ABOUT THE FUNDING

The Continuum of Care (CoC) Program (24 CFR part 578) is designed to promote a community-wide commitment to the goal of ending homelessness; to provide funding for efforts by nonprofit providers, States, and local governments to quickly re-house homeless individuals, families, persons fleeing domestic violence, and youth while minimizing the trauma and dislocation caused by homelessness; to promote access to and effective utilization of mainstream programs by homeless; and to optimize self-sufficiency among those experiencing homelessness.

Please note: As detailed in 23 CFR 578.73 All projects must match all grant funds, except leasing funds, with no less than 25 percent of funds or in-kind contributions from other sources. Cash match must be used for the costs of activities that are eligible under subpart D of this part.

ELIGIBLE PROJECT TYPES

Background:

Homelessness should be rare, brief, and non-recurring. In order to achieve this for all persons experiencing homelessness, our community must transform homeless services to crisis response systems that rapidly return people who experience homelessness to stable housing. All projects serving the homeless should be accessible to the population served and have low barriers to entry. Services should be informed by the value that all people experiencing homelessness are housing ready.

Supportive Services Only – Coordinated Entry (SSO – CE)

Description: Coordinated entry is an important process through which people experiencing - or at risk of experiencing - homelessness can access the crisis response system in a streamlined way, have their strengths and needs quickly assessed, and efficiently connect to appropriate, tailored housing and mainstream services within the community or designated region. Standardized assessment tools and practices used within local coordinated assessment processes take into account the unique needs of children and their families, as well as youth. When possible, the assessment provides the ability for households to gain access to the best options to address their needs, incorporating participants' choice, rather than being evaluated for a single program within the system. The most intensive interventions are prioritized for those with the highest needs.

Resources:

[Coordinated Entry: Core Elements](#)

Performance Measures:

- Population served
- Number of households served
- Percentage of successful referral outcomes
- Average number of referrals per client during the operating period
- Average length of time between referral start date and successful outcomes
- Costs per household
- Financial management
- Data quality reporting timeliness

Eligible Costs: Provisions at 24 CFR 578.37 through 578.63 identify the eligible costs for which funding may be requested under the CoC Program. HUD will reject any requests for ineligible costs.

Joint Transitional & Rapid Rehousing (Joint TH-RRH)

A Joint TH and PH-RRH Component project is a new project type as of the [FY 2017 CoC Program Competition](#) that includes two existing program components—TH and PH-RRH—in a single project to serve individuals and families experiencing homelessness. If funded, HUD will limit eligible costs as follows:

1. Capital costs (i.e., new construction, rehabilitation, or acquisition), leasing of a structure or units, and operating costs to provide transitional housing;
2. Short- or medium-term tenant-based rental assistance on behalf of program participants in the rapid rehousing portion of the project;
3. Supportive services for the entire project;
4. HMIS for the entire project; and
5. Project administrative costs for the entire project.

If awarded, projects must be able to provide both components, including the units supported by the transitional housing component and the tenant-based rental assistance and services provided through the PH-RRH component, to all program participants up to 24 months as needed by the program participants. For example, a program participant may only need the temporary stay in transitional housing unit, but the project must be able to make available the financial assistance and supportive services that traditionally comes with rapid re-housing assistance to that program participant. However, this does not mean that the applicant is required to request funding from the CoC Program for both portions of the project (e.g., the applicant may leverage other resources to pay for the transitional housing portion of the project).

Applications for Joint TH and PH-RRH component projects must demonstrate that the project will have the capacity to provide both transitional housing assistance and rapid re-housing assistance, as needed, to each program participant.

HUD has not imposed time limits that program participants can reside in either portion of the Joint TH and PH-RRH Component project; however, the total length of assistance that a program participant can receive in the entire project is 24 months. This means if the program participant resides in the transitional housing portion of the project for 3 months, they can receive up to 21 additional months of RRH assistance.

