## Sign-off Sheet & Signatures of Environmental Professionals

This document entitled, **Phase I Environmental Site Assessment, Former Normandie Storage / Maintenance / Fueling Facility – 127 West Mission Avenue, in Spokane, Washington**, was prepared by **Stantec Consulting Services Inc. (Stantec)** for the account of the **City of Spokane**. The "User" of this report, as defined by ASTM E 1527-13 is the Property owner, **City of Spokane**. The material in it reflects Stantec's best judgment in light of the information available to it at the time of preparation. Any use which a third party makes of this report, or any reliance on or decisions made based on it, are the responsibilities of such third parties. Stantec accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

All information, conclusions, and recommendations provided by Stantec in this document regarding the Phase I Environmental Site Assessment have been prepared under the supervision of and reviewed by the professionals whose signatures appear below.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 Code of Federal Regulations (CFR) 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## 1.0 SUMMARY

Stantec Consulting Services Inc. (Stantec) has completed a Phase I Environmental Site Assessment (ESA) report of the property located at 127 West Mission Avenue in Spokane, Washington (the "Site" or "Property"), on behalf of the City of Spokane (the "Client" or "City"). The work was performed according to Stantec's proposal and terms and conditions dated May 27, 2016 and accepted by the Client on July 12, 2016. The Site visit was conducted on July 11, 2016.

The Phase I ESA was conducted in general conformance with the requirements of American Society for Testing and Materials (ASTM) Designation E 1527-13, except as may have been modified by the scope of work, and terms and conditions, requested by the Client. Any exceptions to, or deletions from, the ASTM practice are described in Section 7.2.

The Property encompasses approximately 5.37 acres of land (Spokane County Parcel Number 35181.0201) located in an area of mixed use: historic industrial, commercial, and residential; the Property is zoned as Service-Governmental. The Site is mostly inactive and occupied by several large vacant structures and an active petroleum fueling station. Normandie Street bisects the Property into an east and west portion. Based on the records reviewed (1901-present day) it appears that the Property was developed sometime between 1902 and 1910 and occupied by a City storage and maintenance yard in the west portion and an unknown building with an office in the eastern portion. By the 1950s the original structures were demolished and new structures occupied the east and west portions of the Property. A City storage and maintenance yard continued to occupy the western portion of the Property, while a Municipal Garage (including a repair shop and painting room) occupied the northeastern portion of the Property. A used car lot occupied the southeastern portion of the Property in the early 1950s. By the late 1950s a fueling station was installed for City vehicles in the western portion of the Property. Additional garages were built in the late 1950s and 1960s. The current structure configuration has been relatively unchanged since the late 1960s.

In summary, the following recognized environmental conditions (RECs) have been identified in connection with the Property:

1. Records indicate that six USTs have been removed from the Property and that petroleum contaminated soil (PCS) with impacts below applicable regulatory standards have been left in place; due to impacts to soil being remediated below applicable regulatory standards this is considered a HREC. Records further indicate that eight USTs have been closed in place; however, the age, size, integrity, contents (former contents), and location of these USTs is unknown. Therefore this is considered a REC.
2. Records indicate that during a drain removal excavation at 1401 North Normandie Street PCS with impacts above applicable regulatory standards and a 5,000 gallon UST (closed-in-place) were left in place due to concerns regarding utilities and the structural integrity of the building. Due to impacts above regulatory standards being left in place, this is considered a REC.
3. During the Property Reconnaissance visit Stantec observed extensive petroleum staining on the ground surface throughout the Property. Stantec also observed numerous "drywell" catch basins

## Summary

### **Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

throughout the Property. Due to the potential age and extent of the staining and the potential for runoff to have deposited petroleum substances in the catch basins, these findings are considered RECs.

4. Historic records indicate the presence of a used car lot in the southeastern portion of the Property. Given the possibility for automotive repair and leaks from automobiles to have occurred, this is considered a REC.
5. Historic industrial use in the vicinity of the Property, namely two lumber mills on adjacent properties. Given the proximity of these and other facilities there is the potential for impacts to have migrated to the Property; therefore, this finding is considered a REC.

The preceding summary is intended for informational purposes only. Reading of the full body of this report is recommended.

## 2.0 INTRODUCTION

The objective of this Phase I ESA was to perform appropriate inquiry into the past ownership and uses of the Site consistent with good commercial or customary practice as outlined by the ASTM in "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", Designation E1527-13.

The ASTM guidance document E1527-13 states that the purpose of the Phase I ESA is to identify RECs. This ESA was conducted to assist the Client in conducting all appropriate inquiries into previous ownership and use of the Site, as stipulated by the US EPA in 40 CFR Part 312, to qualify for specific landowner liability protections under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) for the Site. The Phase I ESA Site reconnaissance was conducted by Stantec on July 11, 2016. A Vicinity Map is provided as **Figure 1** and a Site Plan is provided as **Figure 2**. Photographs taken during the Site reconnaissance are presented in **Appendix A**.

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-13 for conducting environmental assessments. The assessment included an environmental database search, historical records review, a Site reconnaissance of accessible areas, a review of relevant Site records made available to Stantec, and interviews with individuals associated with the Site. ASTM E1527-13 notes that the availability of record information varies from source to source. The user or environmental professional is not obligated to identify, obtain, or review every possible source that might exist with respect to a Site. Instead, ASTM identifies record information that is reasonably ascertainable from standard sources. "Reasonably ascertainable" means:

- Information that is publicly available;
- Information that is obtainable from its source within reasonable time and cost constraints; and,
- Information that is practicably reviewable.

This Phase I ESA did not include a comprehensive assessment for environmental regulatory compliance of any facility ever operated at the Site (past or present), an evaluation of business environmental risk (BER), sampling and analysis of environmental media, or an assessment on the presence of asbestos, lead-based paint or radon gas. Stantec was not contracted to perform any independent evaluation of the purchase or lease price of the Site and its relationship to current fair market value.

The following terms used in this report are defined in the Standard as follows:

- REC means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to any release to the environment, under conditions indicative of a release to the environment or under conditions that pose a material threat of a release to the environment (de minimis conditions are not RECs).
- Historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulations or meeting unrestricted use criteria established by a regulatory authority,

without subjecting the property to any required controls (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls). HRECs are not RECs.

- Controlled REC (CREC) is a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (i.e., property use restrictions, activity and use limitations, institutional controls, or engineering controls).
- Business Environmental Risk (BER) means a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated by the Standard.
- *De minimis* condition is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not RECs or CRECs.

The conclusions presented in this Phase I ESA report are professional opinions based on data described herein. The opinions are subject to the limitations described in **Section 2.3**.

## 2.1 Site Description

The Property encompasses approximately 5.37 acres of land located in an area of mixed use: historic industrial, commercial, and residential; the Property is zoned as Service-Governmental. The Property is located in the northeast  $\frac{1}{4}$  of the northeast  $\frac{1}{4}$ , Section 18, Township 25 North, Range 43 East of the Willamette Meridian and is identified as tax lots 1 through 14 of Blocks 57 and 58 of the Central Addition on Spokane County half-section map North  $\frac{1}{2}$  Section 18, Township 25 North, Range 43 East Willamette Meridian (**Appendix C**); and further identified as Spokane County Parcel Number 35818.0201 (**Figure 1**).

The Property is referred to as "Former Normandie Storage/Maintenance/Fueling Facility" and consists of one parcel of land located at 127 West Mission Street in Spokane, Washington. The Property is mostly inactive and occupied by several large vacant structures and an active petroleum fueling station. Normandie Street bisects the Property into an east and west portion. Based on the records reviewed (1901-present day) it appears that the Property was developed sometime between 1902 and 1910 and occupied by a City storage and maintenance yard in the west portion and an unknown building with an office in the eastern portion. By the 1950s the original structures were demolished and new structures occupied the east and west portions of the Property. A City storage and maintenance yard continued to occupy the western portion of the Property, while a Municipal Garage (including a repair shop and painting room) occupied the northeastern portion of the Property. A used car lot occupied the southeastern portion of the Property in the early 1950s. By the late 1950s a fueling station was installed for City vehicles in the western portion of the Property. Additional garages were built in the late 1950s and 1960s. The current structure configuration has been relatively unchanged since the late 1960s.

**Figure 2** (The buildings remaining at the Property are labeled based on historic information provided by the City, to indicate most recent uses).

## **2.2 Special Terms, Conditions, & Significant Assumptions**

It is assumed that the purpose of this Phase I ESA is to qualify the User, in part, for landowner protection from Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability and to facilitate the redevelopment of the Property. The possible contaminants of concern considered in this assessment include those hazardous compounds listed under CERCLA and petroleum products. There were no special terms, conditions, or significant assumptions associated with the Phase I ESA.

## **2.3 Exceptions & Limiting Conditions**

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided and given the schedule and budget constraints established by the City. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential and actual liabilities and conditions associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the Property at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information. All information received from the City or third parties in the preparation of this report has been assumed by Stantec to be correct. Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

If a service is not expressly indicated, do not assume it has been provided. If a matter is not addressed, do not assume that any determination has been made by Stantec in regards to it.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report, and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the Property's environmental condition.

This report relates solely to the specific project for which Stantec was retained and the stated purpose for which this report was prepared and shall not be used or relied upon by the User for any variation or extension of this project, any other project or any other purpose.

This report has been prepared for the exclusive use of the City, Property owner. Any use of or reliance on this report by any third party is prohibited, except as may be consented to in writing by Stantec or as required by law. The provision of any such consent is at Stantec's sole and unfettered discretion and will only be authorized pursuant to the conditions of Stantec's standard form reliance letter. Stantec assumes no responsibility for losses, damages, liabilities or claims, howsoever arising, from third party use of this report.

Project-specific limiting conditions are provided in **Section 2.2**.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures are not guaranteed.

The conclusions of this Phase I ESA are based on Property conditions encountered by Stantec at the time of the assessment. Accordingly, additional studies and actions may be required. As the purpose of this report is to identify selected conditions that may pose an environmental risk, the identification of non-environmental risks to structures or people on the Property is beyond the scope of this assessment. The findings, observations, and conclusions expressed by Stantec in this report are not an opinion concerning the compliance of any past or present owner or operator of the Property which is the subject of this report with any Federal, state, provincial or local law or regulation.

This report presents professional opinions and findings of a scientific and technical nature. It does not and shall not be construed to offer a legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, regulations or policies of Federal, state, provincial or local governmental agencies. Issues raised by the report should be reviewed by the City's legal counsel.

Stantec specifically disclaims any responsibility to update the conclusions in this report if new or different information later becomes available or if the conditions or activities on the Property subsequently change.

## **2.4 Personnel Qualifications**

This Phase I ESA was conducted by, or under the supervision of, an individual that meets the ASTM definition of an Environmental Professional. The credentials of the Environmental Professionals and other key Stantec personnel involved in conducting this Phase I ESA are provided in **Appendix B**.

## 3.0 USER-PROVIDED INFORMATION

### 3.1 ASTM 1527-13 Questionnaire

The ASTM E1527-13 standard requires that the User conduct specific inquiries regarding the environmental status of the Property, and provides the results of those inquiries to the Environmental Professional preparing the Phase I ESA. To assist the User in meeting this requirement, Alan Gay (Stantec) interviewed Mr. Ernest Wickert (Property representative; Facilities Maintenance Foreman).

Description of Information	Provided (Yes / No)	Description and/or Key Findings
User Questionnaire	No	The requirements of a User Questionnaire were fulfilled by Stantec during an interview with Mr. Wickert on July 11, 2016.
Environmental Liens or Activity Use Limitations	No	None identified by the Property Representative.
Previous Environmental Permits or Reports Provided by User	Yes	Mr. Gene Jakubczak (City of Spokane) provided Stantec with documents regarding past storage tank removals and remedial investigations and excavations.
Purpose of the Phase I ESA	Yes	To support sale of the Property.

Mr. Wickert's responses to the questionnaire required by ASTM 1527-13 are summarized below:

1. Mr. Wickert reported that the City purchased the Property in 1890s as undeveloped, vacant land and that the City has operated a maintenance facility at the Property since that time.
2. Mr. Wickert reported that he is not aware of activity or use limitations at the Property.
3. Mr. Wickert reported that the Property is not currently for sale and therefore the fair market value is not applicable at this time.
4. Mr. Wickert reported the past use of the Property as a municipal storage, maintenance and fueling facility that has operated since the late 1890s.
5. Mr. Wickert reported that there have been storage tanks on the Property, that petroleum products or hazardous substances have been stored on the Property, and that there have been environmental cleanups that have taken place at the Property (see **Section 4.4.6**).

### 3.2 Title Report

Stantec was not provided with a title report while completing this Phase I ESA.

## 4.0 RECORDS REVIEW

A regulatory agency database search report for the Property and surrounding area was obtained from Environmental Data Resources, Inc. (EDR), a third-party environmental database search firm. A complete copy of the database search report, including the date the report was prepared, the date the information was last updated, and the definition of databases searched, is provided in **Appendix D**.

Stantec evaluated the database report relative to potential impacts to the Property, assessing the potential for impacts based in part on the physical setting. As part of this process, inferences have been made regarding the likely groundwater flow direction at or near the Property. As described in **Section 4.1.3**, the groundwater flow direction is likely to be to the west. Observations about the Property and surrounding areas made during the reconnaissance are provided in more detail in **Section 5**.

### 4.1 Physical Setting

A summary of the Property's physical setting is provided in the following subsections.

<b>Site Location:</b>	Northeast ¼ of the Northeast ¼ of Township 18 North, Range 43 East, Section 18.
<b>Topography:</b>	The western portion of the Property is generally flat with a gentle slope to the southwest in the eastern portion of the Property and to the southeast in the western portion, and sits approximately 1,894-feet (ft) above mean sea level (msl).
<b>Soil/Bedrock Data:</b>	Soil at the Property consists of fine gravelly-silt loam of the Avonville Formation that is well drained and typically exhibits moderate infiltration rates. The loam is underlain by Pleistocene-age catastrophic flood deposits, which comprise the Trinity Trough portion of the Spokane Valley-Rathdrum Prairie aquifer and is comprised primarily of sand, gravel, and cobbles with interbedded silt lenses. These deposits are likely underlain by Tertiary-age sedimentary, igneous and/or metamorphic bedrock.
<b>Estimated Depth to Groundwater/ Estimated Direction of Gradient:</b>	Review of groundwater well data in the vicinity of the Property suggests that depth to groundwater is approximately 22-50 ft below ground surface (bgs). Numerous studies conducted by the USGS suggest that groundwater flow is to the west (USGS, 2005).
<i>Note: Site-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted.</i>	

#### 4.1.1 Property Topography and Surface Water Flow

The Property is located at approximately 1,894 ft above msl. The topography in the vicinity of the Property gently slopes from the northeast, moderately slopes from the southwest, and is relatively flat from northwest to southeast (**Figure 1**). The Property is generally flat with a gentle slope to the southwest in the eastern portion of the Property and to the southeast in the western portion of the Property. Based on the topography, surface water flow infiltrates the ground surface in vegetated or gravel paved areas, flows overland, enters "drywell" catch basins in the eastern portion of the Property, and/or enters the storm drain system on or adjacent to the Property. Overland flow is anticipated to be to the south-southwest toward the Spokane River.

### 4.1.2 Regional and Property Geology

The Property overlies the Spokane Valley-Rathdrum Prairie aquifer and is situated between the Okanogan Highlands and Columbia Basin physiographic provinces. Soil at the Property consists of weathered glacial deposits. These soils are well-drained and typically exhibit moderate infiltration rates. Well logs for multiple environmental investigation and water supply wells located in the vicinity of the Property indicate Quaternary catastrophic flood deposits originating from glacial outwash and glacial lake deposits that consist of a mix of sand, gravel, and cobbles with some areas of interbedded silty lenses. According to USGS reports these glacial deposits are potentially underlain by either basaltic or metamorphic bedrock (USGS, 2005).

### 4.1.3 Regional and Property Hydrogeology

Property-specific groundwater direction and depth can only be determined by conducting site-specific testing, which Stantec has not conducted. Well logs from properties in the Property vicinity indicate that groundwater is present at approximately 22-50 ft bgs. Based on information obtained from numerous studies that have been conducted by the USGS the groundwater flow direction in the vicinity of the Property is likely to the west (USGS 2005).

## 4.2 Federal, State and Tribal Environmental Records

The objective of consulting historical sources of information is to understand the history of the Property and surrounding area and to evaluate if past uses may have resulted in RECs. Physical setting records are reviewed to evaluate whether the physical setting may have contributed to adverse environmental conditions in connection with the Property. During the review of historical records, Stantec attempted to identify Property uses from the present to its first developed use. Stantec's research included the reasonably ascertainable and useful records described in this section.

### 4.2.1 Listings for the Property

The Property was listed on the following environmental databases searched by EDR:

Listed Facility Name(s)/Address/ID#	Database Listing	REC? (YES / NO)
Spokane City Maint Division, Flt Svcs Cent G Flt Svcs Dept, Spokane City Signs Marker (Note that several sites are not designated with a name) 1410 & 1433 N Normandie, W Mission Ave & N Calispel St, and 103 E Mission Ave DOE Facility ID# 96373665, 28411151, 22442438	WA UST WA LUST WA CSCSL WA ALLSITES Financial Assurance RCRA NonGen/NLR RCRA-CESQG FINDS ECHO	Yes

Listed Facility Name(s)/Address/ID#	Database Listing	REC? (YES / NO)
Records indicate that the facility is a Resource Conservation and Recovery Act (RCRA) non-generator and a State of Washington hazardous waste generator with no reported violations. Records also indicate that fifteen USTs have been present at the Property. A 20,000-gallon unleaded gasoline and a 10,000-gallon diesel UST, which were installed in 1998, remains in use at the Property.. Historic reports (see <b>Section 4.4.6</b> ) and Washington Department of Ecology (DOE) records indicate that five of these USTs have been removed and that eight have been closed-in-place. The location, former contents, and size of only one of the USTs closed –n-place are known (adjacent to the former Field Engineers building on the west side of North Normandie Street <b>[Figure 2]</b> ). DOE issued a No Further Action (NFA) determination in 1998. Due to a lack of knowledge of the age, location, contents, and integrity of the closed-in-place USTs, this listing is considered a REC.		

#### 4.2.2 Listings for Nearby Sites with Potential to Impact Property

Stantec assessed data presented in the environmental agency database search report and online DOE databases to evaluate the potential for conditions to pose a REC, CREC, HREC, or potential environmental concern for the Property. The facilities listed in the table below were identified as a potential environmental concern for the Property. Each was further evaluated as to whether it represents a REC for the Property, and a rationale is provided.

