CHAPTER 1

Introduction

ORDINANCE NO. C35455

AN ORDINANCE OF THE CITY OF SPOKANE, WASHINGTON, ADOPTING A SIX-YEAR CITYWIDE CAPITAL IMPROVEMENT PROGRAM FOR THE YEARS 2017 THROUGH 2022, AND AMENDING SECTION 5.5 CAPITAL FACILITIES PROGRAM (CFP) OF THE CITY OF SPOKANE COMPREHENSIVE PLAN.

WHEREAS, in accordance with the Growth Management Act ("GMA"), the City of Spokane previously adopted a Comprehensive Plan that includes a Capital Facilities Program that includes an inventory, analysis, and a six-year financing plan for needed capital facilities; and

WHEREAS, the City formed a Capital Facilities Technical Team which has assembled proposed amendments to Section 5.5 Capital Facilities Program (CFP) of the City of Spokane Comprehensive Plan ("Comprehensive Plan"), which amendments consist of an updated six-year plan (years 2017 through 2022) identifying the proposed locations and capacities of expanded or new capital facilities and a plan to finance such capital facilities within projected funding capacities (the "Six-Year Citywide Capital Improvement Program" or "CIP"); and

WHEREAS, the City previously adopted the Six-Year Street Program (RCW 35.77.010) on June 20, 2016 by Council Resolution 2016-0053, and that program is incorporated into the CIP; and

WHEREAS, GMA provides that proposed amendments to a comprehensive plan may be considered by the governing body of a city no more frequently than once per year, but further provides that amendments to the capital facilities element of a comprehensive plan may be considered outside of this annual process where the amendment is considered concurrently with the adoption or amendment of a city budget; and

WHEREAS, on August 16, 2016, the City's responsible official issued a Determination of Non-Significance for the CIP; and

WHEREAS, the Spokane City Plan Commission conducted public workshops regarding the CIP on August 24th and September 14th 2016; and

WHEREAS, after providing appropriate public notices, on October 26th, 2016, the Spokane City Plan Commission, conducted a public hearing to take testimony on the CIP, and at the close of the hearing, and after considering public input, the SEPA determination, and required decision criteria, found that the CIP is consistent with the Comprehensive Plan and voted unanimously to recommend that the City Council approve the CIP; and

WHEREAS, on August 22, 2016, the City provided the State of Washington the required sixty (60) day notification under RCW 36.70A.106 of the City's proposed amendment to the CPI. The 60-day notice period has lapsed; and

Now, Therefore,

The City of Spokane does ordain:

Section 1. Amendment. The City of Spokane Comprehensive Plan and its capital facilities element are hereby amended to reflect a six-year plan for capital improvement projects (2017-2022), as set forth in the attached Citywide Capital Improvement Program (2017-2022).

Section 2. Authorization to Seek Funding. City staff are authorized to apply for state and federal grants and low-interest loans in support of the projects identified in the Citywide Capital Improvement Program (2017-2022).

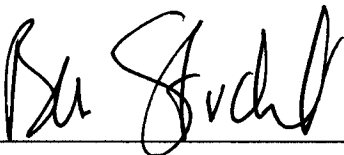

Section 3. Effective Date. This ordinance shall take effect and be in force on January 8, 2017

PASSED BY THE CITY COUNCIL ON November 28, 2016

Terri Pfister, City Clerk

Approved as to Form:

Assistant City Attorney

Council President

 12-09-2016

David A. Condon
Mayor
City of Spokane

January 8, 2017
EFFECTIVE DATE

CITY PLAN COMMISSION FINDINGS OF FACT, CONCLUSIONS, AND RECOMMENDATIONS ON THE 2017-2022 CITYWIDE CAPITAL IMPROVEMENT PROGRAM

A Recommendation of the City Plan Commission certifying that the 2017-2022 Six Year Citywide Capital Improvement Program (CIP) is in conformance with the City of Spokane's Comprehensive Plan.

FINDINGS OF FACT:

A. In May 2001, the City of Spokane adopted its Comprehensive Plan under the Growth Management Act (Chapter 36.70A RCW or "GMA").

B. The City's Comprehensive Plan is required to be consistent with the GMA.

C. The GMA requires that the City's annual CIP shall be in conformance with the City's Comprehensive Plan.

D. The 2017-2022 Six Year Citywide CIP identifies capital project activity which has implications on the growth of the community.

E. The City Plan Commission held two workshops on August 24th and September 14th, 2016, to obtain public comments on the 2017-2022 Six Year Citywide CIP.

F. The City Council must receive a recommendation from the City Plan Commission to certify that the 2017-2022 Six Year Citywide CIP is in conformance with the City's Comprehensive Plan in effect on the day of certification.

ACTION: Motion to accept the staff's Findings of Fact A through F.

CONCLUSIONS:

A. The 2017-2022 Six Year Citywide CIP has been prepared in full consideration of the City's Comprehensive Plan.

B. The 2017-2022 Six Year Citywide CIP has been reviewed by the City Plan Commission and found to be in conformance with the goals and policies of the City's 2001 Comprehensive Plan, as well as the Arterial Street Plan.

ACTION: Motion to accept conclusions A and B by staff as conclusions of the Plan Commission.

RECOMMENDATIONS:

A. The Spokane City Plan Commission is certifying that the 2017-2022 Six Year Citywide CIP is in full compliance with the existing Spokane Comprehensive Plan as required by

RCW 36.70A and RCW 35.77.010 and is recommended for adoption by the Spokane City Council.

B. By a vote of 6 to 0, the Plan Commission recommends the approval of these amended documents by the City Council.

A handwritten signature in blue ink, appearing to read "Dennis Dellwo", is written over a horizontal line.

**Dennis Dellwo, President
Spokane Plan Commission**

Washington State Growth Management Act

The State Legislature recognized that uncoordinated and unplanned growth, together with a lack of common goals, could impact the environment and effect economic development and the high quality of life of Washington citizens. To respond to mounting citizen concerns and to address the problem of uncontrolled growth, the 1990 Legislature adopted the Growth Management Act. The primary goals of the act included the following:

- Conservation of timber, agricultural and mineral resource lands.
- Protection of critical areas.
- Planning coordination among neighboring jurisdictions.
- Consistency of capital facilities, utilities, and transportation plans with land use plans.
- Early and continuous public participation in the planning process

The basic objective of the growth management legislation is to guide and encourage local governments in assessing their goals, evaluating their community assets, writing comprehensive plans, and implementing those plans through regulations and innovative techniques that effectuate their future vision.

Capital Facilities Plan Element of the Comprehensive Plan

The purpose of capital facilities planning is to provide adequate public facilities to serve existing and new development, to reduce the cost of serving new development with public facilities, and to ensure that these facilities will be in place when development occurs. Capital Facilities include roads, bridges, sewer, water and storm water facilities, solid waste facilities, public buildings, parks and recreation facilities.

To provide for capital facility needs, the State of Washington's Growth Management Act RCW 36.70A.070 requires that each jurisdiction prepare a capital facilities plan element in their comprehensive plan consisting of:

- An inventory of existing capital facilities owned by public entities, showing the locations and capacities of the capital facilities;
- A forecast of the future needs for such capital facilities;
- **The proposed locations and capacities of expanded or new capital facilities;**
- **At least a six-year program that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes;** and
- A requirement to reassess the land use element if probable funding falls short of meeting existing needs and to ensure that the land use element, capital facilities plan element, and financing plan within the capital facilities plan element are coordinated and consistent.

This document is intended to address meets the bolded elements above.

City of Spokane's Approach to Capital Facilities Plan

The capital facilities plan implements the land use element of the comprehensive plan, and these two elements, along with the financing plan within the capital improvement program, must be coordinated and consistent. The GMA also requires a separate transportation element. (<http://www.mrsc.org/subjects/planning/capfacilities.aspx>)

Capital facilities include property, buildings (fire stations, buildings etc), open spaces, roadways, sewer plants and facilities including pipes in the ground and electrical wiring, solid waste trucks and disposal sites. A capital facility can also be major communication or computer systems. All cities own property, equipment and buildings. Without capital investments, cities could not provide necessary services. Cities usually acquire property and build the structures that are needed, but they may also purchase existing structures and renovate.

For the City of Spokane's Comprehensive Plan, the Capital Facilities Plan (CFP) for transportation can be found in Chapter 4 and for other capital facilities and utilities can be found in chapter 5. The CFP establishes the City's long-range program to address needs.

While the Land Use Element of the Comprehensive Plan articulates the vision and goals for how Spokane will develop, the Capital Improvement Program is the implementation tool that fulfills the goals and vision of the Comprehensive Plan. The Capital Improvement Program is the critical link between comprehensive planning and projects being constructed. Within the Capital Facilities Plan, implementation of the Comprehensive Plan is described through:

- Established levels of service for various public facilities and services;
- How certain undeveloped areas will develop based on type of public facilities extended;
- How coordination with adjacent jurisdictions will occur; and
- How coordination with other agencies that provide public facilities and services such as school districts, utilities, transit services will occur.

Relationship of the Citywide Capital Improvement Program to Goals and Policies of Comprehensive Plan

The Citywide Capital Improvement Program (CIP) is a six year plan of capital projects with estimated costs and proposed methods of financing that is updated annually.

In 2011, City Council adopted ordinance C34747 which established the annual update of a Citywide Six-Year Capital Improvement Program, a copy can be found in the appendix. The ordinance further directed that the Citywide CIP be reviewed by the Plan Commission for consistency with the Comprehensive Plan and by presented to Council by June of each year.

In 2012, using the State Community Trade & Economic Development (CTED) Capital Facilities Planning Tool User Guide as a resource and other existing models, City staff created 10 needs assessment questions to be used to relate each proposed capital project to the pertinent goals and policies in the Comprehensive Plan. (The CTED Decision Matrix is a set of questions

which were developed to help local agencies to help prioritize projects according to a pre-assigned set of criteria and were particularly valuable for comparing projects from different program categories.) Each proposed project in the Citywide CIP also includes a rationale statement that explains why this project is necessary.

Because the City Administration viewed the needs assessment questions as policy, the Mayor requested that City Council review and approve the needs assessment questions to be used in the development of the Draft 2016-2021 Citywide CIP. City Council also reviewed and approved a weighted scoring for the questions to help inform the City Administration as they developed the draft. The following were used to help inform the process.

2017-2022 Needs assessment for City Wide Projects as approved by City Council

1. Does the project or item meet the goals of the Comprehensive Plan?
 - Which of the goals does it meet?
2. Does the project or item satisfy Federal, State, County or City mandates or regulations? (IE by not performing this project, Federal or State money is withheld, laws violated, or concurrency issues arise)
 - State the mandate or regulation this project or item satisfies
3. Does this project decrease demand on operations and maintenance funding?
 - Explain how this approach decreases demand on maintenance and operations funding
4. Is the project integrated to benefit City functions?
 - Describe how the project is integrated to benefit City functions. (IE does the project also address or help another City function? An example would be if the Water Dept chose to place a new water line along a roadway that needs repair. This would be an integrated project in that the Street Dept benefits from the roadway being improved rather than the water line being placed in another roadway in better condition)
5. Does this project or item eliminate hazards or risks?
(Note: Must align with the Comprehensive Plan (IE the Comprehensive Plan prioritizes the need to create safe, walkable streets for pedestrians))
 - What hazards or risks does it eliminate
6. Does the project or item preserve or extend the life of an existing asset?
 - Explain how the life of an asset will be extended or preserved
7. Does the project or item increase infrastructure capacity to meet future growth needs?
 - Describe the increase. (Include current capacity, the proposed increase and how it relates to future growth)
8. Centers/Corridors, and the Targeted Areas are a priority for the City. Is the project located in one of the highlighted areas shown on the attached map? (Extra weight will be given to projects in the targeted areas, AND/OR centers and corridors)
9. Does the project increase or generate revenue?
 - State the amount of Revenue projected
 - State the amount of time it will take to generate the revenue stated above.
10. Does the project require additional FTE's or increased fixed costs?
 - State how many additional FTE's are needed and state the additional cost.
11. Does the project meet sustainability plan goals?
 - How many goals were met?
 - State how the project or item meets the goal(s) selected
12. Will the project or item be located within a CD neighborhood? (Attach a link to pull up the CD Neighborhood Map)

In summary, the process described qualitatively links each project in the Citywide CIP to pertinent goals and policies in the Comprehensive Plan. The project rationale justifies why the project was selected, and the needs assessment questions link the project to the Comprehensive Plan.

