<tbody>
<tr>
<td><strong>Achillea tomentosa</strong> Woolly Yarrow</td>
<td>2</td>
<td>Soil adaptable. Good for dry, exposed locations. Fire retardent, fernlike leaves are light olive green. Flat clusters of yellow flowers cover foliage in spring. Remove faded flowers. Space 6” to 12” apart.</td>
</tr>
<tr>
<td><strong>Aegopodium podagraria Bishop’s Weed or Gout Weed</strong></td>
<td>4</td>
<td>Soil adaptable. Good for difficult growing situations, but can become invasive and hard to control. 'Variegata' leaves are gray-green edged with white. Space clumps 18”–24” apart.</td>
</tr>
<tr>
<td><strong>Ajuga reptans Ajuga or Carpet Bugle</strong></td>
<td>4</td>
<td>Adaptable, but grows best in moist, well-drained soil with sun or partial sun. There are varieties with green, bronze, or plum-colored leaves with blue flower spikes, though some varieties have white flowers. The flowers rise 4”–6” above the foliage in late spring. Remove or mow them after flowering. Fast growing. Space 6”–12” apart for groundcover.</td>
</tr>
<tr>
<td><strong>Anemone sylvestris Snowdrop Anemone</strong></td>
<td>2</td>
<td>Soil adaptable, but prefers moist, well drained conditions. Avoid wet clay soils, which encourage root rot. Attractive foliage. White, nodding, fragrant flowers bloom in late April through July. Limited availability, usually through catalogs. Can be started from seed. Space 12” apart.</td>
</tr>
<tr>
<td><strong>Arctostaphylos uva-ursi Kinnikinnick</strong></td>
<td>2</td>
<td>Likes poor, sandy soils, Slow to establish, but eventually forms sturdy mats of small, glossy green leaves with bright red-orange berries. Space 3’ apart.</td>
</tr>
<tr>
<td><strong>Arenaria &amp; Sagina subulata Irish and Scotch Moss</strong></td>
<td>5</td>
<td>Likes a moist, rich soil. Best in small applications and between stepping stones. Gold forms are more sun tolerant. Dense mounds with tiny white flowers. Space 12” apart.</td>

</table>
Coronilla varia  Deciduous  Groundcover  2’  S/PSH
Crown Vetch  Non-native  Zone: 2

Comments: Soil adaptable. An aggressive utility groundcover. May be hard to eradicate once established. Lavender-pink flowers all summer followed by brown seed pods. Mow, feed, and water in pring to rejuvenate. Dries out in early fall and dies back in winter. Used in reclamation. Plant divisions 18” apart.

Corydalis lutea  Deciduous  Groundcover  8”  PSH/SH
Yellow Corydalis  Non-native  Zone: 5

Comments: Does best in well drained soil that is slightly alkaline. Adaptable to semishade to full sun if kept consistently moist. Fernlike foliage. Yellow flowers in late May through August. Good in rockeries and for naturalizing. Readily reseeds.

Cotoneaster apiculatus  S-Evergreen  Groundcover  1 1/2’ x 4’  S
Cranberry Cotoneaster  Non-native  Zone: 2

Comments: Adaptable but prefers moist, well-drained soil. Once established, will tolerate drought. Works well in high pH soil conditions. Bears large, attractive red berries. Good for planting on banks. Space 3–5’ apart. See Cotoneaster General Comments. Also listed under SHRUBS 1 1/2’–4’.

Cotoneaster adpressus  S-Evergreen  Groundcover  1 1/2’ x 6’  S
Creeping Cotoneaster  Non-native  Zone: 4

Comments: Adaptable, but prefers moist, well drained soil. Compact and rigidly branched. Glossy leaves with pink flowers and red berries. See Cotoneaster General Comments.

Cotoneaster dammeri  Evergreen  Groundcover  1 1/2’ x 6’  S
Bearberry Cotoneaster  Non-native  Zone: 2

Dianthus deltoides  Deciduous  Groundcover  8”  S
Maiden Pink  Non-native  Zone: 4

Comments: Prefers well drained soil. Low, spreading mats of foliage are smothered by single flowers in summer. Several color strains available. May self-seed. Plant 12–18” apart.

Dianthus graianopolitanus  Deciduous  Groundcover  2–12”  S
Cheddar Pinks  Non-native  Zone: 3

Comments: Prefers well drained soil. ‘Tiny Rubies’, a slow growing form, forms a very short, 1” mat of tiny bluish leaves with pink flowers in July. Good for small areas. Variety ‘Bath’s Pink’ is taller, to 6”, with bluish foliage and very fragrant single pink flowers that bloom in June. Several other good varieties available. Plant 12–18” apart.

### Groundcovers

**Genista pilosa ‘Vancouver Gold’**  
**Dwarf Broom**  
- Non-native  
- Height: 8"  
- Zone: 5  
- **Comments:** Tolerates poor soils but needs good drainage. Small yellow flowers profusely borne in early summer. Do not transplant once established. Cultivars: ‘Vancouver Gold’—6” x 3’, creeping-trailing habit. Dark green foliage-golden yellow pea-like flowers; ‘Royal Gold’—18” x 2’—compact low habit. Golden yellow flowers in July.

**Geranium sanguineum**  
**Cranesbill**  
- Deciduous  
- Height: 1’  
- Zone: 2  
- **Comments:** Soil adaptable, but needs good drainage. Rose, blue, purple, white, or pink flowers throughout summer. Attractive, finely cut foliage. Several varieties and cultivars. Drought tolerant once established. Space 8–12” apart.

**Hedera helix**  
**English Ivy**  
- Evergreen  
- Height: 6”  
- Zone: 2  
- **Comments:** Soil adaptable, but produces best results in rich, fairly moist, organic, well drained soil. Plant in a site protected from winter sun and winds, which often cause leaf burn. Varieties ‘Baltica’ and ‘Thorndale’ are hardy in this region. Space 12–18” apart.

**Hosta (various species)**  
**Hosta/Plantain Lily**  
- Herbaceous  
- Height: Variable  
- Zone: 2  
- **Comments:** Tolerates poor soil but prefers moist, well drained, organic conditions. Grown for attractive bold foliage, which ranges in color from gold, green, blue to blue-gray. Some variegated forms. Good for shady borders, woodland, and waterside plantings. Will grow over tree roots. There are 20 or more species. Many catalogs and nurseries offer good selections. Space 2–3’ apart.

**Iberis sempervirens**  
**Evergreen Candytuft**  
- Evergreen  
- Height: 9”  
- Zone: 2  
- **Comments:** Tolerates poor soil, but prefers good drainage. Dark green leaves. White flowers with 1 1/2” heads in May/June. Remove flower heads after flowering. Prune heavily to keep compact. Space 2’ apart.

**Juniperus chinensis**  
**Japanese Garden Juniper**  
- Evergreen  
- Height: 8” x 10’  
- Zone: 2  
- **Comments:** Variety ‘procumbens’ has handsome sharp-needled foliage. Slow growing. Dwarf forms ‘Nana’ or ‘Greenmound’ available. Space centers 6’ apart. See Juniperus general comments.

**Juniperus chinensis ‘Old Gold’**  
**Old Gold Juniper**  
- Evergreen  
- Height: 3’ x 4’  
- Zone: 2  
- **Comments:** Prefers moist, well drained soil. Grows best in full sun. A compact form with green-gold foliage that retains its color throughout winter. Nice color contrast. Susceptible to blight. Space centers 3 1/2–4’ apart. ‘Gold Coast’ is a similar variety. Also listed under SHRUBS, 1 1/2–4’.
**Juniperus horizontalis (varieties)**

**Creeping Juniper**

**Comments:** Low groundcover, adaptable to sandy and rocky soils, tolerating hot, dry, sunny locations. Used for slope plantings and facer evergreens, groundcovers, masses. ‘Emerald Spreader’ — one of the best groundcover types of junipers. Exceedingly low, ground hugging form with fine emerald green foliage that gives it a full, feathery appearance. Space centers 4’ apart. ‘Prince of Wales’ — very procumbent, 4–6” high, bright green with bluish tinge in summer, purplish plum in winter. Densely branched. Woody, open centers often develop on mature plants. Space centers 4–6’ apart. ‘Webber’ — extremely low, mat-like, spreading form of fine texture, bluish green foliage, 1’ by 6–8’. Space centers 5–6’ apart. ‘Wiltoni (‘Blue Rug’)’ — very prostrate with intense silver-blue foliage which turns a light purplish tinge in winter. Fairly fast growing. Attractive gray-blue berry. Woody, open centers often develop on mature plants. Space 4–6’ apart.

**Juniperus sabina**

**Savin Juniper (varieties)**

**Comments:** Drought tolerant evergreen shrub once established. Junipers can spread very widely and should be used in areas where they have a lot of room. Good for use on slopes for stabilization or as evergreen accent in shrub borders. Junipers don’t take pruning well, leaving exposed dead areas when pruned too deeply. See Juniperus General Comments. Groundcover varieties include: ‘Arcadia’ — bright green foliage with soft texture. Very hardy. Blight resistant, open spreader. Space 4’ on center. ‘Broadmoor’ — dwarf, low-spread ing with foliage that is soft grayish green and is resistant to juniper blight. 2–3’ tall by 10’ wide or more. ‘Buffalo’ — feathery branches with consistent green foliage even in winter. Very hardy and vigorous. 12” tall by 8’ in 10 years. Space 6’ on center. Also listed under Low-Growing Shrubs. ‘Calgary Carpet’ — a dense, low-spread ing juniper with light green foliage. Attractive, compact form. Space 5’ on center. ‘Skandia’ — low growing and dense. Foliage is a pale gray-green. 1’ tall by 4’ wide. Resistant to blight. Very hardy. var tamariscifolia. Neatly mounded and spreading with layered branching of upturned, feathery foliage. Rich deep blue-green. Space 6–10’ apart. 18” tall by 10–20’ in 10 years.

**Juniperus virginiana**

**Silver Spreader**

**Comments:** Prefers a moist, well drained soil. Grows best in full sun. Fast growing variety with silvery blue foliage. Feathery and fine textured. Older branches become dark green. Space 4’ apart. See Juniperus General Comments. Also listed under SHRUBS, 1 1/2–4’.

**Lamium maculatum**

**Comments:** Prefers a rich soil, but will tolerate poor ones. Keep moist if in full sun. Prefers shade. Medium green leaves with a central silver marking. Purple, pink or white flowers appear in May. Shear flowers after blooming to retain a denser cover. Space 18” apart.

**Linnaea borealis**

**Comments:** Requires moist, organic soil. Common carpet on dense forest floors. Woody stem sprawls along ground. Small round leathery leaves. Pink "twin" flowers are borne on small stems in June and July, giving this groundcover its name. Space 18” apart.
**Groundcovers**

*Lonicera japonica* ‘Halliana’  
Deciduous Groundcover 2–3’ x 15’+ S  
Comments: Soil-adaptable and drought tolerant once established. Pure white flowers, which change to yellow, are very fragrant. Vigorous grower-can be invasive. Best used on banks or for erosion control. Prune heavily annually in early spring to keep dry undergrowth from building up. Space 3’ apart. Also listed under VINES.

*Lysimachia nummularia*  
Herbaceous Groundcover 4” S  

*Mahonia repens*  
Evergreen Groundcover 1’ x 3’ S/PSH  
Comments: Evergreen groundcover with leaves that are glossy, dark green and less spiny than *M. aquifolium*. Yellow flowers in May followed by purple berries. Very hardy and drought tolerant. Leaves can winter burn when exposed to cold dry winter winds. Space 2’ apart.

*Pachysandra terminalis*  
Evergreen Groundcover 8’ PSH/SH  

*Penstemon pinifolius*  
Deciduous Groundcover 6’ S  
Comments: Small groundcover suitable for rock gardens or as a low border plant. Very drought tolerant. Flowers are coral to scarlet. Space 8–12” apart.

*Phlox longifolia*  
Deciduous Groundcover 1’ Sun  
Comments: Weak stemmed, pink-flowered plant that climbs up into the branches of sagebrush or other plants. The narrow leaves are 1–3 inches long compared to the short, close-spaced, prickly leaves of the cushion and mat-forming species; it may be quite hairy and/or sticky or free of hairs altogether; and it varies in height from only a few inches tall to well over a foot. Look for these bright flowers in late April and May or, at higher elevations in the Cascades, on into mid-summer. Space 8–10” apart.

*Phlox subulata*  
Evergreen Groundcover 4’ S/PSH  
Comments: Likes a loose soil that is neutral to slightly alkaline. Once established is drought tolerant. A thick mat of color in May. Available in white, pink, purple, blue, and red. Cut back or mow plants after flowering. Space 18” apart.
Potentilla fruitcosa ‘Yellow Gem’  
Cinquefoil  
Deciduous  
Groundcover  
16”  
S/PSH  
Zone: 3  

Potentilla tabernaemontanii  
Spring Cinquefoil  
Evergreen  
Groundcover  
3”  
S  
Zone: 2  
Comments:  Prefers a light, well drained soil. A mat-forming plant with bright yellow flowers in April and May. Space 18” apart. Can be invasive.

Potentilla verna aurea  
Dwarf Cinquefoil  
Deciduous  
Groundcover  
3”  
S/PSH  
Zone: 5  
Comments:  Prefers moisture and well drained soils. Rich dark strawberry like foliage forms low, handsome mounds covered with golden flowers in early summer. Plant 12” apart.

Sedum (species)  
Sedum/Stonecrop  
Evergreen  
Groundcover  
Variable  
S/PSH  
Zone: varies  

Sempervivum tectorum  
Hens and Chicks  
Evergreen  
Groundcover  
Variable  
S/PSH/SH  
Zone: 5  
Comments:  Adaptable. likes ordinary, well drained soil. Drought-tolerant. This is a rosette-forming succulent. Good for groundcover in small areas. Space 6–8” apart. Also listed under Rock Garden Plants.

Stachys byzantina  
Lamb’s Ear  
Deciduous  
Groundcover  
1’ x 3’  
S/PSH  
Zone: 4  
Comments:  Adaptable to most soils. Soft, woolly gray leaves shaped like a lamb’s ear. Planted for its foliage color and texture. Unremarkable purple flower spikes in June. Space 1 foot apart.

Thymus lanuginosus  
Woolly Thyme  
Evergreen  
Groundcover  
2”  
S  
Zone: 4  
Comments:  Soil adaptable. Forms flat mat of stems densely covered with small gray leaves. The leaves have fine hairs giving them a woolly appearance. Seldom flowers. Excellent in rock gardens and often used between stepping stones. Space 10” apart.

Thymus praecox  
Mother-of-Thyme  
Deciduous  
Groundcover  
6”  
S  
Zone: 4  
Comments:  Adaptable, excellent mat forming groundcover with small purplish white flowers in clusters appear June-September. Can be used between stepping stones and in dry, sunny areas. Space 10” apart.
32  Groundcovers

*Thymus pseudolanuginosus*  
Woolly Thyme  
Evergreen Groundcover  1” S/PSH  
Non-native  
Zone:  2  
Comments:  Needs well drained soil. Forms a thick mat of tiny leaves that are gray and woolly. Rosy purple flowers in late May. A good groundcover for small areas. Nice around stepping stones. Space plants 6–10” apart and water regularly to establish.

*Tiarella cordifolia*  
Foamflower  
Deciduous Groundcover  12” PSH/SH  
Non-native  
Zone:  3  

*Veronica peduncularis*  
Creeping Speedwell  
Deciduous Groundcover  12” S/PSH  
Non-native  
Zone:  6  
Comments:  Prefers moist and well drained soil. ‘Georgia Blue’ and ‘Waterperry’ are two excellent new varieties which spread rapidly and cover themselves with small round blue and white flowers in summer. Leaves die back in winter. Plant 12” apart.

*Vinca minor*  
Periwinkle  
Evergreen Groundcover  5” S/PSH/SH  
Non-native  
Zone:  5  
Comments:  Grown in ordinary, well drained soils. Leaves are dark and glossy. Blue flowers appear from March through July. A prostrate, creeping vine that does not twine. Stems root easily. Control weeds with mulch until cover is established. Space about 1–2’ apart, depending on the size of the clump.