Listed Facility Name(s)/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
222 W Mission Ave	EDR Historical Auto Stations	Adjacent and 0.011 miles northwest. (cross-gradient)	NO
The facility is historically listed as a Chevron station. There are no indications of a release from this facility and it is therefore not considered a REC.			
R & R Custom Colorlab 1401 N Calispel DOE Facility ID# 6468120	FINDS WA ALLSITES ECHO	Adjacent and 0.014 miles west-southwest. (downgradient)	NO
Records indicate that the facility is enrolled in the Washington Revised Site Visit Program (RSVP) with no reported violations. Due to a lack of known releases or violations at the facility this listing is not considered a REC.			
Patricia Hatch 50 W Mission DOE Facility ID# 19478775	WA ALLSITES WA UST	0.046 miles east-northeast. (upgradient)	NO
Records indicate that the facility contained two USTs with unknown content that were installed at an unknown date and removed as of August, 1992. Due to the lack of known releases at this facility this listing is not considered a REC.			
Pitney Bowes Inc 1313 N Atlantic Ave DOE Facility ID# 7661972	FINDS WA ALLSITES FINDS ECHO	0.068 miles south-southeast (cross-gradient)	NO
Records indicate that the facility is a TIER2 Emergency/Hazardous Chemical Reporter. Due to a lack of			

**Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

Listed Facility Name(s)/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
known releases or violations this listing in not considered a REC.			
Unocal 0571 1427 N Division St DOE Facility ID# 7490679	WA UST WA ALLSITES	0.081 miles east (upgradient)	NO
Records indicate that this facility contained three USTs of unknown content. One tank was removed in May 2004. Due to a lack of known releases this listing in not considered a REC.			
Precision Tune Spokane 1403 N Division DOE Facility ID# 47227583	WA UST WA ALLSITES EDR Historical Auto Station	0.082 miles east-southeast (upgradient)	NO
Records indicate that this facility contained one UST of unknown content that was removed at an unknown date. The facility is also listed as a Historical Auto Station. Due to a lack of known releases this listing in not considered a REC.			
EWU River Point Dental Hygiene HSB 160 310 N River Point Blvd DOE Facility ID# 8619520	WA ALLSITES WA MANIFEST	0.086 miles northeast (cross/upgradient)	NO
Records indicate this facility is a Washington State hazardous waste generator. There are no reports of releases or violations and therefore this listing is not considered a REC.			
Jiffy Lube 2325 1430 N Division St DOE Facility ID# 10832	EDR Historical Auto Station	0.089 miles east. (upgradient)	NO
Records indicate that this facility is a TIER2 Emergency/Hazardous Chemical Reporter The facility also is historically listed as a Minit Lube and Q Lube. Due to a lack of known releases or violations from this facility it is not considered a REC.			
Northwest Pipeline Corp 9 Mile Pig Trap 9 Mile Rd on Pipeline ROW DOE Facility ID# 6773174	WA ALLSITES WA MANIFEST	0.094 miles northeast. (cross/upgradient)	NO
Records indicate this facility is a Washington State hazardous waste generator. There are no reports of releases or violations and therefore this listing is not considered a REC.			
Vince Moore Auto Rain Sprinklers 1311 N Washington DOE Facility ID# 75435578	WA ALLSITES WA UST FINDS ECHO	0.098 miles west-southwest. (cross/downgradient)	NO
Records indicate that this facility contained one UST of unknown content that was removed at an unknown date. Due to a lack of known releases this listing in not considered a REC.			
BCT Printing 1307 N Washington DOE Facility ID# 4258176	WA ALLSITES FINDS ECHO	0.099 miles west-southwest. (cross/downgradient)	NO
Records indicate that the facility is enrolled in the Washington Revised Site Visit Program (RSVP) with no reported violations. Due to a lack of known releases or violations at the facility this listing is not considered a REC.			
411 W Cataldo Ave	WA UST	0.380 miles south-southwest	NO

**Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

Listed Facility Name(s)/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
DOE Facility ID# 71713561	WA LUST WA VCP WA ALLSITES WA CSCSL WA HSL RCRA Non-Gen/NLR	(cross/downgradient)	
Records indicate priority metals and petroleum impacts to soil above applicable cleanup levels at this facility. The status of the site is listed as "Cleanup Started" and the site has a Washington Ranking Method (WARM) ranking of 5. Records also indicate that the site contained one UST of unknown contents that was installed and removed at unknown dates. Given the distance and cross/downgradient position of the facility to the subject Property, migration of impacts to the Property is unlikely; therefore, this listing is not considered a REC.			
Spokane City Central Park Maintenance Pro 809 N Washington St DOE Facility ID# 4235787	WA UST WA VCP WA ALLSITES WA CSCSL WA HSL RCRA Non-Gen/NLR FINDS ECHO	0.433 miles south-southwest (cross/downgradient)	NO
Records indicate priority metals and polynuclear aromatic hydrocarbons (PAHs) impacts to soil above applicable cleanup levels at this facility. The status of the site is listed as "Cleanup Started" and the site has a WARM ranking of 5. Records also indicate that the site contained one UST of unknown contents that was installed and closed in place at unknown dates. Given the distance and cross/downgradient position of the facility to the subject Property, migration of impacts to the Property is unlikely; therefore, this listing is not considered a REC.			
Fuds Fairchild Nike 441 W Sharp DOE Facility ID# 4235787	WA ALLSITES WA CSCSL	0.177 miles southwest (cross/downgradient)	NO
Records indicate suspected base/neutral/acid organics, petroleum products, and polychlorinated biphenyls (PCBs) impacts to soil are suspected at this facility. The status is listed as "Awaiting Cleanup." Given impacts only being suspected, and the distance and cross/downgradient position of the facility to the subject Property, migration of impacts to the Property is unlikely; therefore, this listing is not considered a REC.			
Dees Auto Service 206 W Indiana DOE Facility ID# 46315252	WA ALLSITES WA CSCSL WA LUST WA UST FINDS ECHO	0.234 miles north (cross-gradient)	NO
Records indicate petroleum impacts to soil above applicable regulatory standards. The status of the site is "Cleanup Started." Records further indicate that three USTs of unknown content were closed in place at unknown dates and one UST of unknown content was removed at an unknown date. Given impacts to soil only and the distance and cross-gradient position of the facility to the subject Property, migration of impacts			

Listed Facility Name(s)/Address	Database Listing	Distance/Direction from Property	REC? (YES / NO)
to the Property is unlikely; therefore, this listing is not considered a REC.			
Drapery Mart 225 W Indiana Ave DOE Facility ID# 5190	WA INST CONTROL WA ALLSITES WA CSCSL NFA WA VCP	0.225 miles north (cross-gradient)	NO
Records indicate that one diesel and one Bunker C heating oil UST were removed from the site in 2010 and that PAH impacts to soil at depth remain at the site. DOE issued a NFA determination in 2011 after an environmental covenant was put in place at the facility. Given impacts of PAHs to soil only and the distance and cross-gradient position of the facility to the subject Property, migration of impacts to the Property is unlikely; therefore, this listing is not considered a REC.			

### 4.3 Local/Regional Environmental Records

Stantec checked the following sources to obtain information pertaining to Property use and/or indications of RECs in connection with the Property:

#### 4.3.1 Washington Department of Ecology

Agency Name	Findings
Washington DOE  File Review Date: 06/29/2016	Stantec reviewed available documents (see <b>Section 4.4.6</b> ) for the Property. Records indicate petroleum impacts to soil above applicable regulatory standards. Records also indicate numerous UST have been/are present at the Property, several of which have been removed and remediated; however there are numerous tanks with an unknown status and/or location. DOE issued a NFA for a portion of the Property located at 1401 North Normandie Street in 1998 related to petroleum contaminated soil.

#### 4.3.2 Spokane County Tax Assessor Records

Agency Name	Findings
Spokane County Department of Assessments  Search Date: 06/14/2016	Stantec reviewed online tax records for the Property. The records show that the Property consists of one parcel of land that is approximately 5.37 acres in size. Available records also indicate that the property has been developed and used as a City storage, maintenance, and/or fueling facility from the early 1900s until the present.

### 4.4 HISTORICAL RECORDS REVIEW

#### 4.4.1 Land Title Records/Deeds

A copy of the Property deed (**Appendix C**) was provided to Stantec during this Phase I ESA. The deed shows that City purchased the Property from JJ & Anna Brown in 1899. An additional document provided to Stantec also shows that Normandie Street was vacated between Mission Avenue and Sinto Avenue in 1958.

#### 4.4.2 Aerial Photographs

Stantec reviewed historical aerial photographs of the Property and surrounding area obtained from EDR. General land use can often be discerned from the type and layout of structures visible in aerial photographs. However, specific elements of a facility's operation usually cannot be discerned from aerial photographs alone. The following table summarizes Stantec's observations of the reviewed historical aerial photographs. Copies of the aerial photographs are provided in **Appendix E**.

Photo Year	Observations
1938	Photograph quality is good. The Property appears developed with numerous structures and is bisected by Normandie Street. The western portion of the Property appears to contain approximately eight structures around the perimeter and three on the interior of the Property; the structures along the northern and eastern perimeter appear generally in their current configuration. The eastern portion of the Property appears to contain approximately three structures in the northwest portion of the Property with the south and eastern portions appearing vacant/undeveloped; two of the structures appear in their current configuration. The surrounding area appears mostly developed with a mix of residential, commercial, and industrial uses.
1946	Photograph quality is fair-poor. The Property and surrounding area appear generally the same as the 1938 aerial photograph with the exception that the three structures on the interior of the western portion of the Property are no longer present.
1953	Photograph quality is fair. The Property and surrounding area appear generally the same as the 1946 aerial photograph with the exception that on the western portion of the Property, the structures on the southern perimeter are no longer present and there is a large structure along the western perimeter (this structure appears in its current configuration). Also, on the eastern portion of the Property there is a new structure present in the northeast corner.
1962	Photograph quality is poor. From what can be discerned, the Property and surrounding area appear generally the same as the 1953 aerial photograph with the exception that a new structure may be present in the southwest corner of the eastern portion of the Property.
1972	Photograph quality is good. The Property appears generally the same as the 1962 aerial photograph with the exception that there is one large structure present near the center of the western portion of the Property, one large structure along the southern perimeter, and a new small structure near the northeast corner of the eastern portion of the Property; all of these structures appear in their current configuration. The surrounding area appears generally the same as the 1962 aerial photograph with the exception that some of the residential properties immediately to the north and southeast of the Property are now utilized for commercial or industrial uses.
1977	Photograph quality is good. The Property and surrounding area appear generally the same as the 1972 aerial photograph.
1982	Photograph quality is fair. The Property and surrounding area appear generally the same as the 1977 aerial photograph.
1991	Photograph quality is very poor. From what can be discerned the Property and surrounding area appear generally the same as the 1982 aerial photograph.
1995	Photograph quality is good. The Property and surrounding area appear generally the same as the 1982 aerial photograph.
2005, 2006, 2009, 2011	Photograph quality is good. The Property and surrounding area appear generally the same as the 1995 aerial photograph with the exception that on the eastern portion of the Property, the building in the northwest corner is no longer present and on the western portion a new small structure, possibly a fueling canopy, appears in the southwest corner. Also, there is development of several large structures on properties immediately to south of the Property. All of these features appear in their current configuration.

### 4.4.3 City Directories

Stantec obtained a search of historical city telephone directory listings on West Mission Avenue and North Normandie Street from EDR. EDR provided directory listings from 1964 to 2013, at approximately five year intervals (**Appendix F**). Historical odd-numbered addresses of the 100-200 Blocks of West Mission Avenue as well as even-numbered and odd-numbered addresses of the 1400 Block of North Normandie Street are considered to be on the Property. Findings from the review of historical city telephone directories for addresses associated with the Property are summarized below:

Year	Address	Listing
1964, 1967, 1970, 1975, 1980, 1984, 1989	103 West Mission Street	City Dept of Traffic Engineering Alarm & Signal Div (whse); No listing (1989)
	115 West Mission Street	City Dept of Pub Safety-Traffic Signs & Marker Div; City Central Garage (1970, 1975, 1980); Vacant (1984); City Engineering Servs (Matls Laby) (1989)
	215 West Mission Street	City dept of Pub Wks whse; No listing (1984, 1989)
	1410 North Normandie Street	City Sev & Equip; City Central Garage (1980)
	1414 North Normandie Street	City Sewer Dept; City Eng's Field Ofc-Constn Survey (1964)
	1420 North Normandie Street	City Department of Public Works (Sewer Div) (1984, 1989)
	1423 North Normandie Street	City Engineer's (Constn Field Ofc) (1984); City Pub Works Dept (Street Mtce Div) (1989)
	1424 North Normandie Street	City Stores Div
	1428 North Normandie Street	City Radio Communication & Electronics (1967, 1970, 1975, 1980, 1984)
	1428 North Normandie Street	City Radio Communication & Electronics (1967, 1970, 1975, 1980, 1984)
	1429 North Normandie Street	City Eng Constn Field Ofc (1967, 1967, 1975)
	1433 North Normandie Street	City Street Dept
1992	1410 North Normandie Street	CTY GARAGE
	1420 North Normandie Street	CTY SEPTIC CLEANG, CTY SWR MNTNCE
	1424 North Normandie Street	CTY STORES
	1433 North Normandie Street	CTY PB WK CONS DIV, CTY STRT MNTNCE
1999	1424 North Normandie Street	Spokane City of Purchasing
	1433 North Normandie Street	Spokane City of: Police Department,

**Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

Year	Address	Listing
		Purchasing, Real Estate Division, Records Management, Reprographics, Retirement, Risk Management, Snow Removal Street Sweeping, Spokane Center, Spokane Regl Sld Wst Systems, Transportation, Treasurer, Street Maintenance & Emergencies
2003	1410 North Normandie Street	City of Spokane
	1420 North Normandie Street	Spkn City of Waste Water Mngmn
	1424 North Normandie Street	Crystal Palace
	1433 North Normandie Street	Street Mntnnc of Spkn City
2008	1410 & 1423 North Normandie Street	City of Spokane

No indication of historical potentially contaminating uses on offsite properties in the vicinity of the Property were discovered during Stantec's review of directory listings.

#### 4.4.4 Historical Fire Insurance Maps

Stantec reviewed historical Sanborn fire insurance maps of the Property and surrounding area provided by EDR. The following table summarizes Stantec's observations of the historical Sanborn maps. Copies of the maps are provided in **Appendix G**.

Map Year	Observations
1902	The Property appears as vacant, undeveloped land. The surrounding area appears mostly undeveloped with a few dwelling present to the north, east, and south.
1910	The western portion of the Property is developed with approximately 12 structures, and is labeled as "City Corporation Yard." The structures include the following: wagon, cement, tank, pipe, hay, dump cart and general storage; and a buggy house, office, grain warehouse and black smith and wagon repair shop (the shop is located in the southwest corner of the Property). The eastern portion of the Property contains one large structure that appears to be a storage shed with a small office in the northeast corner of the Property. Infill of residential, commercial, and industrial properties has occurred in the surrounding area. Of note, there is a lumber mill/yard immediately to the east and south (of the eastern portion) of the Property.

**Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

Map Year	Observations
1950	<p>All of the previously existing structures on the Property are no longer present. The western portion of the Property contains approximately eight structures along the west, north, and east perimeters. These structures include equipment storage, garages, a City Garage, an office, a stock room, work bench, steam heater room, wood working shop, and street sweeper storage house.</p> <p>The eastern portion of the Property is developed with six structures; three in the northwest corner, two in the northeast corner, and one in the southeast corner. Two of the structures in the northwest corner are labeled as "Municipal Garage" and contain repair shops, a blacksmith shop and painting; and there is a 280-gallon gasoline tank identified near the garage. One of the structures in the northwest corner is labeled as "Municipal Water Department's Meter Building." One of the structures in the northeast corner is labeled "Fire Department." The structure in the southeast corner is labeled as an office for "Used Auto Sales."</p> <p>The surrounding area appears generally the same as the 1910 map with the exception that the lumber mill to the east is no longer present and there is carpenter and contractor storage present to the west.</p>
1959, 1961	<p>The Property and surrounding area appear in generally the same configuration as the 1950 map with the exception that there are two additional structures in the southeast corner of the western portion of the Property as well as a gas &amp; oil station near the center of the western portion. Also, on the eastern portion of the Property the "Water Department" structure is now labeled "Municipal Storage" and a "Sewer Department" structure is adjoining it to the south; there is a large "City Shops" building with offices along the southern perimeter; there is gas &amp; oil in the southwest corner; and there is a machine shop in the northeast corner.</p>
1965	<p>The Property and surrounding area appear in generally the same configuration as the 1961 map with the exception that there is more commercial development in the surrounding area.</p>
1968, 1969, 1970, 1980	<p>The Property and surrounding area appear in generally the same configuration as the 1965 map with the exception that there is a truck parking building near the center of the western portion of the Property and there are two salt storage structures near the northeast corner of the eastern portion of the Property. The Property appears generally in the same configuration as the current day.</p>

#### 4.4.5 Historical Topographic Maps

Stantec reviewed historical USGS 7.5-minute and/or 30-minute topographic maps of the Spokane and Spokane NW, Washington Quadrangles provided by EDR to help identify past Property use. No RECs were noted during our review of the topographic maps. Copies of the historical topographic maps are provided in **Appendix G**.

#### 4.4.6 Previous Environmental Reports

Stantec reviewed the following previous environmental reports and documents pertaining to the Property. Copies of these reports and documents can be found in **Appendix H**.

Roar Tech, Inc.: Environmental Site Evaluation, City of Spokane Fleet Services on Normandie, Closure, Bunker C Storage Tank; 1993.

- Roar Tech, Inc. (Roar) performed a Bunker-C heating oil UST closure at the Property in December, 1993.

**Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

- Closure activities included the removal of existing product, cleaning of the tank, sampling beneath the tank, and in-place closure of the tank.
- The tank is located on the west side of North Normandie Street in front of the former Engineering Department building as shown on **Figure 2**.
- Soil sample results indicated concentrations of petroleum hydrocarbons below applicable regulatory standards.
- The tank was closed in-place due to concerns of the structural integrity of the building and the location of utilities.

DOE: Early Notice Letter Regarding a Release From an Underground Storage Tank (UST) System at 1410 North Normandie, Spokane, Washington (City Shop); April 28, 1997.

This Early Notice Letter also contains an attachment report that also is summarized below and titled as follows:

Rob's Demolition: Site Assessment Results and Independent Cleanup Action Report, City of Spokane Fleet Services, 1410 N. Normandie Street, Spokane, Washington, April, 1997.

- DOE Early notice letter states that diesel contaminated soil was discovered during the removal of a 12,000-gallon UST on March 6, 1997. The initial investigation by DOE confirmed that a release had occurred.
- Rob's Demolition (Rob's) report notes that five tanks were removed from the Property and a total of 447.25-tons of PCS were excavated and removed from two areas on the property as shown on **Figure 2**: 1) Diesel Tank – one 12,000-gallon diesel UST (located adjacent and north of the pump island) and one 3,000-gallon diesel UST, previously abandoned in place, (located underneath the pump island) were removed from a location west of Normandie and north of Sinto; and 2) Gas Tanks – two 6,000-gallon and one 12,000-gallon gasoline USTs were removed from a location at the northeast corner of Normandie and Sinto.
- Rob's report also notes that no groundwater was encountered during excavation activities and that groundwater in the vicinity of the property is expected to be approximately 50 ft bgs.
- Soil sampling results consistent with DOE protocols from Rob's tank removal activities indicated that PCS with Washington total petroleum hydrocarbons – diesel fuel (WTPH-D) concentrations [1480 milligrams/kilogram (mg/kg)] above applicable regulatory standards remained in place underneath the diesel pump island, approximately 11 ft bgs, in the diesel tank area and that Washington total petroleum hydrocarbons – gasoline (WTPH-G) and benzene, toluene, ethylbenzene, and xylene (BTEX) were detected below applicable regulatory standards in the gas tank area. Note that the concentration of diesel is above current day regulatory standard; and that concentrations of gasoline and BTEX are below current day regulatory standards.

**Phase I Environmental Site Assessment, Former Normandie Storage/Maintenance/Fueling Facility**

127 West Mission Avenue, Spokane, Washington

Lambert Group, Inc.: Remedial Investigation & Diesel-Containing Soil Removal for 1433 North Normandie, Spokane, Washington; April, 1997.

- Lambert Group, Inc. (Lambert) conducted a remedial investigation at 1433 North Normandie in early 1997 that resulted in the excavation and removal of 447.25 tons of diesel-impacted soil from around the former diesel fuel island located north of Sinto Avenue and west of North Normandie Street.
- Lambert concludes that over-excavation of the excavation had resulted in the removal of soil containing concentrations of diesel above applicable regulatory standards and that no further environmental investigation be conducted.

DOE: Decision on the Independent Cleanup Action at the City of Spokane Fleet Services Property, Located at 1401 North Normandie, Spokane, Washington; June 23, 1998.

- The letter states that the majority of PCS were excavated and removed and that the PCS left in place, located adjacent to and outside the cesspool, was due to concerns regarding the building foundation and utilities.
- DOE concluded that based upon the information provided a determination of NFA was being made.

This Early Notice Letter also contains an attachment report that is summarized below and titled as follows:

Lambert Group, Inc: Remedial Investigation and PCS Disposal, 1401 North Normandie, Spokane, Washington; March, 1998.

- Lambert conducted a remedial investigation regarding PCS in the area of a broken sewer drain line in the City of Spokane Shops located at 1401 North Normandie Street.
- The drain lines were located underneath electrical and steam lines for the Property and emptied into a cesspool. The total extent was not removed due to concerns of structural damage to the building.
- A total of 68.75 tons of PCS were excavated and disposed offsite.

## 5.0 SITE RECONNAISSANCE

A reconnaissance visit was conducted at the Property by Alan Gay of Stantec on July 11, 2016. Photographs collected during the Property visit are included in **Appendix A**.

### 5.1 SITE RECONNAISSANCE METHODOLOGY

The Property reconnaissance focused on observation of current conditions and observable indications of past uses and conditions that may indicate the presence of RECs. The Property reconnaissance was conducted on foot and Stantec utilized the following methodology to observe the Property:

- Traverse the outer Property boundary;
- Traverse transects across the Property;
- Traverse the periphery of all structures on the Property; and
- Visually observe accessible interior areas expected to be used by occupants or the public, maintenance and repair areas, utility areas, and a representative sample of occupied spaces.

### 5.2 GENERAL DESCRIPTION

<b>Property and Area Description:</b>	The Property is located in an area characterized by mixed commercial and residential development.
<b>Property Operations:</b>	The Property is a former municipal storage, maintenance, and fueling facility; there are no current operations at the Property except the fueling facility. The buildings remaining at the Property are labeled on <b>Figure 2</b> , based on historic information provided by the City, to indicate most recent uses.
<b>Structures, Roads, Other Improvements:</b>	The Property is developed with approximately 16 structures built between the early- and mid-1900s.
<b>Property Size (acres)</b>	The Property is 5.37 acres in size.
<b>Observed Evidence of Past Property Use(s):</b>	None observed. The majority of the Property has been operated by the City as a storage and maintenance facility since the early 1900s.
<b>Sewage Disposal Method:</b>	City of Spokane.
<b>Potable Water Source:</b>	City of Spokane.
<b>Electric and Gas Service:</b>	Electric and natural gas service is provided by Avista.

### 5.3 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

The following table summarizes Stantec's observations during the Property reconnaissance.

<b>Observations</b>	<b>Description/Location</b>
Hazardous Substances and Petroleum Products as Defined by CERCLA 42 U.S.C. § 9601(14):	None observed.
Drums (≥ 5 gallons):	One 55-gallon drum of unknown content, not in secondary containment, was observed in the small vehicle maintenance shop. The drum appeared to be in good condition with no observed evidence of leaks or spills.
Strong, Pungent, or Noxious Odors:	None observed.
Pools of Liquid:	None observed.
Unidentified Substance Containers:	None observed.

Observations	Description/Location
PCB-Containing Equipment:	Two pole-mounted transformers were observed; one over the Field Engineers Building and one near the intersection of North Normandie Street. The transformers appeared to be in good condition with no observed evidence of leaks or spills.
Other Observed Evidence of Hazardous Substances or Petroleum Products:	Petroleum floor stains (some extensive); areas of suspected lead-based paint (LPB) (some of which is peeling); and floor tile, ceiling tile, pipe wrap, and roofing material that are suspect asbestos-containing material were observed in various portions of the Property.