Population--The Citywide Capital Improvement Program (CIP) must use the same population projections used in other parts of the Comprehensive Plan. Internal consistency requires all elements of a Comprehensive Plan be based upon the same planning period and the same population projections. The State Office of Financial Management provides an annual estimate for the population of Washington cities. For 2013, the estimate for the City of Spokane is 211,000. Since no one within the City, County, Spokane Regional Transportation Council or State Office of Financial Management provides a six-year population projection for the City of Spokane, Capital Programs staff in conjunction with Planning staff developed a projection based on an average of the annual increase of Spokane's population from the 2000 census through 2010 and used this average annual increase to project a population increase of 6,831 for the years 2016 through 2021. To assure consistency throughout the Citywide CIP, this projected increase was provided to all program/project managers required to use Spokane's population as the demand population in their six-year need analysis.

Inventory--The Growth Management Act requires jurisdictions to prepare an inventory of City-owned buildings, facilities, and infrastructure. In past facility plans, the inventory information has not been consistent. To correct this deficiency, staff have redesigned the inventory format, added it to the Citywide CIP database, and will be phasing in the information during the comprehensive plan update that is currently underway and will be completed by 2017.

Other Jurisdictions Capital Facilities Programs--Although the City of Spokane provides many services to its residents it is not the only provider in Spokane. Capital facilities are owned by many other public providers including the Spokane and Mead School Districts, Spokane Transit Authority, and the Convention and Visitors Bureau.

The following links are provided as they become available from other jurisdictions and can direct you to the other jurisdictions capital programs. We are providing these links for informational purposes only. To review the external entities capital programs, access their websites accordingly:

- Spokane Transit Authority: <http://www.spokanetransit.com/about-sta/view/comprehensive-plan/>
- Spokane County: <http://www.spokanecounty.org/bp/data/Documents/CapFac/TOC.pdf>

As the largest city in Spokane County, the City of Spokane has taken the lead regarding economic development that benefits the entire county. The City has been active in the renovation of the downtown and in revitalization efforts in the University District, North Monroe, and Hillyard.

2017-2022 Citywide Capital Improvement Program Highlights

The Citywide Capital Improvement Program (CIP) is both a planning and financial document. It is a prioritization of the capital improvements the City intends to build in the next six years and a plan for how to pay for these improvements. The 2017-2022 Citywide CIP does not appropriate funds, but rather it functions as a budgeting tool, supporting the actual appropriations that are made through adoption of the budget. It is an important filter that demonstrates that the Capital Facilities Element of the Comprehensive Plan is financially realistic.

Internal Process

Development of a process to include all City departments with capital facilities into a capital improvement program began after adoption of the Citywide CIP ordinance. An internet-based database was created with input from Finance, Accounting, Planning, MIS, and Capital Program Department staff. The information for each capital improvement project was entered for each participating department and reviewed through June 28th. The system was locked on June 28th and a first draft was prepared. The data was compiled and summary reports were shared with the Administration for review. City Council was briefed on the status of the Citywide CIP in May and July. The Citywide CIP will remain in draft form until after Council approves the document. Upon completion of the budgeting process, the Citywide CIP will be edited to reflect any impacts the 2017 budget has on the CIP and then sent to Council for final approval.

Structure of Document and Process

The major purpose of this document is to identify existing and future capital facilities needs including major maintenance, regulatory compliance, expansion and new facilities. The Citywide CIP is organized into Chapters, Sections and Subsections.

Chapters

Chapters are the major organization of the Citywide CIP. They categorize the data and ensure that all information required by the Capital Facilities Elements within the Comprehensive Plan is included in an orderly sequence within the Capital Facilities Program.

Chapter 1 Introduction

Chapter 2 Capital Improvement Program (subdivided by Departments)

FUTURE Chapter 3 Inventory of Public Facilities

Appendix

Sections

Sections are organized by department within Chapter 2 and are presented in alphabetical order.

- Asset Management
- Criminal Justice
- Fire
- Fleet Services
- Information Technology
- Integrated Projects
- Library
- Municipal Court
- Neighborhood Services
- Parking
- Parks & Recreation
- Police
- Solid Waste Collection
- Solid Waste Disposal
- Streets
- Wastewater Management
- Water

Analysis Section

As the City grows there generally is an increase in demand for services and new facilities that may be needed to accommodate this increased demand. The City is committed to providing services for all City residences and providing for growth. In order to evaluate how the City accommodates growth and demand, Level of Service standards were developed. These measures help evaluate the success of providing for new service demands without reducing the service provided to existing residents.

Level of Service Standards

To implement the policies of the Spokane's Comprehensive Plan, the City has adopted Levels of Service (LOS) standards for capital facilities. The LOS measures the quality and quantity of existing and planned public facilities. Providers of capital facilities and services are requested to include an analysis discussion that evaluates how they are meeting the measurable LOS "objective" or standard. These standards have been adopted by the City Council as a commitment to maintain a specific level of service as the City grows. Most service providers have an established standard while others have a standard that is indicated, as "as needed".

Concurrency

The term concurrency is used in conjunction with Level of Service standards within the Capital Facilities Element of Spokane's Comprehensive Plan and requires that the public facilities and services necessary to support development shall be adequate to serve the development at the same time (concurrent to when) the development is available for occupancy or use, or within a reasonable time as approved by the City, without decreasing current service levels below locally established minimum standards.

Department	Level of Service (LOS) Standard
Emergency Medical Services	
Basic Life Support	6.5 minute response 80% of the time
Advanced Life Support (ALS)	8 minute response 80% of the time
Fire	
1 st Engine	7 minute response 80% of the time
1 st Ladder	8 minute response 80% of the time
Law Enforcement	1.5 Officers per 1000 residents
Libraries	3.25 books per person
Parks	
Neighborhood	1.17 acres per 1000 persons
Community	1.49 acres per 1000 persons
Major	2.59 acres per 1000 persons
Solid Waste	
Garbage	4.33 collections/household/month
Recycling	4.33 collections/household/month
Streets	
Signalized intersections	
Arterial, Downtown, CBD	LOS F, not to exceed 90 seconds of delay
Development Proposals	LOS F, not to exceed 85 seconds of delay
Principal or Minor Arterials	LOS E
Collector Arterials	LOS D
Unsignalized Intersections	LOS E
Wastewater Management	
Stormwater	10 year design storm for public right of way
Stormwater	Prevent flooding of property in a 25 yr storm
Stormwater	Prevent damage to building in a 100 yr storm
Sewage	100 gallons per capita per day
Water	Minimum pressure of 45 psi

2017-2022 Citywide Capital Improvement Program

Planning for adequate capital facilities is an important City activity and as a major land owner, property must be maintained properly and major renovations planned and budgeted. New facilities must also be planned and budgeted responsibly, evaluated and balanced with all other City needs. This chapter identifies future projects and describes how they will be budgeted. The Citywide Capital Improvement Program (CIP) is not just a wish list as it also includes a funding and financing plan.

An overview of the entire City is represented in the Spending by Department Summary and Spending by Funding Type Summary. Following the overview, department information is divided into sections. Department information includes a department description, funding summary, and reports for each project. Each capital project has a "spending plan" that identifies revenue sources for projects and when the funds are anticipated to be expended.

Department Description

At the beginning of each Section is a description of each department: their goals, services provided, background and required level of service.

Department Summary

A financial summary illustrates spending and lists proposed projects that are alphabetized by category.

Proposed Projects

Project Reports, located at the end of each Department Section, describe new and ongoing projects for the six-year period 2017-2022.

Project Report Template

Staff used a web-based application to create the Project Reports used in the Citywide CIP. The application format enables the material submitted by the departments to be standardized regardless of the type of projects.

Maintenance Costs

Included in the Project Report is a table to estimate maintenance costs for the project. Routine maintenance of capital facilities, buildings and infrastructure has an impact on a department's operating budget, thus routine maintenance cost for each proposed new or ongoing project should be identified and considered as a component of a project's overall cost. The information is not include in the overall project costs, but is included for general information.

Spending and Funding

Included for each project is Total Project Spending (prior years plus a breakdown of the individual years 2017-2022). The funding source is identified in a similar fashion, funding to date and estimated funding for the individual years. The status of the funds refers to different levels of financial commitment currently secured for the project. Funds that are awarded or encumbered are shown in black; all other funding is shown in red.

What is a Capital Improvement Program (CIP) Project?

Required content:

- Identifies a specific physical improvement
- Specifies the time for construction; and
- Identifies the specific source of funding

Definition of a Capital Project

- A tangible asset
- Have a useful life of 5 years or more
- Has a value of \$60,000 or more
- Meets the goals, policies or level of service of the Comprehensive Plan

Capital by Department Summary

Department	2017	2018	2019	2020	2021	2022	Total

Services Provided

The City of Spokane Asset Management group is responsible for the strategic development of a centralized facilities plan and its implementation. Services provided within centralized facilities are:

- New Construction Project Management
- Architectural Planning
 - Facility Needs Assessments and Feasibility Studies
- Management of the City Hall Maintenance
- Space Planning, and Move Management
- TI Planning and Construction Management
- Preventative Maintenance Plans
- Building Condition Assessments

Background

The Asset Management group was established in January of 2013 and is part of the Finance Division.

Asset Management Department Project Reports

Asset Management/Criminal Justice**Offices for Prosecutors**

AM-2014-143

Executive Summary

City Prosecutor's Office occupies the top floor of the building. Walled office spaces for 12 City Prosecutor's and 6 support staff are needed in order to provide client and victim confidentiality and comply with operations statutory mandate to prosecute criminal cases for the City.

Project Justification

This project would complete the original 1998 plan of the remodel on the building. Maintaining confidentiality and thus safety of victims and witnesses throughout all phases of Prosecution is mandatory. This is impossible as office spaces are defined by temporary wall panels.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

City of Spokane Prosecutor's Office, 909 W. Mallon Ave, Spokane WA 99223

Project Status

Active

Originally Proposed in 1997 remodel of 909 W. Mallon location. Reidentified in 2013 as needed to comply with confidentiality standards required for prosecution to protect victims and witnesses in criminal matters handled by the City Prosecutors

External Factors

This project is awaiting permission and funding to secure an estimate.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

No additional maintenance would be incurred as we would not be adding to the square footage of this office

Asset Management/Criminal Justice**Offices for Prosecutors**

Total			\$0	\$0	\$140,000	\$0	\$0	\$0	\$0	\$140,000

***Status definitions**

- Unidentified: Funding source has not yet been determined
- Identified: Funding source has been found, but not yet requested
- Applied: Grant or loan application has been submitted, or budget has been requested
- Awarded: Grant or loan has been offered but the contract has not yet been signed or budget has not yet been approved by Council
- Encumbered: Project contract has been signed and funds have been allocated to spend on the project

Funding amounts in red reflect sources that are unidentified, identified, or anticipated.