*Viola labradorica var. purpurea*  
Labrador Violet  
Deciduous Groundcover  4” PSH  
Non-native  
Zone:  5  
Comments:  Like moist and fertile soil. Small heart-shaped leaves are deep purple when they open and lighten in the summer. Violet purple flowers bloom profusely in spring and occasionally through the season. Spreads by creeping rootstocks and will self-seed. Nice for woodland settings.

*Waldsteinia fragarioides*  
Barren Strawberry  
Deciduous Groundcover  5” S/PSH  
Non-native  
Zone:  5  
LOW SHRUBS—1 1/2 TO 4 FEET

<td>Comments:</td>
<td>‘Aurea’—3’ x 3’—Pshade. Bright yellow foliage. Slow growing form with an upright, open habit. Makes an interesting hedge. Good for color contrast in groupings and as a specimen in the shrub border. This is one barberry that does not do well in sun. ‘Crimson Pygmy’—2’ x 3’—Sun. Nice red foliage which needs sun to retain color. Its compact horizontal branches are vulnerable to breakage. Good as small hedge or low barrier or in massed plantings. Thorny. Excellent small shrub with color accent. See Berberis. ‘Kobold’—2’ x 3’—Pshade. Similar to ‘Crimson Pygmy’ Barberry, but leaves are a rich green. Full, mounded form, which makes an excellent low hedge. ‘Monomb’—4’ x 4’—Sun. Compact branches can make an excellent low hedge, barrier planting or small specimen. Deep crimson foliage; red berries in fall and winter. ‘Rose Glow’—3’ x 3’—Sun. Burgundy leaves mottled with pink and white. Outstanding long-lasting fall color. Use as accent and in mass plantings.</td>

### Juniperus chinensis

**Juniper** | **Evergreen** | **Non-native** | **Low Shrub** | **Varies** | **S/PSH**
---|---|---|---|---|---

### Juniperus horizontalis

**Youngstown Juniper** | **Evergreen** | **Low Shrub** | **2’ x 5’** | **S**
---|---|---|---|---
Comments: Green foliage, taking on an attractive plum winter color. Low, prostate growth habit. Dense with full-centered look. See Juniperus General Comments.

### Lavandula angustifolia

**English Lavender** | **Deciduous** | **Low Shrub** | **2’ x 2’** | **S**
---|---|---|---|---
Comments: Plant in full sun with loose, fast draining soil. Very drought tolerant, requiring little water and fertilizer after establishment. Leaves are gray, flowers are deep lavender blue to purple depending on variety. Classic garden hedge, edging or herb garden plant.

### Ligustrum vulgare

**Dwarf Privet** | **Deciduous** | **Low Shrub** | **3’ x 4’** | **S/PSH**
---|---|---|---|---
Comments: Prefers a moist, fertile soil, but can be grown under dry conditions. Dense, compact, and slow-growing. Cream-colored flowers are followed by black berries. Makes a good low deciduous hedge. Withstands pruning well.

### Ligustrum x vicaryi

**Golden Privet** | **Evergreen** | **Low Shrub** | **4’ x 5’** | **S**
---|---|---|---|---
Comments: Needs well drained soil. Has glossy yellow-green foliage; flowers are white, pyramidal clusters rarely seen if regularly pruned. Fruit is a black berry, non-ornamental. Upright in shape and loosely rounded; lends to shearing. Use as hedge or contrast color plant. Will often retain some rust-brown foliage throughout winter.

### Lonicera involucrata

**Black Twinberry** | **Deciduous** | **Low Shrub** | **Zone: 5**
---|---|---|---

### Lonicera pileata

**Royal Carpet Honeysuckle** | **Evergreen** | **Low Shrub** | **12” x 4’** | **S**
---|---|---|---|---
<table>
<thead>

<tbody>
<tr>
<td><strong>Lonicera utahensis</strong></td>
<td>Deciduous</td>
<td>Low Shrub</td>
<td>2-4' tall</td>
<td>Adaptable, prefers moist, well-drained soil. Erect widely branching shrub. 1–2” leaves are very thin, variable in shape and without teeth. Twin cream-flowers. The pulpy translucent red berries are joined at the center.</td>
</tr>
<tr>
<td><strong>Lonicera xylosteum</strong></td>
<td>Deciduous</td>
<td>Low Shrub</td>
<td>3’ x 5’</td>
<td>Grows in any well drained soil. Rich Bluish green mounded foliage. Insignificant flowers followed by red berries. Good in mass plantings or as low-maintenance hedge. Needs regular pruning. Another variety, ‘Clavey’s Dwarf’, has similar characteristics.</td>
</tr>
<tr>
<td><strong>Mahonia aquifolium ‘Compacta’</strong></td>
<td>Evergreen</td>
<td>Low Shrub</td>
<td>2’ x 3’</td>
<td>Likes moist, well-drained acid soils. Avoid hot and dry sites. A dwarf form with very glossy leaves and bronze winter color. Showy yellow flowers followed by purple berries. Neat and compact.</td>
</tr>
<tr>
<td><strong>Mahonia repens</strong></td>
<td>Evergreen</td>
<td>Low Shrub</td>
<td>1’ x 3’</td>
<td>Soil adaptable. Evergreen groundcover with leaves that are glossy, dark green and less spiny than <em>M. aquilofolium</em>. Yellow flowers in May followed by purple berries. Very hardy and drought tolerant. Leaves can winter burn when exposed to cold dry winter winds.</td>
</tr>
<tr>
<td><strong>Pachistima myrsinites</strong></td>
<td>Evergreen</td>
<td>Low Shrub</td>
<td>2’ x 2’</td>
<td>Adaptable, prefers well drained soils. Excellent plant for landscaping, can be used in borders and shaped into hedges. Flowers not showy, maroon, small clusters (April–June)</td>
</tr>
<tr>
<td><strong>Penstemon fruiticosus</strong></td>
<td>Deciduous</td>
<td>Low Shrub</td>
<td>Varies</td>
<td>Highly adaptable to most conditions. Shrub may or may not spread to a ground covering mat. Leaves vary from oval or linear, sharp indented or smooth margined. Large blue or lavender flowers bloom from May to August depending on the elevation. Adapts well to rock gardens.</td>
</tr>
<tr>
<td><strong>Picea abies ‘Nidiformis’</strong></td>
<td>Evergreen</td>
<td>Low Shrub</td>
<td>4’ x 4’</td>
<td>Prefers moist, well drained soil, but will tolerate poor soils. Compact, nestlike mound, often with a depression in center (nest). Keep center clean of debris and leaves. A good evergreen used for accent. After many years, can be up to 6’ tall and wider.</td>
</tr>
</tbody>
</table>
### Low Shrubs

**Picea pungens ‘Globosa’**  
**Globe Blue Spruce**  
**Evergreen**  
**Low Shrub**  
**Zone:** 3

**Comments:** Moist, well drained soil, but will tolerate dry conditions. A slow-growing, compact, and rounded bright blue specimen spruce. Holds its color well throughout the year. Ideal focal point in small planting. Good bonsai. Also available grafted on standard blue spruce understock at 24” or 36”.

**Pinus mugo ‘Compacta’**  
**Dwarf Mugo Pine**  
**Evergreen**  
**Low Shrub**  
**Zone:** 2

**Comments:** Grows in moist, well drained soils. Slow-growing, compact, spreading, dwarf form. Rich green needles. Winter buds are conspicuously resin-covered. Used as low foundation plant, in the shrub border and as an accent. The new growth, frequently called ‘candles’, of the Mugo species, makes an interesting contrast in form. See Pinus General Comments.

**Potentilla fruticosa**  
**Cinquefoil or Potentilla**  
**Deciduous**  
**Low Shrub**  
**Zone:** 2

**Comments:** Prefers a moist, well-drained, ordinary soil. Not for dry areas. Will suffer leaf scorch when under water stress. Blooms all summer in hues of white, yellow, orange, and red. Needs frequent pruning to keep from becoming ragged. Use in the front of shrub border, in mass plantings, as a low hedge, and in foundation plantings. Highly susceptible to spider mites. ‘Abbotswood’—2’ x 3’. Large white flowers bloom throughout season. Dark green foliage frames flowers nicely. One of the best of the white forms. ‘Coronation Triumph’—4’ x 4’. Soft green foliage with large, open, bright yellow flowers. Dense, mounded habit; one of the taller varieties. ‘Goldfinger’—3’ x 3’. Compact form with large golden-yellow flowers surrounded by attractive dark green foliage. ‘Hollandia Gold’—2’ x 2’. Low, mounded form. Large (1 3/4”) dark yellow flowers. ‘Jackman’s Variety’—4’ x 4’. Good dark green foliage with bright yellow flowers. One of the larger forms. ‘Katherine Dykes’—4’ x 5’. Silvery green foliage with small (1”) primrose-yellow flowers. Gracefully arching branches. ‘Tangerine’—3’ x 4’. Gray-green foliage with a wide-spreading, mounded habit. Yellow flowers flushed with orange-red in partial sunfading to yellow in full sun.

**Prunus laurocerasus ‘Zabeliana’**  
**Zabel’s Laurel**  
**Evergreen**  
**Low Shrub**  
**Zone:** 6

**Comments:** Prefers a moist, well-drained, organic soil. Willowlike, narrow, dark green leaves. A spreading shrub with free-flowering white blossoms in April/May. A good choice for shady areas. Protect from cold winter winds.

**Purshia tridentata**  
**Antelope Brush—Bitter Brush**  
**Semi Evergreen**  
**Low Shrub**  
**Zone:** 4

**Comments:** Adaptable, prefers well drained soils. Rigidly branched, semi-evergreen shrub for dry sunny places. Small leathery wedge shaped leaves. Small bright yellow-funnel shaped flowers.

**Rhododendron ‘Dora Amateis’**  
**Dora Amateis Rhododendron**  
**Evergreen**  
**Low Shrub**  
**Zone:** 5

**Comments:** A vigorous, distinctive dark green foliage. Flowers are white with green throat. Hardy to -15°F. Lovely used as accent of in border. See Rhododendron General Comments.
**Rhododendron ‘Ramapo’** Evergreen Low Shrub 2’ x 4’ PSH/SH
Ramapo Rhododendron Non-native Zone: 5

**Comments:** Bright violet-purple flowers in April. Hardy to -25°F, but late frosts can cause damage to flower buds. New leaves are a dusty blue. Highly rated. Good choice for rock gardens, as an accent in the border, or along walkways. Shallow roots need mulch. See Rhododendron General Comments.

**Rhododendron ‘Scarlet Wonder’** Evergreen Low Shrub 2’ x 2’ PSH/SH
Scarlet Wonder Rhododendron Non-native Zone: 5

**Comments:** Glossy green foliage and bright red flower. Hardy to -15°F. See Rhododendron General Comments.

**Rhododendron impeditum** Evergreen Low Shrub 1 1/2’ x 3’ PSH/SH
Impeditum/Cloudland Rhododendron Non-native Zone: 5

**Comments:** Nice purple flowers with interesting silvery green foliage. A very dwarf specimen with tight, compact habit. Used as an accent and in front of the shrub border. Hardy to -15°F. See Rhododendron General Comments.

**Rhododendron species (Azalea)** Deciduous Low Shrub 30” x 30” S/PSH
Deciduous Azalea Non-native Zone: 2

**Ribes lucustre** Deciduous Low Shrub up to 6’ S/PS
Black Gooseberry Native Zone: 5

**Comments:** Adaptable, prefers moist forest soils. Erect to spreading shrub. Maple-like leaves with deeply indented lobes. Stems are armed with spines at nodes and prickles in between. Flowers are yellowish-green in drooping racemes. Edible blackberry fruit can be used in jellies or jams.

**Rosa (various species)** Deciduous Low Shrub Varies
Rose Non-native Zone: Varies

**Comments:** Due to extensive hybridization, hybrid teas, grandifloras, floribundas, and miniature roses, are not listed in this publication. Consult books, catalogs, and local garden centers for information.

**Rosa gymnocarpa** Deciduous Low Shrub up to 3’ S/PSH
Bald-Hip Rose Native Zone: 5

**Comments:** Highly adaptable, native to cool, moist sites. Found in association with grand fir or Douglas-fir. Erect, slender, finely branched. Stems have fine prickles (like raspberries). Leaves are alternate, pinnately compound. Small flowers are pink to rose. Fruit are small, ovoid—red hips without attached sepals. Hips are high in Vitamin C, can be used in teas.
**Rubus parvifloris**  
Thimbleberry  
Native  
Deciduous Low Shrub  
Zone: 3  
Comments: Shrub with large maple-like leaves found in moist sites. Good food source for wildlife. Large leaves (to 8”) provide coarse texture accent in a woodland garden. Fruit can be used in jellies.

**Spiraea betulifolia**  
Birch-Leaved Spirea  
Native  
Deciduous Low Shrub  
Zone: 5  
Comments: Adaptable, prefers moist soil. Rhizomatous shrub forms patches. Leaves are alternate, ovate, green above and paler green below. Flowers are small, white in a dense flat cluster (up to 4’ across). See Spirea General Comments.

**Spiraea densiflora**  
Subalpine Spirea  
Native  
Deciduous Low Shrub  
Zone: 4  

**Spiraea douglasii**  
Douglas Spirea  
Native  
Deciduous Low Shrub  
Zone: 4  
Comments: Soil adaptable. Multi-branched shrub with woolly young growth. Leaves are dark green above and paler below. Beautiful pinkish-purple flower plumes appear in mid-July. The creeping underground stems can become invasive and will take over the wetlands they prefer. See Spiraea General Comments.

**Spiraea japonica ‘Little Princess’**  
Little Princess Spirea  
Non-native  
Deciduous Low Shrub  
Zone: 5  
Comments: Wide-spreading, compact mound of mint-green leaves. Prolonged summer blooming with flat clusters of light-rose blossoms. Used as informal hedge, in shrub border or as an accent. Dark red fall color. See Spiraea General Comments.

**Spiraea japonica ‘Shirobana’**  
Shirobana Spirea  
Non-native  
Deciduous Low Shrub  
Zone: 5  
Comments: Late bloomer covered with white, pink and red flower clusters contrasted by bright green foliage. See Spiraea General Comments.

**Spiraea nipponica**  
Snowmound Spirea  
Non-native  
Deciduous Low Shrub  
Zone: 5  
Comments: Dark blue-green leaves with a rounded, dense habit. Blooms in late spring with profuse round clusters of white flowers. See Spiraea General Comments.

**Spiraea pyramidata**  
Pyramid Spirea  
Native  
Deciduous Low Shrub  
Zone: 4  
Comments: Requires moist soils, typical shoreline plant. Spreading to erect plant. Leaves are oval/oblong to lance-shaped, smooth and coarsely toothed above the middle. Flowers vary from tiny, rose-pink to off-white in open pyramid clusters. See Spiraea Comments.
### Spirea x bumalda ‘Anthony Waterer’
- **Deciduous Low Shrub**
- **Zone: 4**
- **Comments:** Rounded dense form with good fall color. Summer blooming with rose-pink flat clusters. Good in the shrub border, massed, or as an informal hedge. Will sucker from roots. New foliage is medium green with bronzy tinge. See Spirea General Comments.

### Spirea x bumalda ‘Goldflame’
- **Deciduous Low Shrub**
- **Zone: 4**
- **Comments:** Foliage is mottled with red, copper, and orange when new, then yellow to yellow-green throughout summer. Flowers are pinkish and compact. Used as informal low hedge, in the shrub border, or as a color accent. See Spirea General Comments.

### Spirea x bumalda ‘Limemound’
- **Deciduous Low Shrub**
- **Zone: 4**
- **Comments:** Uniform, dwarf, mounding habit. Yellow-green leaves with russet tinge in spring. Autumn color is orange-red on red stems. Light pink flowers in summer. Use as informal low hedge, in front of the shrub border, or as a color accent. See Spirea General Comments.

### Symphoricarpus albus
- **Deciduous Low Shrub**
- **Zone: 3**
- **Comments:** Found on warm dry sites with ponderosa pine and Douglas-fir. Fast growing shrub. Leaves are opposite, 1–2” long. Flowers white or pinkish followed by large white berries that are utilized by grouse and songbirds. The berries which remain long after leaves have fallen are considered poisonous to people.

### Syringa patula ‘Miss Kim’
- **Deciduous Low Shrub**
- **Zone: 3**
- **Comments:** Adaptable to most soils. Foliage rich glossy green in summer turning to burgundy red in fall. Three-inch panicles of purple buds open to fragrant icy blue flowers. Very hardy. Blooms later than common lilacs. May be used in mass plantings or as a single specimen.