## 5.4 INTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of the building interiors and/or identified the following information during the interview or records review portions of the assessment. The specific buildings described below will be identified by the building labels provided in **Figure 2**.

Observations	Description/Location
Heating/Cooling Method:	Heat is provided to several of the buildings by either baseboard electric heating units or radiators serviced by a boiler. The Field Lab Building is cooled by a window-mounted air-conditioning unit.
Surface Stains or Corrosion:	Minor-moderate staining was observed on the main floor of the Fleet Building along with some staining in the vicinity of the current and former hydraulic lift equipment in the basement of the building (west side), in the Annex Building, in the Bridge Building, Radio & Body Shop Building, Radio & Body Shop Building Apron (upper and lower), Center Shed, Calispel Shed, and Mission Sheds. The west end of the Radio & Body Shop Building contains heavy petroleum deposits that may be associated with storage of asphalt paving equipment. Extensive staining was observed in portions of the Mission Sheds, Calispel Shed, Center Shed, and Wash Bay areas.
Floor Drains and Sumps:	Floor drains were observed evenly spaced in the bays of the Fleet Building basement, with no evidence of staining. Two sumps were observed on the east, interior portion of the Fleet Building; it was reported that no oil has been known to enter the sumps. A trench drain and sump that tie into the sanitary sewer system are present along the south side of the building. There is also an oil-water separator present to the west of the building. The Annex Building contains two sumps on the south side of the building and six grated sumps in the basement with some staining. Blocked sumps noted throughout the Mission Sheds. Floor drains were observed throughout the interior lower levels of most buildings in the eastern portion of the Property.
Other Interior Observations:	The Lube-oil area of the Fleet Building has sorbent padding laid down. The Bridge Building contains floor tile that may contain asbestos. Server room in the basement contains asbestos-wrapped pipe that is encapsulated. The Field Lab Building contains ceiling tile of unknown composition.

	<p>The Radio &amp; Body Shop Building previously had flooring removed from a room in the northeast corner of the building as part of an asbestos abatement event. Ceiling is coated with peeling lead-based paint (LBP).</p> <p>The Small Vehicle Repair area contained two hydraulic lifts.</p>
--	--

## 5.5 EXTERIOR OBSERVATIONS

Stantec made the following observations during the Property reconnaissance of exterior areas and/or identified the following information during the interview or records review portions of the assessment.

Observations	Description/Location
On-site Pits, Ponds, or Lagoons:	None observed.
Stained Soil or Pavement:	Stained pavement observed throughout the Property
Stressed Vegetation:	None observed.
Waste Streams and Waste Collection Areas:	None observed.
Solid Waste Disposal:	None observed.
Potential Areas of Fill Placement:	None observed
Wastewater:	None observed.
Stormwater:	Storm sewers and "drywells" catch basins throughout the property
Wells:	"Drywells" catch basins observed through the Property, particularly on the eastern portion.
Septic Systems:	None observed.

## 5.6 UNDERGROUND STORAGE TANKS/STRUCTURES

Observations	Description/Location
Existing USTs:	Evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of USTs, was observed during the Property reconnaissance. Mr. Wickert reported that one 10,000-gallon diesel and one 20,000-gallon unleaded gasoline UST were still in service and located near the northeast corner of the North Normandie Street and Sinto Avenue.
Former USTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface patches), which would indicate the presence of historical USTs, was observed during the Property reconnaissance. Mr. Wickert reported that a former UST had been removed from an area north of the east side of the Fleet Services Building. Records indicate that up to fifteen USTs have been present on the Property throughout its use (see <b>Appendix I</b> and <b>Section 4.4.6</b> ).
Other Underground Structures:	None observed.

## 5.7 ABOVEGROUND STORAGE TANKS

Observations	Description/Location
Existing ASTs:	No visible evidence (storage tanks, fill pipes, vent pipes, dispensers, surface stains), which would indicate the presence of ASTs, was observed during the Property reconnaissance.
Former ASTs:	No visible evidence (fill pipes, vent pipes, dispensers, surface stains), reports, or other evidence of the former presence of ASTs was discovered during the Property reconnaissance.

## 5.8 ADJOINING PROPERTIES

### 5.8.1 Current Uses of Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about use and activities on adjoining properties.

<b>North</b>	Commercial, including a strip mall.
<b>South</b>	Commercial – Bowling alley and Spokane Laborers' International Local 238 Union headquarters.
<b>East</b>	Commercial – Spokane Housing Authority offices. Residential – Apartments.
<b>West</b>	Commercial – Frontier Behavioral Health. Residential – Apartment complex (under construction).

### 5.8.2 Observed Evidence of Past Uses of Adjoining Properties

Observations of adjoining properties providing indications of past use and activities, if any, are described below.

<b>North</b>	None observed.
<b>South</b>	None observed.
<b>East</b>	None observed.
<b>West</b>	None observed.

### 5.8.3 Pits, Ponds or Lagoons on Adjoining Properties

As viewed from the Property and/or from public rights-of-way, Stantec made the following observations about the presence of pits, ponds and lagoons on adjoining properties.

<b>North</b>	None observed.
<b>South</b>	None observed.
<b>East</b>	None observed.
<b>West</b>	None observed.

## 5.9 OBSERVED PHYSICAL SETTING

<b>Observations</b>	<b>Description/Location</b>
Topography of the Property and Surrounding Area:	The Property has been extensively regraded to accommodate daylight basement entry for several of the buildings to the east of North Normandie Street. The general gradient is toward the southwest for the eastern portion of the Property. Buildings with two entry levels include the Radio/Body Shop, the Annex, and the Fleet building. There is also a storage space under the parking area of the Field Lab and Bridge Buildings. In general, the area in the middle of the eastern portion of the Property between the Annex Building, Radio & Body Shop Building, Storage Bay, the ramp down from the Bridge building, and the Fleet Building is a large "sump" that slopes toward the north face of the Fleet

	Building. Drainage in this area is to the shallow "drywell" catch basins. To the west of Normandie, the Property is flat, with a general gradient toward the southeast.
--	---

## 6.0 INTERVIEWS

Stantec conducted interviews with the following individuals:

Name	Relationship to Property	Key Findings
Mr. Ernest Wickert	Property Representative (former Facility Foreman)	Mr. Wickert reported that he has been involved with the Property since 1996 and is the Facilities Maintenance Foreman. He reported that numerous USTs have been removed from the property in the past and that there are currently two active (one unleaded gasoline and one diesel) USTs that serve the fueling station located on the northeast corner of North Normandie Street and Sinto Avenue. Also, he reported that some asbestos and lead abatement activities have occurred in some buildings but that asbestos-containing materials (ACM) and LBP are likely still present in/on Property buildings. Mr. Wickert also reported that the Property has operated as a municipal storage, maintenance, and fueling facility since the late 1890's.

## 7.0 EVALUATION

This section provides a summary overview of Findings, Opinions, and Conclusions.

### 7.1 FINDINGS AND OPINIONS

Information gathered from interviews, reviews of existing data, and a property inspection was evaluated to determine if RECs are present in connection with the Property. Based on this information, Stantec made the following findings and developed the following opinions.

- Finding 1:** Records and historic reports indicate that six USTs have been removed from the Property. PCS with impacts below applicable regulatory standards have been left in place.
- Opinion 1:** Due to petroleum impacts to soil being remediated to below applicable regulatory standards this finding is considered a HREC.
- Finding 2:** Records indicate that during a drain excavation at 1401 North Normandie Street PCS above applicable regulatory standards was left in place due to concerns regarding utilities and the structural integrity of the building.
- Opinion 2:** Due to PCS with concentrations above applicable regulatory standards being left in place this finding is considered a REC.
- Finding 3:** Records indicate that eight USTs have historically been closed in place on the Property. The size, content (former contents), age, integrity and location of seven of these USTs are unknown.
- Opinion 3:** The potential presence of up to seven USTs of unknown size, content (former contents), age, integrity and location, is considered a REC.
- Finding 4:** During the Property Reconnaissance visit Stantec noted extensive petroleum staining and petroleum deposits throughout the Property.
- Opinion 4:** Given the extent and possible long term occurrence of petroleum leaking onto ground surfaces, this finding is considered REC.
- Finding 5:** During the Property Reconnaissance visit Stantec noted numerous "drywell" catch basins throughout the Property and particularly on the eastern portion of the Property. Given the age and history of the Property there is the likelihood that surface runoff has deposited petroleum and/or metals into these catch basins.
- Opinion 5:** Given the age and history of the Property there is the likelihood that surface runoff has deposited petroleum and/or metals into these catch basins., this finding is considered a REC.
- Finding 6:** Historic records indicate that a used car lot operated at the in the southeastern portion of the Property in the 1950's.
- Opinion 6:** Given the age of the facility and unknown use (e.g., automotive repair, leaking automobile oil/fuel onto the ground surface, etc.), this finding is considered a REC.

- Finding 7:** Historic industrial use in the surrounding area, namely two lumber mills on adjacent properties, has the potential for impacts to have migrated to the Property.
- Opinion 7:** Given the proximity of historic industrial facilities to the Property, there is the potential for hazardous and petroleum impacts to have migrated to the Property; therefore, this finding is considered a REC.
- Finding 8:** Numerous facilities in the vicinity of the Property are listed on one or more environmental databases. There is no evidence to suggest potential releases from these facilities would have migrated to the Property.
- Opinion 8:** Given the unlikely potential for impacts from these facilities to have migrated to the Property, this finding is not considered a CREC, HREC, REC, or *de minimis* condition for the Property.
- Finding 9:** No surveying or testing for ACM or LBP was conducted as part of the Phase I ESA. Based on the age of the Property structures, information obtained from interviews with the Property representative (Ernest Wickert) and review of historical documents, the presence of ACM and LBP is likely.
- Opinion 9:** ACMs and LBP do not meet the definition of a REC set forth by ASTM 1527-13 and are considered a “non-scope consideration”. ACMs and LBPs, if present at the Property would be considered a BER since ACMs and LBPs must be handled in accordance with local, state, and federal regulations. If Property structures will be renovated or demolished, appropriate testing for ACM and LBP should be conducted prior to these activities.

## 7.2 DATA GAPS

ASTM E1527-13 identifies a “data gap” as the lack or inability to obtain information required by the standards and practices of the rule despite good faith efforts by the Environmental Professional or the User.

Any data gaps resulting from the Phase I ESA described in this report are listed and discussed below.

Gap	Discussion
Deletions or Exceptions From Scope of Work Referenced in Section 2.3:	None
Weather-Related Restrictions To Property Reconnaissance:	None
Facility Access Restrictions to Property Reconnaissance:	None
Other Property Reconnaissance Restrictions:	None
Data Gaps From Environmental Records Review:	None
Data Gaps From Historical Records Review:	None
Data Gaps From Interviews:	None
Other Data Gaps:	None

## 7.3 CONCLUSIONS

Stantec has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-13 of property located at 127 West Mission Street in Spokane, Washington. Any exceptions to, or deletions from, this practice are described in **Sections 2.3** and **7.2** of this report. This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Property except for the following:

1. Records indicate that six USTs have been removed from the Property and that PCS with impacts below applicable regulatory standards have been left in place; due to impacts to soil being remediated below applicable regulatory standards this is considered a HREC. Records further indicate that eight USTs have been closed in place; however, the age, size, integrity, contents (former contents), and location of seven of these USTs is unknown. Therefore this is considered a REC.
2. Records indicate that during a drain removal excavation at 1401 North Normandie Street PCS with impacts above applicable regulatory standards and a 5,000 gallon UST (closed-in-place) were left in place due to concerns regarding utilities and the structural integrity of the building. Due to impacts above regulatory standards being left in place, this is considered a REC.
3. During the Property Reconnaissance visit Stantec observed extensive petroleum staining on the ground surface throughout the Property. Stantec also observed numerous "drywell" catch basins throughout the Property. Due to the potential age and extent of the staining and the potential for runoff to have deposited petroleum substances in the catch basins, these findings are considered RECs.
4. Historic records indicate the presence of a used car lot in the southeastern portion of the Property. Given the possibility for automotive repair and leaks from automobiles to have occurred, this is considered a REC.
5. Historic industrial use in the vicinity of the Property, namely two lumber mills on adjacent properties. Given the proximity of these and other facilities there is the potential for impacts to have migrated to the Property; therefore, this finding is considered a REC.

## 8.0 Non-Scope Considerations

The scope of work completed was limited solely to those items in the ASTM E1527-13 standard. No ASTM E1527-13 non-scope services were performed as part of this Phase I ESA.

### Stantec Resumes

# Nathan C. Magnusson

Staff Geologist

---

Nathan Magnusson is a geologist with four years of experience supporting a variety of environmental projects throughout the Pacific Northwest and upper Midwest. Types of projects he has supported include due diligence/Phase I and II Environmental Site Assessments; surface and subsurface soil and groundwater investigations; and remedial investigations. Along with these activities Nathan has supported operation and maintenance of soil and groundwater remediation systems. Nathan also works extensively with Stantec's brownfields program in the Pacific Northwest. He has been responsible for field crew management, including oversight of exploratory drilling and sampling programs; field program coordination and implementation; field data acquisition; data analyses and interpretation; and report preparation.

## EDUCATION

M.S., Geology, Hydrogeology Emphasis, University of Wisconsin - Milwaukee, Milwaukee, Wisconsin, 2012

B.S., Biology (major) Geology (minor), St. Norbert College, De Pere, Wisconsin, 2003

## CERTIFICATIONS

CPR and First Aid, Bellevue, Washington 2015

OSHA 40- hour HAZWOPER Certification, Milwaukee, Wisconsin 2012

OSHA 8-hour HAZWOPER Refresher, Bellevue, Washington 2015

OSHA Construction Safety and Health, Milwaukee, Wisconsin 2013

API WorkSafe, Bellevue, Washington 2015

Green Defensive Driving, Bellevue, Washington 2014

HAZCOM, Bellevue, Washington 2014

Jason is a California Certified Asbestos Consultant and Lead Related Construction Inspector/Assessor with more than thirteen years of environmental consulting experience. His experience includes Phase I and II environmental site assessments, groundwater assessments, asbestos surveys, lead-based paint surveys, hazardous materials assessments, vapor sampling, sampling for polychlorinated biphenyls (PCBs) in caulk, remedial investigations, air monitoring, personal noise dosimetry, and biological surveys.

His experience also includes assisting with the preparation of numerous California Environmental Quality Act (CEQA) Initial Studies and Environmental Impact Reports. Jason is proficient with preparing air quality, greenhouse gases, and noise impact analyses sections and technical studies.

## EDUCATION

BS, Environmental Biology, California State University, Northridge, California, 2004

## REGISTRATIONS

Certified Asbestos Consultant #12-4949, State of California

Lead Inspector/Risk Assessor #19068, California Department of Public Health

## PROJECT EXPERIENCE

### Environmental Site Assessments Phase I, II, III

Combined Phase I and II Environmental Site Assessments (ESA) (Project Manager)

*Jason served as project manager for combined Phase I and Phase II ESAs, groundwater monitoring, and reporting projects for a major retail tire facility. Projects generally included assessing the extent of contamination associated with hydraulic lifts, underground storage tanks (UST), and other activities associated with operating a tire replacement facility by advancing temporary borings using direct-push drilling techniques to obtain soil samples beneath the site.*

Phase I Environmental Site Assessments (ESA), Various Locations, California (Project Scientist)

*As project scientist, Jason has performed Phase I ESAs on various types of properties including commercial facilities, office buildings, and undeveloped land to identify the potential magnitude of environmental liability associated with identified recognized environmental conditions at the properties.*

### Warehouse / Light Industrial

Former Industrial Facility Methane Survey, San Pedro, California (Staff Scientist)

*Jason conducted a methane survey at a former commercial industrial facility in San Pedro in accordance with Los Angeles Department of Building and Safety (LADBS) guidelines. Work comprised the installation of 15 soil vapor probe points and sampling on two consecutive days for methane via a company licensed by the LADBS.*

Inactive Railroad Spur Evaluation, San Pedro, California (Staff Scientist)

*Jason served as field staff for the evaluation of an inactive railroad spur. The site was part of a former bakery property that had formally operated USTs, hydraulic lifts, and a clarifier that had since been removed, yet included a railroad spur that had been reportedly treated routinely with herbicides/pesticides and rodenticides. The purpose of the evaluation was to determine the extent of arsenic and lead, as well as other constituents of concern that had been detected, that might be present at levels considered hazardous prior to the redevelopment of the site into a nationally known retail store. Additional investigations, and as part of the conditions of the permit application submitted by the client to the Los Angeles Building and Safety Department, included the installation of shallow soil vapor probe points and methane soil gas testing in accordance with the guidelines and methane code set forth by the LADBS.*

### Polychlorinated Biphenyls (PCBs) Sampling

Sampling for PCBs in Caulk and Sealants, Confidential Healthcare Provider, Various Locations, California (Associate Scientist)

*Jason performed sampling of caulk and sealants at multiple facilities for the presence of PCBs to determine if the caulk would require special handling and/or disposal in accordance with U.S. Environmental Protection Agency (EPA) requirements.*

Mr. Hatfield is a Professional Geologist and Project Manager with over 20 years of experience in environmental consulting and project management. His project experience includes property assessment, improvement, development and redevelopment of commercial, municipal, and industrial properties. His project management responsibilities include technical direction, data analysis, report writing, budget development and tracking, scheduling, and coordination of fieldwork. Mr. Hatfield has successfully managed and/or personally completed a wide range of projects including: environmental due diligence related to property transactions, large private redevelopments, Brownfield redevelopment, regulatory permitting and compliance; and investigation and remediation of sites involving soil and groundwater contaminated with petroleum compounds, agricultural chemicals, chlorinated compounds, and metals. His skills in dealing with a wide range of contaminants and site investigations have helped many clients protect and enhance their property values.

## EDUCATION

Health & Safety Training for Hazardous Waste Operations, 40-hour, OSHA, 1995

Bachelor of Science, Geology, University of Wisconsin, Madison, Wisconsin, 1995

## REGISTRATIONS

Certified Site Assessor, State of Wisconsin

Certified Hydrogeologist, State of Wisconsin

Professional Geologist #1247-13, State of Wisconsin

## PROJECT EXPERIENCE

**Brownfield Remediation and Redevelopment**  
Redevelopment Area Phase I, Site Investigation and Remediation, Menomonee Falls, Wisconsin (Project Manager)

*Menomonee Falls, Wisconsin (Project Manager)*  
Stantec conducted an initial Phase I ESA of a small portion of an approximately 40 acre commercial redevelopment area. Findings of the ESA identified numerous abandoned parcels in the redevelopment area with environmental concerns. In a less than two year period, more than 10 separate areas of historic contamination were identified, investigated, remediated, and closed by the WDNR to allow the redevelopment to continue. Chris was the main client contact for the various environmental challenges and managed the process so that appropriate remedial measures were implemented resulting successful construction of an over \$100-million commercial development in an formerly blighted area of Menomonee Falls.