Asset Management/Fire**Construction of apparatus storage facility.**

AM-2012-453

Executive Summary

Storage of reserved fire apparatus in a protective structure adjacent to the FD shop would provide security to the apparatus and logistical readiness of the units when needed.

Project Justification

Having FD spare vehicles co-located in our training/maintenance area would be more cost effective. Long trips to pickup an extra vehicle to swap into, would be eliminated and therefore lower our fuel cost for the fleet. This would also allow fire crews to return back in service faster therefore they will be in their response areas faster which is where we want them.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU6

Location

Other Location

This construction would be at our regional training campus located at 1610 N. Rebecca.

Project Status

Active

This project would fund the construction of an addition to the FD maintenance shop or stand alone structure at the SFD Readiness Complex, to provide for the storage of reserved emergency response apparatus awaiting to be placed in service and for storage of out of service apparatus awaiting repair. This allows apparatus to be in a protective environment that is adjacent to the shop where fire apparatus is brought for repairs. This also frees up valuable space in the fire stations which will give the department more flexibility to expand service delivery options

External Factors

With ARU and other smaller response apparatus in stations, there is limited space to house reserve apparatus. Additionally, with the purchase of new apparatus through SIP funds, there is going to be a lack of storage space for fire apparatus.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$2,500	\$2,500	\$2,500	\$0	\$7,500

Maintenance Comments

Asset Management/Fire**FD-Priority 1-repair/ replacement items for Fire facilities**

AM-2014-118

Executive Summary

SFD has responsibility for 16 fire stations + 5 other facilities. All facilities have levels of repair/ replacement that need attention. This work has been categorized into 4 Priority Levels. This project is for the most critical needs - Roofs; Hot Water tanks; HVAC work; Asphalt resealing.

Project Justification

If we continue to defer maintenance on these items, potential damages and injuries can occur to both the public and employees at these facilities. Hot water tanks can explode, roofs leak, furnaces combustion chambers crack sending carbon monoxide into the quarters and paving fail to the point the entire asphalt lots will need to be removed and re-paved.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 CFU 2 CFU 4 CFU 5 CFU 6

Location

Other Location

This program would include improvements at all 20 FD facilities throughout the city.

Project Status

Active

Currently there are 20 locations on FD properties which are in need of repairs including: Hot water tanks; roofs that are over 23 years old; furnaces over 23 years old; and asphalt areas that need cracks filled, resealed and re striped. There are minimal M & O dollars to fund these projects which in the past were funded by fire bonds.

External Factors

The Spokane Fire Department has responsibility for maintaining the buildings and grounds of 16 fire stations and 5 other support facilities. These buildings receive constant use with the 16 of the 20 having 24-7-365 operations. While minor repairs and maintenance is funded through annual operating budgets, the current M & O budget will not cover these expenditures. Without other funding, these needs will remain and the safety to the public and employees could be serious. Seasonally we are restricted by the weather for roofs and pavements. This project could be affected by grant funding opportunities.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$3,000	\$3,000	\$3,000	\$3,000	\$3,000	\$0	\$15,000

Maintenance Comments

Crack fills should be done annually and striping as needed but typically not more than once every three years. Same goes for resealing it really should be resealed every 3 to 4 years but this is cost prohibited. With the exception of any newer stations most stations have been resealed 8 years ago and some as much as 11 years ago.

Asset Management/Fire**FD-Priority 2-repair/ replacement items for Fire facilities**

AM-2014-119

Executive Summary

SFD has responsibility for 16 fire stations + 5 other facilities. All facilities have levels of repair/ replacement that need attention. This work has been categorized into 4 Priority Levels. This project is for the 2nd most critical needs - Appliances; Exhaust system work; Furniture.

Project Justification

All of the items requested have reached their end of life usage. Failure to be proactive in replacing the refrigerators to maintain proper temperatures for perishables could spoil food, without working gas ranges, crews are left with no means to cook meals, or wash & dry work clothes. The vehicle exhaust drops are essential to provide a safe work environment while vehicles are moved in or out of the stations.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

This program would include upgrades at some or all of the 20 FD facilities throughout the city.

Project Status

Active

Currently there are 21 locations on FD properties which are need of major appliances replaced. The appliances are well past their life expectancy and all facilities are due for replacements to some degree. Additional vehicle exhaust drops are necessary and day room chairs are falling apart. There are limited M & O dollars for these projects which in the past were funded by fire bonds. We have managed to replace some as they failed but the bottom is about to fall out on a vast majority of these items.

External Factors

The Spokane Fire Department has responsibility for maintaining the buildings and grounds of 16 fire stations and 5 other support facilities. These buildings receive constant use with the 16 of the 20 having 24-7-365 operations. While minor repairs and maintenance is funded through annual operating budgets, the current M & O budget will not cover these expenditures. Without other funding, these needs will remain and the safety to the public and employees could be serious.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Asset Management/Fire**FD-Priority 3-repair/ replacement items for Fire facilities**

AM-2014-117

Executive Summary

SFD has responsibility for 16 fire stations + 5 other facilities. All facilities have levels of repair/ replacement that need attention. This work has been categorized into 4 Priority Levels. This project is for the 3rd critical needs - Cabinetry, flooring, bathroom repair.

Project Justification

If we continue to defer maintenance on these items, potential water damages can induce mold into the working environments causing sickness to city employees at these facilities. Damaged floor tiles create trip hazards. Apparatus floors need to have anti skid surfaces laid down to prevent slipping accidents on wet floors in fire station work areas.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

This program would include improvements at all 20 FD facilities throughout the city.

Project Status

Active

Currently there are 21 locations on FD properties which are in need of serious repairs to the bathrooms, floors and cabinetry. There are limited M & O dollars for these projects which in the past were funded by fire bonds.

External Factors

The Spokane Fire Department has responsibility for maintaining the buildings and grounds of 16 fire stations and 5 other support facilities. These buildings receive constant use with the 16 of the 20 having 24-7-365 operations. While minor repairs and maintenance is funded through annual operating budgets, the current M & O budget will not cover these expenditures. Without other funding, these needs will remain and the safety to the public and employees could be serious.

Asset Management/Fire**FD-Priority 4-repair/ replacement items for Fire facilities**

AM-2014-121

Executive Summary

SFD has responsibility for 16 fire stations + 5 other facilities. All facilities have levels of repair/ replacement that need attention. This work has been categorized into 4 Priority Levels. This project is for the 4th most critical needs - Painting; Pruning; Ceiling Tile repair/cleaning.

Project Justification

If we continue to defer maintenance on these items, potential damages to the structures from overgrown vegetation and the facilities will look very unprofessional, to the citizens and employees. This will further deteriorate morale in the workplace and lack of confidence from the tax payers.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

This program would include upgrades to some of the 21 FD facilities throughout the city.

Project Status

Active

Currently there are 21 locations on FD properties which are in need of painting, landscaping and some furniture to complete what has been attempted over the past 6 years without external funding. There are limited M & O dollars for these projects which in the past were funded by fire bonds.

External Factors

The Spokane Fire Department has responsibility for maintaining the buildings and grounds of 1 fire stations and 5 other support facilities. These buildings receive constant use with the 16 of the 20 having 24-7-365 operations. While minor repairs and maintenance is funded through annual operating budgets, the current M & O budget will not cover these expenditures. Without other funding, these needs will remain and the safety to the public and employees could be serious. Seasonally we are restricted by the weather for painting.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Asset Management/Fire**Fire Station Fire Suppression & Alarm systems**

AM-2015-123

Executive Summary

All prototypical stations have fire sprinkler systems for half the station in areas as required when originally built. This project would complete the full fire sprinkler of each of these stations, plus Sta 7,15 & suppression systems for CCB & Sta 1 IT spaces (non conductive sys).

Project Justification

Full fire suppression and smoke and fire detection systems will protect firefighters and city property- two of our greatest assets. Funding will also provide for central monitoring & reporting from our own dispatch center, for enhanced protection.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 CFU 4 CFU 6

Location

Other Location

These will be done at: Fire Stations 1, 2,3 7,8,9,11,13,14,15,16,& 17

Project Status

Active

This project is to fund the completion of fire sprinkler systems in 12 of our 16 fire stations. Included is fire and smoke detector systems that never existed.

External Factors

Coordination of installation would be necessary around the activities of active fire stations.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$5,000	\$5,000	\$5,000	\$5,000	\$5,000	\$0	\$25,000

Maintenance Comments

With increase of size and number of sprinkler heads and alarm systems higher cost for third party testing will need additional funding to cover these cost but these are a fraction of potential losses from just one fire or accidental discharge.

Asset Management/Fire**Fire Station Fire Suppression & Alarm systems**

AM-2015-123

Spending

Project Phase	Spending to Date	Estimated Spending							Total
		2017	2018	2019	2020	2021	2022	6 Year Total	
Construction	\$0	\$0	\$950,000	\$0	\$0	\$0	\$0	\$950,000	\$950,000

Asset Management/Fire**Fire Station/ Facility Entry and Site Security**

AM-2016-170

Executive Summary

The intent is to install more sophisticated entry and security systems at fire stations/ fire facilities and sites. This is needed to only allow authorized entry and maintain records of who has entered the structure as well as to protect employee parking areas.

Project Justification

There is currently not a corporate wide entry or security system in fire stations or other fire facilities. There are thousands of dollars in city and personal property within those facilities that should have an enhanced level of security. Additionally employee parking areas need to be secure to prevent break-ins/ care theft.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

The central location for staging purposes will be at 1610 N. Rebecca or 44 W. Riverside. The actual locations are at fire station/ facilities that are spread throughout the City.

Project Status

Active

Fire Stations/ Facilities and grounds have limited security measures to limit access when city personnel are not within the facility. There is a need to install security systems that will allow proper access and maintain records of who entered the facilities. Providing fencing to secure employee parking will also be necessary.

External Factors

Coordination with a corporate/ enterprise wide security system.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Asset Management/Fire**HVAC and upgrades at Fire Station #1**

AM-2012-405

Executive Summary

The current HVAC was not well designed for the current usage and the boiler and roof top units have reached the end of their life cycle.

Project Justification

Station 1 occupies the Fire fighters and the Fire prevention Bureau on the first floor and Fire Administration and support on the second. The current system has very few zones and is not well designed for the number and types of separations' that exist. The system has reached it's service life and must be replaced and upgraded to a more efficient system.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 CFU 2 CFU 4 CFU 5 CFU 6

Location

Other Location

This Fire Station is located on the corner of Browne and Riverside at 44 W. Riverside.

Project Status

Active

Fire Station 1 was built in 1978 and the HVAC system is old, inadequate and has exceeded its life expectancy. Currently there are no plans or funding available to renovate this system.

External Factors

Current system is 36 years old and was not designed very well. The existing boiler and roof top units have exceeded their useful service life and if we do not replace these soon, we will be without heat or air in the very near future.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$20,000	\$20,000	\$20,000	\$20,000	\$0	\$80,000

Maintenance Comments

The newer system will be much more efficient than the current system. We use more energy than necessary due to the way the current system is designed. We are constantly cooling and heating at the same time in order to reach a balance in locations where there are no thermostats that control heating. The plus side is that over the years we have strived to construct our stations with less maintenance to operate in our choices of materials for all spaces which lowers the maintenance cost in the long run.

