic review to his professional community and interested personal contacts. I explained that the 30-day public comment period is joint with city and state.

I will be working remotely until further notice and will respond to emails as quickly as possible. Thank you for your patience!

Sincerely,

Melissa

If you are not the intended recipient of this message or an agent of the intended recipient, or if this message has been addressed to you in error, please immediately alert the sender by reply email and then delete this message and any attachments.

Hello Robin,
Ecology got back to me on your questions re: updating the SMC to use OFM dollars as of most current available in this review. Yes, we can. Further, I am going through all sections with similar language and ensuring that we have a current OFM number in place, along with language that looks forward and stipulates that future updated OFM numbers will be applied. Does this get to your question with a responsive answer?
Thank you for your input!
Also Happy Groundhog Day

I will be working remotely until further notice and will respond to emails as quickly as possible. Thank you for your patience!

Sincerely,
Melissa
Hi Melissa:
Thank you for notifications on the SMA update. Just a question, could the dollar amount of the exemption be revised to reflect today’s cost per the OFM? I believe it is approximately $7,000.

B. Exemptions. The following shall not be considered substantial development and are exempt from obtaining a shoreline substantial development permit from the director: 1. Any use, modification, or development of which the total cost or fair market value, whichever is higher, does not exceed five thousand dollars or the adjusted amount per WAC 173-27-040, if such use, modification, or development does not materially interfere with the normal public use of the water or shorelines of the state. The total cost or fair market value of the use, modification, or development shall include the fair market value of any donated, contributed, or found labor, equipment, or materials. 2. Normal maintenance or repair of existing structures or developments, including damage

Thank you,
Robin
TO: Agencies and Interested Parties

Good Afternoon,

Attached is the Plan Commission Special Meeting agenda for January 21. The agenda includes the rescheduled Shoreline Master Program joint City & Dept of Ecology workshop (due to windstorm January 13, 2021).

The City project webpage for additional information and documents located here: https://my.spokanecity.org/projects/shoreline-master-program-periodic-update/ The 30-day joint agency public comment period is also in place and runs through February 5, although comments, feedback, and questions are always encouraged.

Thank you for your patience due to the weather emergency. Please contact me if you have any questions.

I will be working remotely until further notice and will respond to emails as quickly as possible. Thank you for your patience!

Sincerely,

Melissa

City of Spokane Planning Services Dept.
Attn: Melissa Wittstruck, Assistant Planner
6th Floor, 808 W. Spokane Falls Blvd.
Spokane, WA 99201-3333

RE: Shoreline Master Program Periodic Review Amendment

Dear Ms. Wittstruck,

Thank you for the opportunity to comment on this Periodic Review of the City of Spokane’s Shoreline Master Program (SMP). The Washington Department of Fish and Wildlife (WDFW) provides our comments and recommendations in keeping with our legislative mandate to preserve, protect, and perpetuate fish and wildlife and their habitats for the benefit of future generations - a mission we can only accomplish in partnership with local governments.

We understand the City has elected to use the optional joint review process with the Department of Ecology and there will be no additional comment period during the state review process. WDFW would like to take this opportunity to inform the City that we recently finalized our updated Priority Habitats and Species (PHS) publications on riparian ecosystems. In May 2018, we published the manuscript for PHS Riparian Ecosystems, Vol. 1: Science Synthesis and Management Implications which meets the criteria of being an independently peer reviewed source of Best Available Science on what riparian ecosystems need in order to be fully functioning habitat for fish and other aquatic species. In December 2020, we finalized the companion PHS Riparian Ecosystems, Vol.2: Management Recommendations in which we recommend to local governments and other landowners and land managers how to apply the science summarized in Volume 1.

The PHS Riparian Ecosystems publications state that rather than simply serving as “buffers” for their adjacent waterbody, riparian areas are important as ecosystems in and of themselves, warranting levels of protection and management not based solely on a waterbody’s typing according to fish use. While shoreline riparian areas do function as aquatic buffers by protecting and improving water quality, they also provide terrestrial habitat used by wildlife for movement, nesting, reproduction, foraging and refugia.

We look forward to working with you to ensure that future updates of the SMP include the review of Site Potential Tree Height at 200-years (SPTH$_{200}$) and the Channel Migration Zone (CMZ) as the method in which to determine the width of the Riparian Management Zone (RMZ). In locations where SPTH$_{200}$ information is not available, or is less than 100 feet, as indicated by this web map, the science informs us that a minimum 100- foot setback is still appropriate in most instances to ensure the RMZ can adequately provide its pollution removal function. (Certain site characteristics, including soil type and adjacent land uses, may require an even larger distance to ensure pollution removal.)

WDFW provides its recommendations through the lens of our agency’s mandate. We appreciate that local governments must weigh many considerations when making decisions about land use plans and activities, and that
tradeoffs sometimes must be made. To that end, WDFW supports site-specific mitigation and decision making within the context of watershed and other landscape scales as appropriate. We recommend flexibility in mitigation requirements so that wildlife and human needs are accommodated; in locations where the level of riparian protection WDFW recommends cannot be observed, such as with setback distances, mitigation which preserves the functions and values of the RMZ should be developed and applied. WDFW is available and eager to assist the City of Spokane in these situations.

Thank you again for the opportunity to comment on this update process. WDFW understands that our new PHS Riparian Ecosystem volumes reflect some significant changes to the approach our state has taken to riparian ecosystem protection for decades, and that local jurisdictions may have additional questions about how best to implement the new guidance. Please do not hesitate to contact me to discuss these guidelines and future implementation.

Sincerely,

Leslie King

cc:
Robin,

Thank you for joining the PC workshop yesterday. That is a very good question – which I will have to check in with Ecology for. I’ll email Jeremy and Lauren as well as touch base with OFM and get back to you asap. I’ve haven’t been tracking state furlough days since December, so it could be early next week. There are also West side jurisdictions I can check code reviews for.

Have a good weekend

I will be working remotely until further notice and will respond to emails as quickly as possible. Thank you for your patience!

Sincerely,

Melissa

Subject
Residents, businesses, and community leaders are engaging with the City of Spokane in a neighborhood-led effort to revitalize East 5th Avenue between Liberty Park and Thor/Freya in the East Central neighborhood. The outcome is an action-oriented strategy with priorities to leverage community assets, programs, and services. This multi-faceted project reflects the diversity of East Central Spokane, and the outcome supports efforts to foster neighborhood identity and enhance the quality of life for citizens and businesses along the 5th Avenue corridor.

Project Update
The project convened a stakeholder group through a series of three stakeholder roundtables and two community forums in late 2019 and early 2020 to explore community priorities and identify action items for improvement. Discussions centered on resident and stakeholder leadership, emphasized community services and programs, and focused on building partnerships, collaboration, and community ownership of the initiative.

Impact
The outcome is a community vision and strategy that is inclusive and unified, and provides strategic actions for improvements, programming, and community building along 5th Avenue. The 5th Avenue Initiative was paused due to the COVID-19 pandemic in 2020, but community emphasis has continued to push forward for adoption by resolution in 2021.

View the draft community strategy and meeting materials on the project page: https://my.spokanecity.org/projects/5th-avenue-initiative/

Background
The 5th Avenue Initiative builds on previous efforts in 2016 and 2017 with an updated community-driven approach and commitment to ensuring diversity is represented. The City resumed the process in 2019 with a focus on communication and relationship bridging, hiring a community leader to help facilitate the discussion.