Menomonee Indian Tribe of Wisconsin Brownfield Assessment, Keshena, Wisconsin (Senior Geologist)  
*Chris was the senior geologist when Stantec (then Northern Environmental) assisted the Tribe with its brownfield assessment program. We developed a U.S. EPA-approved QAPP and outlined protocols to maintain consistency during field sampling and lab analysis. This included wild rice sampling, unique to this U.S. EPA project. We wrote 14 SAPs, field standard operating procedures, and health and safety plans. We also provided ESAs on numerous sites to help prioritize them for redevelopment.*

US EPA Brownfields Assessment Grant  
Implementation, Dakota County, Minnesota (Senior Geologist)

*Chris was a senior geologist responsible for designing and assisting in Phase I and II ESAs for various sites in Dakota County. Chris prepared documents including Quality Assurance Project Plans, Standard Operating Procedure Plans, Sampling and Analysis Plans, Site Specific Workplans and Site Investigation Reports.*

**Environmental Site Assessments Phase I, II, III**  
Ladish Malting Company Facility Phase I and II ESAs, Jefferson, Wisconsin (Geologist)

*Stantec conducted a Phase I ESA of the 374-acre former Ladish Malting Company Facility. Chris assisted with the Phase I, which identified eight Recognized Environmental Conditions associated with the property. Stantec helped a potential purchaser who was looking to turn the property into an ethanol production facility estimate the level of liability. Stantec completed a Phase II to quickly evaluate the environmental risks associated with the property. With this knowledge, the client was able to successfully manage the environmental risk and eventually purchase the property to construct the largest ethanol production facility in Wisconsin.*

# Christopher C. Hatfield PG

Environmental Scientist

---

Citizens Bank-Phase I and II ESAs, Various locations in Wisconsin, Illinois, and Minnesota (Project Manager)

*As Project Manager, Chris has completed ESAs on behalf of Citizens Bank. The client contracted Stantec to perform over 40 Phase I and Phase II ESAs and Transaction Screens at properties in Wisconsin, Michigan, Illinois, and Minnesota. These ESAs were conducted on a variety of commercial properties and foreclosures.*

## Environmental Site Remediation

DAMROW Property Chlorinated Solvent Remediation, Fond du Lac, Wisconsin (Project Manager)

*Chris directed remedial activities involving a chlorinated solvent release to soil and groundwater at a former manufacturing facility. Stantec designed an effective strategy to remediate highly contaminated soil beneath the existing site building without disrupting the existing occupant. Chris oversaw the development and implementation of an enhanced bioremediation injection remedial action designed to greatly increase natural attenuation of chlorinated solvents in groundwater at the property. The remedial action successfully reduced chlorinated solvent and daughter product concentrations with site closure expected in the near future.*

Reich Property Chlorinated Solvent Remediation, Ripon, Wisconsin (Project Manager)

*Chris directed remedial activities involving a chlorinated solvent release to soil and groundwater at a multi-family residential property. Remediation efforts failed causing the property owner to retain Stantec to design an effective remediation strategy. Chris oversaw the development and implementation of an enhanced bioremediation injection remedial action designed to greatly increase natural attenuation of chlorinated solvents in groundwater at the property. The remedial action successfully reduced chlorinated solvent and daughter product concentrations by over 99.9% and three years after initiation of the remedial action site closure was granted by the WDNR.*

GE Medical Systems-RCRA Facility Investigation and Remediation, West Milwaukee, Wisconsin

*Chris directed investigation and remedial activities involving a chlorinated solvent release to soil and groundwater at a G.E. Medical Systems industrial facility under the oversight of the U.S. EPA. He oversaw the installation of a vacuum-enhanced groundwater pump and treatment system and provided the technical lead for remediation system operation and groundwater monitoring. Groundwater contaminant treatment was achieved by a combination of air-stripping and carbon filtration. Treated groundwater was permitted for discharge to the local storm sewer system. The remediation system successfully contained the groundwater contaminant plume and reduced contaminant concentrations.*

## Remedial Investigations & Assessments

Town of Grafton Denow Landfill, Grafton, Wisconsin (Project Manager and Senior Geologist)

*As project manager and senior geologist, Chris directed our team as they investigated and monitored groundwater contamination caused by a closed municipal landfill. Portions of the project were completed in cooperation with a second responsible party. The investigation involved installing and sampling more than 20 groundwater monitoring wells into unconsolidated glacial material and bedrock, collecting groundwater samples from over 40 private water supply wells, evaluating contaminant migration and groundwater flow within multiple hydrogeologic units, and development of a remedial action plan using monitored natural attenuation as the long-term remedy for the landfill and coordinating access to adjacent property owners' private water supply wells to collect groundwater samples.*

Town of Jackson Garage, Jackson, Wisconsin (Project Manager)

*As project manager, Chris directed our team as they investigated and monitored groundwater contamination present at the site due a leaking underground storage tank. The investigation involved installing groundwater monitoring wells into bedrock and coordinating access to adjacent property owners' private water supply wells to collect groundwater samples.*

## **Alan Gay, P.E.**

### **Civil Engineer**

Alan is a professional engineer registered in Washington, Oregon, Idaho, and Montana. His educational background includes a M.S. in environmental engineering from the University of Washington and a BSCE from Montana State University. His master's thesis focused on solid waste characterization methods; a summarized version of that document was subsequently published in the ASCE Journal of Environmental Engineering. He has also taken numerous continuing education courses in remediation strategies and system design. He is active in ASCE (local chapter technical education committee chair) and WSPE (local past president, current scholarship committee chair, and state scholarship trustee), and the PNCWA (Pacific Northwest Clean Water Association).

Alan's experience includes overseeing and preparing many Phase I environmental site assessments for potentially impacted properties.

Specific examples include ESA Phase I assessments for Spokane Valley Parks Department under a term contract; the recent Kofmehl property for the City of Spokane; and Washington Motorsports Airway Heights Raceway Park. Alan has also project managed and designed oil storage and site remediation facilities throughout the Pacific Northwest. Alan has also been responsible for coordinating permit compliance with the Eastern Region Office of the Department of Ecology and local agencies; overseeing NPDES application preparation and filing; formulating and reviewing stormwater drainage and water quality protection systems design in Eastern Washington in compliance with the Stormwater Management Manual for Eastern Washington; conducting numerous Environmental Site Assessments; and over 100 SPCC plans.

### **Relevant Experience**

#### **Washington Motorsports, in Spokane County, Washington**

To facilitate the sale of their automobile racing facilities on the West Plains of Spokane County, Alan led a team approach to conducting the project, with a grid set-up to conduct the site walk through of approximately one square mile of site, including a drag strip, two paved circuit tracks, a wetland, a lagoon, two wells, two sets of stadiums, support buildings, and a maintenance facility. The project resulted in a phase 2 investigation of trichloroethylene in the groundwater under the site. The property transfer occurred and car racing resumed at the facility.

#### **Spokane Valley's New Parks Department**

Alan led the preparation of an ASTM E1527 Phase I Environmental Site Assessment of a farmstead property in the Greenacres district of the City. Aspects of the project included property owner and tenant interviews, a comprehensive site walk-through, identification of a recognized environmental condition, photo documentation, an electronic record review, and compilation of the resulting document.

## ALTA Commitment

COMMITMENT FOR TITLE INSURANCE  
Issued by Old Republic National Title Insurance Company

OLD REPUBLIC NATIONAL TITLE INSURANCE COMPANY, a Minnesota corporation ("Company"), for a valuable consideration, commits to issue its policy or policies of title insurance, as identified in Schedule A, in favor of the Proposed Insured named in Schedule A, as owner or mortgagee of the estate or interest in the land described or referred to in Schedule A, upon payment of the premiums and charges and compliance with the Requirements; all subject to the provisions of Schedules A and B and to the Conditions of this Commitment.

This Commitment shall be effective only when the identity of the Proposed Insured and the amount of the policy or policies committed for have been inserted in Schedule A by the Company.

All liability and obligation under this Commitment shall cease and terminate six (6) months after the Effective Date or when the policy or policies committed for shall issue, whichever first occurs, provided that the failure to issue the policy or policies is not the fault of the Company.

The Company will provide a sample of the policy form upon request.

This Commitment shall not be valid or binding until countersigned by a validating officer or authorized signatory.

IN WITNESS THEREOF, Old Republic National Title Insurance Company, has caused its corporate name and seal to be affixed by its duly authorized officer and signatory on the date shown in Schedule A.

Issued through the office of:

**Privacy Policy Notice**

**PURPOSE OF THIS NOTICE**

Title V of the Gramm-Leach-Bliley Act (GLBA) generally prohibits any financial institution, directly or through its affiliates, from sharing nonpublic personal information about you with a nonaffiliated third party unless the institution provides you with a notice of its privacy policies and practices, such as the type of information that it collects about you and the categories of persons or entities to whom it may be disclosed. In compliance with the GLBA, we are providing you with this document, which notifies you of the privacy policies and practices of **Spokane County Title Company**

We may collect nonpublic personal information about you from the following sources:

- Information we receive from you such as on applications or other forms.
- Information about your transactions we secure from our files, or from [our affiliates or] others.
- Information we receive from a consumer reporting agency.
- Information that we receive from others involved in your transaction, such as the real estate agent or lender.

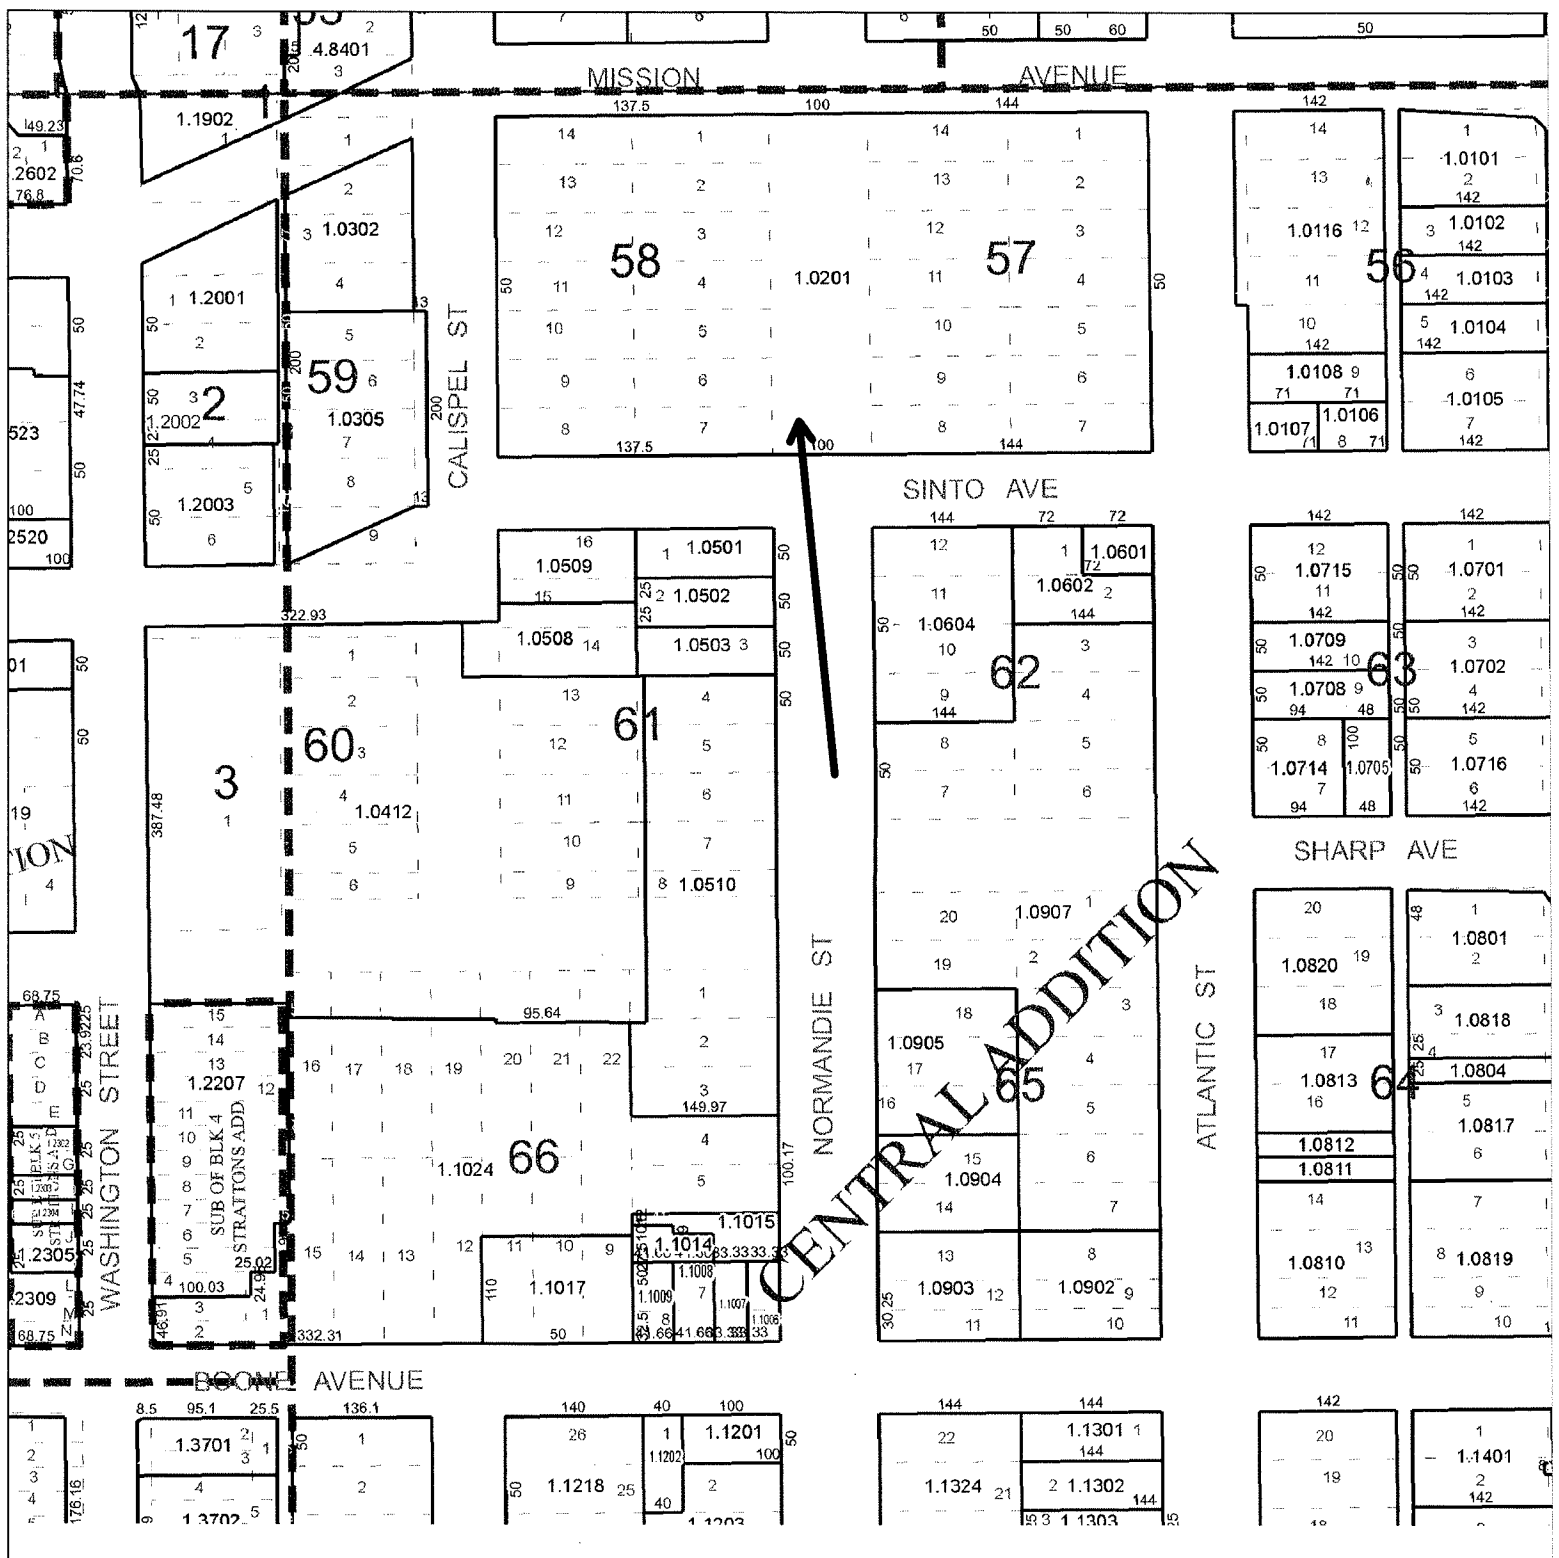

Unless it is specifically stated otherwise in an amended Privacy Policy Notice, no additional nonpublic personal information will be collected about you.

We may disclose any of the above information that we collect about our customers or former customers to our affiliates as permitted by law.

**WE DO NOT DISCLOSE ANY NONPUBLIC PERSONAL INFORMATION ABOUT YOU WITH ANYONE FOR ANY PURPOSE THAT IS NOT SPECIFICALLY PERMITTED BY LAW.**

We restrict access to nonpublic personal information about you to those employees who need to know that information in order to provide products or services to you. We maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

ORT 287-C     5/07/01

A PORTION OF THE NE QUARTER OF SECTION 18, TOWNSHIP 25 NORTH, RANGE 43 EAST, W.M.

THIS SKETCH IS FURNISHED FOR INFORMATION PURPOSES ONLY TO ASSIST IN PROPERTY LOCATION. DIMENSIONS ARE NOT GUARANTEED AND MUST NOT BE RELIED UPON TO DETERMINE ACREAGE OR SHAPE. THIS COMPANY ASSUMES NO LIABILITY FOR LOSS INCURRED BY REASON OR RELIANCE THEREON.

SPOKANE COUNTY TITLE COMPANY  
326-2626

#### COMMITMENT CONDITIONS

1. The term mortgage, when used herein, shall include deed of trust, trust deed, or other security instrument.
2. If the proposed Insured has or acquired actual knowledge of any defect, lien, encumbrance, adverse claim or other matter affecting the estate or interest of mortgage thereon covered by this Commitment other than those shown in Schedule B hereof, and shall fail to disclose such knowledge to the Company in writing, the Company shall be relieved from liability for any loss or damage resulting from any act of reliance hereon to the extent the Company is prejudiced by failure to so disclose such knowledge. If the proposed Insured shall disclose such knowledge to the Company, or if the Company otherwise acquires actual knowledge of such defect, lien, encumbrance, adverse claim or other matter, the Company at its option may amend Schedule B of this Commitment accordingly, but such amendment shall not relieve the Company from liability previously incurred pursuant to paragraph 3 of these Conditions and Stipulations.
3. Liability of the Company under this Commitment shall be only to the named proposed Insured and such parties included under the definition of Insured in the form of policy or policies committed for and only for actual loss incurred in reliance hereon in undertaking good faith (a) to comply with the requirements hereof, or (b) to eliminate exceptions shown in Schedule B, or (c) to acquire or create the estate or interest or mortgage thereon covered by this Commitment. In no event shall such liability exceed the amount stated in Schedule A for the policy or policies committed for and such liability is subject to the insuring provisions and Conditions and Stipulations and the Exclusions from Coverage of the form of policy or policies committed for in favor of the proposed Insured which are hereby incorporated by reference and are made a part of this Commitment except as expressly modified herein.
4. This Commitment is a contract to issue one or more title insurance policies and is not an abstract of title or a report of the condition of title. Any action or actions or rights of action that the proposed Insured may have or may bring against the Company arising out of the status of the title to the estate or interest or the status of the mortgage thereon covered by this Commitment must be based on and are subject to the provisions of this Commitment.
5. The policy to be issued contains an arbitration clause. All arbitrable matters when the Amount of Insurance is \$2,000,000 or less shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. You may review a copy of the arbitration rules at <http://www.alta.org>. If a policy other than the 2006 ALTA Owner's Policy of Title Insurance, 2006 ALTA Loan Policy of Title Insurance or 2006 ALTA Short Form Residential Loan Policy is ultimately issued, the arbitration provisions of the issued policy shall control.

#### AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY OF TITLE INSURANCE - 2006 EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those related to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
  - (e) resulting in the loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is:
  - (a) a fraudulent conveyance or fraudulent transfer; or
  - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in Public Records that vests Title as shown in Schedule A.

**CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (01/01/08)**  
**ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE**  
**EXCLUSIONS**

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
  - (a) building;
  - (b) zoning;
  - (c) land use;
  - (d) improvements on the Land;
  - (e) land division; and
  - (f) environmental protection.

This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23, or 27.

2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks;
  - (a) that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
  - (b) that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
  - (c) that result in no loss to You; or
  - (d) that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, B.e., 25, 26, 27, or 28.
5. Failure to pay value for Your Title.
6. Lack of a right;
  - (a) to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
  - (b) in streets, alleys, or waterways that touch the land

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.

**AMERICAN LAND TITLE ASSOCIATION**  
**LOAN POLICY OF TITLE INSURANCE - 2006**  
**EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those related to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.  
(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
  - (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

## WARRANTY DEED.

No. 31525

J. F. Browne et ux  
City of Spokane

STATE OF WASHINGTON, SPOKANE COUNTY, SS.

Filed the 8 day of August 1899  
at 1 o'clock and 55 minutes P. M., at request  
of L. G. Boyd

W. H. Briddan  
County Auditor.

By G. J. Dyer

Deputy.

Recorded on 22 day of August 1899

By L. G. Dyer

Deputy.

THIS INDENTURE, Made this 21st day of July, A. D. 1899  
between J. F. Browne and Anna W. Browne his  
wife

part of the first part and

City of Spokane a municipal corporation  
organized under the laws of the State of Washington part 4 of the second part,  
WITNESSETH That the said part 1 of the first part for and in consideration of the  
sum of One Dollar (\$1.00)

to them in hand paid by the said part 4 of the second part, the receipt whereof is hereby acknowledged, do  
hereby grant, bargain, sell and convey unto the said part 4 of the second part, its successors and assigns, forever, all  
those tract 8 or parcel 8 of land, lying and being in the County of Spokane, and State of Washington

and described as follows, to-wit:

Blocks Fifty seven (57) Fifty eight (58) and sixty  
two (62) in Central Addition to Spokane Washington

To Have and to Hold the Same, Together with all the hereditaments and appurtenances thereunto belonging or  
in anywise appertaining to the said part 4 of the second part, its successors and assigns forever. And the said  
J. F. Browne and Anna W. Browne his wife  
part 1 of the first part, for their heirs, executors and administrators, do covenant with the said part 4  
of the second part, its successors and assigns, that they are well seized in fee of the lands and premises  
aforesaid, and have good right to sell and convey the same in manner and form aforesaid; that the same are free from  
all encumbrances

Except taxes which said second party hereby  
assumes and agrees to pay

and the above bargained and granted lands and premises, in the quiet and peaceable possession of said part 4 of the  
second part, its successors and assigns, against all persons lawfully claiming, or to claim, the whole or any part  
thereof, the said part 1 of the first part will warrant and defend.

In Testimony Whereof, The said part 1 of the first part have hereunto set their hands and seal the  
day and year first above written.

Signed, Sealed and Delivered in presence of

R. J. Danson

J. F. Browne  
Anna W. Browne

THE STATE OF WASHINGTON, COUNTY OF Spokane, SS.

I, R. J. Danson, a Notary Public in and for said County and State, do hereby certify  
that on this 23 day of July, A. D. 1899, personally appeared  
before me J. F. Browne and Anna W. Browne his wife  
to me known to be the individual 8 described in and who executed the within instrument, and  
acknowledged that they signed and sealed the same as their free and voluntary  
act and deed, for the uses and purposes therein mentioned.

Witness my hand and official seal, the day and year in this certificate first above written.