Asset Management/Fire**HVAC and upgrades at Fire Station #1**

Asset Management/Fire**Land/Construct/Furnish Permanent Fire Station 5-SW Spokane**

AM-2015-157

Executive Summary

Design, construct, furnish and otherwise ready a new permanent fire station 5 in SW Spokane before 1-1-2020. Anticipate design and construction beginning in 2018. Furnishing in 2019 for station completion by end of 2019.

Project Justification

Though an agreement with Local 29, the City must permanently expand to a 3 person company serving SW Spokane before 1-1-2020. Temporary Station 5 is not large enough to accommodate a traditional Engine so a permanent station is needed.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

The temporary Fire Station 5 to serve SW Spokane is on Eagle Ridge Blvd at the entrance to Eagle Ridge Subdivision in SW Spokane. The permanent Fire Station 5 is anticipated to be on Cheney-Spokane Road just south of the SR 195 interchange.

Project Status

Active

The continued growth in SW Spokane has created the necessity for the construction and operation of a fire station in the area. During 2015 a facility at the entrance to the Eagle Ridge subdivision was purchased and opened as a temporary fire station. Though an agreement with Local 29, the City must permanently expand to a 3 person company serving SW Spokane before 1-1-2020. Therefore, construction of a permanent Station 5 must start no later than early 2019. The City purchased land on Cheney-Spokane Road just south of the SR195 interchange, for Station 5's permanent location. This project is for the completion of the construction and furnishing of a permanent Fire Station 5 to serve SW Spokane. Necessary apparatus & Equipment are within a separate Station 5 Apparatus & Equipment Capital Project.

External Factors

Though an agreement with Local 29, the City must permanently expand to a 3 person company serving SW Spokane before 1-1-2020.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$30,000	\$0	\$30,000

Maintenance Comments

Newer stations may be more energy efficient but they are also typically larger and have HVAC systems that continually exchange air in the building. This however may make for a safer environment for occupants it does cost more to heat/cool thus higher energy cost from typical older stations. The plus side is that over the years we have strived to construct our stations with less maintenance to operate in our choices of materials for all spaces which lowers the maintenance cost in the long run.

Asset Management/Fire**UPS (uninterrupted power supply) upgrade at the CCB**

AM-2012-439

Executive Summary

The CCB is nearing 14 years in age. The current UPS and HVAC were sized for growth but there was no knowledge of the changes in FCC rules to require a new communications system. The existing UPS system is almost at full capacity will be exceeded with the upcoming changes.

Project Justification

Once UPS redundancy has been eliminated by going over existing capacity, every time there is a temp failure on either existing unit, both unit will go into bypass. The building will then be on straight un-filtered (dirty power) from Utility Company. This could result in damages to existing electronics and every time there is a power bump (minute power loss) the entire communications system will drop off line and need to be re-booted. This is not a good situation. The current HVAC system is at max capacity at times in the summer with redundancy. With the additional loads being brought in, we will be out of redundancy even during the cooler months (not just peak of summer). The suppression system needs to be changed to an inert gas product that is non-conductive and will extinguish the fire if activated.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

This facility is located at the Combined Communications Building located at 1620 N. Rebecca.

Project Status

Active

The current UPS at the CCB is soon to run out of capacity and is over 13 years old, meaning it will soon reach its serviceable life. With the additional load from the new radio system and loads from both City MIS and County IMS there will not be any redundancy if one of the two units fail. This will have devastating effects on telephone and communications operations for the entire dispatch center for all agencies.

External Factors

The current UPS system over 13 years old and will exceed design capabilities with upcoming changes.. The existing UPS will soon exceed their useful service life, will no longer be supported from manufacturer and if we do not replace these soon, we will have serious communications and power issues at the dispatch center.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$40,000	\$40,000	\$40,000	\$40,000	\$40,000	\$0	\$200,000

Maintenance Comments

The annual maintenance on the UPS, HVAC are contracted out, the cost for the two would very likely increase overall maintenance cost for the entire building which is divided amongst all occupants (police, fire, sheriff, and 911). Costs listed are above current contractual amounts (estimated).

Asset Management/Library**Branch Remodeling - Six Locations**

AM-2016-132

Executive Summary

Utilizing the 2016 Facilities and Future Service Plan, the Library Board and City Staff will work with the community and City Council to develop a final cost estimate and identify a preferred funding mechanism.

Project Justification

The proposed service model for these 6 library locations would be changed to meet the needs of a changing community. The changes require in some locations a new physical design to support technology, engagement, learning, collaboration, business growth and overall community development. Other locations will need improvements that are less disruptive but necessary to deliver relevant and effective library services.

This project meets the following comprehensive plan goals and/or policies:

The Library is an important public service in the City core and neighborhoods. The Library is a key contributor to the quality of life of Spokane City residents.

Location

Other Location

Six locations were identified to be remodeled: Main Library 906 W. Main Ave; Eastside 524 S. Stone; Hillyard 4005 N. Cook; Indian Trail 4909 W. Barnes; Shadle 2111 W. Wellesley; Southhill 3324 S. Perry

Project Status

Active

Implementing the next phase: Community outreach regarding final cost estimating and selecting an appropriate funding mechanism. The 2016 Facilities and Future Service Plan identified the potential cost range to be between \$30 and \$90 Million. This next phase will determine what elements will move forward to the final scope resulting in a final cost estimate.

External Factors

Construction is currently proposed to begin in 2019 however the start date is dependent upon a potential public vote to create a funding mechanism such as a bond measure.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

After a final cost estimate for construction is developed, the maintenance costs can be determined.

Asset Management/Library
Collaborative Learning Space

AM-2015-56

Executive Summary

Repurpose 3,293 square feet in the third floor public space to support collaborative learning.

Project Justification

The Library continually evaluates service needs and community partnerships. A collaborative learning space will address those needs.

This project meets the following comprehensive plan goals and/or policies:

Social Health-Healthy communities embrace a complex set of factors that contribute to good health: which includes employment options, job training, quality education, cultural and recreational opportunities, This space will contribute to that goal. Also allows library to meet changing needs of city.

Location

Other Location

Main Branch - 906 W Main Ave

Project Status

Active

Planning and implementation of this project will occur in 2016

External Factors

This space is occupied by Mobius until the end of 2015. The leading factor affecting the timing of this project post-Mobius will be the lack of funding.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Asset Management/Library**Resurface Parking Lots at all Branches**

AM-2014-80

Executive Summary

Resurface parking lots at all branches

Project Justification

The parking lots have developed pot holes, cracks and need to be resurfaced.

This project meets the following comprehensive plan goals and/or policies:

The Library is an important public service in the City core and the neighborhoods. The Library is a key contributor to the quality of life of Spokane City residents.

Location

Other Location

East Side Library 524 S. Stone Hillyard Library 4005 N. Cook Indian Trail library 4909 W. Barnes Shadle Library 2111 W. Wellesley South Hill Library 3324 S. Perry

Asset Management/Municipal Court**Criminal Justice Facility**

AM-2014-64

Executive Summary

To either purchase land and construct a central facility for the Court, Probation, Prosecuting Attorney and Public Defender, or purchase land and existing structure capable of being appropriately retrofit for these services.

Project Justification

Spokane Municipal Court currently leases space in the Public Safety Building and the Courthouse Annex from Spokane County. The existing Annex courtrooms have inadequate and unusable space: (a) Courtroom size is inadequate for the amount of cases heard by Municipal Court. Dockets are usually capped at 40-50 cases. This easily results in over 100 people, including a defendant's friends and family, trying to crowd into courtrooms that were designed to hold 35-40 people; (b) The current courtrooms are approximately 600 square feet. The National Center for State Courts has established standards of 1800 square feet for courtrooms in courts of limited jurisdiction the size of Spokane; and (c) During a trial, the counsel tables cannot be configured so all parties (the judge, witnesses and the jury) can see all of the other parties, as is required. The courtrooms in the Annex are unsafe for criminal justice personnel: (a) There is no holding cell facility adjacent to the courtrooms. As such, all inmates appearing for a particular docket must remain shackled together in the courtroom. This makes it more difficult for the Transport Officers to maintain a safe distance between the inmates and the public in the gallery. Close proximity to the public in this setting increases the opportunity for inmates to have conversation or receive items from friends/family that the jail would otherwise prohibit; (b) Inmates are placed within arm's distance of the judge and prosecutor; (c) Judges' chambers have no security and can be accessed by the general public; and (d) There are an insufficient number of fire exits from the courtrooms, especially considering the amount of people appearing at the hearings. The courtrooms in the Annex compromise the safety of the public: (a) Inmates going to court must be transported through public corridors, thereby increasing the opportunity for escape or altercations with members of the public; (b) While in the courtrooms, inmates sit in relatively close proximity to the public; and (c) Prote

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Within a 6 block radius of the Spokane County Jail located at W. 1100 Mallon is ideal. However, up to a 25-block radius would suffice.

Project Status

Active

Commission a feasibility study for the development of a Criminal Justice Facility to improve the quality, capacity, and safety of the municipal court system.

External Factors

The County is reviewing its need for additional space on the county campus to house expansion of its own departments and elected officials. District Court has already requested Municipal Court relinquish some of the meager space Municipal Court has been allocated by the county. Additionally, the City's interlocal joint use agreement is of a relatively short duration and the City cannot anticipate the County will continue to allow joint use in the existing facilities based on the County's Capital Facilities Plan.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$3,500	\$8,000	\$8,000	\$0	\$19,500

Asset Management/Neighborhood Services
East Central Community Health Center
 AM-2014-69

Executive Summary

Partial support for providing access to dental care for low and moderate income families in south east Spokane.

Project Justification

This project will create better access to dental care for the community.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

East Central Neighborhood

Project Status

Active

The project is in the planning stages.

External Factors

A local FQHC has committed to leasing space within the ECCC for 7 years upon project completion to provide dental care. Additional funding for the project is being sought through a state capital grant application.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Asset Management/Parking**Parking Citation Software**

AM-2013-131

Executive Summary

Software and hardware upgrade will provide greater capacity to monitor parking trends, provide more effective enforcement and improve quality of information captured and stored by the parking team. This system will also integrate with new Smart Meters proposed in the capital plan. LPR included.

Project Justification

Our current system is dated and does not have the capability to manage the level of information as well as interact with new Smart Meter technology proposed in the capital plan. This system will enhance officer efficiency as well as improve tracking and interface capability with various departments(Parking, Courts)

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

The hardware (devices) will be housed at the parking service center and with the staff in the field. The software will be housed at the service center and backed up in the cloud

Project Status

Active

Active

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Software maintenance is completed by vendor as part of the contract. The system is hosted in the cloud and the vendor services it on a regular basis.

Asset Management/Parks and Recreation**Ops - Edwidge Woldson Park Bathroom**

AM-2012-299

Executive Summary

Currently there is no restroom facility for the Moore-Turner Garden. A restroom in this location would serve Moore-Turner Garden and the surrounding Parkland. Design completed in 2016 with construction scheduled for 2018.