### Taxus baccata ‘Repandens’
- **Evergreen Low Shrub**
- **Zone: 4**
- **Comments:** Will not tolerate wet, soggy soils. A low, dense, spreading plant with branches that are pendulous at the tips. A good choice for shade, but avoid prolonged winds. Can be vigorously pruned. See Taxus General Comments.

### Teucrium chamaedrys
- **Evergreen Low Shrub**
- **Zone: 5**
- **Comments:** Tough plants that can endure sun, heat and poor rocky soils. Many upright stems carry toothed dark green leaves. Red or purple with ¾” flowers in loose spikes appear in summer. Useful as edging, foreground or low hedge. Should be sheared back once or twice a year to force branching and keep neat.

<td>5' x 7'</td>
<td>S/PSH</td>
<td>Soil adaptable, drought tolerant once established. Mounded shrub that is covered with large white flowers in late April through May. Gray-green leaves, yellow to red fall color. One of the first shrubs to bloom in the spring. Larger cultivars listed in “Shrub/Small Tree” Section.</td>
</tr>
<tr>
<td><em>Aronia arbutifolia</em></td>
<td>Deciduous</td>
<td>M/Tall Shrub</td>
<td>6' x 3'</td>
<td>S/PSH</td>
<td>Soil adaptable but prefers moist, rich, well drained soil. Lustrous green leaf with small white or reddish flower. Distinctly upright and multi-stemmed. Suckers freely. Effective for persistent bright red berries and showy fall color. Use as mass planting and screening. Birds won’t eat the bitter berries. Cultivar: ‘Brilliantissia’—6’ x 8’, white flowers in May. Brilliant red berries in fall that are retained for a long period of time.</td>
</tr>
<tr>
<td><em>Artemisia tridentata</em></td>
<td>Evergreen</td>
<td>M/Tall Shrub</td>
<td>4' x 4'</td>
<td>S</td>
<td>Evergreen shrub found in rocky/gravelly basaltic soils. Flowers are small, yellow, appearing in August—September. Used as hedge, and silvery-gray accent shrub in a dry, sunny site.</td>
</tr>
</tbody>
</table>
Berberis koreana
Korean Barberry
Deciduous M/Tall Shrub 5' x 4' S/PSH
Non-native
Zone: 4

Berberis thunbergii
Japanese Green-Leaf Barberry
Deciduous M/Tall Shrub 5' x 4' S/PSH
Non-native
Zone: 4

Berberis thunbergii ‘Atropurpurea’
Japanese Red-Leaf Barberry
Deciduous M/Tall Shrub 6' x 6' S/PSH
Non-native
Zone: 4
Comments: Same as B. thunbergii, except for burgundy foliage and more upright, loosely-rounded habit. See Berberis General Comments.

Berberis thunbergii ‘Erecta’
Truledge Columnar Barberry
Deciduous M/Tall Shrub 5' x 5' S/PSH
Non-native
Zone: 4
Comments: Primarily used as hedge due to distinctly upright and narrow growth habit. Yellow, orange, and red fall color. Space 2 1/2' apart for hedge. See Berberis General Comments.

Berberis x mentorensis
Mentor Barberry
Deciduous M/Tall Shrub 5' x 5' S/PSH
Non-native
Zone: 5

Betula pumila
Bog or Dwarf Birch
Deciduous M/Tall Shrub 6' x 4' S/PSH
Native
Zone: 2
Comments: Prefers moist soil. Upright multi-stemmed shrub. Downy young shoots, small, toothed, green leaves changing to yellow in fall. Good for streamside, lakeside plantings or as mass planting in naturalized, but irrigated yards. Sometimes referred to as Betula glandulosa in guides. See Betula General Comments.

Buddleia davidii
Butterfly Bush or Summer Lilac
Deciduous M/Tall Shrub 5' x 5' S

<tbody>
<tr>
<td>Calycanthus floridus</td>
<td>Deciduous M/Tall Shrub</td>
<td>6' x 6'</td>
<td>5</td>
<td>Adaptable to different soil types, but prefers moist soil. Attractive glossy foliage. Unusual 2” cinnamon-red fragrant flowers in May. Broadly rounded and spreading. Good in shrub border, as background filler, or near walkways. (Unusual flowers most notable.)</td>
</tr>
<tr>
<td>Ceanothus sanguineus</td>
<td>Deciduous M/Tall Shrub</td>
<td>Up to 10'</td>
<td>4</td>
<td>Highly adaptable to most conditions. Colonizes disturbed areas. Erect loosely branched shrub. Stems are smooth, purplish-red, alternately branched. Leaves are alternate, dark green, 1–4 inches long with serrated margins on a 1” petiole. White flowers in small clustered panicles in May–June. An important browse for deer and elk.</td>
</tr>
<tr>
<td>Ceanothus velutinus</td>
<td>Evergreen M/Tall Shrub</td>
<td>6' x 6'</td>
<td>5</td>
<td>Soil adaptable. Medium sized rounded evergreen shrub with white flowers borne in showy clusters. Leaves are bright green and leathery. Susceptible to winter burn when exposed to cold winter winds. Good native alternative to Euonymous fortunei.</td>
</tr>
<tr>
<td>Chaenomeles speciosa</td>
<td>Deciduous M/Tall Shrub</td>
<td>6' x 8'</td>
<td>5</td>
<td>Adaptable to different soil types. Foliage appears bronzy red, turning dark glossy green. April flowers are pure white, salmon or red. Habit ranges from upright, rounded and wide-spreading. Profuse flowers appear before leaves. Effective in mass plantings or hedge. Many hybrids are available. ‘Nivalis’—pure white flowers with upright form; ‘Super Red’—red flowers; ‘Pink Lady’—deep rose-pink; ‘Red Chariot’—double-rose-red; ‘Spitfire’—upright, vivid red.</td>
</tr>
<tr>
<td>Chaenomeles x japonica</td>
<td>Deciduous M/Tall Shrub</td>
<td>4' x 4'</td>
<td>5</td>
<td>Adapts to most soils and will tolerate dry conditions once established. Profuse flowers on old wood appear during April before leaves appear. Compact spreading habit. Can be pruned into hedge form or used in the shrub border as accent. Very hardy. Nearly thornless. The fruit is edible (jams) and resembles an apple. Other varieties include: ‘Cameo’—apricot/pink double flowers, compact habit; ‘Low &amp; White’—soft white flowers, low-spreading habit; ‘Minerva’—large cherry-red flowers, upright habit; ‘Texas Scarlet’—bright, scarlet-red flowers.</td>
</tr>
<tr>
<td>Chamaecyparis obtusa</td>
<td>Evergreen M/Tall Shrub</td>
<td>6' x 4'</td>
<td>4</td>
<td>Prefers moist, well drained, slightly acid soil. Thick dark green foliage. Slow, compact, pyramidal growth, nice form. This plant makes an excellent specimen if protected and well watered. Distinctive and unusual character.</td>
</tr>
</tbody>
</table>
Chamaecyparis pisifera ‘Filifera’  
Threadleaf False Cypress  
Evergreen M/Tall Shrub 6’ x 6’ S/PSH  
Zone: 4  
Comments: Soil should be moist and well drained. Threadlike droopy foliage. Loose open habit; often wide-spread. Good in rockery or specimen. Can become leggy with maturity. ‘Aurea Nana’—gold-tipped form, often not exceeding 4; ‘Cyano-Viridis’—silvery blue-green foliage, upright and narrow.

Clethra alnifolia  
Summersweet  
Deciduous M/Tall Shrub varies S/PSH/SH  
Zone: 3  
Comments: Prefers moist, acidic soil rich in organic matter. Large deep-green leaf; late to leaf out in spring. Fragrant white or pink large panicle-type flowers appear in June. Upright, oval to rounded habit. Ranges in size from 3–8” x 4–6’. Good in shrub border or as accent. Its delightful fragrance, tidy habit, and shade tolerance make this a suitable addition to any shrub or perennial planting. Cultivars: ‘Hummingbird Summersweet’—5’ x 4’—mounded, lustrous green foliage, tolerates deep shade and moist conditions; ‘Ruby Spice’—6’ x 4’ upright, bright pink flowers in mid-summer, yellow fall color.

Cornus alba  
Tatarian Dogwood  
Deciduous M/Tall Shrub 8’ x 8’ S/PSH  
Zone: 3  
Comments: Likes moist, well drained soil. Leaf is dark green, twigs are red. Flower is a yellowish white, flat-topped cluster followed by a bluish white berry. Upright, vase-shaped, and wide habit. Use in mass plantings and as filler. ‘Elegantissima’—variegated (green and white) form; ‘Gouchaulti’—leaf margin is yellow and rose, center of leaf is green. Also called “Mottled Dogwood,” ‘Bud’s Yellow’—7’ x 7’—rounded shape, medium green leaves, yellow stemmed. ‘Ivory Halo Dogwood’—6’ x 7’, compact rounded shape, variegated green-white leaves. See Cornus General Comments.

Cornus sericea  
Redosier or Redtwig Dogwood  
Deciduous M/Tall Shrub 15’ x 15’ S/PSH  
Zone: 2  
Comments: Requires moist to wet soil. Large shrub with bright red branches visible in winter. Striking against backdrop of snow or light fence. Excellent ornamental. Good for use in erosion control on slopes near streams or wet areas. ‘Flaviramea’—Yellow twig variety. See Cornus General Comments.

Corylus avellana ‘Contorta’  
Contorted Filbert  
Deciduous M/Tall Shrub 8’ x 5’ S/PSH  
Zone: 3  

Corylus cornuta  
Beaked Hazelnut  
Deciduous M/Tall Shrub 6’ S/PSH  
Zone: 4  
Comments: Adaptable, but prefers wet areas. Medium green leaves, yellow fall color, drooping catkins. Best used in riparian zone or naturalized areas. Small nut is covered in hairy husk; feeds wildlife. Spreads by suckering.

<tr>
<td><strong>Cotinus coggygria</strong></td>
<td>Deciduous M/Tall Shrub</td>
<td>12' x 12'</td>
<td>S</td>
<td>Soil and pH adaptable, even to dry and rocky sites. Loose, spreading open habitat. Blue-green leaves late to leaf out, reddish fall color. Known for unusual flower clusters which, when fading, appear as 4–6” smoky pink puffs. Several purple leaf types.</td>
</tr>
<tr>
<td><strong>Cotoneaster acutifolius</strong></td>
<td>Deciduous M/Tall Shrub</td>
<td>8' x 6'</td>
<td>S/PSH</td>
<td>Soil adaptable. Foliage larger and lighter in color than other species. Small inconspicuous white flowers followed by blue-black fruit. Strong growing upright form. Ideal hedge plant if sheared. Nice specimen with light shearing. Good fall color! See Cotoneaster General Comments.</td>
</tr>
<tr>
<td><strong>Cotoneaster divaricatus</strong></td>
<td>Deciduous M/Tall Shrub</td>
<td>8' x 6'</td>
<td>S/PSH</td>
<td>Soil adaptable. Small glossy coin-shaped foliage, profuse small pink flowers in May. Showy in fall with long-lasting red berries. Upright, open, and vase-shaped. Good in mass plantings; effective as background and corner specimen. Superb fall color! See Cotoneaster General Comments.</td>
</tr>
<tr>
<td><strong>Cotoneaster horizontalis</strong></td>
<td>S-Evergreen M/Tall Shrub</td>
<td>4' x 8'</td>
<td>PSH</td>
<td>Adaptable but prefers moist, well-drained soil. Tolerates drought once established. Heavily textured with herringbone branch pattern. Dark, glossy green foliage with orange, red or purplish fall color. Prune only minimally to retain shape. Space 5’ apart. See Cotoneaster General Comments.</td>
</tr>
<tr>
<td><strong>Scotch Broom</strong></td>
<td>Deciduous M/Tall Shrub</td>
<td>5' x 5'</td>
<td>S</td>
<td>Adaptable to almost any soil; poor sandy soil is fine. Narrow grasslike stems and foliage, light yellow flowers in early May. Upright or loosely-rounded habit. Usually becomes leggy and unsightly in time. Self-seeds freely. Good bank stabilizer. May die back in severe winters. Cultivars listed tend to be less weedy than species. ‘Burkwoodii’—red flowers; ‘Moonlight’—pale yellow flowers, compact growth habit.</td>
</tr>
<tr>
<td><strong>Deutzia gracilis</strong></td>
<td>Deciduous M/Tall Shrub</td>
<td>4' x 4'</td>
<td>S/PSH</td>
<td>Needs a well drained soil. Rosy purple flowers appear all along the last year’s growth in early April, before the leaves appear. They are very fragrant and are followed in early June by brilliant scarlet berries. which birds quickly seek. Planted as fragrant early-flowering accent in garden. BERRIES ARE POISONOUS TO HUMANS.</td>
</tr>
</tbody>
</table>

---

**Cotoneaster General Comments:**

- All Cotoneaster species are adaptable to a variety of soil conditions, but prefer well-drained soil. They are generally easy to grow and can tolerate a range of conditions. They are also attractive for their winter interest, as they maintain some level of foliage throughout the winter months.

**Deutzia General Comments:**

- Deutzias are drought-tolerant once established and require minimal care. They are often used as accents or as part of a mixed shrub border, adding color and form to the landscape.

## Medium to Tall Shrubs

### Juniperus chinensis

**Chinese Juniper**

- Evergreen
- M/Tall Shrub
- Varies
- Zone: Varies
- Non-native

### Juniperus scopulorum ‘Moonglow’

**Moonglow Juniper**

- Evergreen
- M/Tall Shrub
- 12' x 8'
- Zone: 3
- Non-native

**Comments:** A dense, blue, globe-shaped selection. A broad, attractive form with excellent color. Use as hedge or accent. See Juniperus General Comments.

### Juniperus scopulorum ‘Tabletop’

**Table Top Juniper**

- Evergreen
- M/Tall Shrub
- 5' x 8'
- Zone: 3
- Non-native

**Comments:** Handsome silvery-blue foliage. Heavily branched, semi-spreading, flat-topped plant. Use as mass planting or hedge. See Juniperus General Comments.

### Juniperus virginiana ‘Skyrocket’

**Skyrocket Juniper**

- Evergreen
- M/Tall Shrub
- 15' x 3'
- Zone: 4
- Non-native

**Comments:** Needlelike blue foliage. Rapid grower with quite narrow form, distinctly upright branching. Use in close groupings. See Juniperus General Comments.

### Kerria japonica

**Kerria or Globe Flower**

- Deciduous
- M/Tall Shrub
- 6' x 5'
- PSH/SH
- Non-native

**Comments:** Needs well drained soil. Long, dark green, toothed, narrow leaf; golden yellow button flowers in May. Upright vase-shaped open form; very dense and twiggy. Unique free-flowering as specimen or in shrub border. Prune after flowering. Slender yellow to green stems in mass provide winter interest. *K. japonica* ‘Pleniflora’ is a double-flowering cultivar.
<table>
<thead>
<tr>
<th>Common Name</th>
<th>Type</th>
<th>Zone</th>
<th>Comments</th>

Zone: 4  
| *Ligustrum x vicaryi*        | Evergreen M/Tall Shrub | 5   | **Golden Privet**  
Non-native  
Zone: 5  
Comments: Needs well drained soil. Has glossy yellow-green foliage; flowers are white, pyramidal clusters rarely seen if regularly pruned. Fruit is a black berry, non-ornamental. Upright in shape and loosely rounded; lends to shearing. Use as hedge or contrast color plant. Will often retain some rust-brown foliage throughout winter. |
| *Lonicera tatarica*          | Deciduous M/Tall Shrub | 3   | **Tatarian Honeysuckle**  
Non-native  
Zone: 3  
Comments: Soil adaptable. Small flowers in white, pink or red in April. Twin berries are red. Primary feature is flowers. Other times, without regular pruning, it is an untidy, hard-to-appreciate member of the shrub bed. Use as filler or in mass. Give it room. Attractive to bees and hummingbirds, but can be severely distorted by aphids. ‘Korolkowii var. zabelii’ and ‘Arnold Red’ are red flowering varieties. |
| *Magnolia liliiflora*        | Deciduous M/Tall Shrub | 5   | **Lily Magnolia**  
Non-native  
Zone: 5  
| *Magnolia stellata*          | Deciduous M/Tall Shrub | 4   | **Star magnolia**  
Non-native  
Zone: 4  

## Medium to Tall Shrubs

### Mahonia aquifolium

**Oregon Grape**

- Evergreen
- M/Tall Shrub
- Native
- 6' x 6'
- PSH/SH
- Zone: 5

**Comments:**
Prefers rich, well drained soil. Glossy deep green spiny hollylike foliage. New growth is reddish bronze. Yellow flower cluster in April. True blue grapelike clusters of berries are edible and used in jelly. Use in foundation, hedge, or specimen. Stoloniferous and sometimes invasive. Compact forms available.

