

**State Environmental Policy Act (SEPA)
ENVIRONMENTAL CHECKLIST**

File No. _____

PLEASE READ CAREFULLY BEFORE COMPLETING THE CHECKLIST!

Purpose of Checklist:

The State Environmental Policy Act (SEPA) chapter 43.21C RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An Environmental Impact Statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the agency identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the agency decide whether an EIS is required.

Instructions for Applicants:

This environmental checklist asks you to describe some basic information about your proposal. Governmental agencies use this checklist to determine whether the environmental impacts of your proposal are significant, requiring preparation of an EIS. Answer the questions briefly, with the most precise information known, or give the best description you can.

You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer, or if a question does not apply to your proposal, write "do not know" or "does not apply." Complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations, such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the governmental agencies can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Use of checklist for nonproject proposals:

Complete this checklist for nonproject proposals, even though questions may be answered "*does not apply.*"

IN ADDITION, complete the SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS (Part D).

For nonproject actions, the references in the checklist to the words "project," "applicant," and "property or site" should be read as "proposal," "proposer," and "affected geographic area," respectively.

A. BACKGROUND

1. Name of proposed project: 5 Mile Apartments
2. Applicant: 5 Mile Spokane, LLC
3. Address: PO Box 127
City/State/Zip: Longview, WA 98632 Phone: 206-472-3885
Agent or Primary Contact: Erik Fuentes, PE DCG/Watershed
Address: 601 W Main Avenue, Suite 617
City/State/Zip: Spokane, WA 99201 Phone: 509-606-3600
Location of Project: Five Mile Prairie Neighborhood, Spokane, WA
Address: 7601 N Five Mile Road, Spokane, WA 99208
Section: 25 Quarter: NW of NW Township: 26 N Range: 42 E
Tax Parcel Number(s) 26252.0064
4. Date checklist prepared: 02/08/2024
5. Agency requesting checklist: City of Spokane
6. Proposed timing or schedule (including phasing, if applicable): As soon as possible.

7. a. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain. No.

- b. Do you own or have options on land nearby or adjacent to this proposal? If yes, explain. No.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal. None yet prepared. Geotechnical report will be prepared.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. Unknown.

10. List any government approvals or permits that will be needed for your proposal, if known. Unknown.

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. _____

Four 12-unit apartment buildings with onsite surface parking (53 stalls). Proposed driveway entrances on N Five Mile Road and N A Street. Street improvements, including paving and cul-de-sac construction on N A Street. ROW dedication along A Street. Removal of existing single family home. 2-acre site.

12. Location of the proposal: Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit application related to this checklist. _____

7601 N Five Mile Road, Spokane. NW 1/4 of NW 1/4, Section 25, Township 26 N, Range 42 E.
Site plans, mapping, and legal description submitted separately.

13. Does the proposed action lie within the Aquifer Sensitive Area (ASA)? The General Sewer Service Area? The Priority Sewer Service Area? The City of Spokane? (See: Spokane County's ASA Overlay Zone Atlas for boundaries.) Yes to all four questions

14. The following questions supplement Part A.

a. Critical Aquifer Recharge Area (CARA) / Aquifer Sensitive Area (ASA)

(1) Describe any systems, other than those designed for the disposal of sanitary waste installed for the purpose of discharging fluids below the ground surface (includes systems such as those for the disposal of stormwater or drainage from floor drains). Describe the type of system, the amount of material to be disposed of through the system and the types of material likely to be disposed of (including materials which may enter the system inadvertently through spills or as a result of firefighting activities). _____
Stormwater runoff generated from proposed pollution-generating impervious surfaces (pavements and potentially some roof surfaces) will be routed to treatment swales and/or rain gardens, and then to drywells for infiltration. Runoff from other surfaces (e.g. roofs) will be routed directly to drywells for infiltration.

(2) Will any chemicals (especially organic solvents or petroleum fuels) be stored in aboveground or underground storage tanks? If so, what types and quantities of material will be stored? _____
No chemical storage is proposed.

(3) What protective measures will be taken to insure that leaks or spills of any chemicals stored or used on site will not be allowed to percolate to groundwater. This includes measures to keep chemicals out of disposal systems. _____
No permanent chemical storage is proposed.
During construction, standard temporary erosion and sediment measures will be installed. Any chemicals used in construction will be stored on impermeable liners and with temporary curbing installed for containment.

(4) Will any chemicals be stored, handled or used on the site in a location where a spill or leak will drain to surface or groundwater or to a stormwater disposal system discharging to surface or groundwater? No.

b. Stormwater

(1) What are the depths on the site to groundwater and to bedrock (if known)? _____
Unknown at this time, but this will be determined by a geotechnical investigation.