Project Justification

The garden and park does not have a bathroom that is available when the Corbin Art Center is not open to the public.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Edwidge Woldson Park/Moore Turner Garden - 7th and Stevens

Asset Management/Parks and Recreation**Rec - Aquatic Center Indoor Facility**

AM-2013-72

Executive Summary

Cover existing aquatic center with a suitable indoor facility structure

Project Justification

This project will provide access to year round aquatic programming and will require a bond to fund this project.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 5, 6, 7 CFU 1, 3, 5

Location

Other Location

Witter Pool at Mission Park

Project Status

Active

Proposed

External Factors

Will need to seek bond funding for this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Asset Management/Parks and Recreation**Rec - SE Sports Complex Renovations**

AM-2012-303

Executive Summary

Complete the redesign of the SE Sports Complex. Phase 1: relocate amenities, replace restroom/concessions/storage and reorganize parking area. Phase 2: reconfigure and add to neighborhood park and trails. Phase 3: add synthetic turf fields, lighting and compete youth athletic field renovations.

Project Justification

Current design is inadequate for current use and future growth. A master plan study was completed in 2015/16 that validates these improvements.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 3, 5, 6, 7 CFU 1, 5

Location

Asset Management/Police**Additional Vehicle Storage for seized vehicles**

AM-2015-169

Executive Summary

The property room is in need of additional space for storing vehicles that the investigation unit has seized in the normal course of Policing.

Project Justification

The current location for storing vehicles is at its maximum capacity. When a vehicle is seized it must remain in the same condition as it came in. The only way to provide assurance to the courts this has occurred is by keeping is enclosed.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Next to the current property room on Alki. Property storage of seized investigation vehicles.

Asset Management/Wastewater Management**RPWRF Building Exterior Rehabilitation and Improvements**

AM-2014-112

Executive Summary

Replace and upgrade the Solids Process Building exterior, and that of a few others, including roofs, windows, insulation, snow canopies, loading docks, and stairways.

Project Justification

The Solids Process Building exterior is a metal skin over a steel framework and was originally constructed in 1975 through 1977, with a small portion replaced in 2004. It is reaching the end of its service life. Weather-caused water damage has occurred and is a great concern for the building integrity and equipment (Plant control system and solid processing system). In addition, there are chemicals and lab equipment housed in the building that are becoming at risk. A number of associated smaller buildings, of similar age and condition, are also need exterior rehabilitation.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

Proposed for 2021, this project is in the planning phase.

External Factors

This project was deferred in 2013 due to funding constraints.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Asset Management/Water**Upriver Building Brickwork**

AM-2013-162

Executive Summary

Depending on the findings of the structural evaluation of the previous year, it is anticipated that repairs will be needed at the Upriver Complex. The type and extent of those repairs will not be known until the study is conducted.

Project Justification

The buildings that make up the control complex, as well as the Well Electric well station, have deteriorated over the decades to the point where their structural integrity is in question.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Upriver Dam

Project Status

Active

Construction will begin in 2018.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

CRIMINAL JUSTICE DEPARTMENT SPOKANE CITY PROSECUTOR'S OFFICE

FOR PROJECTS SEE UNDER ASSET MANAGEMENT

Spokane City Prosecutor's Office

Department Goals

To promote justice and protect the people of the City of Spokane by fairly prosecuting those who violate the law. This office acts in concert with other agencies and organizations to maintain a just, safe and orderly community.

Contact Information

Justin Bingham 835-5994

Name	Title	Telephone	email
Justin Bingham	City Prosecutor	835-5994	jbingham@spokanecity.org
Kristin O'Sullivan	Chief Assistant	835-4526	kosullivan@spokanecity.org

Services Provided

Operating under statutory mandate to prosecute criminal misdemeanors, criminal gross misdemeanors and civil infractions occurring in the City of Spokane, the City Prosecutor's Office handled 7,560 new criminal misdemeanor cases and approximately 5,000 infraction cases in 2015.

With the assistance of support staff, prosecutors evaluate and file charges, investigate facts involved in the cases, interview and subpoena witnesses, produce discovery demands and responses, negotiate resolutions with opposing counsel and prepare for trial as needed in each case. The average caseload of 850 new criminal cases per year for trial court prosecutors is one of the highest in the state. In addition, our appellate attorney represents the City in approximately 50 to 100 appeals annually.

In order to successfully respond to the rise in property and domestic violence related crimes and to manage a regularly reduced budget and full-time staff, the office has implemented significant operational changes and actively initiates and/or participates in cooperative programs with other agencies. An example of this cooperation is the Community Relicensing Program which responds to over 4000 client inquiries per year and is housed in our office.

Background

Prior to the 1997 remodel of the building, both the City Prosecutor's Office and the City Public Defender's Office shared the office area of a first story of the building. The addition of the second floor allowed the Prosecutor's Office to reside on the second floor while the City Public Defender's Office occupied the first floor.

The first floor of the building was defined with attorney and staff offices having walls. The second floor of the building does not have defined offices or walls for staff and attorneys. This presents a significant challenge to our staff and attorneys who must maintain confidentiality on each case while interviewing officers, crime victims, witnesses and negotiating with defense counsel.

The City Prosecutor's Office houses the City Prosecutor, Chief Assistant Prosecutor, eleven Assistant Prosecutors and six clerks as full time employees. In addition, the office regularly houses two County staff for the Community Relicensing Program, two Rule 9 interns for our infraction dockets, and law student externs for special projects.

Level of Service Standard

The level of service standard for the City Prosecutor's Office is to provide efficient prosecution of criminal misdemeanors, gross misdemeanors and civil infractions within the Criminal Justice System in response to the state mandate and the public's expectation that safety is a quality of life that is valued and maintained in Spokane.

Spokane City Prosecutor's Office Project Reports

SPOKANE FIRE DEPARTMENT

Spokane Fire Department

Department Goals

The Spokane Fire Department's Goal is to serve the community by protecting life, property and the environment. SFD strives to provide excellent service through prevention, education, preparedness, and mitigation, recognizing that their people are the key to success.

Contact Information

Name	Title	Telephone	email
Bobby Williams	Fire Chief	625-7001	bwilliams@spokanefire.org
Brian Schaeffer	Assistant Fire Chief	625-7002	bschaeffer@spokanefire.org
David Stockdill	Division Chief	625-7080	dstockdill@spokanefire.org

Services Provided:

The Spokane Fire Department (SFD) responds to over 39,000 calls each year ranging from fire fighting and medical aid to auto extraction, special rescue situations and hazardous materials incidents. SFD provides response services from 16 stations located strategically throughout the city staffed by approximately 61 personnel each day on 19, emergency response apparatus. Special teams and skills provided by response personnel include Confined Space Rescue, Swift Water Rescue, Hazardous Materials, Trench Rescue, Technical Rescues, Terrorism, Paramedic Training, and Auto Extraction.

SFD's CARES program operates in concert with EWU's School of Social Work to use student interns to link patients of station personnel's responses, to social and other community programs that can provide them needed assistance. This program has not only helped to reduce repeated 9-1-1 calls, but has aided those in need by getting them in touch with existing programs that can provide them help in a number of ways.

Besides emergency responses the Fire Department provides a number of other services to the public. There is significant fire prevention and life safety work through: Community Risk Reduction Programs, Life-Safety Related Code Enforcement and Development, Permit Issuance, Special Event Planning, Construction and Building Inspections, Life Safety System Records Management, Business License Fire Inspections, Permitting, Planning, Rapid Entry Systems and Fire Investigation.

The Combined Communications Center (CCC) also provides Fire and Emergency Medical Dispatch services to all fire agencies in Spokane County through a contractual arrangement. The CCC receives calls through the county-wide 9-1-1 system and dispatches over 68,000 calls per year.

Internal divisions within the Fire Department include:

The Training division who works to ensure competent and highly trained firefighters. SFD Training facilities provide a variety of training opportunities for not only City personnel, but for others throughout the region.

The Integrated Medical Services Division is tasked to lead and manage the medical systems necessary to provide quality pre-hospital basic life support and paramedic level critical care including the management and oversight of the 9-1-1 ambulance transport contract as well as participation in the coordination of the overall community EMS system.

The Logistics division provides maintenance services for all response apparatus and equipment used by response personnel as well as oversees SFD's 21 facilities.

The Planning and Information Management division is the provider of critical information technology services for the entire Fire Department with key responsibilities including functionality of the computer aided dispatch (CAD) and other systems necessary to provide contract dispatching services.

Background

The Spokane Fire Department began as a volunteer fire department in 1884. As a result of the Great Fire of Spokane that occurred in the summer of 1889, the City of Spokane City Council established a paid fire department on December 18, 1889. On August 22, 1893, the city council passed an ordinance officially naming the department, "A department of the city government is hereby created and established to be known as the Fire Department of the City of Spokane."

Level of Service Standard

Fire Department response time objectives to be accomplished 90% of the time are as follows:

- 8 min 30 sec for the first arriving fire engine at a priority fire suppression incident.
- 8 min 30 sec for the first arriving fire department medical unit at a priority medical incident.
- 8 min 30 sec for the first arriving SFD paramedic unit at a priority medical incident.
- 11 minutes for the arrival of the full first alarm assignment (16 personnel) at a structure fire.

Fire/---**Apparatus & Equipment for Permanent Station 5 - SW Spokane**

SFD-2015-155

Executive Summary

Permanent Fire Station 5 is scheduled to open 1/1/2020. It will require apparatus & equipment. This project is for the purchase of an Engine, PPE, EMS Equipment, Radios, etc for the new station.

Project Justification

To provide emergency response apparatus and equipment for each additional fire station added to the City/FD service delivery system so the assigned personnel can provide services. The FD does not have extra apparatus and equipment to place in added fire stations. Anticipate Apparatus purchase in 2018 & Equipment purchases in 2019.

This project meets the following comprehensive plan goals and/or policies:

Public Facilities and Services under the Growth Management Act and Goals and Policies

Location

Other Location

Apparatus would be located at the newly built station where the additional service occurs.

Project Status

Active

It will be necessary for the City to acquire the following for Station 5: 1. Emergency response apparatus (Engine and Brush units) & Equipment 2. Self Contained Breathing Apparatus (SCBA) 3. Personal Protective Equipment (PPE – fire coat, pants, boots, helmet, etc) for each of the new person to staff the station 4. EMS equipment 5. Radios. Note: The Engine Purchase costing for Station 5 is included in the Large FD Response Apparatus Project plan anticipated to be funded through SIP dollars.

External Factors

Determination by City's policy makers that an additional fire station would be added to the City/ FD service delivery system. Voter approval of a Fire Bond issue if policy makers choose said method for funding.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$25,000	\$25,000	\$25,000	\$75,000

Maintenance Comments

Annual maintenance cost include: vehicle maintenance/ fuel/ tires.

Fire/---**Equipment for Stations/Training and Fire Dept. Facilities**

SFD-2012-449

Executive Summary

In addition to equipment necessary for response to emergencies, there are equipment needs at FD facilities to support the response to calls for help. Anticipated 2017 purchases include: computer equipment to support response functions within the FD.

Project Justification

Computer equipment is necessary during and after responses and to deal with day to day station and division operations.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

The central location for staging purposes will be at 1610 N. Rebecca. The actual locations are spread throughout the City.

Project Status

Active

Besides equipment necessary for response to emergencies, there are equipment needs at FD facilities to support the response to the communities calls for help. Computer equipment for personnel to complete reports/ training/ etc is an example of this equipment.

External Factors

Other than funding, none at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Fire/---

Equipment needed for Fire Department Incident Response

SFD-2012-451

Executive Summary

Equipment used for FD Incident response must be updated regularly. 2017 Purchases to include: Equip for newly purchased apparatus-1 Ladder,1 Rescue; Equip for Brush Trucks & Specialty Teams-HazMat/Water/Tech; MDC's for apparatus; Air Compressor for Station 1; & Intersection Pre-emption equipment.