R. J. Danson  
Notary Public,  
State of Washington.  
Commission Expires,  
Feb 16th 1899

WAR REVENUE STAMPS  
Dollars 10 Cents

R. J. Danson

Notary Public.

Residing at Spokane Washington

This is to certify that I have compared the foregoing  
and find same to be a correct copy of the original  
instrument.

Wm. L. Cole

For off. see Book 186 Page 689

and 10.40% to be borne by the city, as pre-submitted by the city engineer, was accepted and ordered placed on file.

Plan and profile to establish the grade of Napa Street, from Columbia Avenue to Rowan Avenue, were approved.

**ORDINANCE NO. C15753 (By McKenna)**

An ordinance vacating Normandie Street, in the City of Spokane, from the south line of Mission Avenue to the north line of Sinto Avenue.

The City of Spokane does ordain:

Section 1. That Normandie Street, in the City of Spokane, from the south line of Mission Avenue to the north line of Sinto Avenue, be, and the same is hereby, vacated: Provided, however that the city retains an easement or the right to exercise and grant easements in respect to the vacated land for electrical transmission lines and facilities and a telephone plant as the same now exist.

Section 2. This ordinance shall take effect and be in force thirty days from and after its passage.

Passed the City Council December 22, 1958.

F. G. SUTHERLIN, Mayor.

Attest: A. A. BROWN, City Clerk.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/09/2015 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

#### ***State- and tribal - equivalent NPL***

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/18/2016 has revealed that there are 6 WA HSL sites within approximately 1 mile of the target property.

### State- and tribal - equivalent CERCLIS

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 01/20/2016 has revealed that there are 13 WA CSCSL sites within approximately 1 mile of the target property.

### State and tribal landfill and/or solid waste disposal site lists

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, and dated 03/18/2016 has revealed that there are 2 WA SWF/LF sites within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 01/20/2016 has revealed that there are 13 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/09/2015 has revealed that there are 9 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site name: U SAVE CLEANERS

Classification: Small Quantity Generator

Date form received by agency: 03/11/1999

Site name: U SAVE CLEANERS

Classification: Not a generator, verified

Facility Has Received Notices of Violations:

Regulation violated: Not reported

Area of violation: Generators - Pre-transport

Date violation determined: 06/19/2009

Date achieved compliance: 01/29/2010

Violation lead agency: State

Enforcement action: WRITTEN INFORMAL

Enforcement action date: 10/23/2009

Enf. disposition status: Not reported

Enf. disp. status date: Not reported

Enforcement lead agency: State

Proposed penalty amount: Not reported

Final penalty amount: Not reported

Paid penalty amount: Not reported

Regulation violated: Not reported

Area of violation: Listing - General

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**FINDS:**

Registry ID: 110005318405

**Environmental Interest/Information System**

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/15/2011
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ***Federal Delisted NPL site list***

#### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 04/18/2016
	Data Release Frequency: Quarterly

### ***Federal CERCLIS list***

#### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/13/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/06/2016	Telephone: 703-603-8704
Date Made Active in Reports: 05/20/2016	Last EDR Contact: 04/08/2016
Number of Days to Update: 135	Next Scheduled EDR Contact: 07/18/2016
	Data Release Frequency: Varies

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA

### ***Federal CERCLIS NFRAP site list***

#### SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 04/05/2016

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/09/2015	Source: EPA
Date Data Arrived at EDR: 03/02/2016	Telephone: 800-424-9346
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016
	Data Release Frequency: Quarterly

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 04/05/2016	Last EDR Contact: 03/30/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/11/2016
	Data Release Frequency: Quarterly

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2016	Telephone: (206) 553-1200

### ***Federal institutional controls / engineering controls registries***

#### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 05/16/2016
Number of Days to Update: 13	Next Scheduled EDR Contact: 08/29/2016
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 05/25/2016
Number of Days to Update: 53	Next Scheduled EDR Contact: 09/12/2016
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/10/2015	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/11/2015	Telephone: 703-603-0695
Date Made Active in Reports: 11/03/2015	Last EDR Contact: 05/25/2016
Number of Days to Update: 53	Next Scheduled EDR Contact: 09/12/2016
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 03/28/2016  
Date Data Arrived at EDR: 03/30/2016  
Date Made Active in Reports: 05/20/2016  
Number of Days to Update: 51

Source: National Response Center, United States Coast Guard  
Telephone: 202-267-2180  
Last EDR Contact: 03/30/2016  
Next Scheduled EDR Contact: 07/11/2016  
Data Release Frequency: Annually

## ***State- and tribal - equivalent NPL***

HSL: Hazardous Sites List

The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

Date of Government Version: 02/18/2016  
Date Data Arrived at EDR: 03/15/2016  
Date Made Active in Reports: 05/03/2016  
Number of Days to Update: 49

Source: Department of Ecology  
Telephone: 360-407-7200  
Last EDR Contact: 06/10/2016  
Next Scheduled EDR Contact: 09/19/2016  
Data Release Frequency: Semi-Annually

## ***State- and tribal - equivalent CERCLIS***

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/20/2016  
Date Data Arrived at EDR: 01/21/2016  
Date Made Active in Reports: 05/06/2016  
Number of Days to Update: 106

Telephone: 360-407-7200  
Last EDR Contact: 04/21/2016  
Next Scheduled EDR Contact: 08/01/2016  
Data Release Frequency: Semi-Annually

## ***State and tribal landfill and/or solid waste disposal site lists***

SWF/LF: Solid Waste Facility Database

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/18/2016  
Date Data Arrived at EDR: 03/21/2016  
Date Made Active in Reports: 05/03/2016  
Number of Days to Update: 43

Source: Department of Ecology

### ***State and tribal registered storage tank lists***

FEMA UST: Underground Storage Tank Listing

A listing of all FEMA owned underground storage tanks.

Date of Government Version: 01/01/2010	Source: FEMA
Date Data Arrived at EDR: 02/16/2010	Telephone: 202-646-5797
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 04/11/2016
Number of Days to Update: 55	Next Scheduled EDR Contact: 07/25/2016
	Data Release Frequency: Varies

UST: Underground Storage Tank Database

Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 03/25/2016	Source: Department of Ecology
Date Data Arrived at EDR: 03/29/2016	Telephone: 360-407-7183
Date Made Active in Reports: 05/03/2016	Last EDR Contact: 05/13/2016
Number of Days to Update: 35	Next Scheduled EDR Contact: 08/29/2016
	Data Release Frequency: Quarterly

AST: Aboveground Storage Tank Locations

A listing of aboveground storage tank locations regulated by the Department of Ecology's Spill Prevention, Preparedness and Response Program.

Date of Government Version: 12/14/2015	Source: Department of Ecology
Date Data Arrived at EDR: 02/02/2016	Telephone: 360-407-7562
Date Made Active in Reports: 05/03/2016	Last EDR Contact: 04/28/2016
Number of Days to Update: 91	Next Scheduled EDR Contact: 08/15/2016
	Data Release Frequency: Varies

INDIAN UST R6: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 12/03/2015	Source: EPA Region 6
Date Data Arrived at EDR: 02/04/2016	Telephone: 214-665-7591
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 04/29/2016
Number of Days to Update: 120	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Semi-Annually

INDIAN UST R7: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 09/23/2014	Source: EPA Region 7
Date Data Arrived at EDR: 11/25/2014	Telephone: 913-551-7003
Date Made Active in Reports: 01/29/2015	Last EDR Contact: 04/29/2016
Number of Days to Update: 65	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Varies

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### INDIAN UST R8: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 8 (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming and 27 Tribal Nations).

Date of Government Version: 01/26/2016	Source: EPA Region 8
Date Data Arrived at EDR: 02/05/2016	Telephone: 303-312-6137
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 04/29/2016
Number of Days to Update: 119	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Quarterly

### INDIAN UST R9: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).

Date of Government Version: 02/25/2016	Source: EPA Region 9
Date Data Arrived at EDR: 04/27/2016	Telephone: 415-972-3368
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 04/27/2016
Number of Days to Update: 37	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Quarterly

### INDIAN UST R10: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 10 (Alaska, Idaho, Oregon, Washington, and Tribal Nations).

Date of Government Version: 01/07/2016	Source: EPA Region 10
Date Data Arrived at EDR: 01/08/2016	Telephone: 206-553-2857
Date Made Active in Reports: 02/18/2016	Last EDR Contact: 04/29/2016
Number of Days to Update: 41	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Quarterly

### INDIAN UST R1: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 1 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 10/20/2015	Source: EPA, Region 1
Date Data Arrived at EDR: 10/29/2015	Telephone: 617-918-1313
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 04/29/2016
Number of Days to Update: 67	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Varies

### INDIAN UST R4: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations)

Date of Government Version: 02/05/2016	Source: EPA Region 4
Date Data Arrived at EDR: 04/29/2016	Telephone: 404-562-9424
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 04/26/2016
Number of Days to Update: 35	Next Scheduled EDR Contact: 08/08/2016
	Data Release Frequency: Semi-Annually

### INDIAN UST R5: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 11/05/2015	Source: EPA Region 5
Date Data Arrived at EDR: 11/13/2015	Telephone: 312-886-6136
Date Made Active in Reports: 01/04/2016	Last EDR Contact: 04/27/2016
Number of Days to Update: 52	Next Scheduled EDR Contact: 08/08/2016

## ***State and tribal Brownfields sites***

### **BROWNFIELDS: Brownfields Sites Listing**

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/18/2016	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/07/2016	Telephone: 202-307-1000
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 05/31/2016
Number of Days to Update: 88	Next Scheduled EDR Contact: 09/12/2016

Date Made Active in Reports: 03/06/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### Other Ascertainable Records

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 12/09/2015	Source: Environmental Protection Agency

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Next Scheduled EDR Contact: 08/22/2016  
Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013  
Date Data Arrived at EDR: 03/03/2015

Next Scheduled EDR Contact: 09/19/2016  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2015

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

Next Scheduled EDR Contact: 07/18/2016  
Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  
Date Data Arrived at EDR: 03/01/2007  
Date Made Active in Reports: 04/10/2007  
Number of Days to Update: 40

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/31/2014	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 04/17/2015	Telephone: Varies
Date Made Active in Reports: 06/02/2015	Last EDR Contact: 03/24/2016
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/11/2016
	Data Release Frequency: Varies

### BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2013	Source: EPA/NTIS
Date Data Arrived at EDR: 02/24/2015	Telephone: 800-424-9346
Date Made Active in Reports: 09/30/2015	Last EDR Contact: 05/27/2016
Number of Days to Update: 218	Next Scheduled EDR Contact: 09/05/2016
	Data Release Frequency: Biennially

### INDIAN RESERV: Indian Reservations

This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 12/08/2006	Telephone: 202-208-3710
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 04/15/2016
Number of Days to Update: 34	Next Scheduled EDR Contact: 07/25/2016
	Data Release Frequency: Semi-Annually

### FUSRAP: Formerly Utilized Sites Remedial Action Program

DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

Date of Government Version: 03/11/2016	Source: Department of Energy
Date Data Arrived at EDR: 03/15/2016	Telephone: 202-586-3559
Date Made Active in Reports: 06/03/2016	Last EDR Contact: 05/09/2016
Number of Days to Update: 80	Next Scheduled EDR Contact: 08/22/2016
	Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010	Source: Department of Energy
Date Data Arrived at EDR: 10/07/2011	Telephone: 505-845-0011

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/20/2015  
Date Data Arrived at EDR: 10/27/2015  
Date Made Active in Reports: 01/04/2016

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### SNOHOMISH COUNTY:

#### Solid Waste Sites of Record at Snohomish Health District

Solid waste disposal and/or utilization sites in Snohomish County.

Date of Government Version: 11/16/2011  
Date Data Arrived at EDR: 03/29/2012  
Date Made Active in Reports: 05/03/2012  
Number of Days to Update: 35

Source: Snohomish Health District  
Telephone: 206-339-5250  
Last EDR Contact: 03/24/2016  
Next Scheduled EDR Contact: 07/04/2016  
Data Release Frequency: Semi-Annually

### TACOMA/PIERCE COUNTY:

#### Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

Date of Government Version: 09/01/2002  
Date Data Arrived at EDR: 03/24/2003  
Date Made Active in Reports: 05/14/2003  
Number of Days to Update: 51

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013  
Number of Days to Update: 45

Source: Department of Energy & Environmental Protection

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Daycare Center Listing

Source: Department of Social & Health Services

Telephone: 253-383-1735

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

## **GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

FORMER NORMANDIE STORAGE/MAINT./FUELING FACILITY  
127 WEST MISSION AVENUE  
SPOKANE, WA 99201

### **TARGET PROPERTY COORDINATES**

Latitude (North):	47.671161 - 47° 40' 16.18"
Longitude (West):	117.414336 - 117° 24' 51.61"
Universal Transverse Mercator:	Zone 11
UTM X (Meters):	468895.6
UTM Y (Meters):	5279616.5
Elevation:	1894 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	6004781 SPOKANE NW, WA
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
SPOKANE, WA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 53063C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

### NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
SPOKANE NW	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### *Site-Specific Hydrogeological Data\*:*

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSE
Site Name:	ATOMIC CHEMICAL CORP
Site EPA ID Number:	WAD027496306
Groundwater Flow Direction:	W
Inferred Depth to Water:	approximately 30 feet
Hydraulic Connection:	The materials overlying the aquifer at the site are typically extremely permeable.
Sole Source Aquifer:	A sole source aquifer is present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
B8	1/4 - 1/2 Mile SSW	Not Reported
17	1/2 - 1 Mile West	W

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q (decoded above as Era, System & Series)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	AVONVILLE
Soil Surface Texture:	fine gravelly - silt loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	fine gravelly - silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 5.60
2	16 inches	25 inches	very gravelly - silt loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.60
3	25 inches	37 inches	very gravelly - sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 6.00 Min: 2.00	Max: 7.30 Min: 6.60
4	37 inches	60 inches	very gravelly - sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 20.00 Min: 6.00	Max: 7.30 Min: 6.60

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: gravelly - silt loam  
sandy loam  
gravelly - loam  
gravelly - sandy loam  
loamy coarse sand  
very stony - loam  
cobble - sandy loam  
silt loam  
gravelly - coarse sandy loam

Surficial Soil Types: gravelly - silt loam  
sandy loam  
gravelly - loam  
gravelly - sandy loam  
loamy coarse sand  
very stony - loam  
cobble - sandy loam

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Shallow Soil Types:    silt loam  
                                  gravelly - coarse sandy loam  
                                  very gravelly - sandy loam  
                                  gravelly - coarse sandy loam  
                                  fine sandy loam  
                                  gravelly - silt loam  
                                  silt loam  
  
 Deeper Soil Types:    extremely gravelly - coarse sand  
                                  coarse sand  
                                  very gravelly - loamy coarse sand  
                                  loamy sand  
                                  very stony - loamy coarse sand  
                                  extremely gravelly - loamy sand  
                                  stratified  
                                  very cobbly - fine sandy loam

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## **TOPOGRAPHIC INFORMATION**

### **USGS 7.5' Digital Elevation Model (DEM)**

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### **Current USGS 7.5 Minute Topographic Map**

Source: U.S. Geological Survey

## **HYDROLOGIC INFORMATION**

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### **State Wetlands Data: Wetland Inventory**

Source: Department of Ecology

Telephone: 360-407-6121

## **HYDROGEOLOGIC INFORMATION**

### **AQUIFLOW<sup>R</sup> Information System**

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## **GEOLOGIC INFORMATION**

### **Geologic Age and Rock Stratigraphic Unit**

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### **STATSGO: State Soil Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### **SSURGO: Soil Survey Geographic Database**

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Wells

Source: Department of Health

Telephone: 360-236-3148

Group A and B well locations.

#### Water Well Listing

Source: Public Utility District

Telephone: 206-779-7656

A listing of water well locations in Kitsap County.

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Listing

Source: Department of Natural Resources

Telephone: 360-902-1450

Locations that represent oil and gas test well sites in Washington State from 1890 to present.

### RADON

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

with any questions or comments.

### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2016 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc. or its affiliates is prohibited without prior written permission.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	<u>Target Street</u>	<u>Cross Street</u>	<u>Source</u>

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Stantec were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

STATE OF WASHINGTON  
DEPARTMENT OF ECOLOGY

4601 N. Monroe, Suite 202 • Spokane, Washington 99205-1295 • (509) 456-2926

April 28, 1997

**CERTIFIED MAIL: P 616 649 367**

Mr. Dale Arnold  
City of Spokane  
808 West Spokane Falls Boulevard  
Spokane, WA 99201

Dear Mr. Arnold:

RE: Early Notice Letter Regarding a Release From An Underground Storage Tank  
(UST) System at 1410 North Normandie, Spokane, Washington (City Shop).

On March 6, 1997, The Department of Ecology (Ecology) was notified by a contractor, working for the City of Spokane, that they had confirmed the release of a hazardous substance at the above-referenced site. Diesel contamination was discovered during the removal of a 12,000 gallon diesel UST system. This tank removal was part of a project that also included the removal of a previously abandoned diesel UST and three gasoline USTs at the same site.

As provided under the Model Toxics Control Act Cleanup Regulations (MTCA), as owner/operator of this property, the City of Spokane (City) was responsible for conducting an investigation of this release and taking appropriate measures to mitigate any impacts of the release on human health and the environment. The investigation and cleanup could be conducted independently or, if appropriate, under a formal agreement with Ecology.

I conducted an Initial Investigation of the release on March 11, 1997, meeting on-site with you and Gene Jakubczak, Assistant Fleet Services Director. This investigation served to confirm that there was a release of a hazardous substance (diesel) and that the release impacted soils beneath the site. Also, at that time, it was determined that the City intended to continue on with an independent investigation and cleanup of the site. Ecology is available to provide informal advice and guidance to those who choose to proceed independently, and some guidance was provided for the work at this site.

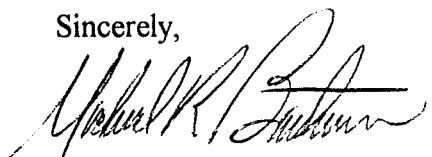

Mr. Dale Arnold  
April 28, 1997  
Page 2

Ecology has received final cleanup reports from the two contractors who conducted the investigation and cleanup. There are two separate reports, each dated April 1997. The reports describe the characterization and cleanup of the contamination that was discovered. Ecology strongly encourages the independent cleanup of sites, and the initiative demonstrated in independently addressing the contamination at this site is appreciated. A notice of the independent cleanup reports will be published in Ecology's Site Register as required by WAC 173-340-600(6).

Ecology maintains a database of underground storage tank (UST) sites where there has been a confirmed release. This incident has been added to that database with a status of "reported cleaned up". Inclusion in the database is not a finding of liability as defined under MTCA.

If a formal review of an independent cleanup report is desired, the report may be submitted to Ecology under the Independent Remedial Action Program. This program was established in response to the public's need for Ecology to review cleanup actions undertaken. A fee has been established to support this review process. If you have any questions about this program, or any other issues in this letter, you may contact me at (509) 456-4457.

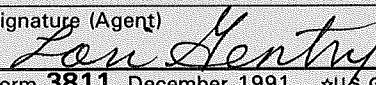

Sincerely,

Michael R. Boatsman  
Site Manager  
Toxics Cleanup

***SITE ASSESSMENT  
AND  
INDEPENDENT CLEANUP ACTION REPORT  
CITY OF SPOKANE FLEET SERVICES  
1410 NORTH NORMANDIE STREET  
SPOKANE, WASHINGTON***

**INTRODUCTION**

Rob's Demolition permanently closed four underground storage tank systems for the City of Spokane in March 1997. The systems were located at the City's Fleet Services Facility at 1410 N. Normandie Street.

As a part of this closure we did a site assessment: an investigation to determine if the systems caused any environmental contamination. And, in completing the site assessment, we discovered soil contaminated with petroleum at levels exceeding Washington State Department of Ecology allowable limits.

We notified Mike Boatsman, with the Eastern Regional Office of the Washington State Department of Ecology, that we found contaminated soil at the site.

Most of the contamination was under the diesel pump islands. Some contamination was around the diesel tank. We excavated a total of 447.25 tons of petroleum contaminated soil at the site and hauled it to USA Waste's Graham Road Landfill in Medical Lake, WA for disposal.

The Lambert Group, Inc. oversaw the contaminated soil excavation we did under the diesel pump islands. Lambert collected soil samples from the diesel pump island excavation. The lab results for the analyses done on these samples indicate the soil left in place at the site met Ecology's standards – the levels of petroleum were less than Ecology's allowable limits.

Lambert completed a report on the contaminated soil excavation we did under the diesel pump islands entitled, "Remedial Investigation & Diesel-Containing Soil Removal for 1433 North Normandie." Lambert used a different site address than we did, however we are both referring to the same site – the site is rather large and there is probably more than one address for it.

We did the initial sampling at the site. Lambert did the follow up sampling. You should read Lambert's report along with our report to get a more complete understanding of the work that was done at the site.

Our site assessment was done in general accordance with the Department of Ecology's, "Guidance for Site Checks and Site Assessments for Underground Storage Tanks," except as we have described in this report.

Robin Carper, owner of Rob's Demolition, conducted this site assessment. He has completed the Washington State Department of Ecology qualifying requirements for Site Assessors. He has passed the International Fire Code Institute exam for Site Assessors. He is neither a professional engineer nor scientist.

This report summarizes:

- The various steps we took to complete the site assessment.
- What we learned about the site.
- What we did about the contaminated soil we discovered.
- What conclusions you can make from our findings.