(2) Will stormwater be discharged into the ground? If so, describe any potential impacts. _____
Yes, after proper treatment and detention. No potential impacts are currently known.

B. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site (check one):

Flat Rolling Hilly Steep slopes Mountainous

Other: The site generally slopes down from northwest to southeast at 1-5% slopes with an average of 2%.

b. What is the steepest slope on the site (approximate percent slope)? 5%

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils. _____
Unknown. This information will be determined by geotechnical investigation.

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe. _____
City GIS mapping suggests there may be erodible soils in the vicinity. This will be determined by geotechnical investigation.

- e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill: _____
Significant excavation and fill is not anticipated, except for construction of building foundation and grading for proposed onsite parking. The site grading design will seek to balance cut and fill and minimize net cut or fill.
- f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe. _____
Slopes in the site vicinity are shallow to moderate, so significant erosion is not anticipated. Standard erosion and sediment control measures will be in place during construction.
- g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt, or buildings)? 40-60%
- h. Proposed measures to reduce or control erosion or other impacts to the earth, if any: _____
Typical erosion control measures will be put in place during construction, as required by City standards. These will include, at a minimum: temporary construction entrance, storm drain inlet protection, silt fencing, and a contained concrete equipment wash area.

2. Air

- a. What type of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known. _____
Dust and equipment emissions would result during construction. Vehicle emissions will result from vehicles entering and leaving the finished premises.
- b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. None are currently known.

- c. Proposed measures to reduce or control emissions or other impacts to air, if any: _____
Contractor will moisten soils to minimize dust. Equipment will be turned off when not in use.

3. Water

a. SURFACE WATER:

- (1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into. _____

No.

- (2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. _____

No.

- (3) Estimate the amount of fill and dredge material that would be placed in or removed from the surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material. _____

N/A.

- (4) Will the proposal require surface water withdrawals or diversions? If yes, give general description, purpose, and approximate quantities if known. _____

No.

(5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. _____

No.

(6) Does the proposal involve any discharge of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. _____

No.

b. GROUNDWATER:

(1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known. _____

Water will be supplied by the City of Spokane. No water will be directly discharged to groundwater, but stormwater will be infiltrated after treatment and detention.

(2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. _____

Wastewater will be discharged to the City sewer system.

c. WATER RUNOFF (INCLUDING STORMWATER):

(1) Describe the source of runoff (including stormwater) and method of collection and disposal if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe. _____

Stormwater runoff will be generated on proposed roof and pavement surfaces. All stormwater will be infiltrated onsite according to City standards. Where required, stormwater will receive water quality treatment, such as with a grass swale or rain garden, prior to infiltration.

(2) Could waste materials enter ground or surface waters? If so, generally describe. _____

No.

(3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe. _____

The proposed drainage system will be designed to preserve or improve the existing drainage patterns in the vicinity of the site, as required by the City of Spokane.

d. PROPOSED MEASURES to reduce or control surface, ground, and runoff water, and drainage patten impacts, if any. _____

Stormwater runoff generated from proposed pollution-generating impervious surfaces (pavements and potentially some roof surfaces) will be routed to treatment swales and/or rain gardens, and then to drywells for infiltration. Runoff from other surfaces (e.g. roofs) will be routed directly to drywells for infiltration.

4. Plants

a. Check the type of vegetation found on the site:

Deciduous tree: alder maple aspen

Other: Approximately 5 deciduous trees of unknown species exist onsite.

Evergreen tree: fir cedar pine

Other: Approximately 5 evergreen trees of unknown species exist onsite.

Shrubs Grass Pasture Crop or grain

Orchards, vineyards or other permanent crops

Wet soil plants: cattail buttercup bullrush skunk cabbage

Other: None.

Water plants: water lily eelgrass milfoil

Other: None.

Other types of vegetation: None.

b. What kind and amount of vegetation will be removed or altered? _____

Some or all existing onsite trees will be removed or altered.

c. List threatened and endangered species known to be on or near the site. _____

None.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any: Landscaping and street trees will be proposed in accordance with City standards.

Areas disturbed during construction will be stabilized and landscaped after construction. Proposed final landscaping yet to be determined.

e. List all noxious weeds and invasive species known to be on or near the site. _____
None.

5. Animals

a. Check and List any birds and other animals which have been observed on or near the site or are known to be on or near the site:

Birds: hawk heron eagle songbirds

Other: Unknown.

Mammals: deer bear elk beaver

Other: Unknown.