However, when designing this type of project it is important to keep in mind the following:

- The recipient or subrecipient cannot dictate minimum stays in either portion of the project (e.g., the recipient cannot require a program participant to reside in the transitional housing portion of the project for one-year).
- Program participants should receive only the assistance they need to safely and stably exit homelessness; therefore, not all program participants should automatically receive 24 months of assistance.

Projects must be able to make available both components—TH and PH-RRH—to all program participants entering the project. This does not mean that all program participants will receive assistance through both portions of the project.

HUD expects Joint TH and PH-RRH projects to be client-driven and the assistance to be tailored to the program participants' needs. This means that a program participant may choose to receive assistance through only one portion of the project, but they must have had the option to receive the assistance through the other. This also means that projects should not provide assistance beyond what is needed to help program participants safely and stably exit homelessness. For example, recipients should not have a policy in place to provide all program participants with 12 months of rental assistance in the RRH portion of the project, but instead should determine the least amount necessary to help the program participant safely and stably exit homelessness, which will vary by person.

Project applicants may use the reallocation process to eliminate a TH and a PH-RRH project operated by the same recipient to create a new Joint TH and PH-RRH component project through the transition grant process.

Leasing Costs

Leasing is an eligible cost category under the PH, TH, SSO, and HMIS program components. Funds may be used to lease individual units or all or part of structures. Rents must be reasonable and, in the case of individual units, the rent paid may not exceed HUD-determined Fair Market Rents. Leasing funds may not be used for units or structures owned by the recipient, subrecipient, their parent organization(s), any other related organization(s), or organizations that are members of a partnership where the partnership owns the structure without a HUD-authorized exception. When leasing funds are used to pay rent on units, the **lease must be between the subrecipient and the landowner, with a sublease or occupancy agreement with the program participant**. The recipient may, but is not required to, charge the program participant an occupancy charge, consistent with the parameters specified in the interim rule.

Rental Assistance Costs

Rental assistance is an eligible cost category under the PH and TH program components and may be tenant-based (TBRA), sponsor-based (SBRA), or project-based (PBRA), depending upon the component type.

Rental assistance may be short-term for up to 3 months; medium-term for 3 to 24 months; or long-term for more than 24 months. The length of assistance depends upon the component type under which the cost is funded. Recipients must serve as many program participants as identified in their funding application to HUD, but, if the amount reserved for the term of the grant exceeds the amount needed to pay actual costs, the excess funds may be used to cover property damage, rent increases, or the rental needs of a greater number of program participants.

- **TBRA:** Program participants select any appropriately sized unit within the CoC's geographic area, although recipients or subrecipients may restrict the location under certain circumstances to ensure the availability of the appropriate supportive services. Except for victims of domestic violence, program participants may not retain their rental assistance if they relocate to a unit outside the CoC's geographic area.

When rental assistance funds are used to pay rent on units, the lease must be between the program participant and the landowner. Each program participant, on whose behalf rental assistance payments are made, must pay a contribution toward rent consistent with the requirements of the interim rule.

Rapid Rehousing for Homeless Households

Description: Rapid re-housing (RRH) is designed to assist homeless individuals and families, with or without disability, to move into permanent housing within thirty (30) days of being referred from Coordinated Entry and achieve stability in that housing. Assistance provided through RRH should focus on progressive engagement and be client-centered. Once clients have been housed, RRH providers should stay connected with them and provide a safety-net, if needed, that promotes long-term housing stability and reduces returns to the homeless system.

Permanent Supportive Housing (PSH)

Description: PSH projects should have minimal barriers to entry, provide on-site services and prioritize the most vulnerable homeless households. Support services should be informed by harm reduction and employ flexible and creative person-centered services to ensure continued housing stabilization. Services should be available and encouraged but cannot be required as a condition of tenancy. There

should be ongoing communication and coordination between supportive service providers, property owners, or managers and housing subsidy programs.