Plan Commission Consideration:
The draft community strategy will be reviewed by the Plan Commission and then forwarded to City Council for consideration of adoption by resolution in early 2021.

Motion
The Plan Commission makes a motion of support for the 5th Avenue Initiative Community Strategy to the City Council for consideration and resolution.
5TH AVENUE COMMUNITY STRATEGY

Background and **Overview**

The 5th Avenue Initiative is a neighborhood-driven effort to revitalize East 5th Avenue between Liberty Park and Thor/Freya in the East Central neighborhood. In partnership with the City of Spokane, this project presents a community vision that is inclusive and unified. It provides strategic actions for improvements, programming, and community building along 5th Avenue. Reflecting the diversity of East Central, the outcome supports efforts to foster neighborhood identity and enhance the quality of life for residents at every life stage and economic condition, and to promote local businesses along the 5th Avenue corridor.

**Neighborhood History**

East Central is one of the oldest and most diverse neighborhoods in Spokane. Developed in the late 1800s and early 1900s as a strong community of working-class and immigrant families, the neighborhood grew in connection with industrial development (Figure 2). It was the first neighborhood built east of the city’s downtown core. However, the financial success that prospered early did not last long.

Beginning in the 1920s, core industries declined after World War I and land values in East Central dropped. The Federal Housing Administration, which was established in 1934, refused to insure mortgages in and near African American, low income, and immigrant neighborhoods — a policy known as “redlining.” The federal Home Owners’ Loan Corporation (HOLC) created redlined maps to determine the kinds of mortgages it would insure in cities across the country, including in Spokane (Figure 3). This worked to segregate...
African American communities, making it difficult or impossible for people in certain areas to access mortgage financing and become homeowners and build equity. The maps identified East Central neighborhood as an area of limited funds and improvements, and by the 1950s it had become one of the poorest neighborhoods in Spokane along with other redlined neighborhoods in West Central and Hillyard. Still, East Central remained home not just to thousands of families from all different backgrounds, but hundreds of businesses which employed many of its residents. The struggles of the previous decades had left a robust, if less well-off, community.

This decline eventually made for cheap land and East Central became a focus for federal highway planners in the 1950s looking to develop the national system of highways. One of three options through Spokane, the interstate was routed through East Central with devastating and traumatic impacts for residents. The development of I-90 split the neighborhood into two sections north and south of the freeway, leveled over a thousand homes, and displaced residents—the majority of whom were African American and immigrant families. Liberty Park was the oldest and most elaborate city park in Spokane at the time, and a source of pride for the community. However, the park was destroyed when the City sold 26 of its 28 acres for the freeway (Figure 4). Due to traffic being redirected onto the freeway, nearly all the long-standing businesses struggled to stay open and many were forced to close.

The community continued to fight for the neighborhood and its residents. In the 1970s, the East Central Community Center was conceived by the League of Women for Community Action, and was opened in 1979 after a laborious five years of lobbying, planning and fundraising by residents to get the City to purchase the building site. It was the first community center to open in Spokane, and neighborhoods in West Central and northeast Spokane rallied to create their own soon after.

This history of housing discrimination and legacies of racial and economic inequality have had long-lasting impacts on the 5th Avenue community and East Central neighborhood. In the face of these challenges, however, the area remains rich in community, history, and unique resources, and 5th Avenue continues to be an important cultural place for the many residents who have called it home over the decades.
Honoring Heritage and Building Legacy
The 5th Avenue area in East Central is remains a community of immense diversity: families and individuals at every stage of life; immigrant communities from all over the world; and residents of various backgrounds, races, ethnicities, faiths, and income levels (Figure 5). Though neighborhood demographics have evolved, the area is still one of the most diverse communities in Spokane, with 35% of residents as Black, Indigenous and People of Color—compared to 19% of residents citywide. In particular, the area has been an important cultural center for the African American community for decades. In 1970, 20% of residents were Black or African American; by 2019 this decreased to 9% while Asian, Native Hawaiian and Other Pacific Islander, multi-racial, and Hispanic/Latino populations increased during this time.

The 5th Avenue commercial area is reflective of this diversity, with businesses that are African American-owned, and organizations that support local immigrant communities like the Marshallese, Latino/Hispanic, and Russian-speaking communities. The area serves people from all backgrounds and income levels across the city and region, and this is an important value the residents want to preserve.

Businesses, community organizations, and churches have been working to revitalize 5th Avenue as a catalyst for a renewed vision in East Central. There has been much progress already, including the opening of Fresh Soul, the Carl Maxey Center, and SERA Youth Tutoring and Recreation Center. The Martin Luther King, Jr. Family Outreach Center moved into the East Central Community Center in 2018 to become the Martin Luther King Jr. Family Outreach Center at East Central. The campus is expanding with more space, SNAP, Community Colleges of Spokane’s Head Start program, and with building the CHAS Dental Health Clinic connected to the Center. Starting in 2020, the Eastside Library will be rebuilt in Liberty Park with nearly double the space and will feature a Children’s Zone programming space. The Children of the Sun Trail is planned to connect with the Centennial Trail and Ben Burr Trail through East Central, and the City recently invested in sidewalk improvements and planting new street trees along the 5th Avenue commercial area.

5th Avenue Initiative
In 2016, the community began engaging with the City under former Mayor David Condon’s administration on a vision for 5th Avenue from Liberty Park to Thor/Freya. The 5th Avenue Initiative was identified as a priority focus for concerted efforts to counter decades of disinvestment. Discussions initially began with the challenge that the East Central neighborhood has never healed from the impact that the I-90 construction caused to the community. Nor does the community feel that this legacy has been adequately addressed. Community problems identified included an underutilized commercial area, lack of cultural identity, need for pedestrian and streetscape improvements, and lack of community coordination. The objective was to address past mistakes and reconnect residents and the neighborhood to opportunities that can strengthen and reinvigorate the community in culturally relevant ways.
The 5th Avenue area is at a unique crossroad. New investments both private and public are creating new opportunities, and community stakeholders have come together to articulate a strategy to build upon this momentum (Figure 6). The area’s location is an important asset for residents and a strength to build from when considering strategies for neighborhood improvement. While signs of reinvestment are more visible, families who live in the neighborhood still face significant challenges. There is much concern about gentrification and displacement of current residents as changes come. Strategies that support people where they are at and work to enhance livelihoods for the whole community will help ensure everyone can achieve a successful life.

Development of the Community Strategy
The 5th Avenue Initiative built on previous discussions in 2016 and 2017 with additional and expanded stakeholder meetings in late 2019 and early 2020 (Figure 7). The City contracted with a facilitator and community liaison to help convene and lead conversations. Three stakeholder meetings were held in November and December 2019 to review previous discussions, provide project updates, and identify emerging challenges and opportunities. A community forum was held in December 2019, and through these conversations, initial themes rose to the surface. Priorities for each theme were developed, and a second community forum was held in February 2020. Community members reviewed the priorities, shared what is most important, and discussed next steps for moving forward.
The priorities in this strategy provide guidance to the community, City, and partners for projects, needs, and desired outcomes. The initiative brought together a diverse group of residents, businesses, property owners, and organizations to focus on collaboration. This strategy hopes to capture the community momentum and focus the energy to keep the important work alive today and for the future. The hope is that both the social and economic health of 5th Avenue is fostered, nurtured, and strengthened for residents going forward. As a guiding document, implementation will require the ongoing support and advocacy of the 5th Avenue stakeholders and residents.