Fish: bass salmon trout herring shellfish

Other: Unknown.

Other (not listed in above categories): _____

b. List any threatened or endangered animal species known to be on or near the site.

Unknown.

c. Is the site part of a migration route? If so, explain. _____

Unknown.

d. Proposed measures to preserve or enhance wildlife, if any: _____

None.

e. List any invasive animal species known to be on or near the site. _____
None.

6. Energy and natural resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.

Electric and/or natural gas.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe. No.

c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any: _____

Unknown at this time.

7. Environmental health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste that could occur as a result of this proposal? If so, describe. _

No.

(1) Describe any known or possible contamination at the site from present or past uses. _____
Historical land uses are not known. Any soil contamination, if it exists, will be included in the geotechnical investigation of the site.

(2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity. _____
No existing hazardous chemicals or conditions are known to exist on the site or in the vicinity.

(3) Describe any toxic or hazardous chemicals/conditions that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project. _____
No hazardous chemicals or conditions are anticipated to be stored on the project site during or after construction, or at any time in the life of the future apartment building.

(4) Describe special emergency services that might be required. _____
No special emergency services are anticipated to be required.

(5) Proposed measures to reduce or control environmental health hazards, if any:
None proposed at this time.

b. NOISE:

(1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)? _____

Traffic.

(2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site. _____

Construction equipment and vehicular traffic during construction. Construction noise would occur during business hours unless otherwise permitted by the City. Vehicular noise would occur on a long term basis from cars entering or leaving the site.

(3) Proposed measure to reduce or control noise impacts, if any: _____

None currently proposed.

8. Land and shoreline use

a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe. _____

The site and vicinity is currently zoned R-1, low density residential. The proposal will not affect current land uses on nearby properties.

b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use? _____

Unknown.

1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how: No/not applicable.

c. Describe any structures on the site. Existing single family residence, to be demolished.

d. Will any structures be demolished? If so, which? Existing single family residence, to be demolished.

e. What is the current zoning classification of the site? R-1, low density residential.

f. What is the current comprehensive plan designation of the site? R-1, low density residential.

g. If applicable, what is the current shoreline master program designation of the site? _____

N/A.

h. Has any part of the site been classified as a critical area by the city or the county? If so, specify. _____
No.

i. Approximately how many people would reside or work in the completed project? _____
The completed project would include 48 residential apartments (four 12-unit buildings).

j. Approximately how many people would the completed project displace? _____
One single family residence.

k. Proposed measures to avoid or reduce displacement impacts, if any: _____
N/A.

l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any: _____
None.

m. Proposed measures to ensure the proposal is compatible with nearby agricultural and forest lands of long-term commercial significance, if any: _____
N/A.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing. _____

The completed project would include 48 residential apartments (four 12-unit buildings).

b. Approximately how many units, if any, would be eliminated? Indicate whether high-, middle- or low-income housing. _____

One single family residence.

c. Proposed measures to reduce or control housing impacts, if any: _____

None.

10. Aesthetics

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed? _____

The proposed buildings shall be no greater than the maximum allowed height per land use regulations (40').

b. What views in the immediate vicinity would be altered or obstructed? _____

Unknown/none likely.

c. Proposed measures to reduce or control aesthetic impacts, if any: _____

The proposed buildings will implement modulation, material change, and architectural interest in order to break down the scale of the buildings in order to be more harmonious with the existing single family urban fabric.

11. Light and Glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur? _____
Glare impacts are not anticipated to be significant. The proposal includes glazing within building code.

- b. Could light or glare from the finished project be a safety hazard or interfere with views? _____
Glare impacts are not anticipated to be significant. The proposal includes glazing within building code.

- c. What existing off-site sources of light or glare may affect your proposal? _____
Off-site light or glare is not anticipated to significantly impact the proposal.

- d. Proposed measures to reduce or control light and glare impacts, if any: _____
Exterior lighting will be shielded and not spill to adjacent properties as required by code.

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity? _____
None.

- b. Would the proposed project displace any existing recreational uses? If so, describe. _____
No.

- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any: _____
None.