Project Justification

Upgraded equipment used on incident responses is essential to meet standards and for the safe and efficient operation by fire fighters on fire and medical incidents.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

Equipment will be distributed to all FD vehicles that respond to emergency incidents and street intersections where Opticom lighting controls will be installed.

Project Status

Active

There is a wide variety of equipment needed by FD emergency response personnel to provide service on fire and medical incidents. This equipment must be regularly upgraded to meet standards and to ensure safe and state-of-the-art operations for fire fighters. This project includes a broad spectrum of equipment. Equipment includes but is not limited to: Hose; Nozzles; Thermal Imaging Cameras; Saws; Extrication tool; Air bags; Opticoms; radio equipment; air compressors; equipment for Specialty teams; MDC and Safety Pad computers; etc.

External Factors

Given the hazardous environment in which it must operate, equipment used by fire fighters during incident responses can be easily damaged or lost. This equipment must be replaced or upgraded for all front line and front line reserve FD units. SIP/Bond dollars are needed to fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$4,000	\$4,000	\$4,000	\$4,000	\$4,000	\$0	\$40,000

Maintenance Comments

There is a multitude of pieces included in this request which a lot of them require annual preventative maintenance and ongoing repairs.

Fire/---**FD Apparatus Rehab/ Update-Engines-Ladders-Rescue-Brush-etc.**

SFD-2013-191

Executive Summary

The majority of SFD response apparatus have many years and miles on them. It is necessary to refurbish apparatus to ensure safety for responders and extend the apparatus useful life. It is anticipated that the chassis of one of the FD's Brush Trucks will be converted during the next period.

Project Justification

Reliable current front line apparatus will be moved to a front line reserve status upon the purchase of new apparatus. These apparatus need to be updated to stay current with NFPA standard changes since the trucks were originally built. This also provides additional life with the trucks as in the past; we extended usage for approximately 5 to 7 years.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU6

Location

Other Location

Throughout the Fire Department/ City.

Project Status

Active

This project funds the upgrade of fire apparatus to improve their functionality and performance capability. The FD has 19 front line apparatus, multiple cross staffed apparatus plus front-line reserve Engines and Ladders that are relied upon to provide response services on a routine basis. While the most dated/ unreliable apparatus will be replaced, the FD must maintain a number of existing apparatus as front-line reserve apparatus to fill in when front line units are out of service.

External Factors

L & I rules and NFPA standards require the safe operation of apparatus and equipment used by FF. These provisions are constantly monitored by L & I. Lack of availability of front line reserve apparatus can result in the FD/City not having units to respond and thus impacts service delivery.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2016	2017	2018	2019	2020	2021	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Average annual maintenance cost for larger units is approximately \$20,000 per year. This cost includes fuel, maintenance, tires, etc.

Fire/---

FD PPE - Personal Protective Equip-Structural-Wildland-Teams

SFD-2012-444

Executive Summary

PPE-Personal Protective Equip is essential for responder safety. Approx 65 sets of Structural PPE will be purchased on an annual basis. Additionally, Wildland gear will purchased over the next 3 years to replace gear obtained through grant. Annual replacement of Specialty Team gear will also occur.

Project Justification

There must be an adequate number of sets of PPE for all uniformed personnel who respond to emergencies. PPE replacement is being scheduled annually to avoid large lump sum expenditures.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU6

Location

Other Location

This equipment is necessary for all uniformed personnel who respond to emergencies and would be distributed throughout all 15 fire stations.

Project Status

Active

In order to maintain PPE for all FD response disciplines, each year a certain number of sets have to be replaced. This includes approximately: 65 sets of Structural PPE (coats/pants); 30 sets of Structural support PPE (Helmets,boots,bailouts,etc); plus Wildland; and Special Team gear (Haz Mat;Water;Tech).

External Factors

WA state L & I standards require the FD to provide PPE that meet NFPA standards. Failure to do so exposes the City and FD to fines and financial risks. Bond funding is the only mechanism to fund this project in the future.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$5,000	\$5,000	\$5,000	\$5,000	\$0	\$0	\$40,000

Maintenance Comments

Turnout gear is required to be inspected semi annually and tested annually, which requires handling over 600 sets of PPE twice a year. This is very time consuming and expensive if failures require replacement of the entire ensemble or individual sections

Fire/---

Fire/---**Large FD Response Apparatus**

SFD-2012-362

Executive Summary

Replacement of Large Fire response units needs to be on a scheduled program. If replaced on a schedule, large response apparatus dependability can improve & overall fleet on-going maintenance costs can be stabilized. A Ladder and Rescue are scheduled for replacement in this period.

Project Justification

This Category is for Large Response Apparatus - Engines; Ladders; Pumper-Ladders; Rescues. In order to have reliable apparatus for emergency response, the City needs to replace response vehicles in a timely manner. These apparatus become more and more unreliable with every year/mile that goes by. The Fire Department provides excellent preventative maintenance, but that can only go so far. Additionally NFPA (National Fire Protection Association) Standards for fire apparatus continue to change and over the typical life of existing SFD apparatus, most SFD apparatus can no longer comply with current standards.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

These are located throughout the city at various fire stations.

Project Status

Active

Last period, 3 Engines and several small vehicle replacements occurred. One Ladder and one Rescue unit along with small vehicle replacement are scheduled in the upcoming period.

External Factors

Large FD Response apparatus replacement is anticipated to be funded SIP funds therefore availability of funds necessitates spreading the replacement schedule over several years. Typically it takes approximately a year to spec, bid, build, receive, prep for service and train on a new apparatus before it can go in service. It will be approximately 2023 before all critical large apparatus are replaced.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$20,000	\$30,000	\$20,000	\$30,000	\$20,000	\$0	\$240,000

Maintenance Comments

Average annual maintenance cost for larger units is approximately \$20,000 per year. This cost includes fuel, maintenance, tires, etc.

Fire/---**SCBA - FD - Self Contained Breathing Apparatus Replacement**

SFD-2016-117

Executive Summary

SCBA's are required for all personnel who enter IDLH (Immediately Dangerous to Life or Health) environments. Therefore all fire response apparatus must have SCBA's. All SCBA's and accessories must be replaced before the 10 year anniversary in 2020 necessitating purchase in 2019.

Project Justification

NFPA 1981 is the Standard for Open Circuit Self-Contained Breathing Apparatus for Fire and Emergency Services that must be followed in accordance with State L & I standards. In accordance with the standard, SCBA life is 10 years.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

SCBA's are located on all fire response apparatus throughout the City.

Project Status

Active

Current SCBA's were purchased with 2009 Fire Grant funds and were placed in service in 2010. By NFPA standards, SCBA's must be replaced within 10 years so current SCBA's will need to be replaced before the 10 anniversary in 2020.

External Factors

Failure to replace SCBA's within the 10 year life could be considered an L & I violation and could prevent SFD from sending personnel into an IDLH environment to extinguish fires.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Fire/---**Small FD Response Units - BC-ARU-Brush-Staff-SIU-etc.**

SFD-2012-442

Executive Summary

Replacement of Fire response units needs to be on a scheduled program. If replaced on a schedule, response apparatus dependability can improve and overall fleet on-going maintenance costs can be stabilized. One pickup used in an emergency response capacity is scheduled for replacement this period.

Project Justification

This Category is for Smaller Response Apparatus - BC units; ARU's; Brush units; SIU vehicles; Staff response vehicles, etc. In order to have reliable apparatus for emergency response, the City needs to replace response vehicles in a timely manner.

This project meets the following comprehensive plan goals and/or policies:

CFU1 CFU2 CFU4 CFU5 CFU6

Location

Other Location

These vehicles would be located at different fire stations and FD locations throughout the city.

Project Status

Active

One pickup used in emergency response capacity is scheduled for replacement in the upcoming period.

External Factors

An agreement with Local 29 for continuing the ARU program impacts the operation of ARU's.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Anticipated annual maintenance cost for Smaller vehicles is approximately \$5000. This cost includes: fuel; maintenance; tires.

FLEET SERVICES

NO PROJECTS THIS YEAR

Fleet Services

Department Goals

Our mission is to establish efficient and effective delivery of City services by providing Customer departments with safe, reliable, economical and environmentally sound transportation and related support services that are responsive to their needs and that conserve vehicle value and equipment investment.

Contact Information

Gene Jakubczak, Director

Name	Title	Telephone	email
Steve Riggs	Assistant Director	625-7706	sriggs@spokanecity.org
Jane Nordling	Fleet Specialist	625-7778	jmnordling@spokanecity.org

Services Provided

The City Fleet Services Department provides maintenance services for all City-owned vehicles and equipment with the exception of the Fire Department's assets. The department manages a robust preventive maintenance program for motorized equipment, and makes both major and minor repairs as required. Fleet Services also furnishes technical information and prepares specifications for vehicles and equipment purchased by the City, and maintains a replacement fund to finance the replacement of equipment for the Street Department. The department has a budget of \$12.8 million and a staff of 36 fleet professionals.

- Vehicle maintenance and fleet management services are provided at the newly built Spokane Central Service Center (SCSC) for 1350 vehicles and equipment for Police, Refuse, Streets, Parks, Sewer Maintenance, Water, and several other departments, including 140 vehicles in the Washington State Motor Pool.

- Fleet Services also operates three state-of-the-art fueling facilities. Our Broadway and Normandie fueling stations provide nearly one million gallons of fuel (unleaded and diesel) annually to City vehicles and equipment. The Broadway site also proves an equipment washing facility, which is environmentally friendly and open 24 hours per day. The third site, located at SCSC, is a time-fill Compressed Natural Gas (CNG) site which provides CNG to 20 refuse trucks, currently.
- Our Communications shop maintains seven communications sites, the radio infrastructure, and all hand-held and vehicle mounted radios for the City's Public Works Division.

Background

The Fleet Services Department was established in 1961 as an internal services fund. The department recovers 100% of its budget through charges to other city departments (and other governmental agencies) for services provided. The department is centrally located at The Spokane Central Service Center.

Level of Service Standard

The level of service (LOS) for Fleet is to ensure that our customers, other using departments, have the vehicles and equipment they require to safely perform their function when they need it, and at a reasonable cost. Nearly every City of Spokane department relies on Fleet Services to keep vehicles and equipment ready to serve its citizens. The services provided enhance the safety of our community.

Fleet Services Project Reports

INFORMATION TECHNOLOGY

Information Technology (IT)

Department Goals

Our goals are: 1) Deliver innovative and effective technology solutions, tools, and services to the departments, agencies, and citizens of the City of Spokane, 2) Provide outstanding customer service to City staff and the citizens we serve, and 3) Provide strategic and tactical planning and project management to enable cost effective technology solutions for today and the future needs of the City.

Contact Information

Eric S. Finch, Chief Information & Technology Officer (CITO)

Michael A Sloon, Director

Name	Title	Telephone	email
Shelley McCarrey	Clerk III	625.6474	smccarrey@spokaneCity.org
Michael A Sloon	Director	625.6468	msloon@spokaneCity.org
Eric S Finch	CITO	625.6455	efinch@spokaneCity.org

Services Provided

Technology Strategy and Business Integration: Develop and maintain a consistent technology strategy and systems road map that supports the current and future needs of the City Departments. Integrate technology efforts across the City to reach greater efficiencies and leverage resources to focus more effort on innovation. Implement long term and capital planning of technology assets through Smart City, Open Data, and other strategic initiatives. Develop partnerships with each Division and Department to ensure their strategic plans and initiatives help shape and build an integrated technology platform that gives significant information access and business control over their systems and data assets.