### **SITE BACKGROUND**

We gathered background information on the site by checking readily available records and references, questioning various individuals, and by making observations at the site. This section of our report summarizes what we found out.

The City of Spokane has operated a vehicle maintenance and storage facility at the site for several decades.

We referred to the underground storage tank (UST) systems we removed at the site as the following:

- **Diesel Tank.** It was located in the part of the facility that is west of Normandie and north of Sinto. It consisted of a buried 12,000 gal. steel tank, galvanized product and vent piping and two pump islands. There was a small building just west of the pump islands – we referred to it as the diesel fueling shed – we demolished this building. The product pump was a suction pump as opposed to a pressure one.
- **Gas Tanks.** These systems were located near the northeast corner of Normandie and Sinto. They consisted of buried steel tanks, galvanized product and vent piping and a pump island. Two of the tanks were 6,000 gal. in size; the third tank was 12,000 gal. in size. The product pumps were pressure ones.

We also removed a fifth tank at the site in March. It was a 3,000 gal. diesel tank that was previously abandoned in place. It was located under the diesel pump islands.

The city used the UST systems to refuel their vehicles and equipment.

None of the UST systems had any form of secondary containment. We did not see any monitoring wells at the site.

City personnel regularly used a tank measuring stick to determine how much fuel was in the tanks. They cross checked the information they obtained from doing this with their inventory records. Shortly before we did this job they noticed some discrepancies in the diesel tank records. About 500 gallons of diesel was missing. They also had about 1,500 gal. of water in the tank.

Upon learning this, the city had a tightness test done on the diesel tank UST system. The system failed the test.

The city also regularly had the gasoline UST systems tightness tested – they always passed the tests.

We did not encounter groundwater in our excavations. At the site, the Spokane Aquifer is approximately 50 feet below ground level. The amount of water pumped from the ground, in the section is located in, is negligible (US Geological Survey Water Supply Paper 2265). The City of Spokane, supplies water in the area the site is located in.

The native soil near the UST systems was a cobbly, slightly silty, sand -- Unified Soil Classification System Symbol SW

The site is located in northwest Spokane. The area surrounding the site is primarily commercial. There are some residences in the area.

### SITE INSPECTION

Our site inspection was limited to the area in the immediate vicinity of our excavations only. We did not make a comprehensive inspection of the entire site as part of this site assessment. Where we did inspect we found some obvious contamination.

We observed the following:

- **Diesel Tank.** There was obviously contaminated soil below the diesel pump islands. This was probably caused by leaky pipe fittings and / or diesel that was spilled when vehicles and equipment were refueled. Some of the soil around the tank fill pipe was stained and had a petroleum odor. We could smell a petroleum odor when we excavated the soil from around the tank. This was probably caused by overfilling the tank and spilling diesel from the tanker truck delivery hose. The tank was slightly to moderately corroded. We did not find any holes in the tank.

- **Gas Tanks.** There was some evidence of possible contamination around the gasoline systems. Some of the soil around the tank fill pipes was stained and had a petroleum odor. We could also smell a gasoline odor when we excavated the soil from around the tanks. There was some staining on and around the pump island – probably from spillage during refueling operations.

Initially, we expected to find holes in the diesel tank and evidence of it leaking because the city had lost 500 gal. of diesel and the tank had approximately an 1,500 gal. of water in it. However, we didn't find any holes in the diesel tank or evidence of it leaking. One possible explanation for the missing diesel and water in the tank is theft. Someone could have stole some diesel and tried to cover their tracks by putting water in the tank to replace the diesel they stole.

### **CONTAMINATED SOIL EXCAVATION**

The soil under the diesel tank pump islands was obviously contaminated. We excavated the soil under it that appeared contaminated under the direction of the Lambert Group. Lambert's report, "Remedial Investigation & Diesel Containing Soil Removal," more fully explains this work that we did.

Some of the soil we excavated to remove the diesel tank was also contaminated.

### **SOIL SAMPLING**

We collected twenty-one soil samples at the site for this UST site assessment. This section of our report tells you where and how we collected them.

- **Diesel Tank.** After we removed the tank, we collected a sample below where the tank was located. We also obtained two composite samples of the sidewalls of the excavation; one was from the north and east sidewalls, the other from the south and west sidewalls. We took a sample under where the pump island was located. And, we obtained six samples from the stockpiles of excavated soil.
- **Gas Tanks.** We obtained three samples from the excavation floor – one sample below where each of the three tanks was located. We also collected three samples from the sidewalls of the excavation. There was a considerable amount of soil between the 6,000 gal. tanks and the 12,000 gal tank – we collected one sample of this soil. And, we gathered three samples from the stockpiles of excavated soil.

We had three stockpiles of soil around the diesel tank excavation. One stockpile was soil from under the pump island. Two stockpiles were soil excavated from around the tank – one of these stockpiles was at the north end of the diesel tank excavation; the other one was along the east side of the excavation.

We sampled the stockpile along the east side of the excavation twice. The first time we obtained one composite sample of the entire stockpile. The second time we divided the stockpile into thirds and obtained one composite sample from each third of the stockpile.

All samples were obtained either directly from the excavation pit, or where it was not safe to enter the pit, from the backhoe bucket. Clean latex gloves were worn to obtain each sample and fill the sample jars.

### **LABORATORY ANALYSIS**

We took the samples we collected to North Creek Analytical, in Spokane, for chemical analysis.

All of the samples were analyzed for petroleum. Different methods were used, primarily depending on what tank or tanks the sampling location was next to.

The samples from the diesel tank excavation were analyzed for diesel using Ecology Method WTPH-D.

The samples from gas tank excavation were analyzed for gasoline using Washington State Department Ecology Method WTPH-G. They were also analyzed for BTEX - benzene, toluene, ethyl benzene and xylenes – which are constituents of gasoline, using EPA Method 8020A

Results from these analyses are summarized in Tables 1 - 5. North Creek Analytical's laboratory reports are included in the appendix.

The results confirmed the soil under the diesel tank pump island was contaminated. The results also indicated that some of the soil that was excavated from around the diesel tank was contaminated. The lab results for the other samples we obtained at the site were below Ecology's allowable limits – the soil was not contaminated.

## **QUALITY CONTROL & DATA QUALITY**

We took steps, and the laboratory did likewise, to maintain the quality of the data.

The steps we took were primarily in collecting and shipping the samples to the laboratory. To avoid accidentally contaminating the samples we wore clean latex gloves to collect them. So we would minimize the chance of any contaminants evaporating from the samples we put the lids on the sample jars as soon as possible and kept them cool. And, to document the handling of the samples we followed chain of custody procedures.

North Creek Analytical has a comprehensive quality control plan. They follow it to keep up the quality of their data.

They also provide quality control data in their reports. According to North Creek, the results they obtained for surrogate recoveries and laboratory duplicates were within acceptable limits.

## **CONTAMINATED SOIL DISPOSAL**

We contacted USA Waste about disposing of the contaminated soil. After they reviewed the lab data, they agreed to accept it.

We hauled the contaminated soil (447.25 tons) to USA Waste's Graham Road Landfill, in Medical Lake, for disposal.

We backfilled the excavations with imported fill

## **CONCLUSION**

We discovered some petroleum contaminated soil under the diesel tank pump islands at the City of Spokane Fleet Services Facility. The contamination was apparently caused by leaky pipe fittings and / or diesel being spilled during refueling operations. Some of the soil around the diesel tank was also contaminated.

The lab results for the samples from the gas tank excavation were all less than Ecology's allowable limits.

We excavated the contaminated soil at the direction of the Lambert Group. We hauled the contaminated soil to USA Waste's Graham Road Landfill, in Medical Lake.

Our findings are based on the limited sampling we did, and the chemical analysis we had done. They should not be construed as a definite conclusion regarding the environmental quality of the site.

## City of Spokane Fleet Services

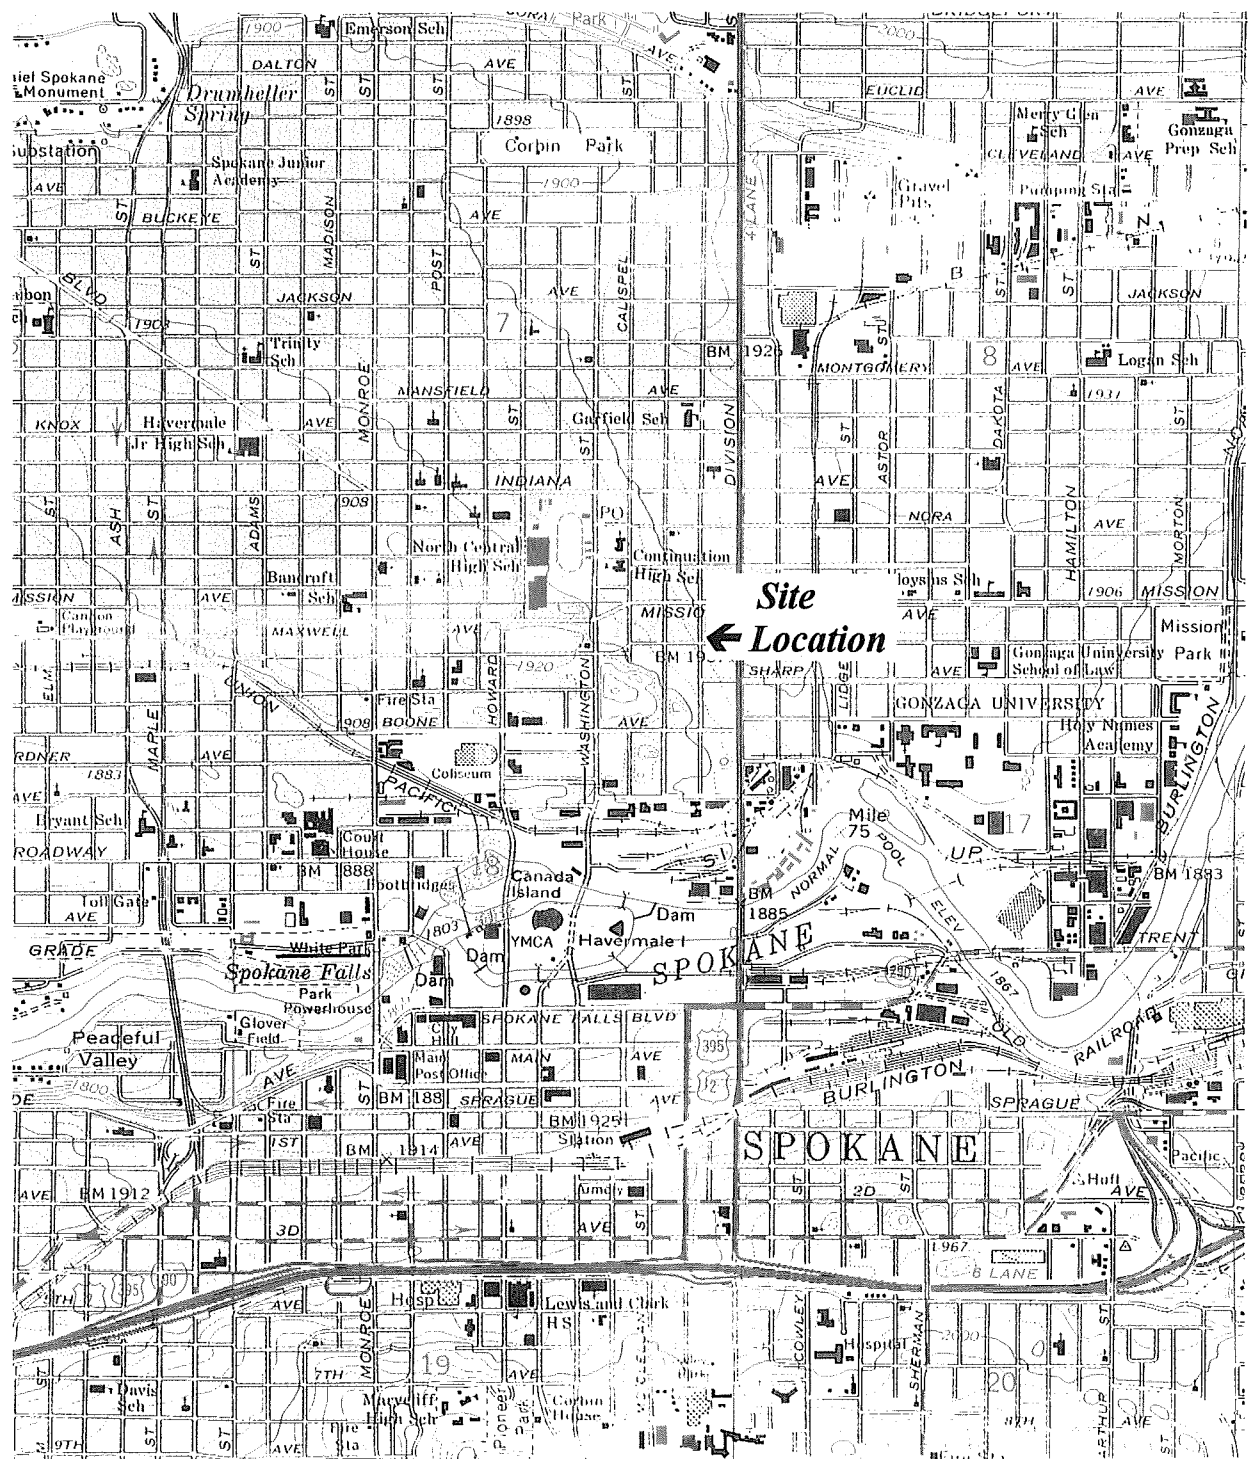

The diesel UST system before we started to excavate. The diesel fueling shed and pump islands were removed, along with the tank. The tank fill pipe is under the orange traffic cones in the background.

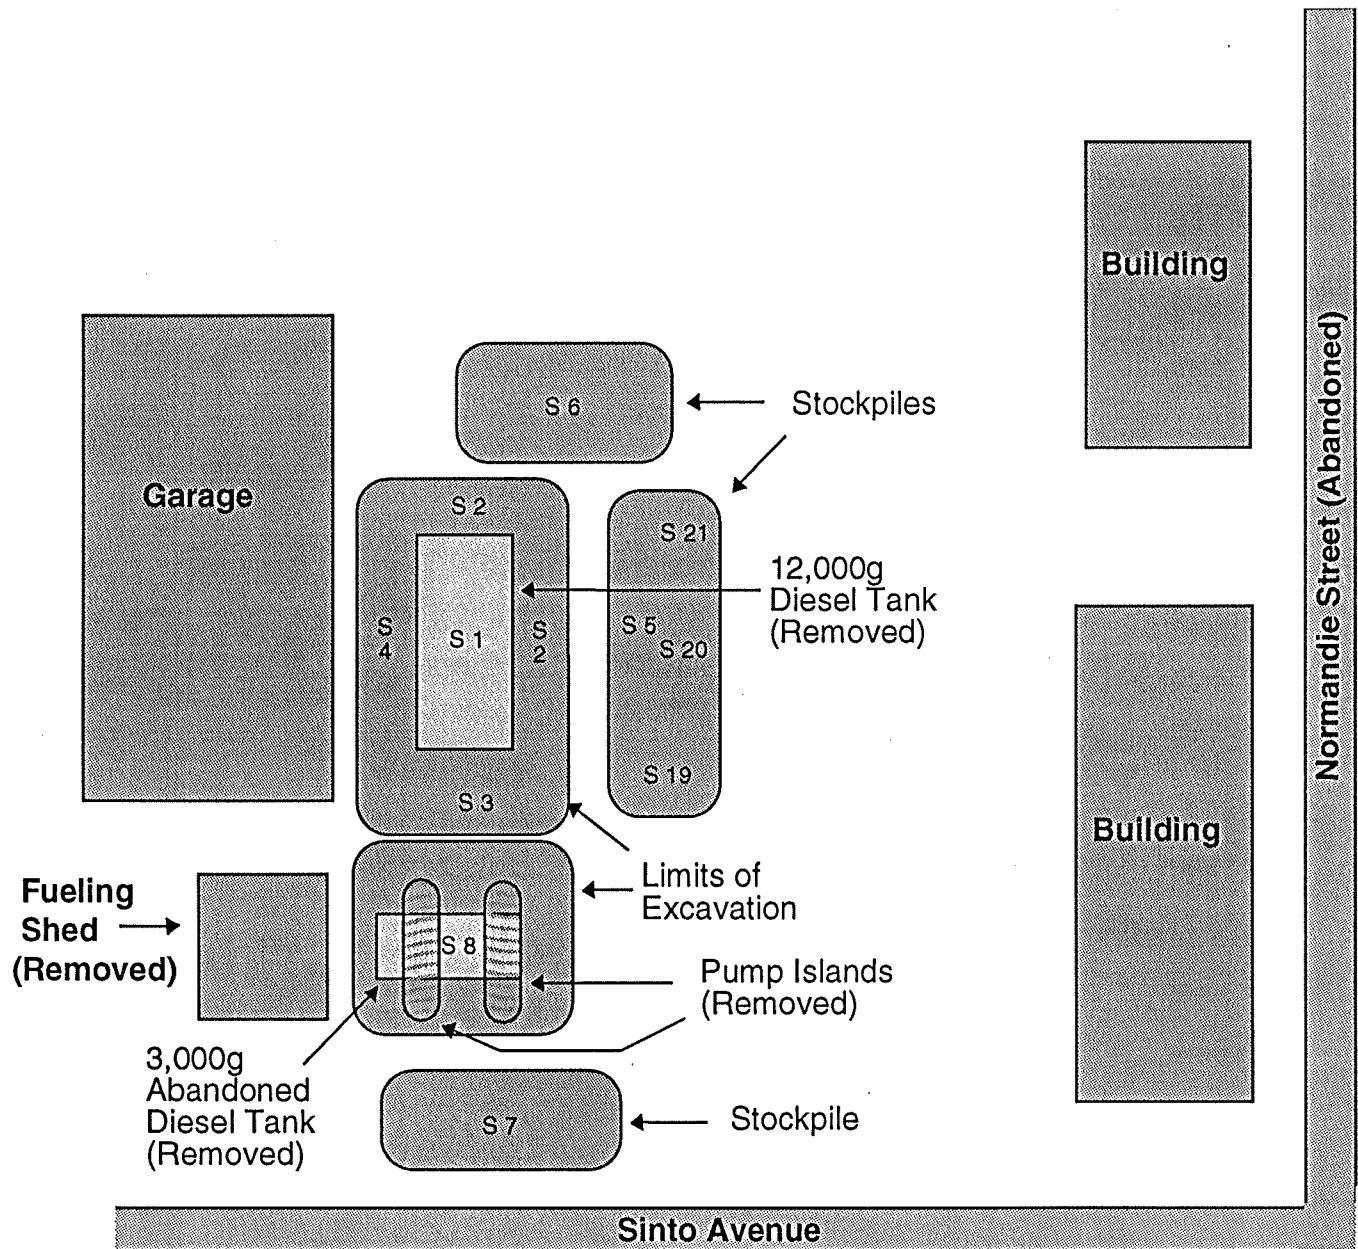

The gasoline UST systems when they were still in use.

## INSTRUCTIONS:

When a release has **not** been confirmed and reported, this Site Check/Site Assessment Checklist must be completed and signed by a person registered with the Department of Ecology. **The results of the site check or site assessment must be included with this checklist.** This form must be submitted to Ecology at the address shown below within 30 days after completion of the site check/site assessment.

**SITE INFORMATION:** Include the Ecology site ID number if the tanks are registered with Ecology. This number may be found on the tank owner's invoice or tank permit.

**TANK INFORMATION:** Please list all the tanks for which the site check and site assessment is being conducted. Use the tank ID number if available, and indicate tank capacity and substance stored.

**REASON FOR CONDUCTING SITE CHECK/SITE ASSESSMENT:** Please check the appropriate item.

**CHECKLIST:** Please initial each item in the appropriate box.

**SITE ASSESSOR INFORMATION:** This form must be signed by the registered site assessor who is responsible for conducting the site check/site assessment.

## REASON FOR CONDUCTING SITE CHECK/SITE ASSESSMENT

Check one:

- ☐ Investigate suspected release due to on-site environmental contamination.
- ☐ Investigate suspected release due to off-site environmental contamination.
- ☐ Extend temporary closure of UST system for more than 12 months.
- ☐ UST system undergoing change-in-service.
- ☐ UST system permanently closed-in-place.
- ☒ UST system permanently closed with tank removed.
- ☐ Abandoned tank containing product.
- ☐ Required by Ecology or delegated agency for UST system closed before 12/22/88.
- ☐ Other (describe): \_\_\_\_\_

**CHECKLIST**

Each item of the following checklist shall be initialed by the person registered with the Department of Ecology whose signature appears below.