FUNDING PRIORITIES AND KEY ASSUMPTIONS

Department of Housing and Urban Development (HUD) Policy and Priorities:

1. ***Ending homelessness for all persons.*** To end homelessness, CoCs should identify, engage, and effectively serve all persons experiencing homelessness. CoCs should measure their performance based on local data that consider the challenges faced by all subpopulations experiencing homelessness in the

geographic area (e.g., veterans, youth, families, or those experiencing chronic homelessness). CoCs should have a comprehensive outreach strategy in place to identify and continuously engage all unsheltered individuals and families. Additionally, CoCs should use local data to determine the characteristics of individuals and families with the highest needs and longest experiences of homelessness to develop housing and supportive services tailored to their needs. Finally, CoCs should use the reallocation process to create new projects that improve their overall performance and better respond to their needs.

2. Creating a systemic response to homelessness. CoCs should be using system performance measures such as the average length of homeless episodes, rates of return to homelessness, and rates of exit to permanent housing destinations to determine how effectively they are serving people experiencing homelessness. Additionally, CoCs should use their Coordinated Entry process to promote participant choice, coordinate homeless assistance and mainstream housing and services to ensure people experiencing homelessness receive assistance quickly, and make homelessness assistance open, inclusive, and transparent.

3. Strategically allocating and using resources. Using cost, performance, and outcome data, CoCs should improve how resources are utilized to end homelessness. CoCs should review project quality, performance, and cost effectiveness. HUD also encourages CoCs to maximize the use of mainstream and other community-based resources when serving persons experiencing homelessness. CoCs should also work to develop partnerships with Public Housing Authorities (PHAs) to work toward helping CoC Program participants' exit permanent supportive housing through Housing Choice Vouchers and other available housing options. Finally, CoCs should review all projects eligible for renewal in FY 2018 to determine their effectiveness in serving people experiencing homelessness, including cost effectiveness.

4. Use a Housing First approach. "Housing First" prioritizes rapid placement and stabilization in permanent housing and does not have service participation requirements or preconditions. CoC Program funded projects should help individuals and families move quickly into permanent housing, and the CoC should measure and help projects reduce the length of time people experience homelessness. Additionally, CoCs should engage landlords and property owners, remove barriers to entry, and adopt client-centered service.

Key Assumptions Incorporated in this Funding Notice:

- Projects that are able to leverage Medicaid funding for services linked to housing may be reduced in the future;
- Projects are expected to leverage all other mainstream system resources, including education/employment, healthcare, etc.;
- Projects will demonstrate Housing First practices (low admission criteria);
- Projects funded to provide RRH will work collaboratively with Coordinated Entry to ensure

streamlined processes that will result in households' homeless episode ending in 30 days or less;

- Projects funded for Coordinated Entry will work collaboratively with the RRH providers to ensure streamline processes that will result clients' households homeless episode ending in thirty (30) days or less;
- Projects providing or supporting permanent housing will ensure that client assessments are completed in the timeline and method detailed in the contract;
- Projects will ensure culturally appropriate and responsive services;
- Projects will gear their program models to a "move up strategy" valuing recovery and graduation from housing units with intensive services;
- Projects will collect data and enter records into the City Homeless Management Information System (HMIS) for every client served. HMIS data collection and entry will be in accordance with applicable HMIS data standards and guidelines HMIS data for any given month will be entered and accurate no later than the 5th day of the following month;
- Projects will participate in the Coordinated Entry System; and
- Projects will align with Spokane's CoC system-wide performance measures.

All projects applying under this funding notice are expected to leverage operating and services funding from other sources to the maximum extent feasible including, but not limited to, such sources as Veterans Administration sources, Medicaid, and private fundraising. If a Medicaid supportive housing benefit can be obtained - and projects have the ability to leverage Medicaid funding for services linked to housing - we anticipate reducing funding based on this ability to leverage funds.

FUNDS AVAILABLE

If HUD awards a different amount to these programs than what was estimated, actual funding awards will be increased or decreased to accommodate the discrepancy. CoC Program projects are initially funded for 12 months. Projects must compete annually for continued funding under the CoC Program.