In 2020, the emergence of the COVID-19 pandemic paused work on the 5th Avenue Initiative. The vision presented in the draft community strategy helps make the 5th Avenue community stronger and more resilient, and supports the health, safety, and wellbeing of the community. Many longstanding challenges rooted in historical trauma continue to challenge the 5th Avenue area, and it remains one of the most vulnerable areas in the City of Spokane. During the pandemic, access to safe and quality housing has been heightened, and thus the need to preserve affordability in the 5th Avenue area will be important going forward to mitigate displacement and support residents’ continued heritage and legacy in East Central.
Strategic Priorities

A. Define the 5th Avenue identity and foster collaboration.

In stakeholder discussions and the community forums, participants expressed that one of the first steps they would like to engage in is to define the 5th Avenue neighborhood identity as both unique and a part of the East Central neighborhood. With changing demographics, it is also important to emphasize the diverse and rich heritage of 5th Avenue, including the historic African American community and the emerging Asian, Marshallese and Hispanic/Latinx communities. As part of the discussion around identity, there is strong concern over gentrification that could change the fabric of the neighborhood and displace current residents. Addressing cultural, economic, and social equity are important points in directing if and how change will occur, and for whom the benefits will emerge. With this initiative, the community is in a unique position to guide these discussions and help influence the outcome of revitalization activities and growth as it comes to the area. Establishing a coalition and framework to continue engaging residents, businesses, and community organizations is considered an important part of the success of the strategy moving forward. This could be additional civic forums, a coordination committee, or other framework that convenes the group and helps organize a collective community voice.

A1. Work as a community to define the 5th Avenue neighborhood identity that honors the history of the neighborhood and celebrates the diversity of cultures.

A2. Advocate for equitable policies and projects that address gentrification, preserve the identity of the neighborhood, and support cultural equity.

A3. Develop a story map that documents the story of the 5th Avenue area.

A4. Establish a 5th Avenue coalition to organize and coordinate strategic efforts, identify funding and partnerships, and advocate for the community.

A5. Expand shared experiences for residents that promotes physical and emotional well-being, fosters social connections, helps with community healing.

A6. Seek out and promote opportunities for community art, culture, and expression.

A7. Build awareness of how to participate in City and other public processes, neighborhood council meetings, and connect with fellow community members.

B. Promote coordination among community service providers.

Improve access to key assets within the 5th Avenue area by connecting residents to information about resources, support, and program offerings. Community service providers in the area support local residents as well as people from all over the region, including the MLK Jr. Outreach Center at East Central, Carl Maxey Center, Southeast Reunion Association, Southeast Daycare Center, SNAP, the incoming CHAS dental clinic, and numerous faith-based organizations. Ongoing coordination among organizations can help foster relationship building and develop a shared understanding of programs and collaboration for resources. Providers can work together to support the community while also developing and supporting their niche focus and core audience. This can help strengthen programming and minimize overlap. It can also make it easier for residents to understand the resources available and how to access and engage with community service providers.

B1. Identify the best way to communicate with the 5th Avenue residents, businesses, and organizations. Consider a resource guide and community calendar of events. Address language and cultural barriers to make outreach accessible and relevant.
B2. Expand youth and intergenerational programming. Topics include tutoring, mentoring, extracurricular activities, parental support and parenting skills, health and wellness, and food security and nutrition.

B3. Create one annual community event that promotes the area, supports neighborhood diversity, and encourages visitors.

B4. Develop partnerships to increase participation from businesses like Fred Meyers and Dominos in neighborhood council meetings, stakeholder meetings, and other community events.

C. Improve the 5th Avenue streetscape to promote safety and accessibility.

Continue to build on past and recent investments in infrastructure and capital facilities with enhanced streetscapes. A major priority is traffic calming solutions along 5th Avenue to support pedestrians and non-motorized uses. This includes through the commercial area; the intersection of 5th and Altamont; around community service providers; and the connection between the MLK Jr. Outreach Center at East Central, the relocated Eastside Library, and neighborhoods parks. Desired outcomes are expanded street lighting, sidewalk improvements, bump outs, improved bus shelters, and green infrastructure along 5th Avenue.

C1. Identify opportunities and partnerships for funding a streetscape improvement plan and follow-up improvements. Consider traffic calming, lighting, sidewalk improvements including bump outs and benches.

C2. Explore wayfinding signage that calls more attention to community assets and local businesses.

C3. Participate with WSDOT in the North Spokane Corridor planning to identify locations for pedestrian crossings over I-90 that connects 5th Avenue to the East Sprague Business District. vii

C4. Work with STA to enhance public transit stops along 5th Avenue with safe and welcoming amenities and placemaking.

C5. Explore a solution for an enhanced pedestrian connection between 5th Avenue and the Perry District.

D. Preserve and expand options for affordable housing to support residents at every life stage and economic condition.

The 5th Avenue area is one of the most diverse areas for homeownership in Spokane, particularly for households of color. viii The area is critical to providing affordable housing options for many households that would not be able to achieve homeownership in other parts of the city. Yet even with this affordability, close to half of households in the area are cost-burdened, meaning they spend more than 30% of their household income on housing costs. It is important to support the social and economic health of existing residents and help sustain affordable housing opportunities. The community and partners can promote existing repair and rehab programs, and provide guidance to homebuyers through training, courses, and other loan programs. Affordable housing projects that support multi-generational and immigrant families is also an important part of maintaining and fostering community in the area. Mixed income developments that include both affordable and marketing rate housing can support successful lives for all residents in all phases of their life and economic condition.

D1. Establish a community vision for affordable housing in the 5th Avenue area that prioritizes anti-displacement strategies for residents. Explore opportunities and resources that support a community land trust homeownership model and shared-equity homeownership programs.

D2. Participate in City discussions on housing. Hold civic forums to educate and mobilize residents on issues of ownership and long-term residency.

D3. Maintain affordable, older single-family housing with incentives and training for low-income households to repair and weatherize their homes. Promote community resources and programs.
D4. Explore ways to incentivize the development of high-quality, affordable, mixed-income, and multi-generational housing. Explore development of student housing opportunities for nearby colleges.

D5. Expand culturally relevant training with community organizations and local realtors to offer homeownership, equity, and finance courses for residents to pursue and maintain homeownership if desired.

E. Promote vibrant neighborhood commercial opportunities and jobs that reflects the diversity of the community.

Projects and strategies that support both a strong community and a strong place will be key to a vibrant and resilient commercial area along 5th Avenue. In 2015, the City eliminated parking requirements in neighborhood retail areas for buildings less than 3,000 square feet to help encourage revitalization of small scale, neighborhood serving businesses. The small commercial area is zoned neighborhood retail, which encourages businesses that are neighborhood serving and pedestrian-oriented. Some stakeholders expressed concern over current zoning limitations along 5th Avenue, particularly related to the limited neighborhood retail zone. The community would like to explore ways to maximize existing commercial opportunities with locally-owned cultural businesses and services that meet neighborhood needs. In addition to supporting existing businesses, the neighborhood can also further identify appropriate spaces and desires for targeted commercial development and active reuse of vacant spaces. Ideas include community gathering spaces, coffee shop, ethnic food, bakery, and local restaurants.

E1. Identify appropriate spaces for targeted businesses and build partnerships with property owners for active reuse.

E2. Work with City to identify neighborhood ideas for adapting and reusing the current Eastside Library building.

