CONCLUSIONS:

Based upon the application materials, staff analysis (which is hereby incorporated into these findings, conclusions, and recommendation), SEPA review, agency and public comments received, and public testimony presented regarding application File No. Z23-479COMP, the Plan Commission makes the following conclusions with respect to the review criteria outlined in SMC 17G.020.030:

1. The Application was submitted in a timely manner and added to the 2023/2024 Annual Comprehensive Plan Amendment Work Program, and the final review application was submitted as provided in SMC 17G.020.050(D).
2. Interested agencies and the public have had extensive opportunities to participate throughout the process and persons desiring to comment have been given that opportunity to comment.
3. The Application is consistent with the goals and purposes of GMA.
4. Any potential infrastructure implications associated with the Application will either be mitigated through projects reflected in the City's relevant six-year capital improvement plans or through enforcement of the City's development regulations at time of development.
5. As outlined in above in the Findings of Fact, the Application is internally consistent as it pertains to the Comprehensive Plan, as described in SMC 17G.020.030.E.
6. The Application is consistent with the Countywide Planning Policies for Spokane County, the comprehensive plans of neighboring jurisdictions, applicable capital facilities plans, the regional transportation plan, and official population growth forecasts.
7. The Application has been considered simultaneously with the other proposals included in the 2024 Annual Comprehensive Plan Amendment Work Program in order to evaluate the cumulative effect of all the proposals.
8. SEPA review was completed for the Application.
9. The Application will not adversely affect the City's ability to provide the full range of urban public facilities and services citywide at the planned level of service, or consume public resources otherwise needed to support comprehensive plan implementation strategies.

10. The Application proposes a land use designation that is in conformance with the appropriate location criteria identified in the comprehensive plan (e.g., compatibility with neighboring land uses, proximity to arterials, etc.).
11. The proposed map amendment and site is suitable for the proposed designation.
12. The map amendment would implement applicable comprehensive plan policies better than the current map designation.

RECOMMENDATIONS:

In the matter of Z23-479COMP, a request by Dwight Hume of Land Use Solutions and Entitlement on behalf of Excelsior Wellness, and expanded by the City of Spokane, to change the land use plan designation of 35.1 acres of land from “Residential Low” to “General Commercial”, “Conservation Open Space”, and “Residential Moderate” with a corresponding change of the implementing zoning from “R1” to “R1”, “RMF”, and “Community Business, 55-foot height limit (CB-55)”. Based upon the above listed findings and conclusions, by a vote of **8 to 0, with one abstention**, the Spokane Plan Commission recommends City Council **APPROVE** the requested amendment to the Land Use Plan Map of the City’s Comprehensive Plan with corresponding amendment to the City’s Zoning Map, subject to the removal of parcel 26261.3401, a change to the Potential Open Space designation, and the adoption of a development agreement between the City and the applicant, and authorizes the President to prepare and sign on the Commission’s behalf a written decision setting forth the Commission’s findings, conclusions, and recommendation on the application.