Project Management: Develop and implement a formal project management culture within the IT enterprise and for our external partners we enable through technology. Formalize processes and procedures to ensure that business process analysis is a fundamental step in the project lifecycle and implement a project and value based approach to selection and prioritization of projects and tasks. Ensure that the cost-benefit analysis is measured during projects and cyclical reporting is maintained to keep all stakeholders informed and invested in the project process.

IT Support: IT Support continues to evolve to a more customer service oriented model and position IT as a trusted service partner within our organization. Customer service orientation will continue to grow through service level agreements, a service catalog approach, and more deployed and visible support resources throughout the City. The Help Desk continues its role as nexus for IT and customer service into the organization, and provides a greater role moving forward in training, technology acquisition, and performance management.

Applications: This group provides direct application support and consulting services in the acquisition, implementation, and maintenance of the computer systems that support business operations across all City departments (i.e. HRMS, Utility Billing, Permits, and Financial Systems). To provide services that meet and exceed the requirements of City departments and be cost-effective, the Applications group must:

- Use formal project management methodologies to ensure project success
- Maintain well-trained staff with excellent leadership, technical, and communications skills
- Match business process improvement with enabling technology solutions on all projects
- Ensure our customers and citizens are the focus of new innovations in technology
- Proactively anticipate changes in technology that will affect City systems and users

Web: In support of the Web Communications development team, provide resources to enable technology and information delivery across a variety of internal and external portals to include Open Data and Information Management initiatives. The goal is to provide more internal and citizen facing information in an easy to use format.

GIS: GIS is critical to supporting many lines of business for the City of Spokane including public safety, engineering, water and wastewater, infrastructure management, permitting, planning, code enforcement, emergency services, growth management, street maintenance, crime analysis, solid waste and others. GIS is a growing platform for the City and regionally to improve service delivery and business operations through better geographic information for decision making. In addition, the integration of map based information with the City's business systems helps improve overall customer service, enhance workflows and streamline the organizations business processes.

Network: The Network team provides support of the City's data, voice and video networks and services that enable internal and external interaction in a secure environment. It enables City employees to collaborate with each other and their regional, state and federal colleagues, and allows communication between citizens and the City's departments and that provide services to them 24 hours a day. These networks include fixed, mobile and IP communications that allow internal and external users to access applications, information and services in a secure and reliable manner. Our strategic goal is to provide increasing services and expertise to integrate technology platforms across all departments in the City and with regional partners as we continuing to invest in information security and network technologies that can be delivered in a timely and cost effective manner.

Enterprise Administration: This area provides high level systems administration and integration to the entire City. This group is responsible for our highly virtualized environment, deploying and maintaining more than 200 servers and hardware appliances, and administration of all accounts on the network. Through a diverse knowledge on computer systems and architecture, they provide enterprise level applications for email, file servers, print services, security policy, data archiving, internet security, PC mobility, security certificates, FTP, application licensing, messaging and video conferencing. The Enterprise team monitors and maintains the health of these services 24/7 in order to ensure the reliability and sustained operation of systems to the City of Spokane's facilities and staff.

Both Enterprise and Network teams continue to dedicate more time to safeguarding City systems and data based on increasing risk and threats to information security as the City continues to invest more time, budget and technology into this area in cooperation with regionally, State, and Federal authorities.

Data Center: Data Center Services includes support for enterprise data storage, printing, data backup, data recovery, disaster recovery, offsite storage, servers administration, data transfer/processing, data security, building security system, building camera systems and Data Center management. Data Center IT Operations provides a secure environment, maintains high availability systems, and the secure transfer of data. The data must be accessible, secure, and archived to ensure ongoing business functionality 365 days a year. Data Center Operations staff monitor, measure, and manage data center efficiency to achieve lower operating expenses. Data Center Operation protects data and systems within restore, backup, and disaster recovery requirements and ensuring off-site copies can be brought online on time. The objective is to provide four 9's (99.99%) reliability, less unscheduled downtime per year and meet business requirements while getting the most for the public dollar.

Mail Center: The Mail Center accepts and distributes all incoming and outgoing mail services for City Departments. The Mail Center has knowledge of regulations and standards required for all mail and packages to and from the United States Postal Service, Federal Express and UPS for the City of Spokane. The Mail Center inserts, meters, and trays Utility Bills on a daily basis. All Payroll and Retirement payments are sealed, presorted, and metered if needed. The Mail Center processes monthly presort standard mailings, which involves some, or all of the following functions: tabbing, sealing, addressing, packaging, sacking/traying and delivering to the USPS processing plant. Quality and customer service is the focus of the Mail Center. Mail handling and internal distribution will be accomplished at or less than market rate.

Open Data (Strategic Initiative): The Open Data and transparency challenge is to increasingly provide open access to data from hundreds of government systems and services in a meaningful way to engage the public and better inform. A new approach is planned that delivers three distinctive information consumption patterns; visualization, bulk data download, and a highly interactive middle tier data environment. Working with all City stakeholders to prioritize data to make increasingly available, this approach will focus on the most requested

information and questions the City is asked externally and internally. This three tier approach is engineered to use data to both better inform, help tell the larger story meaningful to that individual citizen looking for information, and link the open data user to other City resources and services.

Resiliency (Strategic Initiative): Resilience is the capacity of individuals, communities, institutions, businesses, and systems within a city to survive, adapt, and grow no matter what kinds of chronic stresses and acute shocks they experience. Working with all City Divisions and regional partners, the City develops and maintains a robust emergency management and business continuity framework and plan that is citizen focused and integrates effort across City Divisions and regional partners. The outcome is creation of an environment that better supports citizens all the time across a broad spectrum of services resulting in greater stability and growth including during times of critical events or crisis.

Information Technology Project Reports

Disastery Recover Site and Equipment

IT-2015-26

Executive Summary

Integration and co-use investment on CCB computer room to run critical non-public safety City systems in the event that central IT computer room and systems are unavailable. 2016 effort includes redundant racks, servers, data storage, and incremental UPS and power generation equipment.

Project Justification

The City currently has limited Public Safety and Utilities disaster recovery capability and no capability for other City services that could be deemed essential in an emergency.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.1 Service levels CFU 1.2 Operational efficiency CFU 3.4 Manmade and natural disasters

Location

Other Location

In existing Combined Communications Building computer room facility located at the Fire Training Center complex.

Project Status

Active

Initial feasibility determined capacity exists for next 3-5 years. Next steps are to set basic systems infrastructure and then build out contingency services in a priority order to be defined.

External Factors

Capacity to use current CCB computer room is in review (initial feedback is that space is available, but expanded use may require additional power and UPS/back-up generation requirements) - Commitment of other agencies for expanded use may require decisions and/or additional funding as required.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$75,000	\$75,000	\$75,000	\$75,000	\$75,000	\$75,000	\$1,350,000

Maintenance Comments

- IT and Finance are looking at funding investment options using the MIS Capital and reserve funds as the initial source and allocation of ongoing continuity costs by departments based on need. - Analysis completed between multiple agencies that capacity of current CCB computer room and expected growth needs over next 5 years allow for initial use with certain facilities costs required. Expansion needs past five years part of a Cloud services strategy that will require less on premise continuity requirements. Current feedback from a budgeting perspective is the costs of additional infrastructure (larger UPS, power generation, utility infrastructure) would be similar in cost to building/expanding the facility (According to SFD Facilities estimate) - Spokane County actively wants to use the CCB facility as part of their Disaster Recovery plan and discussions have started but stalled on cost sharing as part of the overall CCB COOP discussion. County/City governance committee has directed combined/regional use and cost sharing subject to plan and budget approval details.

Information Technology/Data Center

Datacenter computer hardware replacement

IT-2015-143

Executive Summary

Annual replacement of computing hardware based on end-of-life (EOL) support from the vendor or the hardware has reached its useful value.

Project Justification

Computing hardware must remain adequate to meet the compute needs of the business applications/departments, vendors will not support EOL equipment, and the hardware has a calculated life-span of 5 - 7 years.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

City-wide

Project Status

Active

Annual hardware replacement

External Factors

Although we plan for a 5 - 7 year replacement schedule, we attempt to extend the replacement schedule if the hardware still meets the needs of the business and the vendor maintains support.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Information Technology/Network

Fiber network infrastructure

IT-2013-6

Executive Summary

To provide high performance network connectivity, redundant routing, and high availability of service to the City of Spokane's departments and agencies.

Project Justification

Many locations within the city are not serviced by high-speed network providers, and we only install the infrastructure when the cost to do so is lower than commercially provided networking.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Through out the City of Spokane

Project Status

Active

City IT installs network conduit through out the City of Spokane as the business need or opportunity occurs (when the Street Department has the road surface open for repair or construction).

External Factors

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Added two additional out years based on supporting Smart City and Wireless Broadband initiatives. Added \$50K to 2016 for additional fiber infrastructure for RFP and wireless access point initiatives.

Information Technology/Software

Software Capital Replacement Fund

IT-2016-159

Executive Summary

Develop software capital replacement fund for systems replacement plan and roadmap for the City to include needed system updates, replacement, and integration of other systems within the City.

Project Justification

The City has no current financial vehicle to fund new or replacement software initiatives. This would use the same methodology in place for hardware capital replacement based on application consumption within the City. Without this funding capability, the City will have to look at alternative funding (SIP, loan, reserves) for any major software application purchase.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

City-wide

Project Status

Active

Software capital replacement fund to build funding capability across the City for systems replacements and enhancements. 2017 Budget year will reduce and use 50% of the hardware capital fund allocation dollars to start this capital fund.

External Factors

Any significant new systems need would require a new investment and funding strategy. In the next three years, major updates to the Financial Management System, Utility Billing, and Courts Administration system are all expected and all may represent over \$1M purchases or upgrades.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Software replacement fund; maintenance would be a separate OPEX requirement based on the system acquired.

SPOKANE PUBLIC LIBRARY

Spokane Public Library

Department Goals

The programs and services the library offers are guided by the library's mission statement:

Spokane Public Library delivers high quality education for all—opportunities to read, to learn, and discover the world.

In accomplishing our mission, we keep in mind certain values that contribute to creating an open and welcoming place where all people can use the services of the library freely. We value:

- Free and open access to education and information
- A culture that fosters creativity and innovation
- Teamwork and collaboration
- The diverse nature of our community
- Responsible stewardship of public funds

Our 2014 – 2018 Strategic Directions always guide our work which was approved by the Library Board of Trustees. Library staff engaged in a planning process that resulted in this five-year strategic directions and goals. There are three primary directions for the library:

STRATEGIC DIRECTION: Empower our citizens to help our community succeed

Goal: Inspire a community of readers

Goal: Expand citizen access and knowledge of emerging literacies and technologies

Goal: Be the resource for free learning opportunities for citizens of all ages so they can achieve their personal and professional goals

STRATEGIC DIRECTION: Build partnerships for a greater impact on citizen's lives

Goal: Be an engaged community partner

Goal: Collaborate to expand access to community expertise for customers

Goal: Meet customers and partners when and where they are with the information they want

STRATEGIC DIRECTION: Become an organization of growth and innovation

Goal: Remain relevant and vital through continuous learning

Goal: Transform our libraries to meet local needs of our customers and community

Goal: Share the library messages widely

Services Provided

Spokane Public Library provides lending library services, programs and classes to nearly one million visitors a year. Over two million items are borrowed from the libraries each year. Other services include:

1. *Self-Directed Education*—early, adult & digital literacy through our collections of items in print, audio, video, and digital formats, specialized online research tools, historical collections and educational tools;
2. *Small Business and Workforce Support*—increase workforce skills and strengthening the small business sector through high-quality business information resources, training, and workshops;
3. *Outreach to Seniors and Youth*—a youth outreach worker delivers early literacy classes to children in Head Start and ECEAP childcare centers around the city. A deposit collection is checked out to many childcare centers so the children have books to read. Library service is brought on site to more than 40 senior and assisted-living centers in Spokane delivering access to educational and enrichment materials to those that would not have it otherwise;
4. *Research and Instruction*—professionally trained staff enable citizens to find reputable and reliable sources of information via professional assistance, classes and events;
5. *Computer access and Wi-Fi service* – all of the libraries provide Internet computers, technical assistance and Wi-Fi for library customers;
6. *Meeting Rooms*—available for use (free) to groups for open, public meetings.