E3. Promote and encourage placemaking activities, like sidewalk art, intersection art, and the play streets program to temporarily reclaim public spaces.

E4. Promote the existing Community Empowerment Zone incentive program by identifying opportunities to create small-scale manufacturing opportunities and jobs, like incubator spaces or craft businesses.

E5. Explore ways to maximize the current neighborhood retail zoning to support locally-owned and cultural businesses and services that meet neighborhood needs.

E6. Encourage discussions around the City’s land use plan and related policy for recommendations to commercial and residential changes along 5th Avenue that support mixed zoning, including a City-sponsored Comprehensive Plan amendment to commercialize specific parcels.

F. Protect and enhance neighborhood parks and trails.

Enhance the experience at neighborhood parks with amenities and play while also protecting local natural areas and trees. The development of the Children of the Sun Trail provides an opportunity to expand connections to the Ben Burr Trail and Centennial Trail, and the commercial areas along East Sprague and Perry District. The community can advocate for efforts and improvements that advance environmental justice for the community, and support the physical, mental, and emotional health and wellbeing of residents.

F1. Request installation of electrical power and more lighting at Underhill Park for safety and events. Expand amenities at both Liberty Park and Underhill Park, including art and interactive play equipment. Explore designating an area dog park.

F2. Maintain natural areas and natural beauty in neighborhood parks. Organize community clean-ups in the parks.
F3. Support efforts to expand trail connections between Underhill Park and Liberty Park, the Ben Burr Trail and the Children of the Sun Trail.

F4. Establish a one-mile walking route/heritage and culture route around the neighborhood to encourage residents to build community and increase physical wellbeing.

F5. Seek resources to mitigate and reverse the effects of environmental hazards past and present.

Next Steps and Implementation

Developed in partnership with the City of Spokane, the 5th Avenue strategy will require the ongoing support and commitment of residents, businesses, property owners, community organizations, and other partners. This document provides an overview of community priorities and provides guidance to ensure policies and projects align to the neighborhood vision. Each priority action will require further analysis and funding for implementation. Still, this is an important step for the 5th Avenue community that lays the foundation for when funding, resources, and partner opportunities arise. The 5th Avenue community can pursue the following next steps in order to successfully implement the plan and develop key catalyst projects:

- Funding: Build partnership and advocate for potential funding sources for priority projects. Consider grants, public/private partnerships, fundraising, and community volunteer efforts.
- Update: Consider reviewing and updating the priorities on an annual basis to address completed projects and changed neighborhood conditions.

Stakeholders prioritized the following next step actions at the December 2019 community forum:

1. Defining who the community is – What is the 5th Avenue identity? Who does 5th Avenue represent?
2. Organize coalition for potential capital and power to facilitate needed changes
3. Continue to improve street and sidewalk infrastructure
4. Rally community stakeholders around a starter initiative
5. Create gateway entrance that is reflective of the community and identity
6. Address zoning limitations
7. Adapt previous East Central Library building with community focus
8. Address community safety
9. Finish developing commercial parcels/buildings along 5th Avenue
10. Leverage NSC development

---

1 Race alone or in combination with one or more other races
2 Probability that two individuals chosen at random would be of different races or ethnicities. Data were obtained from the Census’ American Community Survey 2013-2017 estimates and calculated by PolicyMap.
4 Comparable data is Spokane County
5 All Other Data: U.S. Census Bureau, 2015-2019 American Community Survey
RESOLUTION NO. ________

A RESOLUTION RECOGNIZING THE 5TH AVENUE COMMUNITY STRATEGY DEVELOPED BY THE 5TH AVENUE INITIATIVE STAKEHOLDERS AND COMMUNITY AS A DECLARATION OF PRIORITIES AND ACTIONS TO REVITALIZE EAST 5TH AVENUE BETWEEN LIBERTY PARK AND THOR/FREYA IN THE EAST CENTRAL NEIGHBORHOOD.

WHEREAS, the 5th Avenue Initiative is a neighborhood-driven effort in partnership with the City of Spokane that builds on previous community discussions and efforts to revitalize the East 5th Avenue area from 2016 and 2017; and,

WHEREAS, the East Central neighborhood and East 5th Avenue community are one of the most diverse areas in the City with strong communities of African Americans, Asians, Marshelleese, and Hispanic/Latinx; and,

WHEREAS, the 5th Avenue Initiative was identified as a priority focus under former Mayor David Condon’s administration for concerted efforts to counter decades of systemic disinvestment rooted in redlining; and,

WHEREAS, discussions initially began to address the challenge that the East Central neighborhood has never healed from the impact that the I-90 freeway construction caused to the community in the 1950s; and,

WHEREAS, the 5th Avenue community feels this legacy has not been adequately addressed socially, economically, or equitably; and,

WHEREAS, the City helped re-engage a stakeholder group of residents, businesses, property owners, community organizations, and agency partners in 2019; and,

WHEREAS, the City secured the services of an independent contractor and community liaison for the purpose of facilitating the process and engaging the community (OPR 2019-0977), and signed a contract on October 28, 2019 with Pastor Rodney McAuley with Spokane Youth for Christ; and,

WHEREAS, the City and facilitator held a series of 3 community meetings and 2 forums to discuss priorities and issues, and identify and explore community actions from November 2019 to February 2020; and

WHEREAS, community problems identified by the neighborhood include a lack of identity and coordination for 5th Avenue; underutilized and underinvested commercial
areas; a need for traffic calming, pedestrian and streetscape improvements; a need for preserving affordable housing; addressing the pressures of gentrification and displacement; and a desire to preserve neighborhood parks and expand amenities; and,

WHEREAS, the 5th Avenue Draft Community Strategy was prepared and shared with stakeholders in February 2020, to reflect the diverse community in the 5th Avenue area, present a community vision that is inclusive and unified, and provide strategic actions for improvements, programming, and community building along 5th Avenue; and,

WHEREAS, the 5th Avenue Community Strategy documents the desires of the 5th Avenue stakeholders and community for City decision-makers as they consider future funding and implementation measures for City plans and projects; and

WHEREAS, the Plan Commission recommended the Spokane City Council approve the resolution recognizing the plan on ___________; and

WHEREAS, the 5th Avenue Initiative and Community Strategy carries forward momentum among the community to enhance the quality of life for residents at every life stage and economic condition, hoping that this will result in a strong community and strong economy that uplifts the 5th Avenue community with pride and investment; and,

NOW THEREFORE, BE IT RESOLVED that the 5th Avenue Community Strategy is recognized as a written record of the 5th Avenue Initiative stakeholders’ and community’s ongoing desire and effort to revitalize 5th Avenue, encourage equitable development, and create a vibrant, healthy, active, safe, and connected community for all neighbors, businesses, and community organizations.

ADOPTED by the City Council this__day of___________________, 2021.

Assistant City Attorney
Subject
This update is for Phase I of the Unified Development Code and general Spokane Municipal Code Maintenance. This code maintenance project was reviewed at the September 23 and November 11, 2020 Plan Commission workshops.

A draft ordinance of Phase I amendments is included in the hearing packet for Plan Commission. If Plan Commission recommends approval, the draft ordinance will move forward to City Council hearing.

Background
The 2020 Unified Development Code (UDC) Maintenance Project is a list of proposals for changes to some Titles in the Spokane Municipal Code (SMC). These are most often proposed by city staff over time. The Maintenance project purpose is to respond to needed corrections, changing conditions, and the potential for improvements for all users.