### Malus sargentii

**Sargent Crabapple**

- Deciduous
- M/Tall Shrub
- Non-native
- 8’ x 12’
- S
- Zone: 4

**Comments:**
Rich, moist, well drained soil. Small, round dark green leaf, profuse, single, fragrant white flowers. Small persistent dark red fruit. Considered more shrublike than tree form. Flower buds are pink, opening to white in April or May. Wide-spreading habit, often twice as wide as high. Shows good disease resistance. See Flowering Crabapple General Comments.

### Perovskia atriplicifolia

**Russian Sage**

- Deciduous
- M/Tall Shrub
- Non-native
- 5’ x 4’
- S
- Zone: 5

**Comments:**

### Philadelphus coronarius

**Sweet Mockorange**

- Deciduous
- M/Tall Shrub
- Non-native
- 8’ x 6’
- S
- Zone: 4

**Comments:**

### Philadelphus lewisii

**Syringa**

- Deciduous
- M/Tall Shrub
- Native
- 8’ x 6’
- S/PSH
- Zone: 4

**Comments:**
Soil adaptable. Medium to tall shrub that is covered with white fragrant flowers May–July. Flowers after serviceberry. Medium green leaves with dull fall color. State flower of Idaho. Locally called “mockorange.”

### Philadelphus x virginalis

**Virginal Mockorange**

- Deciduous
- M/Tall Shrub
- Non-native
- 8’ x 6’
- S
- Zone: 4

**Comments:**

### Physocarpus malvaceus

**Mallow Ninebark**

- Deciduous
- M/Tall Shrub
- Native
- 5’ x 4’
- S/PSH
- Zone: 2

**Comments:**
Adaptable, prefers well drained soil. Ninebark has reddish to grayish-brown shredding bark, thus common name. Found on canyon slopes and bottoms with ponderosa pine and Douglas-fir. Small, white flowers May–July. Medium green foliage with orange/red fall color.
Physocarpus opulifolius  
Eastern Ninebark  
Deciduous M/Tall Shrub 6’ x 6’ S  
Comments: Soil adaptable. Foliage is broad and textured. Flowers are profuse in pinkish white flat clusters. Interesting, persistent fruit dries with a pinkish cast. Habit is upright and spreading, with shredding bark. Cultivars: ‘Aureus’—Golden Ninebark, similar to Common Ninebark, but larger foliage, distinct yellow overtone. Prune out old wood to prevent rangy growth. Good accent or informal screen; ‘Dart’s Gold’—4’, compact form, yellow-green foliage; ‘Nugget’—6’ x 5’ dense bushy, yellow to lime foliage, fall foliage yellow.

Picea abies ‘Nidiformis’  
Bird’s Nest Spruce  
Evergreen M/Tall Shrub 4’ x 4’ S/PSH  
Comments: Prefers a moist, well-drained soil but will tolerate poor soils. Compact, nestlike mound, often with a depression in center (nest). Keep center clean of debris and leaves. A good small evergreen used for accent. After many years, can be up to 6’ tall and wider.

Picea glauca ‘Conica’  
Dwarf Alberta Spruce  
Evergreen M/Tall Shrub 8’ x 5’ S/PSH  

Picea omorika ‘Nana’  
Dwarf Serbian Spruce  
Evergreen M/Tall Shrub 7’ x 7’ S  
Comments: Prefers deep rich, moist well drained soil. Slow growing dwarf shrub. Becomes a globe like mound. Glossy blue-green needles have white bands on the underside.

Picea pungens glauca ‘Fat Albert’  
‘Fat Albert’ Colorado Spruce  
Evergreen M/Tall Shrub 10’ x 10’ S  

Pieris japonica  
Japanese Pieris  
Evergreen M/Tall Shrub 4’ x 4’ PSH  
Comments: Likes rich, moist, acid soil. A broadleaf evergreen with lustrous green leaves. New growth is bronzy green. Drooping flower clusters of small waxy bells in white or pink. Fruit is insignificant. Excellent specimen or effective as mass planting. Makes good companion planting with evergreens. Plant only in very protected locations with filtered sunlight. Hardiness is borderline. Cultivar: ‘Forest Flame’—6’ x 4’, brilliant red then pink-creamy white foliage, clusters of broad white flowers, hardiest rating. See Pinus General Comments.

Pinus densiflora ‘Pendula’  
Weeping Japanese Red Pine  
Evergreen M/Tall Shrub 10’ x 12’ S  
Comments: Prefers well drained, slightly acid soil. Exhibits strong character with horizontal branches arching and sweeping to the ground. Dark green needles in bundles of 2, with striking orange-red bark. Good as specimen or draping over rock wall. See Pinus General Comments.
### Pinus densiflora ‘Umbraculifera’

**Taxonomy:**
- Evergreen
- M/Tall Shrub
- 10’ x 12’
- Zone: 5

**Comments:**
Prefers well drained, slightly acid soil. Shrublike pine with multiple upright branches forming flat topped crown. Long, stiff, bright-green needles in bundles of 2. Great in rock garden. Has a natural bonsai look. Also available grafted on standard Japanese Red Pine understock at 24” or 36”. See Pinus General Comments.

### Pinus mugo var. mugo

**Taxonomy:**
- Evergreen
- M/Tall Shrub
- 5’ x 10’
- Zone: 2

**Comments:**

### Pinus strobus ‘Nana’

**Taxonomy:**
- Evergreen
- M/Tall Shrub
- 8’ x 12’
- Zone: 3

**Comments:**
Soil adaptable, but prefers fertile, moist, well-drained soil. Bushy, mounded to pyramidal habit, often growing broader than tall. Long, soft, blue-green needles in bundles of 5. Tolerates shearing, as this can be an irregular grower. Soft texture and unique form is perfect accent for rock garden, courtyard, or entry. See Pinus General Comments.

### Pinus strobus ‘Pendula’

**Taxonomy:**
- Evergreen
- M/Tall Shrub
- Variable
- Zone: 4

**Comments:**
Soil adaptable, but prefers fertile, moist, well drained soil. Long, spreading branches can be trained with upright leader or left to essentially form a horizontal, wide-spreading specimen. Blue-green needles in bundles of 5. Pendulous branches sweep to the ground. Excellent specimen. See Pinus General Comments.

### Pinus sylvestris ‘Glauca Nana’

**Taxonomy:**
- Evergreen
- M/Tall Shrub
- 10’ x 5’
- Zone: 4

**Comments:**
Soil adaptable. Compact and slow growing with rounded habit. Dense, upright branchlets with blue-green needles in bundles of 2. Generally available grafted on standard scotch pine understock at 24 inches and 36 inches. Good as accent or specimen. See Pinus General Comments.

### Platycladus orientalis

**Taxonomy:**
- Evergreen
- M/Tall Shrub
- Variable
- Zone: 5

**Comments:**

### Prunus glandulosa

**Taxonomy:**
- Deciduous
- M/Tall Shrub
- 5’ x 5’
- Zone: 4

**Comments:**
Prefers a moist, well drained soil. A somewhat weak, multi-stemmed shrub which needs frequent pruning to keep from looking straggly. It is grown for its profuse display of pink or white single or double flowers, which bloom in late April/early May. Susceptible to fireblight. See Prunus General Comments.

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Pyracantha coccinea
Scarlet Firethorn

Comments:
Tolerates dry soil and slightly acidic to neutral pH. More upright form than *P. augustifolia*, above. Hardy, with scarlet berries following profuse white flowers. Densely branched, erect and broadspreading. Excellent for espalier. Lustrous green leaf. Foliage can burn if exposed in harsh winter; it may even die back to ground, but it will recover. 'Kasan'—another hardy form; 'Lelandei—most hardy and widely grown. Orange-red berry; 'Wyattii'—another hardy form. Tolerates poor soil.

Rhododendron (species)

Comments:

Rhododendron: Exbury hybrids

Comments:
Upright growers with textured, medium-green foliage. Flower color ranges from pastel pinks and deep golden to light lemon-yellows to orange and red-oranges. Blooms in mid to late May as, or shortly before, new foliage appears. 'Cannon's Double'—wonderful double pink. Hardy to -10°F; 'Gibraltar'—brilliant orange-red; one of the most popular. Hardy to -15°F; 'Klondyke'—golden yellow in May. Hardy to -15°F; 'Sunset Pink'—5' pink flowers with yellow blotch in May, hardy to -10°F; 'King's Red Exbury'—lightly ruffled light red flowers; 'Northern Starburst'—earlier bloomer, large clusters of intense pink flowers; 'Oxydol Exbury Azalea'—large white flowers, yellow spots. See Rhododendron General Comments.

Rhododendron: Northern Lights

Comments:
Nice compact habit. Abundant bloomers. Fragrant flowers in early May on bare stems. Broad color variation from white to orchid to soft and deep pink. Exceptionally hardy (-35°F to -45°F). Exceptional choice for landscapes. 'Rosy Lights'—dark rose pink, 4'–5' x 5'–6'; 'Orchid Lights'—soft lilac (more compact form 2'–3' x 2'–3'); 'Spicy Lights'—yellowish pink single bloom 4'–5' x 3'–4'; 'White Lights'—pure white 5'–6' x 5'–6'. See Rhododendron General Comments.
**Rhodotypos scandens**  
**Black Jetbead**  
Deciduous M/Tall Shrub 5' x 5' S/PSH/SH  
Zone: 5  
**Comments:** Very soil adaptable. Contrasting light green foliage heavily toothed on the margins. Interesting dogwoodlike, white 4-petaled flowers in late May followed by shiny black fruit, 3–4 in a grouping. Durable and hardy shrub for adverse conditions and deep shade. Unique plant for variety of texture, foliage color, flowers and fruit. Vigorous grower. Available in catalogs.

**Rhus glabra**  
**Smooth Sumac**  
Deciduous M/Tall Shrub 15' x 10' S  
Zone: 3  
**Comments:** Soil adaptable. Can be drought tolerant. Broad spreading large shrub—may even be single-trunked small tree. Compound dark green leaves have brilliant red and orange fall color. Yellow/green cone shaped flower clusters in spring change over summer to dark dryish looking cones, favored by many birds and small animals. Good naturalizer, soil stabilizer.

**Rhus trilobata**  
**Oakleaf Sumac**  
Deciduous M/Tall Shrub 6' x 6' S  
Zone: 3  
**Comments:** Adaptable, but best in dry sites. Light green, 3-lobed leaves. Flowers are yellow and pea-like. Fall color is excellent. Sumac is useful in planting disturbed areas. Also called “skunkbush.”

**Rhus typhina**  
**Staghorn Sumac**  
Deciduous M/Tall Shrub 15' x 10' S/PSH  
Zone: 3  
**Comments:** Adaptable, but a dry, infertile soil is best. Open, spreading shrub with flat crown and picturesque branching. Ornamental cone-shaped russet fruit appear in August. Fuzzy fruit and stems. Sensational scarlet-orange fall color. Tends to sucker, so not a good lawn tree. Beautiful along woodland edges. Use in clumps or as a single specimen. Tolerates neglect. ‘Laciniata Cutleaf’, 8’ x 8’ wide spreading, medium green foliage, use as an accent or in mass plantings.

**Ribes alpinum**  
**Alpine Currant**  
Deciduous M/Tall Shrub 5' x 5' S/PSH  
Zone: 2  
**Comments:** Will tolerate any soil type. Leaf bright green, generally 3-lobed. Flower is insignificant, yellow-green and small. Sparse, nonedible red berry. Habit is distinctly upright and densely branched. Excellent for hedging. Not exceptional as single specimen. Will leaf out very early in spring. Fall color is dull yellow.

**Ribes aureum**  
**Golden Currant**  
Deciduous M/Tall Shrub 6' x 5' S  
Zone: 2  
**Comments:** Soil adaptable. Large shrub with yellow trumpet flowers in May followed by yellow to red berries. Very hardy and drought tolerant. Attracts hummingbirds and other wildlife.

**Ribes sanguineum**  
**Red-Flowering Currant**  
Deciduous M/Tall Shrub 6' x 6' S/PSH  
Zone: 2  
**Comments:** Soil adaptable; fairly drought-tolerant. Maple-like leaf is 3–5 lobed, and heavy-textured. Flowers are deep pink to red and in drooping clusters blooming in April/May. Non-ornamental blue-black berries produced late season. Beautiful fall color persists very late into fall/early winter. Good as mass planting or shrub border addition. Cultivar: ‘White Icicle’—same habit, with white flowers. Effective when planted with red-flowering currant.

### 62 Medium to Tall Shrubs

*Tsuga canadensis* ‘Pendula’ Evergreen M/Tall Shrub Variable PSH/SH

**Comments:** Prefers moist, well drained, acid soil. Fine-textured needles. Broad spreading tree with overlapping branches forming a dense mound. Tolerates pruning. Striking appearance makes this an excellent accent or specimen. Can also be used as hedge.

*Viburnum carlesii* Deciduous M/Tall Shrub 5’ x 5’ S/PSH

**Korean Spice Viburnum** Non-native Zone:  5

**Comments:** Prefers well drained, slightly acid soil. Leaves are dull green and fuzzy underneath. Flower is similar to Burkwood viburnum. Rounded form with upright branching. Compact, tidy habit, and fragrant flowers make this a must for any shrub bed.

*Viburnum dentatum* Deciduous M/Tall Shrub 8’ x 6’ S/PSH

**Arrowwood** Non-native Zone:  3

**Comments:** Quite soil adaptable. Densely-branched upright shrub becoming rounded with maturity. Nonfragrant, cream-colored, flat-topped flowers in June. Showy clusters of blue-black fruit attract birds. Excellent fall color. Good choice for the shrub border or informal hedge. See Viburnum General Comments.

*Viburnum lantana* Deciduous M/Tall Shrub 12’ x 10’ S/PSH

**Wayfaring Tree** Non-native Zone:  3

**Comments:** Tolerates dry soils. Same habit and flower as arrowwood viburnum above. The foliage is different from other viburnums as it is dull bluish green and fuzzy, top and bottom. Persistent, showy fruit is attractive to birds. Inconsistent fall color. Good in shrub border. Cultivar ‘Mohican’ has 6’ x 6’ compact growth. Heavy dark green foliage, white flat topped flowers. Fruit is orange-red to black.

*Viburnum lentago* Deciduous M/Tall Shrub 15’ x 10’ S/PSH/SH

**Nannyberry** Non-native Zone:  2

**Comments:** Tolerates moist or dry soils. Lustrous dark green leaf with wavy margin. Open, upright and often rangy habit. Nonfragrant, flat-topped flowers in April/May. Showy berry clusters. Very hardy, inviting for birds. Arching branches with white flower clusters in May. Berries are bluish black in the fall and make good winter food for birds. Ideal for naturalizing or as background screening plant. Watch for mildew when planted in shady areas. Tends to send up suckers. See Viburnum General Comments.

*Viburnum opulus* Deciduous M/Tall Shrub 12’ x 10’ S/PSH

**European Cranberry Bush** Non-native Zone:  3

**Comments:** Adaptable to extremes of soil types, including wet and boggy. Large, open, form; dark green leaves, white flat flower clusters. Large red berries with unpleasant odor. Very prone to sever aphid infestations that curl and deform leaves. Cultivars: ‘Compactum’—5’ x 6’, rounded, compact habit; ‘Roseum’—common snowball bush. Large double white flowers.

*Viburnum plicatum plicatum* Deciduous M/Tall Shrub 15’ x 15’ S

**Japanese Snowball** Non-native Zone:  5

**Comments:** Soil adaptable. Oval, dull dark green, strongly veined leaves 3–6” long, turning purplish red in fall. Snowball clusters of white flowers 2–3” across, blooming in May.