	YES	NO
1. The location of the UST site is shown on the vicinity map.	✓	
2. A brief summary of information obtained during the site inspection is provided. (see Section 3.2 in the Site Assessment Guidance)	✓	
3. A summary of UST system data is provided. (see Section 3.1)	✓	
4. The soils characteristics at the UST site are described. (see Section 5.2)	✓	
5. Is there apparent groundwater in the tank excavation?		✓
6. A brief description of the surrounding land is provided. (see Section 3.1)	✓	
7. Information has been provided indicating the number and types of samples collected, methods used to collect and analyze the samples, and the name and address of the laboratory used to perform the analyses.	✓	
8. A sketch or sketches showing the following items is provided:		
- location and ID number for all field samples collected	✓	
- groundwater samples distinguished from soil samples (if applicable)		N/A
- samples collected from stockpiled excavated soil	✓	
- tank and piping locations and limits of excavation pit	✓	
- adjacent structures and streets	✓	
- approximate locations of any on-site and nearby utilities		✓
9. If sampling procedures different from those specified in the guidance were used, has justification for using these alternative sampling procedures been provided? (see Section 3.4)	✓	
10. A table is provided showing laboratory results for each sample collected including: sample ID number, constituents analyzed for and corresponding concentration, analytical method and detection limit for that method.	✓	
11. Any factors that may have compromised the quality of the data or validity of the results are described.	✓	
12. The results of this site check/site assessment indicate that a confirmed release of regulated substance has occurred.	✓

STATE OF WASHINGTON  
DEPARTMENT OF ECOLOGY

4601 N. Monroe, Suite 202 • Spokane, Washington 99205-1295 • (509) 456-2926

June 23, 1998

Mr. Gene Jakubczak  
City of Spokane, Fleet Services  
914 North Foothills Drive  
Spokane, WA 99207

Dear Mr. Jakubczak:

RE: DECISION ON THE INDEPENDENT CLEANUP ACTION AT THE CITY OF SPOKANE FLEET SERVICES PROPERTY, LOCATED AT 1401 NORTH NORMANDIE, SPOKANE, WASHINGTON; BEING WITHIN THE NE  $\frac{1}{4}$  NE  $\frac{1}{4}$  OF SECTION 18, T. 25 N., R. 42 E.W.M.

Thank you for submitting the results of your independent remedial action(s) for review by the State of Washington Department of Ecology (Ecology). We appreciate your initiative in pursuing this administrative option under the Model Toxics Control Act (MTCA).

Ecology's Toxics Cleanup Program has reviewed the following information regarding the above, described facility/property:

- Remedial Investigation and PCS Disposal for 1401 North Normandie, Spokane, Washington; March 1998, Lambert Group, Inc., Project Number 97167

The report will be kept in the Central Files of the Eastern Regional Office (ERO) of Ecology for review by appointment only.

The independent report states that the majority of petroleum-impacted soil has been excavated and removed from the site. It is believed that a limited amount of contaminated soil remains outside and adjacent to three sides of the brick sidewalls of the former cesspool. These sidewalls were not removed due to building foundation and utility run structural limitations.

Based upon the above-listed information, Ecology has determined that, at this time, the discovered release of petroleum hydrocarbons to site soil no longer pose a threat to human health or the environment.

Therefore, Ecology is issuing this determination that **No Further Remedial Action** is necessary at this site under MTCA, chapter 70.105D RCW. Please note that because your

RE: 1401 North Normandie Remedial Investigation/PCS Disposal Report  
Lambert Group, Inc., Project Number R97167

Dear Mr. Jakubczak:

This letter presents the findings of the remedial investigation and subsequent disposal of petroleum-containing soils from the area of a broken sewer drain line in the City of Spokane Shops located at 1401 North Normandie Street (see Exhibit 1. Location Map).

**Summary:** Petroleum-containing soils found as a results of a broken sewer drain line at the above referenced address have been removed and disposed of in a proper manner at the Graham Road Landfill near Medical Lake, Washington.

The drain lines from the building emptied into a cesspool located under the floor inside of the building. The cesspool was located directly underneath a concrete chase for steam lines and electricity from the boiler and electrical service located on the subject property. The petroleum-containing soils and road grim were removed from the area of the sewer drain line and cesspool. Some of the brick structure of the cesspool still remains in place. The structure was not totally removed due to the possibility of structural damage to the existing building.

Mr. Gene Jakubczak stated the intention of the City of Spokane is to install an oil water separator and plumb floor drains from the building to the separator with final discharge to the Spokane sewer system. Until a final resolution is made on how to handle the drains from the building, the drain will not be used.

We recommend no further environmental investigation until such time as the building and steam/electrical chase is demolished. At that time the remaining portion of the cesspool should be removed and surrounding soils sampled and tested for the presence of petroleum hydrocarbons and metals.

**General:** The Lambert Group, Inc. was retained by the City of Spokane to investigate the soils around a broken sewer drain line. The drain line was excavated by the City of Spokane and suspect petroleum-containing soils were encountered.

**Field Observations:** Mr. Douglas Ladwig, Senior Environmental Geologist with the Lambert Group, Inc., inspected the suspect petroleum-containing soils on December 16, 1997. Soils in the excavation near the point of the broken sewer line were dark in color and a strong odor of waste oil/grease was present. Soil samples were collected from the

excavation and stockpiled soils and analyzed for waste oil-containing soils by WTPH-418.1 (see Exhibit 2. Site/Sample Location Map). Samples from the stockpiled soils were also analyzed for total metal.

Samples were placed in EPA-approved glass jars with Teflon-lined lids. After collection each sample was placed the ice chest under ice and remained there till received by the laboratory. The samples were delivered to Anatek Laboratories in Spokane, WA the same day.

Laboratory Results December 16, 1997-Sampling: Sample results detected the presence of elevated levels of waste oil at the bottom of the excavation, west side wall and the stockpiled soils. Table 1. summarizes the laboratory results and is included in Appendix A. along with the laboratory results.

Sample results indicated that the soil at the bottom of the excavation and the soils along the west wall were above the Washington State Department of Ecology's (WDOE) *Model Toxics Control Act Cleanup Regulations* (MTCA), Chapter 173-340 WAC, method 'A' cleanup levels for waste oil-containing soils.

The laboratory results were transmitted along with the chain-of-custody to USA Waste Companies in Hillsboro, OR for disposal approval of the soils at the Graham Road Landfill near Medical Lake, WA. The petroleum-containing soils identified in the stockpile and bottom of the excavation were approved for disposal, with the exception of the soils along the west wall. USA Waste Companies requested that the soils along the west wall be reanalyzed for approval after the soils were removed from the excavation.

Field Observations January 9, 1998: The excavation work and transportation of the petroleum-containing soils for disposal at Graham Road was conducted by Rob's Demolition. On January 9, 1998 additional soils were removed from the excavation and transported to Graham Road along with the stockpiled soils identified and approved for disposal. Soils along the west wall of the excavation were stockpiled separately and sampled.

During the excavation work on the west wall a brick lined cesspool was discovered underneath the steam utility vault. All road grim and greases were removed from the area of the cesspool till clean native soils were encountered at the bottom. A final sample was collected from the bottom of the excavation and handled in the same manner as previously described in this report (see Exhibit 3. Site/Sample Location Map).

A second excavation was placed on the outside of the building in the area of the cesspools western wall to assess the surrounding soils for petroleum. Asphalt was removed and stockpiled separately. Soils removed from the excavation were stockpile separately and soil samples collected from the stockpile as well as one soil sample from the bottom of the excavation. Asphalt fragments were observed in the stockpiled soils.

During the excavation of the soils in front of the building a drain line was observed that appeared to lead from the cesspool toward the catch basin nearest the excavation. The lid was removed from the catch basin to determine if a drain line was present. No drain line was observed entering the catch basin due to the water level in the catch basin.

Mr. Jakubczak stated that the city would pump the water down and check for the drain line. Mr. Jakubczak stated that after the city pumped the water level down in the catch basin no drain line was present. Further work done by the city found no connection between the observed drain line, catch basin or the cesspool. Additional investigation by the city determined that the drain line was not attached to the cesspool nor did the drain line enter the catch basin.

Laboratory Results January 9, 1998 Sampling: Soil samples were delivered to Anatek laboratories for analyses. Soil samples from the excavation were analyzed for petroleum hydrocarbons by WTPH-418.1. Soil samples from the stockpiled soils were analyzed for petroleum hydrocarbons and total metals. Samples from the excavation were not analyzed for metals because the metal results from the excavated soils were below the WDOE MTCA method 'A' cleanup action level. Table 2. summarizes the laboratory results for January 9, 1998 sampling and is included in Appendix A. along with the laboratory results.

The laboratory results did not detect the presence of petroleum-containing soils in the bottom of the cesspool excavation or in the bottom of the excavation placed on the outside of the building. Soil samples from both stockpiles indicated the presence of waste oil-containing soils above the WDOE MTCA method 'A' cleanup action levels. The stockpiled soils from the outside excavation are believed to be the results of asphalt fragments in the sample.

Soils above the cleanup action level were profiled again by USA Waste Companies for acceptance at the Graham Road Landfill near Medical Lake, Washington. Prior to acceptance, lead content of the soils was analyzed for leachability by EPA approved method 3011/6020. The results for the leachability study were below the dangerous waste regulations of 5 µg/L.

**Soil Disposal:** Soils from the excavation for the cesspool and the second excavation were transported to Graham Road Landfill on January 9, 1998 and January 29, 1998. A total of 68.75 tons of petroleum-containing soils were removed and disposed.

**Conclusion:** The petroleum-containing soils from the broken sewer line draining to the cesspool have been removed. At the present time the building and wash bay are not being used. The City of Spokane anticipates installing an oil water separator on the outside of the building and plumbing all floor drains from the building to the oil water separator for final discharge to the Spokane City Sewer System.

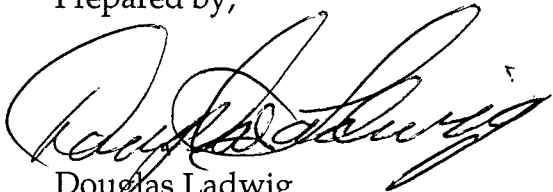

Petroleum-containing soils discovered as the result of a broken sewer line have been removed and disposed of at Graham Road Landfill near Medical Lake, WA. The sewer drain line from the drains inside of the building at 1401 North Normandie emptied into a cesspool. Over the years grease and road grim from City of Spokane equipment was flushed down the drains.

The cesspool was located directly underneath the concrete chase from the boiler and electrical room. The cesspool was constructed out of brick and was open at bottom to native soils. Road grim and grease were removed from the cesspool and disposed. The brick walls of the cesspool still remain on the west, south and north sides. These walls were not removed due to the potential of structural damage to the existing building.

The second excavation on the outside of the building detected low levels of petroleum in the soils of the stockpile. No petroleum-containing soils were discovered in the sample collected from the bottom of the excavation. There is a potential for petroleum-containing soils to be present around the outside of the brick cesspool structure. At the time the building is demolished the remaining portion of the cesspool should be removed and soil samples collected to determine if petroleum-containing soils are present.

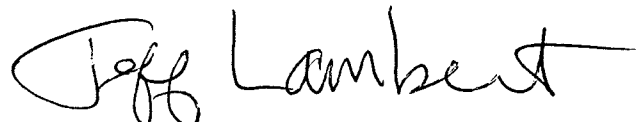

There is a low risk of a significant health threat or impact to the environment due to petroleum-containing soils that may still be present. The broken sewer drain line and the cesspool have been removed. Any remianing petroleum-containing soils are covered by the building and asphalt paved lot. We recommend no further environmental investigation until such time as the building and electrical/steam chase are demolished.

RE: Normandie Diesel Site, Remedial Investigation Report  
Lambert Project R97023

Dear Mr. Jakubezak:

This letter presents the findings for the remedial investigation and soil removal at the former diesel tank site at the City of Spokane Shop located at 1433 North Normandie Street in Spokane, WA (see Exhibit 1. Location Map).

**Summary:** Laboratory analysis of the diesel-containing soils remaining at the above referenced property are below the Washington State Department of Ecology (WDOE) cleanup action level of 200 mg/Kg. Field observations and laboratory analyses did not detect the presence of any additional diesel-containing soils above the WDOE cleanup action levels in the excavation.

We recommend no further environmental investigation regarding the former diesel tank found beneath the pump island at the subject property.

**General:** Rob's Demolition was retained by the City of Spokane to remove a diesel tank pump island and related piping at the Normandie Shop facility. During removal of the pump island a second diesel tank was discovered that had been filled in place beneath the pump island.

Mr. Carper, Principal of Rob's Demolition, stated that the underground storage tank was filled with a mixture of sand and water. The water in the tank had a sheen and odor of diesel fuel. Mr. Carper also stated that Rob's Demolition had collected soil samples from under the tank and found diesel containing soils at approximately 1400 mg/Kg. The WDOE cleanup action levels for diesel-containing soils is 200 mg/Kg.

**Field Observations - March 11, 1997:** Mr. Dave Lamb, Senior Environmental Scientist with the Lambert Group, Inc., directed Rob's Demolition to excavate around the side walls and bottom of the excavation to allow sample collection. Mr. Lamb collected soil samples for laboratory analysis from the side walls and bottom of the former diesel tank site. Five soil samples were collected for laboratory analysis (see Exhibit 2. Site/Sample Map). Soil samples were placed in EPA-approved glass jars with Teflon-lined lids. After collection the samples were placed in an ice chest under ice and remained there until received by Anatek Laboratories, in Spokane, WA.

Diesel-containing soils already stockpiled on site were removed from the subject property by Robs Demolition on March 21 & 22. The soils were approved for disposal at Graham Road Landfill near Medical Lake, Washington. From the initial over excavation work conducted by Robs a total of 182.23 tons of diesel-containing soils were removed and disposed (see Appendix A. Disposal Records).

**March 24, 1997:** Laboratory results from the soil samples collected on March 11, 1997 indicated the presence of diesel-containing soils above the cleanup action levels. Mr. Douglas Ladwig, Senior Environmental Geologist with the Lambert Group, Inc., was present when Robs Demolition removed additional soil from the diesel tank excavation. Soils were checked with a portable field analyzer for the presence of diesel-content and also checked by sheen test.

The portable field analyzer (HNu) is used for field screening and aiding in the identification of soils with volatile organic compounds (VOC's). The HNu meter is a trace gas analyzer used to detect and give a direct reading of the concentrations of VOC's. The HNu is a qualitative instrument, not a quantitative instrument.

The HNu meter was calibrated prior to analyzing field samples. The meter was calibrated to Isobutylene at 100 ppm. After calibration an ambient air reading was collected. The ambient air reading was 0.8 ppm.

The soils in the excavation consist of coarse grained sands, gravels and rock. These soils are consistent with the soils observed in the Spokane River Valley area. No bed rock or ground water was encountered during the excavation work.

Field samples collected from the excavation only detected VOC's in the bottom of the excavation. The field readings detected 30 mg/Kg. A sheen test was conducted on the soils from the bottom of the excavation and a strong sheen was still present. Additional soils were removed from the bottom of the excavation to about 17 feet below the ground surface (bgs) where a soil sample was collected and sent to the laboratory for analysis. A light sheen was still present in the materials at the bottom of the excavation. VOC readings from the bottom of the excavation were 4 mg/Kg. A slight diesel odor was still present.

A total of 265.02 tons of diesel-containing soils were removed from the excavation on March 24, 1997 and disposed of at Graham Road Landfill (see Appendix A. Disposal Records).

On March 27, 1997 one additional sample was collected from the bottom of the excavation at approximately 19 feet bgs to confirm the laboratory results from March 17, 1997. The sample was handled and shipped as before.

**Laboratory:** Anatek Laboratories analyzed the soil samples collected on March 11, 1997 on March 17, 1997. The sample results indicated that there was diesel-containing soils above the WDOE cleanup action levels on the west wall, north wall, east wall and bottom of the excavation (see Exhibit 2. Site/Sample Map). Laboratory results are summarized in Table 1 and detailed laboratory analysis are included in Appendix B.

March 24, 1997 Laboratory Results: The samples were shipped to Anatek Laboratories in Spokane, WA for analyses. The laboratory results did not detect the presence of any petroleum-containing soils in the samples.

March 27, 1997 Laboratory Results: Laboratory results from the sample collected from the bottom of the excavation at approximately 19' bgs detected petroleum-containing soils in the form of diesel at 169 mg/Kg.

**Table 1**

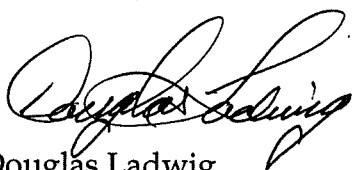

<i>Date</i>	<i>Sample #</i>	<i>Location</i>	<i>Sample Results</i>	<i>WDOE Cleanup Levels</i>
3/11/97	97023-01	Bottom excavation ≈ 13'	1330 mg/Kg	200 mg/Kg
3/11/97	97023-02	South wall	< 25 mg/Kg	200 mg/Kg
3/11/97	97023-03	East wall	915 mg/Kg	200 mg/Kg
3/11/97	97023-04	North wall	471 mg/Kg	200 mg/Kg
3/11/97	97023-05	West wall	2050 mg/Kg	200 mg/Kg
3/24/97	97023-06	West wall	< 25 mg/Kg	200 mg/Kg
3/24/97	97023-07	Bottom Excavation ≈ 17'	< 25 mg/Kg	200 mg/Kg
3/24/97	97023-08	North wall	< 25 mg/Kg	200 mg/Kg
3/24/97	97023-09	East Wall	< 25 mg/Kg	200 mg/Kg
3/27/97	97023-10	Bottom Excavation ≈ 19'	169 mg/Kg	200 mg/Kg

**Conclusion:** Diesel-containing soils were detected underneath the pump island around a abandoned underground storage discovered during the removal of the pump island and another diesel tank.

Over-excavation of the diesel-containing soils from the excavation were removed and hauled to Graham Road Landfill near Medical Lake, Washington. A total of 447.25 tons of diesel-containing soils were disposed of by Robs Demolition.

Soil sampling, laboratory analysis and field observations indicated that the remaining diesel-containing soils are below the WDOE cleanup action level of 200 mg/Kg. We recommend no further environmental investigation regarding the former diesel tank located beneath the pump island on the subject property.

☒ NO FURTHER ACTION

Release ID 3253 & 427689

☒ SITE HAZARD ASSESSMENT

Release ID 3254

### Comments:

**Release ID 3254; Date 1989:** A 10,000 gallon bunker oil tank/waste oil tank was removed from the site. Soil containing petroleum was transported to the North Side Landfill for disposal. File notes indicate the final three samples collected from the excavation document the "total lead at ~ 40 ppm; leachable lead was extremely low (not close to DW levels); PCBs N/D TPH very low; One water sample showed traces of 4 VOA's.....Clean fill placed back in hole". There are no laboratory analytical results for this release in the file. This release occurred prior to the UST regulations. Pictures taken at the time of the work document the removal of soils from ground water and a dark staining on the surface of the ground water. There was no report in the files to document the remedial process or levels of soil contamination prior to backfilling the excavation. Based on the file evidence the release should be scheduled for an SHA.

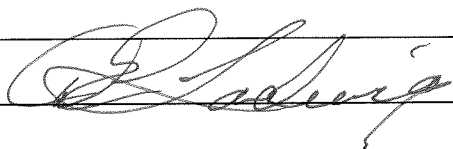

**Release ID 3253; Date 1992:** In 1992 during repaving of the area around the diesel pump island at the City Shop soil contamination was uncovered. The contractor removed as much contamination as possible. During the excavation work an abandoned storage tank was discovered. The tank was practically filled with pea gravel. Approximately 40 cubic yards of petroleum contamination was removed from around the tank before excavation was halted due to concerns for surrounding improvements. Soils left in place were above the cleanup action levels of the time. Diesel containing soils were documented at 1950 mg/Kg was left in place. According to file notes the contamination would be excavated and dealt with in approximately 5 years. Levels of contamination remaining in the excavation are below the cleanup action levels established today.

**Release ID 427689; Date 1997:** During 1997 the owner decommissioned four underground storage tanks at the subject property. The tanks being removed were in the same location as the release reported in 1992. At the time of the investigation soil contamination in the form of diesel was discovered above the cleanup action levels. The contractor under the direction of the consultant hired by the City to oversee the work directed soil removal in the tank excavation. A total of 447.25 tons of petroleum contaminated soils were removed from the site and disposed at Graham Road landfill. Soil samples collected from the final extent of the excavation document the remaining soils are below the cleanup action levels established at the time. A new underground storage tank system was installed after the work was completed. The system is still active today. Based on the file information the 1992 release and the 1997 release status should be changed to NFA.

CITY OF SPOKANE  
FLEET SERVICES ON NORMANDIE**

**CLOSURE, BUNKER C STORAGE TANK**

On December 16, 1993 Roar Tech, Inc. was contracted to clean and fill in place one (1) non-regulated, commercial, bunker C heating oil underground storage tank (UST) for the City of Spokane, Fleet Services. The UST was located at 1424 N. Normandie, Spokane, Washington. The UST was inside the city's compound on the east site of the Engineering and Street Department offices (Refer Site Location Map figure 1).

The UST was closed in place because of; 1) The tanks location being right next to an existing building, removing the tank would compromise the structural integrity of the building; 2) Underground utility line (gas) runs very close to the tank and may pose a problem if the tank were to be removed.

The tank had a capacity of five thousand (5,000) gallons. Three hundred fifty (350) gallons of Bunker C (PS-300) heating oil product was removed from the UST into seven 55 gallon DOT drums and removed from the site. The Bunker C heating oil was disposed of in a environmentally approved manner. The UST was cut using a torch on the bottom of the tank after cleaning. Samples were removed from the two cut areas. After cleaning and sampling, the tank was inspected for any holes, leaks or metal decomposition. The visual inspection showed no compromise to the surrounding environment. The Bunker C tank was filled first with 2-3 feet of gravel to insure good drainage. Then filled to the surface with a sand slurry mixture to ensure 95% compaction.

The fill pipe, vent pipe, and distribution piping were unprotected steel. The fill material for the tank was unknown on the sides and top due to asphalt over the tank. The bottom of the tank where the hole were cut showed only native soil material. The dimensions of the tank were 24 feet by 72 inches and 34 inches from the surface to the top of the tank.