This is the first overall maintenance effort undertaken and proposed for adoption since 2015. Several chapters of the SMC will be included. Shaping Spokane, the 2017 adopted City of Spokane Comprehensive Plan Chapter 3 Land Use policy 7.2 calls out a continuing review process; the continuing need for periodic maintenance of the SMC is intended to aid the public in preparing applications for development and reviews by staff relying on code citations and the enforcement of same.

This proposal is Phase I of a multi-phase effort coming to Plan Commission for consideration and recommendations, and eventually, to City Council over the next 12 months. Phase I consists of minor corrections.

Phase I proposed amendments are categorically exempt from State Environmental Policy Act (SEPA) as stated in Washington Administrative Code (WAC) Procedural Actions 197-11-800(19)(a)(b).

To help understand the types of changes that are addressed in maintenance projects, the amendments have been consistently categorized under three general types over the last two decades. The first category is MINOR. These are the types of proposals coming to Plan Commission in late 2020.

Minor: These include corrections to cross references to repealed or renumbered sections in Titles; an example is the recent repeal of sections of chapter 11.19 that remain in Title 17 SMC. In some cases, redundant phrasing, or inaccurate word choice without changing meaning or substance are also categorized as minor.

Later phases anticipated in 2021 are the next two categories, CLARIFICATION and SUBSTANTIVE.

Clarification: These include changes such as fixing conflicting provisions within the code or fixing code provisions that were either oversights or mistakes when the code was adopted.
**Substantive:** These include changes such as adjusting permitted uses, adjusting a development standard, or improving the practical application of the code.

**Action:** Plan Commission deliberation and recommendation for City Council.

Draft ordinance attached to this briefing paper:
ORDINANCE NO. _____________

WHEREAS, the maintenance of the Unified Development Code (UDC) and in general the Spokane Municipal Code (SMC) has been a periodic, recurring project of Planning Services as well as other City departments over the course of the last two decades to maintain consistency and clarity as local policy documents needs or local, State and Federal regulations change; and

WHEREAS, Planning Services has identified Phase I of multiple sections of SMC chapters require minor corrections, elimination of redundancy, or other non-substantive action; and

WHEREAS, Shaping Spokane, the 2017 adopted City of Spokane Comprehensive Plan Chapter 3 Land Use policy 7.2 calls out a continuing review process; and

WHEREAS, the continuing need for periodic maintenance of the SMC is intended to aid the public in preparing applications for development by relying on code citations and the enforcement of same necessitates active review and corrections; and

WHEREAS, the processing of applications and enforcement activity is anticipated to be more efficient by eliminating the time spent on resubmittal after explanation of the current or correct language of SMC Titles, including Title 17, affecting the applicant, improving customer service; and

WHEREAS, amendments to Title 17 SMC do require Plan Commission review or recommendation whether the amendment affects a land use action or not; and

WHEREAS, this action is categorically exempt from the State Environmental Policy Act (SEPA) RCW 43.21 as stated in Washington Administrative Code (WAC) Procedural Actions 197-11-800(19)(a)(b); and

WHEREAS, a Notice of Intent to amend and adopt SMC multiple chapter sections including 04.13.015, 17C.110.100, 17C.124.110, 17C.220.060, 17E.050.080 Appendix B, 17F.010.050, 17F.040.140, 17G.040.040(B), 17G.060.020(A)(3), 17G.060.070(B)(5)(c), 17G.070.220(A), 17G.080.070(C)(5), as part of periodic maintenance of the SMC was published in the City Gazette November 25 and December 2 2020, updated on the city online project page https://my.spokanecity.org/projects/2020-2021-unified-development-
Section 1. That SMC section 04.13.015 (E) is amended:
04.13.015(E) Administrative Agencies and Procedures; Design Review Board
Purpose.
The design review board is hereby established to:
   A. improve communication and participation among developers, neighbors, and the City
      early in the design and siting of new development subject to design review under the
      Spokane Municipal Code;
   B. ensure that projects subject to design review under the Spokane Municipal Code are
      consistent with adopted design guidelines and help implement the City’s
      comprehensive plan;
   C. advocate for the aesthetic quality of Spokane’s public realm;
   D. encourage design and site planning that responds to context, enhances pedestrian
      characteristics, considers sustainable design practices, and helps make Spokane a
      desirable place to live, work, and visit;
   E. provide flexibility in the application of development design standards as allowed
      through development design standard departures; and
   F. ensure that public facilities and projects within the City’s right-of-way:
      1. wisely allocate the City’s resources,
      2. serve as models of design quality.

Section 2. That SMC section 17C.110.100 (B) and (C) is amended:
17C.110.100 (B) and (C) Residential Zones; Residential Zones Primary Uses; Limited
Uses (L) and Conditional Uses (CU)
A. Permitted Uses (P). Uses permitted in the residential zones are listed in Table 17C.110-
1 with a "P." These uses are allowed if they comply with the development standards and
other standards of this chapter.
B. Limited Uses (L). Uses permitted that are subject to limitations are listed in Table
17C.110-1 with an "L." These uses are allowed if they comply with the limitations as listed
in the footnotes following the table and the development standards and other standards of
this chapter. In addition, a use or development listed in SMC 17C.320.080, (Design
Criteria) Decision Criteria, is also subject to the standards of this chapter. The paragraphs
listed below contain the limitations and correspond with the bracketed [ ] footnote numbers
from Table 17C.110-1.
C. Conditional Uses (CU). Uses that are allowed if approved through the conditional use
review process are listed in Table 17C.110-1 with a "CU." These uses are allowed provided
they comply with the conditional use approval criteria for that use, the development
standards and other standards of this chapter. Uses listed with a "CU" that also have a
footnote number in the table are subject to the standards cited in the footnote. In addition,
a use or development listed in SMC 17C.320.080, (Decision Criteria) is also subject to the standards of this chapter. The conditional use review process and approval criteria are stated in chapter 17C.320 SMC, Conditional Uses.

D. Uses Not Permitted (N). Uses listed in Table 17C.110-1 with an "N" are not permitted. Existing uses in categories listed as not permitted are subject to the standards of chapter 17C.210 SMC, Nonconforming Situations.

Section 3. That SMC section 17C.124.110 (A)(7)(a) is amended:

Chapter 17C.124 Downtown Zones

Section 17C.124.110 Limited Use Standards

The paragraphs listed below contain the limitations and correspond with the bracketed [ ] footnote numbers from Table 17C.124-1.

1. Group Living.
   This regulation applies to all parts of Table 17C.124-1 that have a [1].
   a. General Standards.
      All group living uses except for alternative or post-incarceration facilities are allowed by right.
   b. Alternative or Post Incarceration Facilities.
      Group living uses which consist of alternative or post incarceration facilities are conditional uses.

2. Adult Business.
   This regulation applies to all parts of Table 17C.124-1 that have a [2]. Adult businesses are subject to the additional standards of chapter 17C.305 SMC.

3. Commercial Parking.
   This regulation applies to all parts of Table 17C.124-1 that have a [3]. See SMC 17C.230.310 for the parking structure design guidelines. See SMC 17C.124.340, Parking and Loading, for ground level parking structure use standards.
   a. New standalone surface commercial parking lots are not allowed as the primary use within the area shown on Map 17C.124-M1, Surface Parking Limited Area. Within the area shown on Map 17C.124-M1, standalone commercial parking as a primary use must be located entirely within a parking structure.

