**SILT FENCE NOTES**

1. Silt fences shall be purchased in continuous roll and cut to the length of the perimeter to be used. Use 30 in. high unless otherwise specified. A 30 ft. (9.1 m) section of silt fence shall be placed together only at a support post, with a minimum 9 in. (23.0 cm) gap, and secured with a line of wire around the post.
2. Posts shall be spaced a maximum of 5 ft. apart and driven securely into the ground forming an arc of 30 degrees.
3. A trenched, ditch, or other means shall be used to contain the silt fence and to keep the silt fence away from the drainage area.
4. When installing, the top edge of the fence shall be placed 2 ft. above the ground, and the bottom edge of the fence shall be placed 2 ft. below the surface of the ground.
5. The standard gusseted filter fabric shall be stapled or wired to the fence post, and 2 in. of the fabric shall be placed outside the trench. The fabric shall not extend more than 20 in. beyond the original ground surface. For the fabric shall not be exposed to excessive wind.
6. Silt fences shall be inspected immediately after each rainfall and at least daily during prolonged rainfall. Any required repairs shall be made immediately.
7. Do not install or move any fence until it has been properly staked.
8. Silt fences will be installed parallel to the slope contour.
9. Constructing a no sediment device or a drainage system of the required perviousness.
10. Do not install below an outlet pipe or weir.
11. Install a drainable of exposition area.
12. Do not drive over or through the fence.

**HYDROSEEDING NOTES**

1. Hydroseeding shall be applied in accordance with the ODOT standard plan notes on the plan sheet.

2. Hydroseeding to be the following mixture:

<table>