<td>12' x 10'</td>
<td>S/PSH</td>
<td>Similar in characteristics to V. opulus but is hardier, native to northern U.S. and not susceptible to aphids. A good choice for shrub borders, naturalizing or as a specimen with year round interest. ‘Compactum’—a compact variety reaching 5–6’.</td>
</tr>
<tr>
<td>Viburnum × burkwoodii</td>
<td>Dec./S-Ever.</td>
<td>M/Tall Shrub</td>
<td>8' x 6'</td>
<td>PSH/SH</td>
<td>Soil adaptable. Lustrous dark green leaf. Upright and multi-stemmed, almost rangy. Showy, heavily-fragrant flower, pink in bud opening to white in April. Excellent choice for the shrub border, as it is open and informal. Good fall color. Prune after flowering, and only to improve form. Also good for espalier.</td>
</tr>
<tr>
<td>Weigela florida</td>
<td>Deciduous</td>
<td>M/Tall Shrub</td>
<td>8' x 9'</td>
<td>S</td>
<td>Soil adaptable, but prefers well drained soil. Upright, open and spreading. Coarse appearance in the winter. Colorful tubular flowers in May and June and often again in the fall. Best in shrub border. Recommended cultivars: ‘Java Red’—4’, compact and mounded with reddish foliage; ‘Newport Red’—6’, red flower. Vigorous, more hardy and more shapely form; ‘Red Prince’—6’, rich red nonfading flower, green foliage; ‘Variegata’—5’, green and cream variegated foliage; pale pink flower; ‘Pink Princess Weigela’—6' x 6', loose open form, bright pink flowers.</td>

</table>
**Acer japonicum** ‘Acontifolium’  
Fernleaf Full Moon Maple  
Deciduous  
Shrub/S. Tree  
15’ x 10’  
PSH  
Non-native  
Zone: 5  
Comments:  
Prefers moist soils. Delicate looking shrubby tree with rounded form. Rounded, deeply cut leaves with red and orange brilliant fall color. See Acer General Comments.

**Acer negundo** ‘Flamingo’  
Flamingo Box Elder  
Deciduous  
Shrub/S. Tree  
20’ x 15’  
S  
Non-native  
Zone: 3  
Comments:  
Very soil and site adaptable. Although the species boxelder tree is not recommended for the landscape, the cultivars ‘Flamingo’ and ‘Sensation’ are because of their more controlled growth and improved branch structure. ‘Flamingo’ has variegated white and green leaves with new foliage showing pink tones. See Acer General Comments.

**Acer negundo** ‘Sensation’  
Flamingo Boxelder  
Deciduous  
Shrub/S. Tree  
30’ x 15’  
S  
Non-native  
Zone: 2  
Comments:  
Very soil and site adaptable. Although the species boxelder tree is not recommended for the landscape, the cultivars ‘Flamingo’ and ‘Sensation’ are because of their more controlled growth and improved branch structure. ‘Sensation’ has medium green summer foliage which turns brilliant red in fall. See Acer General Comments.

**Acer palmatum**  
Japanese Maple  
Deciduous  
Shrub/S. Tree  
Varies  
PSH  
Non-native  
Zone: 5  
Comments:  
Prefers moist, well drained soils. There are dozens of cultivars of this gracefully branched, airy, medium tall ornamental tree. Inclusion of the cultivars here is not possible. The species (*A. palmatum*) has green leaves and is faster growing than the cultivars. Many cultivars have red or purple leaves. New branches and twigs vary in color from green to polished red. Dappled shade is ideal. Red leaved cultivars become green in too much shade. All are nice near patios, entries and walkways, providing a strong focal point for outdoor living areas. Heights vary from 15 to 25 feet; widths are generally equal to or greater than the height. Wrap trunks of young trees if exposed to the sun to prevent sunscald. Japanese maples are classified as non-dissected or dissected types. Non-dissected types have 5 or 7 deeply cut, pointed lobes in each leaf. Dissected types (laceleaf maples) have 5, 7, or 9 lobes which are much more deeply and finely cut, lending an almost feathery appearance. See Acer General Comments.

**Acer platanoides** ‘Globosum’  
Globe Norway Maple  
Deciduous  
Shrub/S. Tree  
15’ x 18’  
S  
Non-native  
Zone: 4  
Comments:  
Soil adaptable but prefers a moist, rich soil environment. Very dense, compact, aptly named tree. Green leaves turn to yellow in the fall. Good for smaller areas and for under power lines. See General Comments.

**Alnus incana** spp. *tenufolia*  
Mountain Alder, Thinleaf Alder  
Deciduous  
Shrub/S. Tree  
20’ x 12’  
S/PSH  
Native  
Zone: 2  
Comments:  
Requires moist soil as in streamside or sub-irrigated sites. Often multi-branched and thicket forming. Shiny green leaves remain green throughout much of autumn. Catkins develop before leaves and persist through winter, providing food source for birds. Tree roots “fix” nitrogen.

<tr>
<td><em>Caragana arborescens</em></td>
<td>Deciduous Shrub/S. Tree</td>
<td>15' x 12'</td>
<td>Non-native</td>
<td>2</td>
<td>Very drought tolerant. Small compound leaf with yellow fall color. Bright yellow flowers bloom on old wood in May. Persistent seed pods, 1–3” long. Stiffly upright tree with small thorny spines. Wood is a contrasting yellow-green color. Use as hedge, windbreak, or screen. Very hardy. ‘Pendula’ is a weeping cultivar, 15’ x 15’.</td>
</tr>
<tr>
<td><em>Cercis canadensis</em></td>
<td>Deciduous Shrub/S. Tree</td>
<td>20' x 25'</td>
<td>Non-native</td>
<td>5</td>
<td>Prefers a deep, moist, well drained soil, but will tolerate any soil type except wet. Has a short trunk with spreading branches. Pink pea-like flowers appear before leaves in early spring. New heart-shaped leaves are reddish purple, turning to dark green. Fall color is yellow. Looks nice in natural landscapes or as a specimen plant. For strong growth, water and fertilize regularly. Not as hardy as <em>C. occidentalis</em>.</td>
</tr>
</tbody>
</table>
### Cercis occidentalis
**Western Redbud**  
Deciduous Shrub/S. Tree  
18' x 18'  
S  
Zone: 3  
Comments:  Drought tolerant after 2–3 years of watering. Usually a multi-stemmed small tree. Native to California, Arizona, and Utah. Large, 3” bluegreen leaves with yellow or red fall colors. Flowers for 3 weeks with a brilliant display of magenta flowers. Excellent for dry, well drained banks.

### Cercocarpus ledifolius
**Curl-leaf Mountain Mahogany**  
Evergreen Shrub/S. Tree  
10' x 5'  
S/PSH  
Zone: 4  
Comments:  Prefers hot, dry sites. Drought tolerant large evergreen with slender pointed leathery leaves, twisted branches and feathery plumed seeds. Excellent ornamental for use as background in a border and in neutralized areas.

### Cornus alternifolia
**Pagoda Dogwood**  
Deciduous Shrub/S. Tree  
10' x 15'  
PSH  
Zone: 3  
Comments:  Adapts to most soils, but does best in cool, moist, acid conditions. A small shrub or tree with strongly horizontal branching. Nice winter interest. Flowers are yellowish white and not of particular ornamental value. Light green leaves turn dull red in fall. Blue-black fruit. May be used to soften bold, vertical line of architecture or nature. Relatively short, but wide-spreading tree. See Cornus General Comments.

### Cornus florida
**Flowering Dogwood**  
Deciduous Shrub/S. Tree  
12' x 12'  
S/PSH/SH  
Zone: 6  
Comments:  Prefers an acid, cool, moist, well drained soil. Appreciated for its small stature, spring blooms and nice branch structure for winter interest. Many cultivars in the trade with varying flower color and hardiness. Makes a good specimen, screen or windbreak. Some recommended ones: ‘Cherokee Chief’—deep rosy-red flowers in May before the leaves expand. Leaves are dark green in summer, turning to reddish purple in fall. Fairly upright in habit. Used for a strong accent in color and form. Watch for fungal diseases: leaf spots, cankers, anthracnose, blossom blight. Pay close attention to cultural needs and plant in protected locations with respect to winter sun and winds. ‘Cherokee Princess’—early spring white flower bracts. White varieties are generally harder than the pink or red varieties. Even so, they require special attention to cultural needs. ‘Rubra’—hardy to Zone 5; rosy-pink flower bracts. ‘Welchii’—hardy to Zone 4; flowers on this variety are not profuse. It is grown primarily for its leaf color interest. Leaves are variegated, creamy white, pink, deep rose, and green throughout the summer. See Cornus General Comments.

### Cornus kousa
**Kousa Dogwood**  
Deciduous Shrub/S. Tree  
20' x 20'  
S/PSH  
Zone: 5  

### Cornus mas
**Cornelian Cherry**  
Deciduous Shrub/S. Tree  
15' x 12'  
S/PSH  
Zone: 5  
Comments:  Grows in ordinary garden soil. Will tolerate alkaline soils. This is a bushy shrub that can be pruned to a tree form. Eye catching small yellow blossoms on bare twigs in March. Bright scarlet edible fruit in fall. Reddish fall foliage. An easy-care specimen planted for its interesting and early flower habit. See Cornus General Comments.
Cornus racemosa
Grey Dogwood

Deciduous Shrub/S. Tree 12' x 12'  S/PSH/SH

Grey Dogwood

Zone: 4

Cotinus obovatus
American Smoketree

Deciduous Shrub/S. Tree 25' x 20'  S

American Smoketree

Zone: 4

Comments: Soil adaptable. Large, fuzzy flower clusters, 4 inches in diameter, give this small, rounded tree its name. Round green leaves change to different tones of yellow, orange, red and purple in fall. Striking plant.

Crataegus columbiana
Columbia Hawthorn

Deciduous Shrub/S. Tree 20' x 15'  S

Columbia Hawthorn

Zone: 4

Comments: Adaptable, but prefers sunny moist locations. Large thorny shrub or small tree with white spring flowers, long thorns and red fruit in fall. Fall foliage yellow. Excellent for hedgerow or wildlife plantings. See Crataegus General Comments.

Crataegus crus-galli
Cockspur Hawthorn

Deciduous Shrub/S. Tree 25' x 25'  S

Cockspur Hawthorn

Zone: 4

Comments: Soil adaptable. Dense rounded tree with spreading branches, long thorns. Green, glossy and leathery leaves change to orange, bronze and scarlet in fall. See Crataegus General Comments.

Crataegus douglasii
Douglas Hawthorn

Deciduous Shrub/S. Tree 25' x 15'  S

Douglas Hawthorn

Zone: 4

Comments: Prefers moist to wet locations but adaptable to well drained sites. Shrubby tree with clusters of white flowers in May–June followed by small, black fruit. Shiny green leaves. Easily identified by 1”-long thorns on branches. Fruit is food source for birds and small animals. In nature, often found growing near streams. See Crataegus General Comments.

Crataegus laevigata
‘Paul’s Scarlet’ and ‘Crimson Cloud’ Hawthorn

Deciduous Shrub/S. Tree 18’ x 15’  S

‘Paul’s Scarlet’ and ‘Crimson Cloud’ Hawthorn

Zone: 4

Comments: Adaptable to most soils, but should be well drained. Two commonly available cultivars: ‘Paul’s Scarlet’—clusters of double flowers are rose red in color. Very showy. Very susceptible to mildew and leaf spot, which can sometimes cause defoliation. Thorns are 1” long. ‘Crimson Cloud’—Shapely tree. Bright red single flowers with white centers. Bright red fruit persists into winter. Foliage has a high resistance to leaf-spot diseases. Thorns are 1 inch long. See Crataegus General comments.

Crataegus phaenopyrum
Washington Hawthorn

Deciduous Shrub/S. Tree 25’ x 20’  S/PSH

Washington Hawthorn

Zone: 4

Comments: Adaptable to most soils, but should be well drained. Will tolerate some shade. More disease resistant than other hawthorns. A rounded, dense, thorny tree with 2–3” thorns. Lustrous dark green summer foliage with excellent fall color. White flowers. Fruit persists well into winter. Nice specimen plant, hedge, or screen. Avoid high-traffic areas due to long thorns. See Crataegus General Comments.
**Crataegus x lavallei**  
*Lavalle Hawthorn*  
Deciduous Shrub/S. Tree 30' x 20' S  
Zone: 4  
Comments: Adaptable to most soils, but should be well drained. Dense oval tree with lustrous dark green foliage in summer turning to orange/coppery red in fall. Attractive white flowers. Long 2” thorns. Fruit is orange-red in color and persists into winter. This hybrid has a vase-shaped habit and may mature much smaller than 30’ in height. See Crataegus General Comments.

**Fagus sylvatica**  
*Weeping Beech*  
Deciduous Shrub/S. Tree 12' x 12' S/PSH  
Zone: 5  
Comments: Soil-adaptable, but prefers moist, well drained soil. The growth habit will vary and can be taller or broader than stated above. Foliage is a striking textured, lustrous green. Form is a dense characteristic mound with gracefully weeping branches. This is a fine specimen tree for a small courtyard or entry. Needs some pruning to enhance and maintain form.

**Fagus sylvatica**  
*Purple Weeping Beech*  
Non-native Shrub/S. Tree 10' x 15' S/PSH  
Zone: 5  
Comments: Adaptable, but prefers moist well drained soil. Slow growing, broadly weeping tree with purple foliage. Assumes dome shape. Children can play beneath canopy of this specimen tree.

**Juniperus chinensis**  
*Juniper*  
Evergreen Shrub/S. Tree Variable S  
Zone: 4–5  
Comments: Some cultivars include: ‘Keteleeri’—to 15’. Soil adaptable but should be well-drained. A fast-growing tree, loosely pyramidal in form. Medium green foliage with blue-green berries. Lends itself to shearing well so may be used as hedge. 4’–15’. ‘Spartan’—15’ x 3’. Soil-adaptable, but must be well drained. Narrow, columnar habit. Fast and dense growing. Color is a rich green. Makes a nice vertical accent plant. 4’–15’. ‘Torulosa’—20’ x 15’. Soil adaptable, but should be well drained. A vivid green with twisting branches giving it an interesting form. Good as an accent shrub or screen.

**Juniperus scopulorum**  
*Rocky Mountain Juniper*  
Native Shrub/S. Tree 15' x 8' S  
Zone: 3  
Comments: Likes hot, dry sites. Not fussy about soil type. Columnar evergreen with blue green foliage. Useful either as a specimen or in groupings or windbreaks. See Juniperus General Comments.

**Juniperus scopulorum**  
*Gray Gleam*  
*Medora Juniper*  
Non-native Shrub/S. Tree 10' x 5' S  
Zone: 5  
Comments: Good contrasting blue-green foliage. Slow-growing, columnar form. Hardy plant needing little if any pruning. See Juniperus General Comments.

**Juniperus scopulorum**  
*Pathfinder*  
Non-native Shrub/S. Tree 20' S  
Zone: 5  
Comments: Soil adaptable but should be well drained. A bluish gray pyramidal form. Leaves are in flat sprays. See Juniperus General Comments.

<td>Prefers rich, moist soil. Multi- or single stemmed, spreading tree. The many cultivars generally have large (5–10” diameter) flowers ranging from pale pink to deep rose color. Because flowers come out early and before leaves, they are often damaged by frost and outer petals remain brown while the bloom lasts. See Magnolia General Comments.</td>
</tr>
</tbody>
</table>
**Malus spp.**

Flowering Crabapple

**Deciduous**

Shrub/S. Tree

Variable

S

**Zone:** Varies

**Comments:** Generally tolerant of most garden soils, but seems to do best in a heavy loam that is wel drained. There are many cultivars that vary in size, leaf and flower color, and disease susceptibility. Insect pests include apple maggot, leaf skeletonizer, and aphids. Diseases include fireblight and apple scab. The fruit size varies from \(\frac{1}{4}\) to \(\frac{1}{2}\) inch. Trees are spectacular when in bloom, but must be considered moderate to high maintenance. Prune early in the season, or flowering for the following season may be affected. Some good cultivars follow: 'Adams', 20' x 20', dense rounded form, pink single blooms, red fruit, excellent disease resistance; 'Centurion', 20' x 15', narrow upright form, purple leaves, red single blooms, red fruit, excellent disease resistance; 'Indian Magic', 15' x 15', upright spreading form, large pink blooms, good disease resistance; 'Prairie Fire', 20' x 20', spreading form, white flowers, red fruit, excellent disease resistance; 'Professor Springer', 20' x 20', upright spreading form, white flowers, red fruit, excellent disease resistance; 'Red Barron', 18' x 8', columnar form, purple leaves aging to dark green, red flowers and fruit, good disease resistance; 'Robinson', 25' x 25', spreading form, bronze green leaves, dark pink flowers, dark red fruit, good disease resistance; 'Sargent', 8' x 12', low, spreading dwarf, white flowers, small red fruit, excellent disease resistance.