13. Historic and cultural preservation

a. Are there any buildings, structures, or sites, located on or near the sited that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers located on or near the site? If so, specifically describe. _____

[No.](#)

b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources. _____

[No.](#)

c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archaeology and historic preservation, archaeological surveys, historic maps, GIS data, etc. _____

[No methods have been used to date.](#)

d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required _____

[No measures have been taken to date.](#)

14. Transportation

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any. _____
The site is served by N Five Mile Rd, and may be informally served by the gravel road in the A St right of way. The proposal includes paving and cul-de-sac construction in A Street, with two driveways proposed to A street and one driveway proposed to N Five Mile Rd.
- b. Is site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop _____
The site does not appear to be served by public transit. The nearest transit stop is 5 Mile Park and Ride, which is 1.2 miles away.
- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate? _____
The proposal includes 53 onsite stalls. Onsite driveway parking associated with the existing single family home would be eliminated.
- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private). _____
N A Street will require improvement, including paving, cul-de-sac construction, and frontage improvements as required by the City. Frontage improvements along N 5 Mile Rd appear to be recently constructed and compliant with City standards.
- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail or air transportation? If so, generally describe. _____
No.

- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and non-passenger vehicles). What data or transportation models were used to make these estimates? _____

[See attached Trip Generation and Distribution Letter](#)

(Note: to assist in review and if known, indicate vehicle trips during PM peak, AM Peak, and Weekday (24 hours).)

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, general describe. _____

[No.](#)

- h. Proposed measures to reduce or control transportation impacts, if any: _____

[None currently proposed.](#)

15. Public services

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe. _____

[Unknown. However, the project would increase the number of dwelling units on this parcel from 1 \(existing\) to 48 \(proposed\).](#)

- b. Proposed measures to reduce or control direct impacts on public services, if any: _____

[None currently proposed.](#)

16. Utilities

a. Check utilities currently available at the site:

electricity

natural gas (unknown)

water

refuse service

telephone

sanitary sewer

septic system

Other: _____

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed: _____

All existing utility services will require removal and replacement as part of the site re-development, including:

Water - City of Spokane. Trenching in street, disconnection of existing service(s), new connection.

Sewer - City of Spokane. Trenching in street, disconnection of existing service(s), new connection.

Electric - Avista Utilities. Extent of work unknown.

Natural Gas - Avista Utilities. Extent of work unknown.

Telecom - Provider unknown. Extent of work unknown.

Refuse service - City of Spokane. New refuse enclosure in accordance with city standards.

C. SIGNATURE

I, the undersigned, swear under penalty of perjury that the above responses are made truthfully and to the best of my knowledge. I also understand that, should there be any willful misrepresentation or willful lack of full disclosure on my part, the agency must withdraw any determination of Nonsignificance that it might issue in reliance upon this checklist.

<p>FOR STAFF USE ONLY</p> <p>Staff member(s) reviewing checklist: _____</p> <p>Based on this staff review of the environmental checklist and other pertinent information, the staff concludes that:</p> <p><input type="checkbox"/> A. there are no probable significant adverse impacts and recommends a Determination of Nonsignificance.</p> <p><input type="checkbox"/> B. probable significant adverse environmental impacts do exist for the current proposal and recommends a Mitigated Determination of Nonsignificance with conditions.</p> <p><input type="checkbox"/> C. there are probable significant adverse environmental impacts and recommends a Determination of Significance.</p>

D. SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS

(Do not use this sheet for project actions)

Because these questions are very general, it may be helpful to read them in conjunction with the list of elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise? _____

Proposed measures to avoid or reduce such increases are: _____

2. How would the proposal be likely to affect plants, animals, fish or marine life? _____

Proposed measures to protect or conserve plants, animals, fish or marine life are: _____

3. How would the proposal be likely to deplete energy or natural resources? _____

Proposed measures to protect or conserve energy and natural resources are: _____

4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, flood plains or prime farmlands? _____

Proposed measures to protect such resources or to avoid or reduce impacts are: _____

5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans? _____

Proposed measures to avoid or reduce shoreline and land use impacts are: _____

6. How would the proposal be likely to increase demands on transportation or public services and utilities? _____

Proposed measures to reduce or respond to such demand(s) are: _____

7. Identify, if possible, whether the proposal may conflict with local, state or federal laws or requirements for the protection of the environment. _____

C. SIGNATURE

I, the undersigned, swear under penalty of perjury that the above responses are made truthfully and to the best of my knowledge. I also understand that, should there be any willful misrepresentation or willful lack of full disclosure on my part, the *agency* may withdraw any Determination of Nonsignificance that it might issue in reliance upon this checklist.

FOR STAFF USE ONLY

Staff member(s) reviewing checklist: _____

Based on this staff review of the environmental checklist and other pertinent information, the staff concludes that:

- A. there are no probable significant adverse impacts and recommends a Determination of Nonsignificance.
- B. probable significant adverse impacts do exist for the current proposal and recommends a Mitigated Determination of Nonsignificance with conditions.
- C. there are probable significant adverse environmental impacts and recommends a Determination of Significance.