4. Drive-through Facility.
   This regulation applies to all parts of Table 17C.124-1 that have a [4]. Drive-through facilities are subject to the additional standards of SMC 17C.124.290.

5. Quick Vehicle Servicing.
   This regulation applies to all parts of Table 17C.124-1 that have a [5]. Quick vehicle servicing uses are permitted only on sites that have frontage on a Type III or IV complete street. Quick vehicle servicing uses must be fully contained within a
structure. Quick vehicle servicing uses are subject to the additional standards of SMC 17C.124.290.

6. Retail Sales and Services Uses Motorized Vehicle Limitation. This regulation applies to all parts of Table 17C.124-1 that have a [6]. Sale, rental, or leasing of motor vehicles, including passenger vehicles, light and medium trucks is not allowed. Sale, rental, and leasing of motorcycles and other recreational vehicles not able to be licensed for normal on street use is allowed. For sale or leasing of motorcycles and other recreational vehicles see SMC 17C.124.270, Outdoor Activities

7. Industrial Limitation. 
This regulation applies to all parts of Table 17C.124-1 that have a [7]. These types of uses are limited to assure that they will not dominate the downtown area and to limit their potential impacts on residential and commercial uses. In addition, if the planning director determines that the proposed use will not be able to comply with the off-site impact standards of chapter 17C.220 SMC, the planning director may require documentation that the development will be modified to conform with the standards.

a. Limited industrial uses are allowed. ((Only limited industrial uses are allowed.) Industrial uses more intensive than the limited industrial definition are not allowed.

b. Industrial buildings and industrial sites are subject to the same design standards as commercial buildings and commercial sites.

This regulation applies to all parts of Table 17C.124-1 that have an [8]. See SMC 17C.124.340.

This regulation applies to all parts of Table 17C.124-1 that have an [9]. Mini-storage facilities are subject to the additional standards of chapter 17C.350 SMC, Mini-storage Facilities.

10. Outdoor Activity Limitation. 
This regulation applies to all parts of Table 17C.124-1 that have a [10]. Outdoor display, storage, or use of industrial equipment or other industrial items such as tools, equipment, vehicles, products, materials, or other objects that are part of or used for the business operation is prohibited.

This regulation applies to all parts of Table 17C.124-1 that have a [11]. Most community service uses are allowed by right.

See chapter 17C.355A SMC.

This regulation applies to all parts of Table 17C.124-1 that have an [13]. Light
industrial and self-service storage uses in operation on the effective date of this ordinance, are considered to be a conforming use.

14. Mobile Food Vending.
This standard applies to all parts of Table 17C.124-1 that have a [14]. All mobile food vendors shall have a valid mobile food vending license issued pursuant to SMC 10.51.010.

Section 4. That SMC 17C.220.060 is amended:
The City noise standards are stated in (SMC 10.08.020) SMC 10.08D, Public Disturbance Noise. In addition, the department of ecology has standards that apply to environments within which maximum permissible noise levels are established.

Section 5. That SMC section 17E.050.080 Appendix B is amended:
Chapter 17E.050 SEPA
Article III. Categorical Exemptions and Threshold Determinations
Section 17E.050.080 Categorical Exemptions – Applicability

A. If a proposal fits within any of the provisions in SMC 17E.050.230 (Part Nine) and 17E.050.070, the proposal shall be categorically exempt from the threshold determination requirements (WAC 197-11-720), except when the proposal is a segment of a proposal that includes:

1. a series of actions, physically or functionally related to each other, some of which are categorically exempt and some of which are not; or

2. a series of exempt actions that are physically or functionally related to each other, and that together may have a probable significant adverse environmental impact in the judgment of an agency with jurisdiction. If so, that agency shall be the lead agency unless the agencies with jurisdiction agree that another agency should be the lead agency. Agencies may petition the department of ecology to resolve disputes (WAC 197-11-946).

For such proposals, the agency or applicant may proceed with the exempt aspects of the proposals, prior to conducting environmental review, provided the requirements of WAC 197-11-070 are met. See Appendix B for an informational matrix of exempt and nonexempt activities.

B. The lead agency is not required to document that a proposal is categorically exempt. The lead agency may note on an application that a proposal is categorically exempt or place such a determination in the agency’s files.

APPENDIX "B"

1 Applies to land not covered by water.

2 Under section 197-11-305 WAC, each County/City may adopt provisions to exclude exemptions listed in 197-11-800 for those sites listed in Critical Areas.

3 Some utility replacements are non exempt. See WAC for specifics (i.e. replacement of transmission line for natural gas is not exempt.

Section 6. That SMC section 17F.010.050(A)(1) is amended:

Section 17F.010.050 Notice of Hearing

A. Existing Building and Conservation Code.

1. ((Pursuant to chapter 11.11 SMC, notice of hearing,)) Notice of hearing by the building official is given by ((the department of neighborhood services and code enforcement)) the Developer Services Center in the complaint which is:
   a. served personally or by certified mail with return receipt, or if the whereabouts of a person to be served cannot be ascertained, by publication once a week for two consecutive weeks in a legal newspaper, upon all persons having a record interest in the subject property; and
   b. posted on the subject property; and
   c. filed in the manner of a lis pendens in the office of the Spokane County auditor.

2. Personal service, service by certified mail and filing in the auditor’s office are between ten and thirty days before the hearing. Posting and first publication are between fifteen and thirty days before the hearing.

3. Notice of the public hearing of the hearing examiner on an appeal from the order of the building official is given by the office of the hearing examiner by personally serving on, or mailing to, the appellant and all persons having a record interest who have not disclaimed all interest, notice at least ten days prior to the hearing.

B. Effect of Notice.

The notice provisions of this chapter are not jurisdictional or exclusive. The failure of any person to receive notice under this section does not affect the validity of any hearing under this chapter. This section is subject to any specific notice provisions of state and federal law. This section does not prevent any City agency from adopting further provisions for notice by rule or preclude other methods of notice.
Section 7. That SMC section 17F.040.140(A) is amended:

Section 17F.040.140 Awnings
In addition to the requirements of IBC Section 3105, these provisions apply:

A. ((A fixed awning not more than ten feet in length may be erected over a doorway to the building.))

A. An awning which defines an entrance to a nonresidential use and which provides shelter between a passenger loading point and the entrance may be installed in accordance with the standards of this section so long as any portion of the awning that does not project at least forty-two inches over the pedestrian way is confined along the facade to a width not to exceed the width of the doorway plus six feet on both sides.

B. Projection. Awnings may extend over public property (whether the building is conforming or nonconforming) but no portion shall extend nearer than two feet to the face of the nearest curb line measured horizontally.

C. An awning which projects more than eighteen inches into the public right-of-way must provide a minimum forty-two-inch coverage over any sidewalk adjacent to the property.

D. Clearance. All portions of any awning shall be at least eight but not more than twelve feet above any public walkway.

EXCEPTION: Any valance attached to an awning shall not project above the roof of the awning at the point of attachment and shall not extend more than twelve inches below the roof of the awning at the point of attachment, but in no case shall any portion of a valance be less than seven feet in height above a public way.

E. Signs. If an awning also carries advertising copy, the copy is regulated as a sign, but the awning is not thereby exempted from the provisions of this chapter as provided in Section 3107.