**Parrotia persica**

Persian Parrotia

**Deciduous**

Shrub/S. Tree

30' x 20'

S/PSH

**Zone:** 4

**Comments:** Prefers well drained loamy slightly acidic soil. Low branching single or multi-stemmed tree. Leaves are large, medium to dark green with good fall colors. Fall color more brilliant when planted in full sun. Bark exfoliates in maturity, lending considerable winter interest. Virtually pest free. Michael Dirr cites this as one of his favorite specimen trees for the landscape.

**Pinus aristata**

Bristlecone Pine

**Evergreen**

Shrub/S. Tree

20' x 10'

S

**Zone:** 5

**Comments:** Adaptable to most soils and will tolerate poor, dry, rocky conditions. One of the oldest known plant species. Extremely slow growing, so be careful to allow for its eventual 20-foot size. Interesting form. Short needles have white resin spots that are sometimes confused with scale insects. Provides an accent in the shrub border in the rock garden. See Pinus General Comments.

**Pinus strobus 'Pendula'**

Weeping White Pine

**Evergreen**

Shrub/S. Tree

Varies

S

**Zone:** 4

**Comments:** Soil adaptable, but prefers fertile, moist, well-drained soil. Long, spreading branches can be trained with upright leader or left to essentially form a horizontal, wide-spreading specimen. Blue-green needles in bundles of 5. Pendulous branches sweep to the ground. Excellent specimen. See Pinus General Comments.

**Prunus cerasifera**

Purple Leaf or Flowering Plum

**Deciduous**

Shrub/S. Tree

Varies

S

**Zone:** 4–5

**Comments:** Adapts to most soils, but should be well drained. Trees generally have upright form and many have brittle wood, subject to storm damage. Prunus species are subject to many insect and disease problems if not kept in optimum growing conditions. Some commonly available cultivars in the trade: 'Krauter Vesuvius'—grows 20' x 15'. Zone 5. An upright, rounded habit with dark reddish purple foliage. Flowers are light pink and appear in March. Produce sparse black fruit. One of the smaller plums. May be used as a street tree or as an accent in the border or near the entry or patio. 'Newport'—grows
15’ x 12’. Rounded form, harder than others, to Zone 4. Pale pink to white flowers and dark purple, 1” fruit. ‘Thundercloud’—grows 25’ x 15’. Zone 5. Deep purple-red foliage with pink flowers that precede the leaves. Rounded-shape tree, used well as a color accent in the border or around the patio. Fruiting is sparse. Subject to numerous insects and diseases; however vigorous growth will help ward off some of them. See Prunus General Comments.

Prunus padus 'Summer Glow' Deciduous Shrub/S. Tree 25’ x 20’
European Bird Cherry Non-native Zone: 3

Comments: Soil adaptable. ‘Summer Glow’ is smaller than species. Leaves emerge a bright green color and change to reddish purple for the summer. White drooping clusters of flowers in the spring are followed by red fruits that are quite attractive to birds. Rounded form is suitable for urban or naturalized sites. See Prunus General Comments.

Prunus sargentii Deciduous Shrub/S. Tree 30’ x 30’ S
Sargent Cherry Non-native Zone: 4

Comments: Soil adaptable, but should be well drained. Single pale pink flowers in May. Shiny, dark green foliage with good fall color. Attractive reddish brown bark. Excellent choice for street-tree planting where space allows. Also used as specimen or accent. See Prunus General Comments. Cultivar: 'Columnaris'—a narrow (25’ x 12’) form similar to above. Good used near buildings or walkways.

Prunus serrulata Deciduous Shrub/S. Tree Varies S
Japanese Flowering Cherry Non-native Zone: 5

Comments: Likes well drained soil. The species is quite large, but the many cultivars are generally 20 to 30’ and vase shaped. Popular for their spring flowers and fall colors, but like most Prunus species, they are susceptible to insect and disease problems when grown in less than ideal sites. Cultivars in the trade: ‘Amanogawa’—20’ x 8’; narrow, columnar habit. Fragrant flowers are deep pink and semi-double, appearing in late April or early May. Attractive bark and showy green foliage. Yellow-red fall color. Occasional small black fruits. May be used as a street tree or as an accent in the landscape. See Prunus General Comments. ‘Kwanzan’—25’ x 15’; branches are stiffly upright like an inverted cone. Flowers mid-season are double deep pink in pendant clusters. They are followed by reddish new leaves that later turn green. A good choice for a street tree. Avoid pruning. This is the hardiest flowering cherry in eastern Washington. See Prunus General Comments. ‘Royal Burgandy’—20’ x 15’; upright form. Similar to ‘Kwanzan’ but leaves remain a red-purple color through the season. ‘Shirotae’—20’ x 25’; strongly horizontal form with flat top. Flowers are fragrant, white, semi-double, and bloom in early season. A vigorous grower. Leaves are a pale green and appear fringed. Nice bark characteristic of cherries. Use as a screen or buffer or for accent, but allow room for its spread. Pruning will detract from its spectacular form. See Prunus General Comments.

Prunus subhirtella ‘Autumnalis Rosea’ Deciduous Shrub/S. Tree 25’ x 22’ S
Autumn Flowering Cherry Non-native Zone: 5

Comments: Upright spreading tree with medium green leaves changing yellow to bronze in fall. Light pink flowers bloom in spring and again in fall. Good branching pattern adds to winter interest. See Prunus General Comments.

| **Prunus virginiana**          | Deciduous | Shrub/S. Tree | 25' x 25' | S |
| Chokecherry                    | Native    | Zone: 2       |           |   |
| Comments:                      | Soil adaptable, but must be well drained. Usually upright branching with an oval crown. Lime-green new foliage changing to maroon. White pendulous flowers, 3–6” long, in May followed by black berries. Attractive to birds. ‘Canada Red’ cultivar (non-native) has leaves that are green at first and later become dark red or purple. ‘Schubert’ another nice cultivar. See Prunus General Comments. |

| **Prunus x ‘Snofozam’**        | Deciduous | Shrub/S. Tree | 12’ x 12’ | S |
| Snow Fountains Cherry          | Non-native| Zone: 5       |           |   |
| Comments:                      | Small, gracefully weeping tree with beautifully cascading form. Small, dark green leaves turn yellow and orange in fall. White flowers. See Prunus General Comments. |

| **Prunus x blireiana**         | Deciduous | Shrub/S. Tree | 15’ x 15’ | S |
| Blireiana Flowering Plum       | Non-native| Zone: 5       |           |   |
| Comments:                      | Adapts to most soils but should be well drained. Rounded, densely branched tree with reddish purple foliage that fades to green. April flowers are 1-inch, double, light pink, and fragrant. Sparse fruit. May be used as a street tree or as an accent in the landscape. See Prunus General Comments. |

| **Prunus x yedoensis**         | Deciduous | Shrub/S. Tree | 30' x 30' | S |
| Yoshino Cherry                 | Non-native| Zone: 5       |           |   |
| Comments:                      | This is the flowering cherry planted at the tidal basin in Washington D.C. Its upright spreading branches create a strong rounded form. Green glossy leaves, yellow fall color and light pink to white flowers. Cultivars ‘Afterglow’ and ‘Akebono’ are slightly smaller at 25’ x 25’. See Prunus General Comments. |

| **Pyrus fauriei ‘Westwood’**   | Deciduous | Shrub/S. Tree | 12’ x 15’ | S |
| Korean Sun Pear                | Non-native| Zone: 4       |           |   |
| Comments:                      | Soil adaptable. The compact Pyrus fauriei is considered by Dirr a compact cultivar of the Pyrus calleryana. ‘Westwood’ is a dwarf of that with good form, white flowers, and pretty red fall foliage. Perfect in small spaces. |

| **Pyrus ussuriensis**          | Deciduous | Shrub/S. Tree | 25' x 25' | S |
| Usurian Pear                   | Non-native| Zone: 3       |           |   |
| Comments:                      | This is the hardiest of the ornamental pears, developed at North Dakota State University. Upright when young, becoming rounded with age. Dark green leaves, red fall foliage, white spring flowers. Small hard yellowish fruits. ‘Mordak’ cultivar has yellow fall foliage. |
**Rhamnus frangula 'Columnaris'**
Glossy (Tallhedge) Buckthorn

Deciduous Shrub/S. Tree 10’ x 4’ S/PSH

**Comments:**
Adapts to most soils but should be well drained. A narrow and upright plant with dark, glossy green leaves. Unremarkable fall color. Red to purple-black berries in summer. Usually used as a hedge and can be pruned as low as 4’. Fast growing.

**Rhamnus purshiana**
Cascara Buckthorn

Deciduous Shrub/S. Tree 30’ x 18’ S/PSH

**Comments:**
Soil and site adaptable. Erect large shrub. Small tree with rounded form. Dark green leaves embossed with deep veins. Yellowish white flowers. Common on wooded slopes in WA, ID, and MT. More useful in rural areas, suburban parks or in restoration due to susceptibility to aphid attack and urban pollution.

**Rhus typhina**
Staghorn Sumac

Deciduous Shrub/S. Tree 15’ x 10’ S/PSH

**Comments:**

**Salix matsudana 'Tortuosa'**
Corkscrew Willow

Deciduous Shrub/S. Tree 30’ x 15’ S

**Comments:**
Prefers a moist soil, but can get along on less water than most other willows. Narrow, pointed, bright green leaves are borne on twisted and contorted branches. An oddity in the landscape and usually used as an accent.

**Salix scouleriana**
Scouler Willow

Deciduous Shrub/S. Tree 10’+ S/PSH

**Comments:**
Adaptable, but prefers moisture. This is the only upland native willow, requiring less water than any other willow species. Rapid growing rounded shrub or small tree that can reach 30’. Oval dark green leaves turn yellow in fall. “Pussy willow” type catkins in spring. Useful for naturalizing areas and establishing cover over disturbed areas.

**Sorbus scopulina**
Western Mountain Ash

Deciduous Shrub/S. Tree 15’ x 10’ S/PSH

**Comments:**
Shrubby small tree, adapted to most soil types. Tolerates part shade. Compound dark green leaves turn brilliant orange and red in fall. White flowers in rounded clusters in spring are followed by shiny red berries in summer that may persist into fall. Excellent naturalizing plant for wildlife habitat.

**Stewartia pseudocamellia**
Japanese Stewartia

Deciduous Shrub/S. Tree 25’ x 15’ S/PSH

**Comments:**
Needs regular watering and prefers acid soil. White camelia-like flowers, 2 inches in diameter, bloom mid-summer. Medium green leaves turn orange-red to purplish in fall. Trunk exfoliates with age. All-around spectacular landscape specimen tree. Best in places protected from cold winds or frost pockets.
Styrax japonica
Japanese Snowbell

Deciduous Shrub/S. Tree 25' x 25' S/PSH

Syringa reticulata
Japanese Tree Lilac

Deciduous Shrub/S. Tree 20' x 30' S

Comments: Grows well in alkaline soil. This large shrub is easily trained to single stem tree. Striking glossy smooth bark. Large leaves with yellow fall color. Large white flower clusters are showy but not fragrant.

Tamarix ramosissima
Tamarisk

Deciduous Shrub/S. Tree 15' x 10' S

Comments: Prefers an acid, well drained soil. Can grow in sand. Hardy and drought tolerant. A loose, open, delicately branched shrub with pink flowers in June and July that resemble feathery shoots. Use in the background, as branch structure is unattractive when leaves fall. Spreads aggressively in desert areas but not a problem in the Inland Northwest. ‘Summer Glow’ is a good variety.

Taxus baccata
English Yew

Evergreen Shrub/S. Tree 15' x 15' S/PSH

Comments: Needs a moist, well drained soil. More shade and moisture tolerant than other conifers. May not be hardy in all eastern Washington locations. Dark green, 1” soft needles. Red berries give winter interest. The dwarf form, T. baccata ‘Rependens’ is the hardiest. Used extensively for topiary. A slow-growing plant that when left to grow naturally becomes very large. See Taxus General Comments.

Taxus brevifolia
Pacific Yew

Evergreen Shrub/S. Tree 20' x 15' PSH/SH

Comments: Requires moist to wet, well drained sites, especially under canopy of other trees. Dark green 1” needles and red berries. Good hedge or border plant given the right soil conditions. See Taxus General Comments.

Taxus cuspidata
Japanese Yew

Evergreen Shrub/S. Tree 30' x 30' S/PSH/SH

Ulmus glabra
Camperdown Elm

Deciduous Shrub/S. Tree 10' x 15' Non-native

Comments: Gracefully weeping small specimen tree with twisting branches that attract attention year round. Resistant to Dutch Elm Disease and Phloem Necrosis. Yellow fall color.

<tbody>
<tr>
<td><em>Abies concolor</em></td>
<td>Evergreen</td>
<td>Tree</td>
<td>50' x 20'</td>
<td>S/PSH</td>
<td>Non-native Zone: 2. Prefers a moist, well drained sandy loam, but will tolerate dry conditions. A large, symmetrical tree, branched to the base. Slower growing in the garden than in nature. Curved bluish green needles are 2” long. Tolerates city conditions well.</td>
</tr>
<tr>
<td><em>Abies grandis</em></td>
<td>Evergreen</td>
<td>Tree</td>
<td>75'</td>
<td>S/PS</td>
<td>Native Zone: 4. Must have a moist, cool, well drained soil. This fir has an extremely narrow, straight crown. The needles are dark shiny green above and have white lines underneath. In natural conditions, this tree can grow to well over 200 feet. Moderate growth rate.</td>
</tr>
<tr>
<td><em>Abies lasiocarpa</em></td>
<td>Evergreen</td>
<td>Tree</td>
<td>40' x 25'</td>
<td>S</td>
<td>Native Zone: 2. Adaptable to many sites, but found in nature on subalpine slopes at 5,000–8,000 feet elevation where it is dwarfed by harsh conditions. A slender, spire shaped evergreen tree. At lower elevations, trees grow fuller and taller. Upturned bluish-grey needles. Useful as a specimen or in a grouping.</td>
</tr>
<tr>
<td><em>Acer nigrum ‘Greencolumn’</em></td>
<td>Deciduous</td>
<td>Tree</td>
<td>50' x 20'</td>
<td>S</td>
<td>Non-native Zone: 4. Like most maples, tolerates most soil conditions. Upright oval tree with good resistance to heat. Similar to sugar maple (<em>A. saccharum</em>), but better adapted to hot, dry conditions. Light green leaves in summer change to yellow orange in fall. See Acer General Comments.</td>
</tr>
<tr>
<td><em>Acer platanoides</em></td>
<td>Deciduous</td>
<td>Tree</td>
<td>60' x 40'</td>
<td>S</td>
<td>Non-native Zone: 4. Adapts to most soil conditions. A broad-crowned, densely-foliaged tree with deep green leaves that turn yellow in the fall. Showy clusters of small greenish yellow flowers in early spring followed by profuse numbers of winged fruit, called samaras. The most common pests on Norway maple are aphids and cottony maple scale. Water deeply to discourage shallow rooting. Prune in late summer. Although this is a reliable landscape tree, it is common to the point of overuse in the Spokane area. The following cultivars are recommended: 'Cleveland'—40' x 30', upright dense oval tree, good selection for city use; 'Deborah'—45' x 40', broadly oval to rounded tree. New leaves are reddish purple, becoming bronze green in summer. Bronze fall color; 'Fairview'—45' x 35', upright oval growth. New growth is reddish purple, changing to bronze green; 'Globe Norway'—15' x 18', see page 65. ‘Royal Red’—40' x 30', oval when young, becoming round with age. Better hardiness than Crimson King. Deep purple leaves; 'Superform'—45' x 40', broadly oval to round. Green leaves with yellow fall color. Uniform branch angles and very symmetrical shape. See Acer General Comments.</td>
</tr>
</tbody>
</table>
### Acer pseudoplatanus

**Sycamore Maple**
- **Zone:** 4
- **Comments:**
  - Adapts to many soil conditions including those high in saline (salt), but should be well-drained. Form is oval to rounded, and growth rate is moderately fast. Dark green leathery leaves have prominent veins. No particular fall color, but has attractive exfoliating bark. Recommended cultivar: ‘Autopurpureum’ is somewhat smaller and less hardy than species and has green leaves with velvety purple underside. Hardy to Zone 5. See Acer General Comments.