Soil samples were extracted from under the tank and close to each end where the possibility of contamination would be the greatest. A total of two (2) samples were collected and placed in a cooler, then sent by Chain of Custody directly to Advanced Analytical, a Washington State certified laboratory. The laboratory analyzed the samples for WTPH-418.1 (refer site location map figure 2).

FS-SAB-1: (results= 7ppm, WTPH-418.1) The sample was taken 1 foot below the Bunker C heating oil tank and 9.8 feet below the surface in native material near the east end of the tank. This would be the most likely place for contamination. The sample was taken at the same location as head space sample number HS-1.

FS-SAB-1: (results= 86ppm, WTPH-418.1) The sample was taken 1 foot below the Bunker C heating oil tank and 9.8 feet below the surface in native material near the west end of the tank. This would be the most likely place for contamination. The sample was taken at the same location as head space sample number HS-2.

**Table-1: Showing Head Space sampling results.**

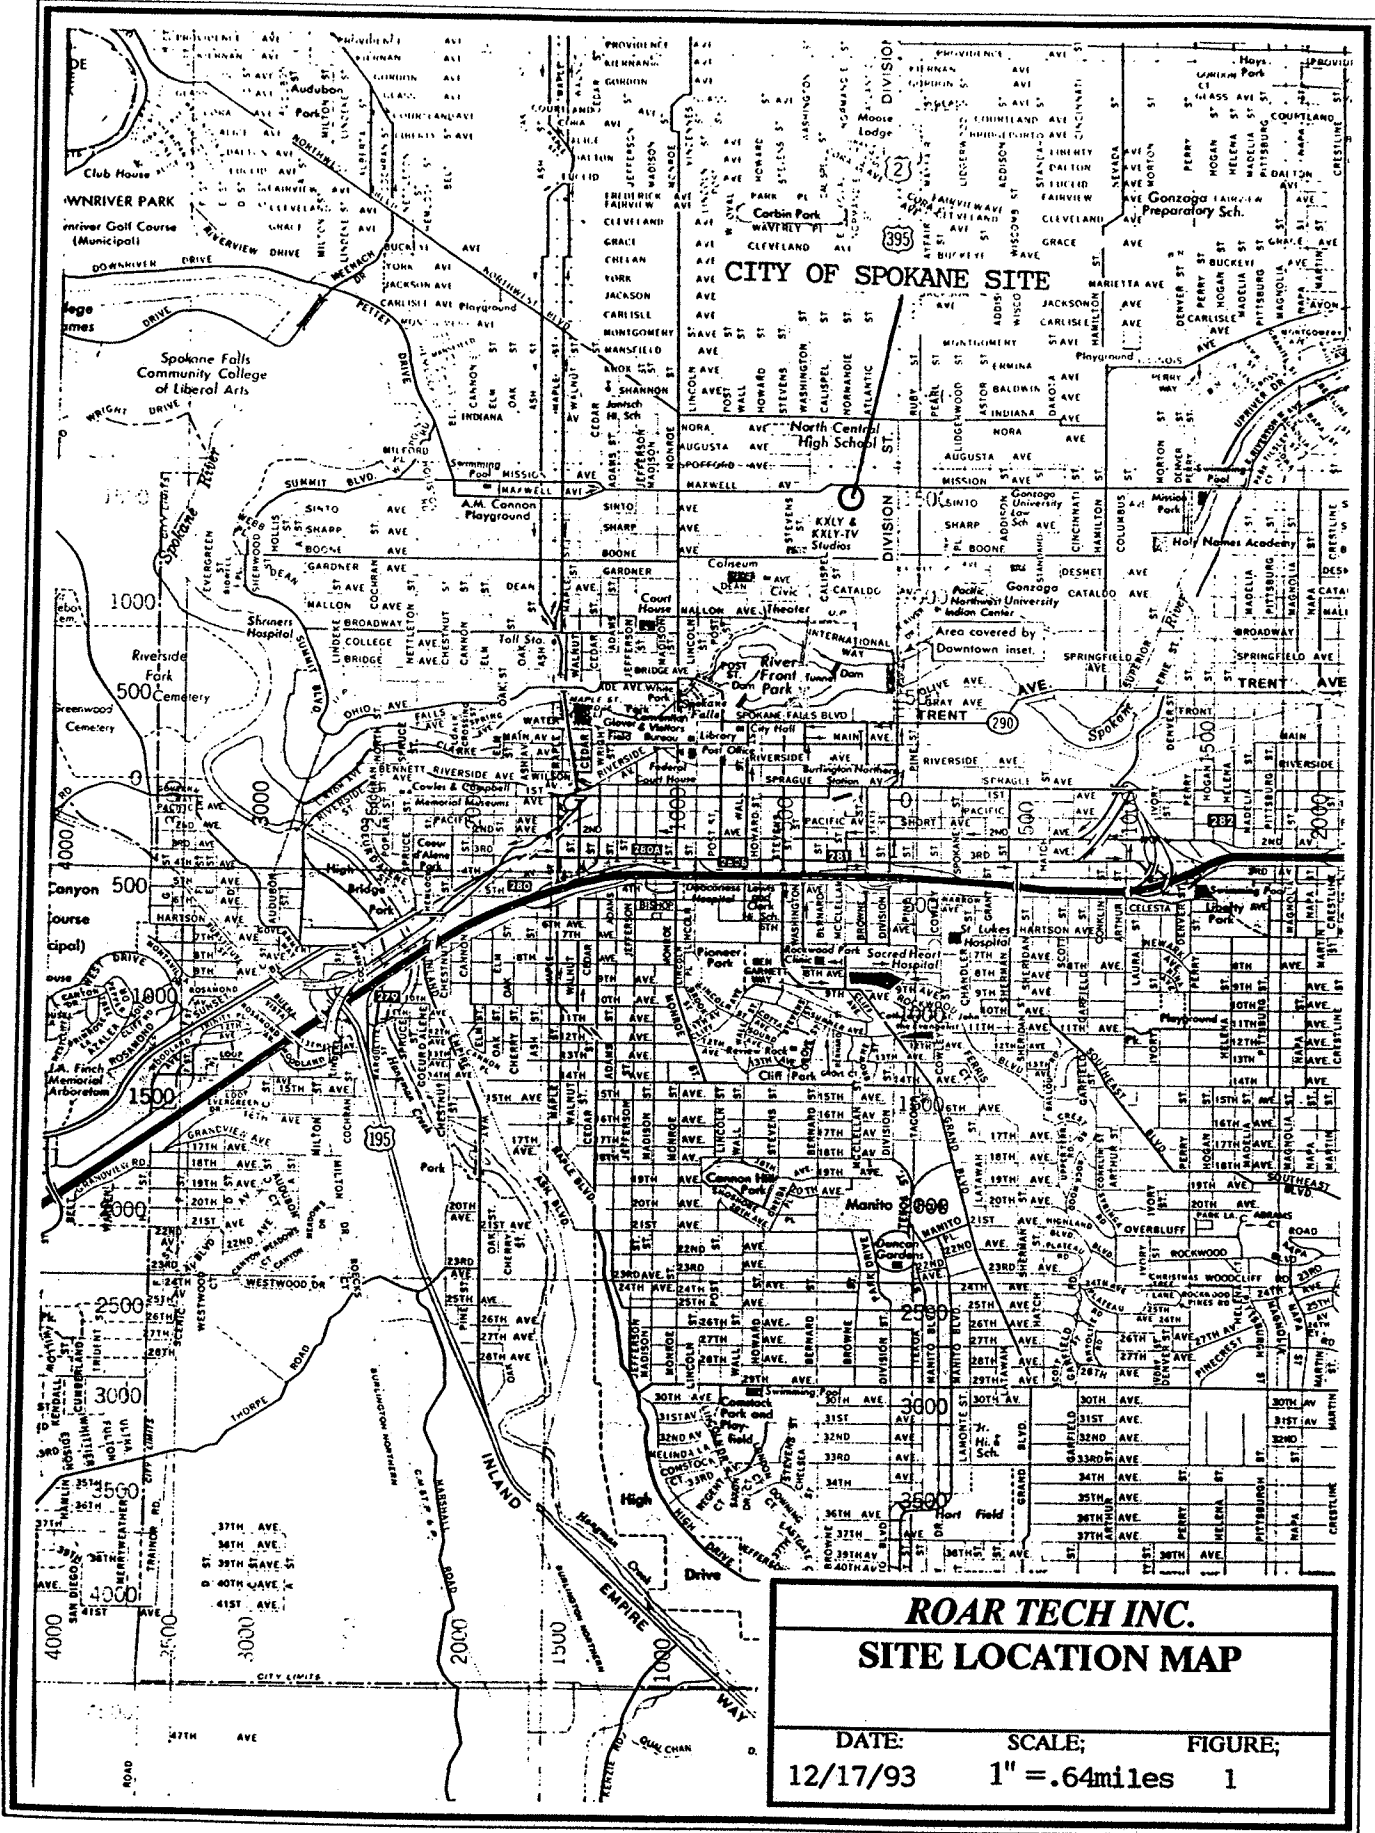

SAMPLE #	DEPTH	RESULTS	TIME
HS-1	9.5 FEET	15/15 PPM	1401
HS-2	9.5 FEET	13/11 PPM	1407

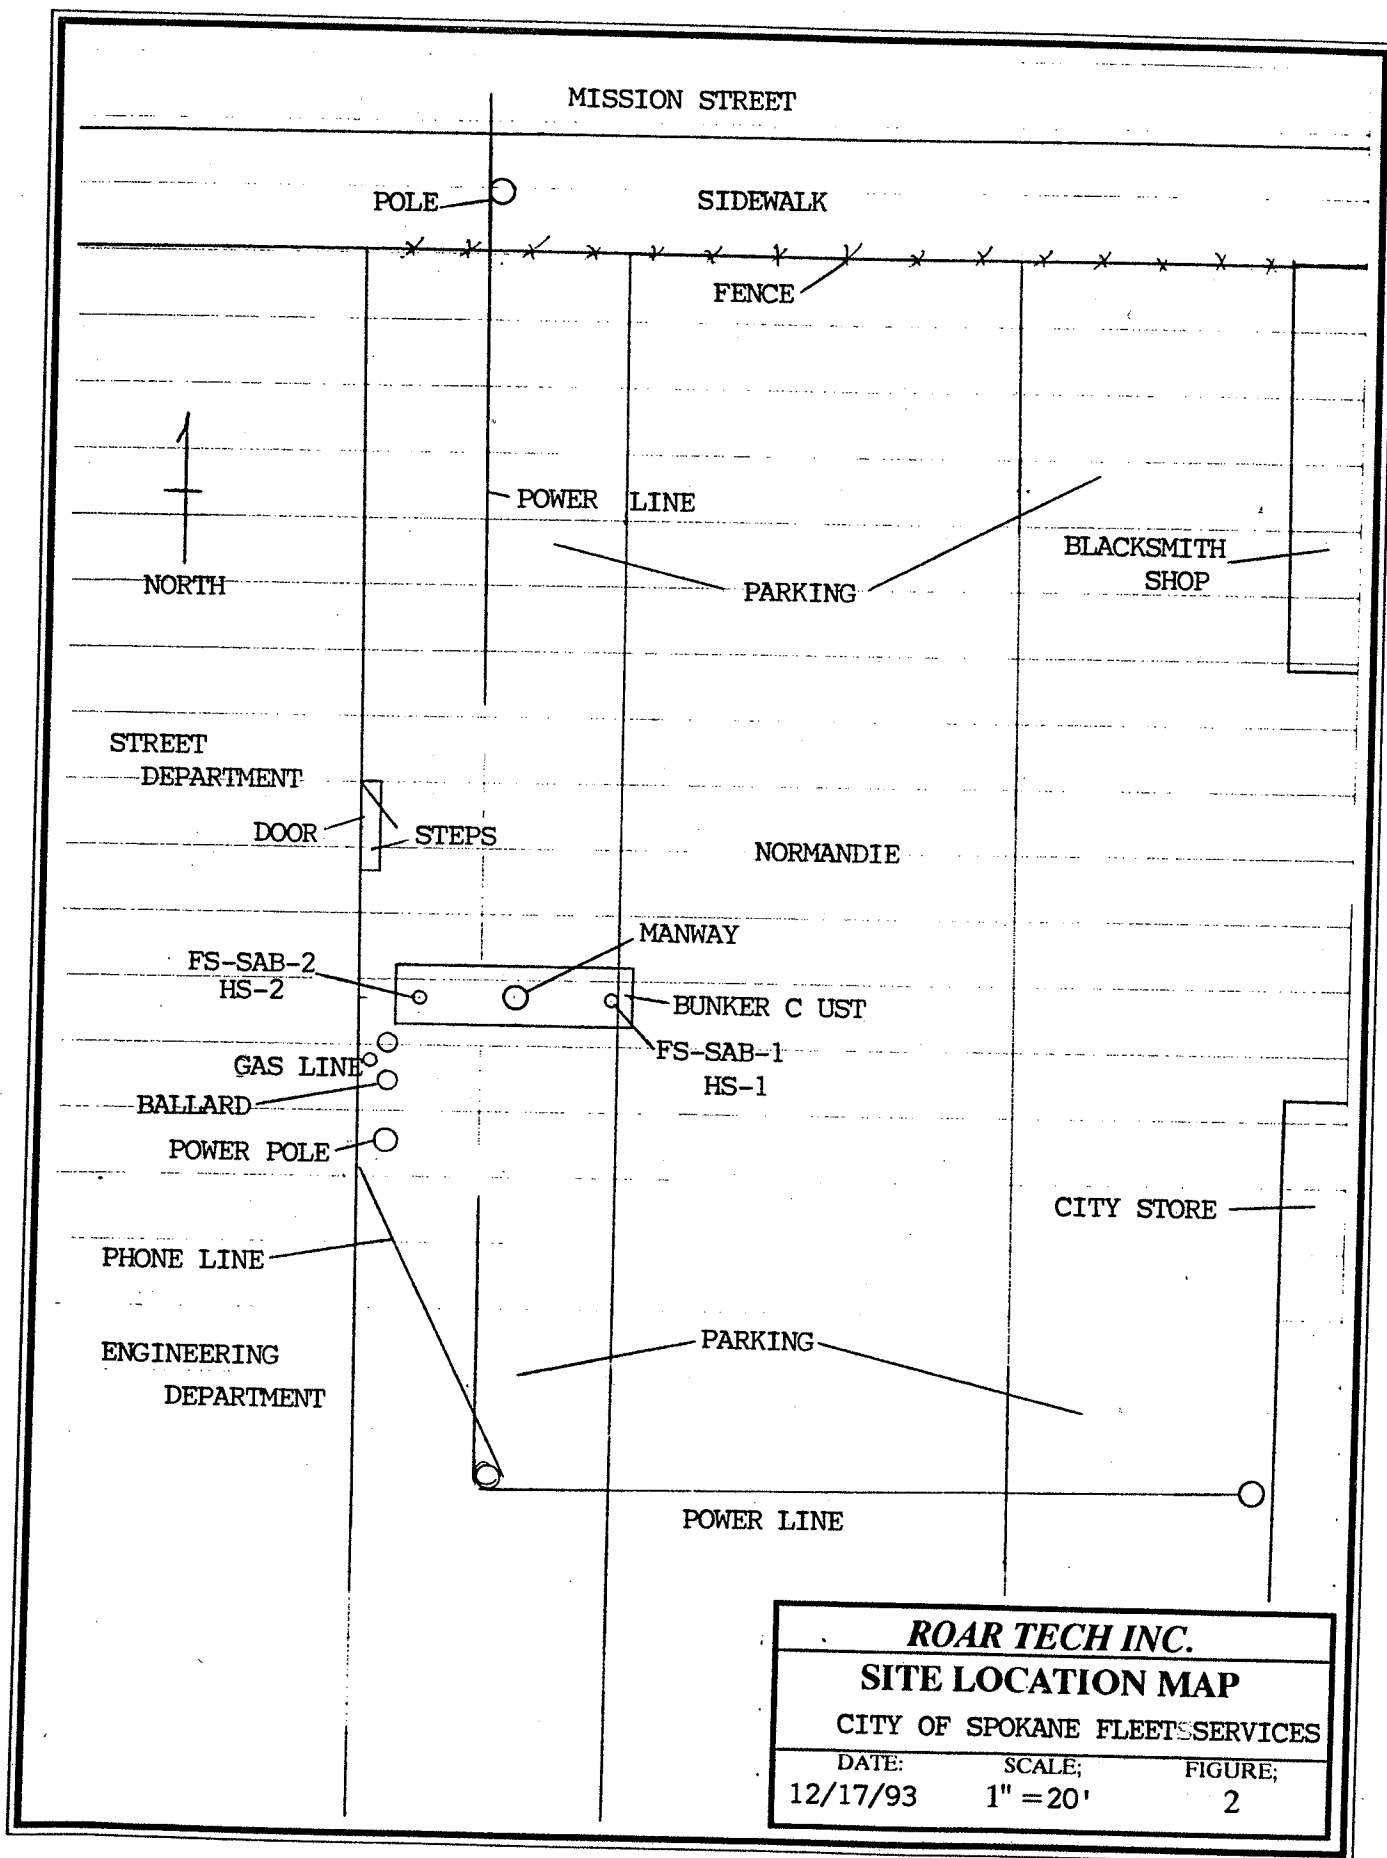

**Table-2 Showing Analytical results.**

SAMPLE #	DEPTH	RESULTS PPM	TIME
FS-SAB-1	9.5 FEET	7	1401
FS-SAB-2	9.5 FEET	86	1407

All analytical results indicated acceptable concentrations of contaminants present. All samples tested were within the limits set by Washington Department of Ecology guidelines. No reporting requirements are needed for the WDOE. This tank is exempt because it was, "used for storing heating oil that is used on the premises where the tank is located". A copy of this report has been sent to the City Fire Department.

The sampling and report have been prepared on behalf of and for the exclusive use of the City of Spokane, Fleet Services, for their environmental evaluation of the site. This report and the findings herein shall not, in whole or in part, be disseminated or conveyed to any other party without the prior written consent of Roar Tech Inc. This report has been prepared in accordance with generally accepted land use assessment practices. No other warranty, expressed or implied, is made.

Lyle McKibbin  
Spokane Fire Department  
44 W. Riverside  
Spokane, WA 99201

Dear Mr McKibbin:

Roar Tech, Inc. requests permission to close in place one (1) underground storage tank located at N. 1433 Normandie in Spokane Washington. Roar Tech will be closing the tank for the City of Spokane, Street Maintenance Department facility. The underground storage tank is a five thousand (5,000) gallon bunker C heating oil tank. We request closure in place because of: 1) The tank location being right next to an existing building and removing the tank would compromise the structural integrity of the building; 2) Underground utility line (gas) runs very close to the tank and may pose a problem if the tank were to be removed.

Sampling would be done to check if any product had discharged from the tank or any of the associated piping. The tank would then be backfilled with an approved inert sand slurry mixture.

Sincerely,

Kipp E. Silver  
Senior Geologist  
Roar Tech, Inc.

## Underground Storage Tank Summary

## Inventory of Underground Storage Tanks

City of Spokane

Normandie Site

1. 10,000 Gallon Waste Oil tank removed 1989. Location: Behind (north of) Fleet Building, east end (based on news photo).
2. 5,000 Gallon Bunker C heating oil tank abandoned in place 1993. Location: Front of (east face of) Broom sheds based on Roar Tech, Inc. Report.
3. 6,250 Gallon single wall unleaded gasoline tank removed prior to 1996. Location: Unknown. Tank number 1114 (3)
4. 6,250 Gallon single wall unleaded gasoline tank removed prior to 1996. Location: Unknown. Tank number 1115 (2)
5. 12,000 Gallon unleaded gasoline tank removed 6/30/1996. Location: Unknown. Tank number 1116 (5)
6. 12,000 Gallon diesel (city inventory) or unleaded gasoline (Ecology inventory) tank removed 6/30/1996. Location: Unknown. Tank number 1117(1)
7. 10,000 Gallon diesel fiberglass double wall tank – operational, Tank number 741007
8. 20,000 Gallon unleaded gasoline fiberglass double wall tank – operational, Tank number 741029
9. Unknown volume, type, substance stored or location. Tank No. 10, closed in place prior to 1996.
10. Unknown volume, type, substance stored or location. Tank No. 11, closed in place prior to 1996.
11. Unknown volume, type, or location. Tank No. 12 stored heating oil, closed in place prior to 1996. Possible this is the tank removed in 1993 from in front of Broom sheds.
12. Unknown volume, type, or location. Tank No. 13 stored heating oil, closed in place prior to 1996. Possible this is the tank removed in 1993 from in front of Broom sheds.
13. Unknown volume or location. Tank No. 4 was a single wall steel tank that stored used oil/waste oil, removed prior to 1996. Possible this is the tank removed in 1989 from behind Fleet building.
14. Unknown volume, location, or substance stored. Tank No. 6 was a single wall steel tank, closed in place prior to 1996.
15. Unknown volume or location. Tank No. 7 was a single wall steel tank that stored leaded gasoline, closed in place prior to 1996.
16. Unknown volume (between 111 and 1,100 gallons) or location. Tank No. 8 was a single wall steel tank that stored leaded gasoline, closed in place prior to 1996.
17. Unknown volume (between 111 and 1,100 gallons) or location. Tank No. 9 was a single wall steel tank that stored leaded gasoline, closed in place prior to 1996.