Section 8. That SMC section 17G.040.040(B) is amended:

Design Review Criteria.
The board shall base its review, report, and/or recommendation on the following criteria:

A. The requirements, guidelines, and applicable provisions of Title 17 SMC that apply to the property in question including all additional zoning regulations which may apply to the use or to its area by provision for overlay district, or made
applicable by any conditional use or variance approval.

B. ((A summary of the design guidelines adopted by the City is found in the)) The Design Review Application Handbook, outlining the design review process, with application forms and submission checklists, is on file in the planning department.

Section 9. That SMC section 17G.060.020(A)(3) is amended:

Section 17G.060.020 Administration

A. Responsibility for the administration, application and interpretation of these procedures pursuant to this ordinance is as is set forth below:

1. The director of building services or his designee is responsible for chapter 17E.050 SMC, Division F; chapter 17G.010 SMC, Division I; and the development codes.

2. The director of engineering services or his designee is responsible for chapter 17D.020 SMC, chapter 17D.070 SMC, chapter 17E.010 SMC, chapter 17E.050 SMC, chapter 17G.080 SMC, Division H and the development codes.

3. The director of planning services or his designee is responsible for SMC (Division B, Division C) Title 17B and Title 17C and (chapter 11.15 SMC, chapter 11.17 SMC, chapter 11.19 SMC,) chapter 17D.010 SMC, chapter 17D.060 SMC, chapter 17D.080 SMC, chapter 17D.090 SMC, chapter 17E.020 SMC, chapter 17E.030 SMC, chapter 17E.040 SMC, chapter 17E.050 SMC, chapter 17E.060 SMC, chapter 17E.070 SMC, chapter 17G.020 SMC, chapter 17G.030 SMC, chapter 17G.040 SMC, chapter 17G.060 SMC, chapter 17G.070 SMC and chapter 17G.080 SMC

B. The procedures for requesting interpretations of the land use codes and development codes shall be made by the department and may be contained under the specific codes.

Section 10. That SMC section 17G.060.070(B)(5)(c) is amended:

Section 17G.060.070 Application Requirements

A. Application requirements for Type I, II, and III project permit applications shall contain the following:

1. Predevelopment meeting summary as provided in SMC 17G.060.050(B), if required in Table 17G.060-3.

2. Application documents provided by the department specifically including:
   a. General application;
   b. Supplemental application;
c. Environmental checklist, if required under chapter 17E.050 SMC;
d. Filing fees as required under chapter 8.02 SMC;
e. A site plan drawn to scale showing:
   i. property dimensions;
   ii. location and dimensions of all existing and proposed physical improvements;
   iii. location and type of landscaping;
   iv. walkways and pedestrian areas;
   v. off-street parking areas and access drives;
   vi. refuse facilities; and
   vii. significant natural features, such as slopes, trees, rock outcrops including critical areas.
f. Required number of documents, plans, or maps (as set forth in the application checklist);
g. Written narrative identifying consistency with the applicable policies, regulations, and criteria for approval of the permit requested;
h. Other plans, such as building elevations, landscaping plans, or sign plans, which are determined by the permitting department to be necessary to support the application; and
i. Additional application information may be requested by the permitting department and may include, but is not limited to, the following:
   i. geotechnical studies,
   ii. hydrologic studies,
   iii. critical area studies,
   iv. noise studies,
   v. air quality studies,
vi. visual analysis, and

vii. transportation impact studies.

3. A certificate of appropriateness if required by chapter 17D.100 SMC.

B. The following Type II and III applications shall meet the requirements in this subsection in addition to the provisions of subsection (A) of this section:

   a. Name, address, and phone number of the applicant. The applicant should be the owner of the property or the primary proponent of the project and not the representative of the owner or primary proponent.

   b. Name, address, and phone number of the applicant’s representative if other than the applicant.

   c. Name, address, and phone number of the property owner, if other than the applicant.

   d. Location of the property. This shall, at a minimum, include the property address and identification of the section, township and range to the nearest quarter, quarter section or latitude and longitude to the nearest minute.

   e. Identification of the name of the shoreline (water body) with which the site of the proposal is associated.

   f. General description of the proposed project that includes the proposed use or uses and the activities necessary to accomplish the project.

   g. General description of the property as it now exists, including its physical characteristics and improvements and structures.

   h. General description of the vicinity of the proposed project, including identification of the adjacent uses, structures and improvements, intensity of development and physical characteristics.

   i. A site development plan consisting of maps and elevation drawings, drawn to an appropriate scale to depict clearly all required information, photographs and text which shall include:
i. the boundary of the parcels(s) of land upon which the development is proposed;

ii. the ordinary high-water mark of all water bodies located adjacent to or within the boundary of the project. This may be an approximate location, provided that for any development where a determination of consistency with the applicable regulations requires a precise location of the ordinary high-water mark, the mark shall be located precisely and the biological and hydrological basis for the location as indicated on the plans shall be included in the development plan. Where the ordinary high-water mark is neither adjacent to or within the boundary of the project, the plan shall indicate the distance and direction to the nearest ordinary high-water mark of a shoreline;

iii. existing and proposed land contours. The contours shall be at intervals sufficient to accurately determine the existing character of the property and the extent of proposed change to the land that is necessary for the development. Areas within the boundary that will not be altered by the development may be indicated as such and contours approximated for that area;

iv. a delineation of all wetland areas that will be altered or used as a part of the development;

v. the dimensions and locations of all existing and proposed structures and improvements, including but not limited to: buildings, paved or graveled areas, roads, utilities, material stockpiles or surcharge, and stormwater management facilities;

vi. an inventory of the existing vegetation on the proposed project site, including the location, type, size, and condition, pursuant to SMC 17E.060.240, Shoreline Vegetation Inventory;

vii. a landscape plan prepared and stamped by a licensed landscape architect, registered in the state of Washington;

viii. where applicable, plans for development of areas on or off the site as mitigation for impacts associated with the proposed project shall be included;

ix. quality, source and composition of any fill material that is placed on the site, whether temporary or permanent;
x. quantity, composition and destination of any excavated or dredged material;

xi. vicinity map showing the relationship of the property and proposed development or use to roads, utilities, existing developments, and uses on adjacent properties;

xii. where applicable, a depiction of the impacts to views from existing residential uses;

xiii. on all variance applications, the plans shall clearly indicate where development could occur without the approval of a variance, the physical features and circumstances of the property that provide a basis for the request, and the location of adjacent structures and uses.

2. Certificate of Compliance.

   a. Site plan is to be prepared by a licensed surveyor; and

   b. Copies of building permits or other data necessary to demonstrate the building was erected in good faith and all reasonable efforts comply with the code.

   a. Alternative development plan designed in conformance with the applicable development regulations; and

   b. A written narrative of how the proposed development plan is superior, or more innovative, or provides greater public benefit.

4. Preliminary Plat, Short Plat, and Binding Site Plan.

   As provided in chapter 17G.080 SMC.

5. PUD.

   a. Profiles of any structures more than one story, shown in relation to finished grade.
   
   b. Location, dimension, and boundary of proposed open space.
   
   c. Site plan demonstrating compliance with ((chapter 11.19 SMC)) chapter 17C.110 and chapter 17G.070 including signs, off-street parking, structure height, building coverage, yards, density, screening, buffering, and lighting.
   a. A legal description of airspace to be occupied.
   b. Architectural and engineering plans.
   c. Artist’s rendering of the proposed skywalk; and
   d. Written narrative of the access for the public from the street, other buildings, and other skywalks.