### Acer rubrum

**Red Maple**
- **Zone:** 4
- **Comments:**
  - Prefers slightly acid soils and must have extra moisture during summer drought. The leaves are shiny green, turning brilliant scarlet in the fall. Red twigs, buds and flowers give showy color in spring. Upright branching with narrow crown. Has attractive silver-gray bark. The following cultivars are recommended: ‘Armstrong’—45’ x 15’, fast growing and columnar. Excellent street tree; ’Bowhall’—40’ x 15’, upright, narrow form, well suited for street plantings. Medium green leaves turn yellow orange to red in fall. ‘Northwood’—50’ x 35’, a hardy variety. Dense, rounded crown; ‘October Glory’—40’ x 35’, broadly oval to round tree. Glossy green leaves in summer change to deep red or reddish purple. Among the last cultivars to color in fall. Adapted best to areas with milder winters and hot summer temperatures; ‘Red Sunset’—45’ x 35’, excellent tree with oval shape. Among the best for fall color; ‘Scarlet Sentinel’—45’ x 20’, fast growing and rather narrow. Good fall color. Good street tree where space allows. See Acer General Comments.

### Acer saccharum

**Sugar Maple**
- **Zone:** 4
- **Comments:**
  - Prefers a moist, well-drained soil of good fertility. Will not tolerate compacted soils, salts, or air pollution. Seems to prefer slightly acid soil for best growth. A large specimen which needs wide open spaces. There is much variation in fall color, which can be spectacular. The following cultivars are recommended: ‘Commemoration’—50’ x 35’, oval to rounded tree. Fast growing, developing many branches and good caliper. Thick glossy green leaves change to orange and red in fall. ‘Green Mountain’—45’ x 35’, most hardy, drought-tolerant variety. Usually reliable for fall color. Broadly oval crown; ‘Legacy’—50’ x 35’, an upright, oval variety with tatter-resistant glossy green foliage. Acer General Comments.

### Aesculus hippocastanum

**Common Horsechestnut**
- **Zone:** 2
- **Comments:**
  - Prefers a moist, well-drained soil. Avoid dry areas. A tall, rounded tree with large palmate leaflets, each being 4–10” long. Very showy pyramidal clusters of white flowers appear in May. The large brown nuts that follow are not edible, and the seed is toxic. Hot summer sun and wind can cause leaf burn. The roots are invasive. A pretty tree, but should be sited with care. Yellow fall color.

### Aesculus octandra (flava)

**Yellow Buckeye**
- **Zone:** 4
- **Comments:**
  - Similar to Common Horsechestnut (above) except for the flower panicles which are yellow to pale green in color.
**Aesculus x carnea**  
Deciduous Tree  
40' x 25'  
S/PSH

**Red Horsechestnut**  
Non-native  
Zone:  
Comments:  
Prefers a moist, well-drained soil. Avoid dry areas. Pyramidal when young, erect with rounded crown when mature. A spectacular flowering tree bearing 8–10” clusters of reddish pink flowers. Provides dense shade. Subject to leaf burn when subjected to hot dry winds. Produces nuts that are toxic. ‘O’Neill Red’—35’ x 20’—smaller than common horsechestnut. Bright red flowers in April/May.

**Alnus glutinosa**  
Deciduous Tree  
50' x 30'  
S/PSH

**Black Alder**  
Non-native  
Zone: 4  
Comments:  
Prefers moisture but tolerates wet ground, tough sites and infertile soil. Fast growing tree, broadly pyramidal. Often multi-stemmed and very dense. Good for screening. Roots “fix” nitrogen.

**Alnus rubra**  
Deciduous Tree  
60' x 30'  
S/PSH

**Red alder**  
Native  
Zone: 4  
Comments:  
Likes moist to wet sites. Dark green leaves with yellow fall color. White bark becomes mottled with age. Alders are valuable in restoring disturbed areas due to an ability to fix nitrogen.

**Betula jacquemontii**  
Deciduous Tree  
40' x 25'  
S

**Jacquemonti Birch**  
Non-native  
Zone: 5  
Comments:  
Prefers rich, moist, well drained soil. Oval shape, with upright branching. Nice green foliage with yellow fall color. The bark is the whitest of the birch species, but will not attain the whiteness until it is past early youth. Susceptible to bronze birch borer. See Betula General Comments.

**Betula maximowicziana**  
Deciduous Tree  
50' x 25'  
S

**Monarch Birch**  
Non-native  
Zone: 4  
Comments:  
Prefers a moist, well drained soil. Rounded in habit with very large, dark green leaves. Yellow fall color. Fast-growing variety. The young branches are reddish brown, eventually becoming gray or whitish, and the bark splits into long, broad, thin sheets, which cling to the tree in shaggy masses. May be hard to locate, but worth the effort. Susceptible to bronze birch borer. See Betula General Comments.

**Betula nigra**  
Deciduous Tree  
50' x 40'  
S

**River Birch**  
Non-native  
Zone: 4  
Comments:  
Needs ample moisture and prefers an acid soil pH. The shape is pyramidal to oval when young, changing to a rounded outline in maturity. Fast grower and is usually multi-stemmed, but can be trained to a single trunk. Leaves are medium to dark green with yellow color in fall. Young bark is pinkish, and on older trees it flakes in brown to blackish sheets. Resists the bronze birch borer. Good in poorly drained soils. Cultivar: ‘Heritage’—lighter-colored bark; large glossy green leaves. A good selection showing resistance to the bronze birch borer. See Betula General Comments.

**Betula papyrifera**  
Deciduous Tree  
70'+  
S

**Canoe or Paper Birch**  
Native  
Zone: 2  
Comments:  
Grows best in well-drained, moist sandy loam. Similar to European white birch but more open and less weeping. Trunk is creamy white. The bark peels in papery layers to expose reddish orange inner bark. Leaves are dull dark green turning to yellow in the fall. Somewhat resistant to the bronze birch borer except in droughty conditions. See Betula General Comments.

<td><em>Cladrastis lutea</em></td>
<td>Deciduous Tree</td>
<td>35' x 35'</td>
<td>4</td>
<td>Prefers a well drained soil and is pH adaptable. Slow to medium grower with a broad, rounded head. Bright green compound leaflets. White, fragrant flowers, similar to Wisteria, followed by long, flat seed pods in May or June. Heavy bloomer in alternate years. May take up to 10 years to produce blooms, and flowering may be somewhat irregular thereafter, but an attractive tree whether it blooms or not.</td>
<td></td>
</tr>
<tr>
<td><em>Fagus sylvatica</em></td>
<td>Deciduous Tree</td>
<td>60' x 40'</td>
<td>5</td>
<td>Prefers a moist, well-drained soil. Will not tolerate wet, compacted soil. One of most majestic landscape trees. Must be planted where there is ample room. Broadly pyramidal to oval. Shallow rooted and difficult to maintain lawn beneath. Leaves are a lustrous dark green in summer, red-brown in fall, and slow to emerge in spring. Smooth, gray bark. Generally does not require pruning. Aphids sometimes a problem. Recommended cultivars: 'Asplenifolia'—finely lobed leaves give delicate appearance to foliage; 'Dawyck'—upright, columnar type spreading only 10' in diameter; 'Dawyck Purple'—columnar type with dark purple foliage; 'Fastigiata'—columnar type; 'Riversii'—purple leaf form. 'Roseo-marginata'—known as tricolor beech, with purple leaves edged with rose and white border.</td>
<td></td>

<tr>
<td>Ginkgo biloba</td>
<td>Deciduous Tree</td>
<td>50' x 30'</td>
<td>S</td>
<td>Comments: Prefers a sandy, deep, moist soil. A lovely, slow-growing tree. Its habit is extremely variable. Some specimens exhibit a wide growth almost equal to height, while others are much more narrow. The leaves are a unique fan shape, like no other tree. They are bright green and turn to a bright yellow in fall when the leaves will drop all at once. There are male and female trees. Fruit on the females is smelly. Good varieties: ’Autumn Gold’—50’ x 40’, upright and broad-spreading form. Slow growing; ’Princeton Sentry’—50’ x 30’, a narrow male clone.</td>

<tr>
<td>Gleditsia triacanthos var. inermis</td>
<td>Deciduous Tree</td>
<td>30' x 18'</td>
<td>S/PSH</td>
<td>Comments: Prefers a rich, moist, alkaline soil, but will tolerate drought, pollution, and salt. Leaves appear in late spring and drop in early fall, making it a good choice for gardening beneath. Light green leaves have yellow fall color. They are tiny and usually blow away after leaf fall. Provides nice filtered shade. Insignificant fragrant spring flowers in May and June will attract bees. Most cultivars do not produce seed pods and thorns; however, unusual weather conditions can trigger this rarely seen response. A fast growing species. Tends to be overused in urban communities. Recommended cultivars: ’Halka’—40’ x 35’, vigorous new selection with attractive foliage. Upright becoming rounded with age. Good horizontal branching; ’Imperial’—35’ x 30’, round form with symmetrical branching. Compact form and dense foliage provide more shade than other cultivars; ’Shademaster’—45’ x 35’, podless, fast grower with upright spreading branches. Dark green foliage. Leaves stay on later in the fall than other cultivars; ’Skyline’—45’ x 35’, pyramidal form with upright branches. Compact, leathery, dark green foliage. Good selection.</td>

</table>
Koelreuteria paniculata
Goldenrain Tree
Deciduous Tree 35' x 30' S
Non-native
Comments:

Larix decidua
European Larch (Tamarack)
Deciduous Tree 70' x 25' S
Non-native
Comments:
Likes a moist, well-drained soil. Avoid dry, shallow soil and shady conditions. This tree is a deciduous conifer with a slender, pyramidal habit with drooping branches. Bright green needles are in fluffy tufts. Provides a spectacular yellow fall color. A specimen tree that does not tolerate air pollution.

Larix occidentalis
Western Larch or Tamarack
Deciduous Tree 100+' x 35' S/PSH
Native
Comments:
Prefers moist soils, but adaptable. Deciduous conifer with clumps of needles borne on short spurs along branches. Medium green needles turn bright yellow in fall before dropping. New needles in spring a soft green. Fast growing (with moisture) and striking as specimen or in a group with evergreens.

Liquidambar styraciflua
American Sweetgum
Deciduous Tree 40' x 20' S
Non-native
Comments:
Prefers a moist, slightly acid soil for best growth. Somewhat cone-shaped in youth, spreading in age. Unique star-shaped leaves are green in summer, turning purple/yellow/red in the fall. Holds leaves late into season. Interesting ridged bark with age. An excellent lawn or street tree, but needs a large area for root development. May sustain some injury when temperature goes below -20°F.

Liriodendron tulipifera
Tulip Tree or Yellow Poplar
Deciduous Tree 60' x 40' S
Non-native
Comments:
Prefers a deep, rich, well-drained, slightly acid soil. Fast growing when provided with ample moisture. Beautiful green and orange 2–3” tuliplike flowers appear in May or early June and often are borne high on the tree. Flowers are rarely seen on young trees. Large specimen not suitable for street tree plantings. Can be spectacular in the fall with yellow foliage.

Metasequoia glyptostroboides
Dawn Redwood
Deciduous Tree 70' x 25' S
Non-native
Comments:
Best in moist, well-drained slightly acid soils. Deciduous conifer with light green needles which turn orange in fall before dropping. Narrow conical habit. Avoid low planting sites which are prone to early winter freezes. Susceptible to winter damage in windy, dry sites.

Nyssa sylvatica
Blackgum, Black Tupelo
Deciduous Tree 40' x 25' S/PSH
Non-native
Comments:
Soil adaptable and tolerant of drought, poor drainage and city conditions. Pyramidal when young, spreading with age. Glossy green foliage turns to brilliant yellow, orange, red or maroon colors. Cracked gray bark gives winter interest. Good adaptable tree that should be used more often.

<tbody>
<tr>
<td><em>Ostrya virginiana</em></td>
<td>American Hophornbeam</td>
<td>Deciduous</td>
<td>40' x 25'</td>
<td>4</td>
<td>Soil adaptable, tolerates dry, rocky and alkaline soil. Upright oval tree does well in urban settings. Hard wood prevents snow and ice damage. Dark green “fuzzy” foliage with yellow fall color. Small nut inside bracts that resembles fruit of hop plant.</td>
</tr>
<tr>
<td><em>Picea abies</em></td>
<td>Norway Spruce</td>
<td>Evergreen</td>
<td>60' x 20'</td>
<td>2</td>
<td>Soil adaptable, but prefers moist, well-drained soil. A short-needled, deep green pyramid in youth; in age it tends to grow out horizontally with branches drooping strongly. Extremely hardy and wind-resistant, so is often used in windbreaks. Long, tight, 6” cones. A fast-growing tree, provided it receives ample water.</td>
</tr>
<tr>
<td><em>Picea engelmannii</em></td>
<td>Englemann Spruce</td>
<td>Evergreen</td>
<td>80' x 25'</td>
<td>2</td>
<td>Prefers a deep moist loamy soil. Densely pyramidal tree resembling blue-green forms of the Colorado spruce, but needles are softer and tree is not so spreading at base. The lower branches remain dense. One of the better spruces for ornamental planting where space allows.</td>
</tr>
<tr>
<td><em>Picea pungens</em></td>
<td>Colorado Spruce</td>
<td>Evergreen</td>
<td>60' x 20'</td>
<td>3</td>
<td>Prefers a rich, moist soil but will tolerate drought better than other spruces. Avoid dry ridges and slopes. Densely pyramidal in shape with stiff, green needles spreading around the branches. Vigorous and fast growing when young, but has a tendency to lose its lower branches as it ages. In the Inland Northwest, it is subject to the Cooley spruce gall adelgid. May be used as an accent or as a windbreak. Has a tendency to dominate the landscape.</td>
</tr>
<tr>
<td><em>Picea pungens</em></td>
<td>Colorado Blue Spruce</td>
<td>Evergreen</td>
<td>60' x 20'</td>
<td>3</td>
<td>Prefers fully exposed, well drained location. Similar to Picea pungens above, but with a decidedly blue coloring. This strong coloring requires careful placement in the landscape. Other blue foliage cultivars: ‘Hoopsii”—a dense, vigorous grower, one of the best blue varieties; ‘Koster”—somewhat irregular growth habit; ‘Moerheimii”—bright blue, narrow, conical form eventually reaching 30’.</td>
</tr>
<tr>
<td><em>Pinus cembra</em></td>
<td>Swiss Stone Pine</td>
<td>Evergreen</td>
<td>30' x 15'</td>
<td>4</td>
<td>Requires well drained, loamy soil. Narrow and densely columnar when young. Dense blue-green needles in bundles of five. Unusual deep-blue cones. Slow growing and upright. Handsome specimen tree. See Pinus General Comments.</td>
</tr>
</tbody>
</table>
Pinus contorta var. latifolia  
Lodgepole Pine  
Evergreen Tree  
Native Zone: 5  
100' x 25' S  

Pinus densiflora  
Japanese Red Pine  
Evergreen Tree  
Non-native Zone: 4  
45' x 40' S  
Comments: Prefers well-drained, slightly acid soil. Needles in bundles of two. Strong horizontal branching with a broad, flat-topped crown. Trunks are often leaning. Interesting form makes this a good specimen tree. See Pinus General Comments.

Pinus flexilis  
Limber Pine  
Evergreen Tree  
Non-native Zone: 2  
30' x 15' S/PSH  
Comments: Adaptable to hot, dry sites. Can be planted on rocky slopes. Dense, broadly pyramidal in youth becoming a low, broad, flat-topped tree at maturity. Slow growing. Dark green needles in bundles of five are slightly curved or twisted. “Limber” branches may droop at decided angle to trunk. See Pinus General Comments.

