Dean,
Thank you for the opportunity to comment. Below is STA's comment.
Gonzaga Haven

- To accommodate the anticipated demand for transit as a result of the housing site a bus stop boarding/alighting pad and transit shelter pad are requested to be installed by the applicant on Nevada/Hamilton Street, just north of the intersection of North foothills and Nevada/Hamilton Street. Review the attached site plan with approximate bus stop location. Spokane Transit's bus stop standards are located at: <https://www.spokanetransit.com/projects-plans/bus-stop-design-standards>. Please coordinate improvements with Tara Limon at tlimon@spokanetransit.com or (509) 343-1692.

Let me know if you have any questions or comments on the proposed transit improvements. The same improvements were requested during the pre-dev for this application.

Thank you,

Tara Limon