7. Floodplain – Floodplain Development Permit and Variance.
   As provided in chapter 17E.030 SMC.

Section 11. That SMC section 17G.070.220 is amended:
Section 17G.070.220 Vesting

A. Applicability.
A planned unit development shall be reviewed under this chapter, the zoning, development and other land use control ordinances contained in (Title 11 SMC and) Title 17 SMC of the Spokane Municipal Code, and any uncodified ordinances modifying the same, in effect on the date a concept plan application has been deemed fully complete by the City. For the purposes of this section, a vested concept plan application shall mean that the applicant is entitled to implement the planned unit development or any portion of it described in the application under the zoning, development and land use ordinances applied by the City in its review of the planned unit development application.

B. Subsequent Regulations.
An applicant may have the option of subjecting its development to any subsequently enacted land use ordinances. However, should an applicant choose to subject its development to a subsequently enacted land use ordinance, this shall have the effect of subjecting the development to all land use ordinances enacted after the application is vested. In order for the director to grant such a request, the applicant must demonstrate how later enacted ordinance(s) will benefit both the project and the City while maintaining consistency with the comprehensive plan and will not be significantly detrimental to the health, safety, or general welfare of the City. The director shall review and either approve the request or determine if a new application must be submitted.

Section 12. That SMC section 17G.080.070(C)(5) is amended:
Section 17G.080.070 Subdivision Design Standards

A. Street Design and Improvements.
1. Street design is governed by the comprehensive plan, city design standards, chapter 17H.010 SMC and chapter 17E.030 SMC. Streets within and along a subdivision are to be designed in light of topography and existing and planned street patterns.

2. Except in unusual cases a plat must dedicate a full width street.

3. Entry gates are prohibited on public streets.

4. The following statement shall appear in the dedication of the final plat, final short plat or final binding site plan:

   a. “All street identification and traffic control signs required by this project will be the responsibility of the developer.”

B. Easements.

1. Where alleys are not provided, easements for public utilities shall be provided adjacent to any right-of-way. Such easements shall be the minimum necessary to provide public utilities. Insofar as possible, the easements shall be continuous and aligned from block to block within the subdivision and with adjoining subdivisions.

2. Easements for sewers, drainage, water main, electric lines or other public use utilities shall be dedicated whenever necessary. The size and location of the easement dedication shall be reviewed and approved by the appropriate utility provider.

3. Adequate provisions for public access to publicly owned parks, conservation areas or open space land shall be provided when a subdivision, short plat or binding site plan is adjacent to such lands.

4. The following statements are required to appear in the dedication of the final plat, final short plat and final binding site plan:

   a. “Slope easements for cut and fill, as deemed necessary by the Engineering Services – Developer Services Department in accordance with the City’s Design Standards, are hereby granted to the City of Spokane for the construction and maintenance of public streets adjoining this plat.”

   b. “A ___ foot easement for utilities, including cable television, is hereby granted along all street frontages to the City and its permittees.”
c. “Utility easements shown hereon the described plat are hereby dedicated to the City and its permittees for the construction, reconstruction, maintenance and operation of utilities and cable television, together with the right to inspect said utilities and to trim and/or remove brush and trees which may interfere with the construction, maintenance and operation of same.”

C. Design of Lots and Blocks.

1. The length, width and shape of blocks shall be designed with due regard to providing adequate building sites for the use contemplated; consideration of the needs for convenient access, circulation, control, safety of the street traffic, provision for utilities and recognition of limitations and opportunities of topography.

2. Blocks shall be recognized as closed polygons, bordered by street right-of-way lines, addition lines or a combination of the two, unless an alley is desired, in which case a block may be comprised of two closed polygons separated by the adjoining alley.

3. Blocks shall ordinarily be sufficient to allow for two tiers of lots of depths sufficient to meet the underlying zone. Double-frontage lots should be avoided.

4. All plat lots shall begin with lot one block one and shall be numbered consecutively by lots and blocks, provided that for plats sequenced by phasing, and which adjoin a previously recorded phase of the approved preliminary plat, lots may continue with lot one and the next consecutively sequenced block number. Lots from one plat shall not cross plat boundaries into another plat.

5. Lot widths, lot areas and frontage upon a public street (or private street within a PUD or binding site plan) shall conform to the underlying zone. For PUDs the hearing examiner may adjust the standards of the underlying zone subject to the provisions of (SMC 11.19.366) SMC 17G.070 and for binding site plans the director may adjust the standards of the underlying zone subject to provision of SMC 17G.060.170(D)(4). Corner lots shall be designed to ensure setbacks are met from both streets. Lots shall be as nearly rectangular as possible with side lot lines approximately at right angles or radial to street lines.

6. Lots shall not be divided by the boundary of any zoning designation or public right-of-way.
7. Where a lot is plotted into one acre or more in size, the director may require an arrangement of the lot such as to permit a subsequent redivision in conformity with plans adopted by the City.

D. Stormwater Improvements.

Stormwater facilities design and improvements shall be in accordance with chapter 17D.060 SMC and other applicable design standards. The following statements shall appear in the dedication of the final plat, final short plat or final binding site plan:

1. “Development of the subject property, including grading and filling, are required to follow an erosion/sediment control plan that has been submitted to and accepted by Engineering Services – Developer Services prior to the issuance of any building and/or grading permits.”

2. “All stormwater and surface drainage generated on-site must be disposed on-site in accordance with chapter 17D.060 SMC, Stormwater Facilities, and City Design Standards, and as per the Project Engineer’s recommendations, based on the drainage plan accepted for the final plat.”

3. “No building permit shall be issued for any lot in this subdivision/PUD until evidence satisfactory to the Director of Engineering Services has been provided showing that the recommendations of chapter 17D.060 SMC, Stormwater Facilities, and the Project Engineer’s recommendations, based on the drainage plan accepted for the final subdivision/PUD, have been complied with.”

E. Sewer Improvements.

Sewer design and improvements shall be in accordance with chapter 13.03 SMC and the city’s design standards. The following statements shall appear in the dedication of the final plat, final short plat or final binding site plan:

1. “Prior to the issuance of any building permits, the lots shall be connected to a functioning public or private sanitary sewer system complying with the requirements of the Engineering Services Department.”

F. Water and Utility Improvements.

Water and city utility design and improvements shall be in accordance with chapter 13.04 SMC and the city’s design standards. The following statements shall appear in the dedication of the final plat, final short plat or final binding site plan.
1. “Only City water and sanitary sewer systems shall serve the plat; the use of individual on-site sanitary waste disposal systems and private wells is prohibited.”

2. “All required improvements serving the plat, including streets, sanitary sewer, stormwater and water, shall be designed and constructed at the developer’s expense. The improvements must be constructed to City Standards by the developer prior to the occupancy of any structures within the development.”

3. “Prior to the issuance of any building permits, the lots shall be connected to a functioning public or private water system complying with the requirements of the Engineering Services Department and having adequate pressure for domestic and fire uses, as determined by the Water and Hydroelectric Services Department.

4. “Prior to the issuance of any building permits, the lots shall be served by fire hydrants and shall have appropriate access to streets as determined by the requirements of the City Fire Department and the Engineering Services Department.

5. “Water mains and fire hydrants must be installed at the developer’s expense, in locations approved by the City Fire Department and in accordance with applicable State and Federal provisions.

6. “All private improvements constructed within the boundaries of a PUD are required to be maintained by a homeowner’s association or comparable entity established for this PUD.” (applies to PUDs).