Pinus monticola  
Western White Pine  
Evergreen Tree  
Native Zone: 3  
80' x 35' S  

Pinus nigra  
Austrian Pine  
Evergreen Tree  
Non-native Zone: 4  
35' x 15' S  
Comments: Widely adaptable to soils, but does best when moist. Withstands city conditions better than most pines. Needles are in pairs and are 4–6” long and quite stiff. Densely pyramidal when young becoming a large, broad, flat-topped tree with a rough, short trunk and low, stout, spreading branches. Makes a good specimen, screen or windbreak. See Pinus General Comments.

Pinus parviflora  
Japanese White Pine  
Evergreen Tree  
Non-native Zone: 5  
35' x 20' S  
Comments: Soil adaptable, but good drainage is important. Stiff needles are in bundles of five. Dense pyramid when young, developing a wide-spreading habit with a rather flat top when mature. A good conifer for the garden with graceful character. See Pinus General Comments.

Pinus ponderosa  
Ponderosa Pine  
Evergreen Tree  
Native Zone: 3  
140' x 40' S  
Comments: Prefers dry sites. Large open growing conifer, requires ample room. Needles are dark green, 4–6” long, in bundles of 2 or 3. Cones are 3–5” long. Exfoliating bark, needles and cones of mature trees considered messy in managed landscapes, but this is our signature native tree in the Inland Northwest and deserves to be here! See Pinus General Comments.

84 Trees
**Pinus resinosa**  
**Red Pine**  
Evergreen Tree  
50' x 15'  
S  
Zone: 2  

**Pinus strobus**  
**Eastern White Pine**  
Evergreen Tree  
80' x 30'  
S  
Zone: 3  
Comments: Prefers a fertile, moist, well drained soil, but adapts to dry or wet conditions. Susceptible to breakage in high winds and intolerant of air pollution and salts. May develop chlorosis in alkaline soils. A symmetrical cone shape with horizontal branches. Long needles are a soft blue green and in bundles of five. See Pinus General Comments.

**Pinus sylvestris**  
**Scotch Pine**  
Evergreen Tree  
40' x 30'  
S  
Zone: 2  
Comments: Prefers a well drained soil, but is otherwise adaptable. Pyramidal in youth, becoming irregular and drooping with age. Stiff blue-green needles are in bundles of two, 1 1/2–3” long. Good landscape choice for mass plantings or single specimen. See Pinus General Comments.

**Pinus thunbergiana**  
**Japanese Black Pine**  
Evergreen Tree  
40' x 20'  
S  
Zone: 5  
Comments: Prefers a moist, well drained, fertile soil. Grows in sandy soils. Quite variable in height and width, spreading in maturity. Has an interesting, irregular form and makes a nice accent in the landscape. Long needles are in bundles of two and are bright green. See Pinus General Comments.

**Platanus x acerifolia**  
**London Planetree (Sycamore)**  
Deciduous Tree  
75' x 50'  
S  
Zone: 5  
Comments: Prefers a deep, rich, moist, well-drained soil, but adapts to most soil conditions. Withstands high pH and air pollution. A very large tree with maplike leaves and interesting exfoliating bark. Pyramidal in youth developing a large, wide-spreading outline with massive branches. Often inappropriately used as a street tree; needs lots of room. Susceptible to anthracnose fungal disease. Look for cultivar ‘Bloodgood’, which shows resistance to this disease.

**Populus tremula**  
**Swedish Columnar Aspen**  
Deciduous Tree  
40' x 10'  
S/PSH  
Zone: 2  
Comments: Adapts to most soil types, but needs ample moisture. Upright narrow tree well adapted to cold climates. Leaves have scalloped edges, yellow fall color and rustle in breezes like our native Quaking Aspen. Smooth gray-white bark. Good substitute for short-lived, brittle Lombardy poplars.
<table>

<th>S/PSH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quaking Aspen</td>
<td>Native</td>
<td>Zone: 3</td>
<td></td>
</tr>
</tbody>
</table>

Comments: Adapts to most soils, but needs lots of moisture. A fast-growing, but relatively short-lived tree. Light green leaves quake (flutter) with air movement. Yellow fall color. Smooth, pale, gray-green bark. Attractive tree and used extensively in massed plantings and as a deciduous screen. The trunk and limbs are subject to borers, and there is a fungal disease that causes a blackening of the leaves and dieback of twigs. Roots can be invasive.

<table>
<thead>
<tr>
<th><strong>Populus trichocarpa</strong></th>
<th>Deciduous Tree</th>
<th>100’ x 60’</th>
<th>S</th>
</tr>
</thead>
<tbody>
<tr>
<td>Black Cottonwood</td>
<td>Native</td>
<td>Zone: 4</td>
<td></td>
</tr>
</tbody>
</table>

Comments: Likes deep, moist soil, especially along rivers and streams. Requires ample space. Dark green leaves are silver-white beneath. Quick growth results in weak wood which breaks in storms. Suckers profusely. This large native tree should ONLY be used in large naturalized sites where it provides habitat for eagles, osprey and herons. NOT A LANDSCAPE TREE.

<table>
<thead>
<tr>
<th><strong>Prunus maackii</strong></th>
<th>Deciduous Tree</th>
<th>30’ x 25’</th>
<th>S</th>
</tr>
</thead>
<tbody>
<tr>
<td>Amur chokecherry</td>
<td>Native</td>
<td>Zone: 2</td>
<td></td>
</tr>
</tbody>
</table>

Comments: Needs well drained soil. Densely branched tree with rounded form. Hanging white flower clusters, 2–3” long, are followed by small dark berries which attract birds. Bark is shiny, reddish and very attractive in winter. See Prunus General Comments.

<table>
<thead>
<tr>
<th><strong>Psuedotsuga menziesii</strong></th>
<th>Evergreen Tree</th>
<th>100’ x 20’</th>
<th>S/PSH</th>
</tr>
</thead>
<tbody>
<tr>
<td>Douglas-fir</td>
<td>Native</td>
<td>Zone: 4</td>
<td></td>
</tr>
</tbody>
</table>

Comments: Prefers a neutral to slightly acid, well drained soil. It has a pyramidal form. Soft medium green needles. The bark is smooth when young, but the older trunks are divided by thick reddish brown ridges. An excellent specimen for groups or massed plantings. Plant where it will be able to grow to full size.

<table>
<thead>
<tr>
<th><strong>Pyrus calleryana</strong></th>
<th>Deciduous Tree</th>
<th>40’ x 30’</th>
<th>S</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bradford or Flowering Pear</td>
<td>Non-native</td>
<td>Zone: 4</td>
<td></td>
</tr>
</tbody>
</table>

Comments: Adapts to most soils and will tolerate drought once established. A low-maintenance tree that tolerates pollution. Flowers profusely in early spring (white.) Non-ornamental fruit may be present in older plantings. Leaves are a glossy dark green and change to a scarlet purple in fall. Overall shape is conical. Exceptional choice for street tree or mass plantings. Relatively free of pests and diseases. Recommended cultivars: ‘Aristocrat’—40’ x 20’, leaves have wavy edges. Zone 4; ‘Autumn Blaze’—Zone 4; ‘Capital’—35’ x 12’, narrower than ‘Bradford.’ Reddish-purple fall color. Zone 5; ‘Chanticleer’—40’ x 15’, narrower than ‘Bradford.’ Hardens off earlier in the fall. Zone 4; ‘Redspire’—35’ x 20’, pyramidal form with yellow fall color. Zone 5 ‘Trinity’—30’ x 20’, rounded form, orange/red fall color. Zone 5.

<table>
<thead>
<tr>
<th><strong>Quercus acutissima</strong></th>
<th>Deciduous Tree</th>
<th>40’ x 40’</th>
<th>S</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sawtooth Oak</td>
<td>Native</td>
<td>Zone: 5</td>
<td></td>
</tr>
</tbody>
</table>

Comments: Soil adaptable, but prefers slightly acid soil. Fast growing, rounded, spreading oak. Dark green, glossy, sharply serrated summer foliage with late developing yellow fall color. Inch-long acorns. See Quercus General Comments.
**Quercus alba**  
White Oak  
Deciduous Tree  
50' x 50'  
Zone: 4  
Non-native  
Comments: Soil adaptable, but prefers moist and acidic soil. Full rounded form. Medium green, fine textured leaves change to deep-red or purple-red in fall. Inch-long acorns. Majestic tree in maturity. See Quercus General Comments.

**Quercus bicolor**  
Swamp White Oak  
Deciduous Tree  
50' x 50'  
Zone: 4  
Non-native  
Comments: Adapted to wet, poorly drained soils. Open rounded tree. Lustrous heavy textured green leaves with wavy margins. Yellow, sometimes red fall color. Inch-long acorns, usually paired. See Quercus General Comments.

**Quercus coccinea**  
Scarlet Oak  
Deciduous Tree  
80' x 50'  
Zone: 4  
Non-native  
Comments: Prefers deep, rich soil. High, open branching habit. Large (6" long) bright green leaves with bright red fall color. (Less color when fall weather is warm.) Deep roots allow for lawn or perennial plant growth beneath canopy. Inch-long acorns usually paired. See Quercus General Comments.

**Quercus macrocarpa**  
Bur Oak  
Deciduous Tree  
55' x 45'  
Zone: 3  
Non-native  
Comments: Soil adaptable, likes alkaline soils. Open broad form. Thick trunk and short branches. Dark green 8–10" leaves turn yellow or yellow-brown fall color. Inch to inch and a half long acorns. See Quercus General Comments.

**Quercus robur**  
English Oak  
Deciduous Tree  
75' x 60'  
Zone: 4  
Non-native  

**Quercus rubra**  
Red Oak  
Deciduous Tree  
60' x 40'  
Zone: 4  
Non-native  
Comments: Prefers a well-drained, sandy loam with an acid pH. Alkaline soils will result in leaf chlorosis. A fast-growing variety with spreading branches and rounded crown. The leaves are reddish in spring, green in summer, and russet in fall. Deep root system makes it easy to garden under. Prune this tree with great care as it is highly susceptible to heart rot. See Quercus General Comments.

**Quercus shumardii**  
Shumard Oak  
Deciduous Tree  
50' x 40'  
Zone: 5  
Non-native  
Comments: Prefers moist, acid soils. Will tolerate wet feet. In its native area (midwestern U.S.) it is found along streams and swamps, but it is known to be drought tolerant in other settings. Wide-spreading, with dark green, lobed, deeply cut leaves; change to reddish brown in fall. Beautiful tree with gray, furrowed bark. See Quercus General Comments.
**Quercus velutina**
Northern Black Oak

Deciduous Tree 50' x 40' S

Non-native Zone: 3

Comments:
Site and soil adaptable. Tolerant of poor soils. Open rounded form. Dark green 4–10” leaves change to rusty red fall color. Deeply furrowed bark on mature trees is almost black. Small, 1/2-inch acorns. See Quercus General Comments.

**Robinia idahoensis**
Idaho Locust

Deciduous Tree 35' x 30' S

Non-native Zone: 2

Comments:
Adaptable to all but permanently wet soils. Very drought tolerant once established. Moderately fast growing tree. Compound green leaves with yellow fall color. Flowers are bright magenta-rose in 8” clusters. Very showy. Good dependable flowering tree for tough conditions. However, wood is brittle and trees can be short lived compared with other species.

**Salix alba var. tristis**
Golden Weeping Willow

Deciduous Tree 40' x 40' S

Non-native Zone: 3

Comments:
Requires damp soil; tolerates wetland conditions. The pale to medium green leaves are borne on long, pendant yellow stems. Roots may become superficial, causing some mowing problems. Don’t plant this tree unless you can provide it with large amounts of water. Plant it away from sewer and plumbing lines.

**Sophora japonica**
Japanese Pagoda Tree

Deciduous Tree 50' x 30' S

Non-native Zone: 4

Comments:
Soil adaptable, heat tolerant. Medium sized tree with dark green, 6–10” leaves. Yellowish white flowers hang in 8–12” clusters in late summer. Flowers followed by 2–3” long pods. Good tree for lawn or patio areas. ‘Regent’ cultivar has straight growth habit and oval crown.

**Sorbus alnifolia**
Korean Mountain Ash

Deciduous Tree 40' x 30' S

Non-native Zone: 4

Comments:
Will grow in any well-drained soil; pH adaptable. Pyramidal form when young; rounded in outline when matures. Unlike other mountain ash that has pinnate compound leaves, the Korean Mountain Ash has simple, lustrous dark green leaves with pretty fall orange and red colors. Bears 6–10 white flowers in loose clusters. Orange-red fruit in fall.

**Sorbus aucuparia**
European Mountain Ash

Deciduous Tree 40' x 15' S/PSH

Non-native Zone: 2

Comments:
Grows in ordinary garden soil, but should be well drained. Fernlike foliage is followed by clusters of white flowers and then small red berries, which are very effective in fall and winter, especially covered with snow. The tree is attractive to birds. It can be considered messy when berries fall upon walkways or patios. Several good varieties available. Some have interesting, orange-tinged bark. Cultivars: ‘Cardinal Royal’—30’ x 15’, glossy dark-green leaves, silver beneath; white flowers; bright red fruit. Distinct upright, narrow, oval form; ‘Black Hawk’—28’ x 18’, glossy green leaves, white flowers, orange fruit. Narrow, oval form; a strong grower; performs well in hot weather.

<tbody>
<tr>
<td><em>Taxodium distichum</em></td>
<td>Deciduous</td>
<td>50’ x 20’</td>
<td>Prefers deep sandy loams with plenty of moisture, but can adapt to drier sites. Deciduous conifer with slender pyramidal form. Needles are bright green in spring, softer green in summer and rich brown in fall before dropping. Nice as specimen tree or grouped.</td>
</tr>
<tr>
<td><em>Thuja plicata</em></td>
<td>Evergreen</td>
<td>70’ x 25’</td>
<td>Prefers a moist, well-drained, fertile soil. A narrow, pyramidal tree when young but becoming quite large and wide with age. Slow to medium in growth habit. Slender, drooping branchlets have dark, scalelike leaves in fanlike branches. The bark is cinnamon brown which appears to “peel and shred” with age. Full form and rich color make this a nice backdrop tree where space allows.</td>
</tr>
<tr>
<td><em>Tilia americana</em></td>
<td>Deciduous</td>
<td>60’ x 30’</td>
<td>Prefers a deep, moist, fertile soil, but will grow in drier and heavier soils. A large specimen that is generally too big for most landscape situations except for parks and golf courses. An attractive tree with yellow-white flowers in loose, fragrant clusters, which appear in June/July. Susceptible to several diseases and insects. Cultivars: ’Boulevard’, ‘Legend’, ‘Lincoln’, ‘Redmond’.</td>
</tr>
<tr>
<td><em>Tilia cordata</em></td>
<td>Deciduous</td>
<td>40’ x 25’</td>
<td>Prefers a moist, well-drained fertile soil. Tolerates alkaline conditions and air pollution. Dense and pyramidal in shape with heart-shaped leaves of dark green above with a silvery cast below. Loose clusters of yellow-white fragrant flowers in June. One of our nicest landscape trees used for shade and as a street tree where space allows. Many suitable cultivars in the trade. ’Glenleven’—Fast growing selection with straight trunk and pyramidal head; ’Greenspire’—40’ x 50’, narrow oval form with straight trunk, small dark green leaves and spicy fragrant flowers.</td>
</tr>
<tr>
<td><em>Tilia tomentosa</em></td>
<td>Deciduous</td>
<td>60’ x 40’</td>
<td>Tolerates heat and drought, once established. Excellent shade tree with good pyramidal shape. Dark green leaves have silvery underside, with striking shimmering effect in the breeze. Yellow fall color.</td>
</tr>
<tr>
<td><em>Tsuga canadensis</em></td>
<td>Evergreen</td>
<td>50’ x 30’</td>
<td>Prefers well drained, moist, acid soil. Short, narrow green needles with white bands on underside. Pyramidal in youth, pendulous pyramidal at maturity. Will grow in shade, or in the sun if sheltered from wind. Can be used as a specimen, grouped, or pruned as a hedge or screen. Nice delicate airy form in the landscape. Small cones are less than an inch long.</td>