Background

Spokane Public Library was first established in 1891 (in City Hall) with its first dedicated building opening in 1905. Service expanded to include branch locations throughout the city as well as bookmobile service. Traditional lending library service as well as early childhood literacy classes for children, educational programs for adults and research assistance have always been staples of the service provided to citizens. Additionally, the libraries have been a place where citizens gather for meetings or for enrichment through discussion of current events and the historical and cultural materials presented in the library. The library has always been free and open to the public. Currently there are six physical locations in the City of Spokane: Main Library (Downtown), 906 West Main Ave, new building opened 1/94, (previous building on same location from 1963); East Side Branch Library, 524 S. Stone, opened 12/95, (previously in East Central Community Center); Hillyard Branch Library, 4005 N. Cook, opened 1/94, (previously in NE Community Center); Indian Trail Library, 4909 W. Barnes, opened 3/98; Shadle Library, 2111 W. Wellesley, opened 3/97, (previously in Shadle Shopping Center); South Hill Library, 3324 S. Perry, opened 1/96, (previously in Manito Shopping Center). In addition to the library's physical locations, Spokane Public Library has a long history of outreach to the community through school, daycare, senior center and business visits by librarians. Additionally, a robust and growing digital collection is offered from the library's website.

Level of Service Standard

Spokane Public Library provides avenues for citizens to improve their digital literacy skills by keeping up with technology standards and offering materials in digital formats. Classes, training and one-to-one customer service for citizens allows them to build skills. Spokane Public Library strives to provide materials quickly using a holds ratio of 3:1. This means that when an item is in high demand we review the number of requests (holds) and if there are more than three holds per copy we purchase additional copies. Customers may submit purchase requests and many are honored; for those that aren't, we seek the materials from other libraries with inter-library-loan (ILL). We answer customer calls promptly and for reference questions complete the request within 48 hours (most are answered on the same day). Today's public is used to fast service in many arenas and we try to provide that at the library as well. We also pride ourselves on creating a pleasant and welcoming environment that goes the extra step to help people find what they need.

Library/---

Facilities Van replacement

LIB-2016-158

Executive Summary

Replacement for maintenance van. Primary transportation and mobile workshop for preventative and necessary maintenance operations at all library properties.

Project Justification

Current van is approaching end of useful life. Given multiple locations of properties, a form of transportation with the necessary tools and equipment provides an effective and efficient means of maintaining all properties in good working condition.

This project meets the following comprehensive plan goals and/or policies:

The Library is an important public service in the City core and neighborhoods. The Library is a key contributor to the quality of life and the continuing education of its citizens.

Location

Other Location

All properties of Library system.

SPOKANE MUNICIPAL COURT

FOR PROJECTS SEE UNDER ASSET MANAGEMENT

Spokane Municipal Court

Department Goals

Spokane Municipal Court serves our community by protecting constitutional guarantees while impartially upholding and interpreting the law and providing open, just and timely resolution of all matters.

Contact Information

Howard Delaney, Court Administrator, 625-4450, hdelaney@spokanecity.org

Name	Title	Telephone	email
Shelley Szambelan	Presiding Judge	625-5867	sszambelan@spokanecity.org

Services Provided

Spokane Municipal Court provides for the filing, processing, hearing, and adjudication of criminal cases (including domestic violence, traffic and non-traffic), civil infractions, and parking infractions issued within the city limits. Spokane Municipal Court processes approximately 6,000 criminal cases, 25,000 civil infractions, and 65,000 parking infractions annually.

Background

Spokane Municipal Court began operation on January 1, 2009 and currently leases two locations on the Spokane County Courthouse Campus. Four courtrooms, judges' chambers and a judicial secretary office are located on the 2nd floor of the Courthouse Annex. The Clerk's Office is located on the 1st floor of the Public Safety Building.

The Clerk's Office employs 33 clerks who perform a wide variety of duties including customer service via the phone or in person, collection of money, data entry into the statewide Judicial Information System (JIS), the Court's case management system (JustWare), the ATS photo enforcement case management system, and parking ticket program (Duncan), preparing court files and dockets, and assisting judicial officers in court. The Clerk's Office provides information and assistance to citizens, attorneys, state and city agencies, defendants and others who are involved or otherwise have an interest in cases filed in Municipal Court.

The Clerk's Office receives more than 10,000 pieces of mail annually which must be opened, reviewed, sorted and processed according to state, city and court policies. On an annual basis, the cashiers in Municipal Court receipt over 17,000 individual payments for criminal cases (most in \$25 increments) that results in over \$400,000 in General Fund revenue. The cashiers also receipt over 100,000 individual payments related to infraction payments (most in \$25 increments) which results in over \$3 million in General Fund revenue per year.

Judicial officers assigned to Municipal Court preside over a large variety of hearings types including arraignments, pre-trial hearings, jury trials, no contact hearings, treatment reviews, bench warrant recalls, show cause hearings, contested and mitigated traffic, non-traffic and parking dockets. Three judges preside over criminal misdemeanor and civil infractions on the Saturday traffic docket. There are two court commissioners who are assigned to preside over infraction (including parking) contested and mitigated dockets. Criminal dockets are quite large and frequently the judge and court clerk will process 40-70 cases in a single morning or afternoon session.

Spokane Municipal Court Project Reports

NEIGHBORHOOD SERVICES

FOR PROJECTS SEE UNDER ASSET MANAGEMENT

Community & Neighborhood Services

Department Goals

Our mission is to enhance quality of life by engaging citizens in government; investing in housing, services and economic development; strengthening neighborhoods and ensuring excellent customer service.

Contact Information

Jonathan Mallahan, Director

Name	Title	Telephone	email
Jonathan Mallahan	Director	625-6734	jmallahan@spokanecity.org

Services Provided

The division of Community and Neighborhood Services incorporates the City's citizen and community oriented departments (ONS/Code, Community Housing and Human Development, Community Centers and My Spokane Customer Service). The division is focused on empowering citizens to be engaged in government, providing support for Spokane's very-low to moderate income citizens, and providing excellent customer service in citizens' interactions with the City.

Background

Community & Neighborhood Services manages the investment of over \$13 Million federal, state and local funding to provide support for Spokane's safety net, enhance quality of life and create economic opportunity for our citizens.

As part of the City's approach to supporting neighborhoods, we fund several community centers which an array of services co-located in one place so that individuals and families can be more effectively & efficiently served.

Level of Service Standard

The level of service (LOS) for Community & Neighborhood Services is to provide support for the right services, housing and engagement opportunities for citizens to improve their quality of life and our community.

Neighborhood Services Project Reports

PARKS & RECREATION DEPARTMENT

Parks and Recreation Division

Division Goals

The Parks and Recreation Division 1) provides and promotes a parks and recreation system which advocates healthy lifestyles and the value of play. 2) stimulates the local economy through the provision of venues, events and activities which draw visitors and keeps local citizens close to home; well maintained and managed greenspaces that enhance property values; and the creation of employment opportunities. 3) directs the acquisition and stewardship of properties for parks and recreation purposes while balancing active recreation and environmental interests. 4) promotes community safety through the development, maintenance, and management of the parks and recreation system. 5) ensures reasonable access to opportunities within a diverse parks and recreation system. 6) honors the history and legacy of the Spokane parks system through celebration, preservation, and restoration efforts. 7) innovatively develops and manages the responsible, efficient, and equitable use of resources leading to the sustainability of a strong and viable parks and recreation system. 8) demonstrates accountability and a collaborative culture through open communication, stakeholder participation, and transparent management practices. 9) continues to encourage a sense of community and pride through the provision of a parks and recreation system that affords citizens social gathering places and spaces.

Contact Information

Leroy Eadie, Director

Name	Title	Telephone	email
Garrett Jones	Park Planning Manager	363-5462	gjones@spokanecity.org
Jason Conley	Executive Officer	625-6621	jkconley@spokanecity.org

Services Provided

The Spokane Parks and Recreation Division maintains its rich history through the provision of an extensive system of parks, trails, recreation facilities, activities, and events. Four operational departments exist within the Division charged with the management, operations, and maintenance of these services for the Spokane community. The Division has an annual operating budget of approximately \$23.5 million with \$14 million coming from the City general fund and \$9.5 million in department generated revenues. Budget and policy setting authority is vested with a City Council appointed Park Board.

Background

The Recreation Department offers classes, special events, athletic leagues, and activities for youth, teens, adults, seniors, and persons with disabilities and provides support for community centers, senior centers, the NE Youth Center, Corbin Art Center, and outdoor swimming pools.

The Riverfront Park Department operates Riverfront Park attractions, the Skyride, Loof Carrousel, Ice Palace, and Imax Theater. It hosts major community events throughout the year along with numerous activities. It is currently under construction for a \$64.3 million dollar renovation.

The Park Operations Department manages and maintains approximately 4,000 acres of land with nearly 1,000 acres in developed green space and facilities. This includes over 80 different park areas and some streetscapes such as parkways and boulevards. The division has responsibility for over 60 playgrounds, 40 restroom buildings, nearly 200 sports facilities (ball diamonds, soccer/football fields, tennis courts, basketball courts, skate parks, horseshoe pits, volleyball courts, disc golf courses), about 25 picnic shelters, 40 miles of trails, a park and golf course equipment repair shop, and a maintenance facility. The Horticulture section manages and maintains a variety of formal gardens (Duncan Garden, Rose Hill, Ferris Perennial Garden, Japanese Garden, and Moore Turner Heritage Garden), Finch Arboretum, and Gaiser Conservatory and greenhouses.

The Golf Division manages, operates, and maintains 4 championship golf courses including Indian Canyon, Downriver, Esmeralda, and the Creek at Qualchan. The Golf Division operates as an enterprise fund and does not utilize public tax dollars.

The Budget/Finance Department provides support and guidance for the entire Department including financial reporting and management, community outreach and marketing, payroll and personnel functions, and other general support services.

Level of Service Standard

Level of Service standards call for 1.17 acres of Neighborhood Parks per 1,000 people, 1.49 acres of Community Parks per 1,000 people, and 2.59 acres of Major Parks per 1,000 people.

Neighborhood Parks are intended to provide both active and passive recreation for residents enjoying short daily leisure periods but should provide for most intensive use by children, family groups, and senior citizens. These parks are centrally located in neighborhoods with safe walking and bicycle access.

Community Parks offer diverse recreational opportunities. These parks may include areas suited for facilities such as athletic complexes and large swimming pools. Natural areas for walking, viewing, and picnicking are often available in community parks. Water bodies are present in many of these parks,

Major Parks are a large expanse of open land designed to provide natural scenery and unique features of citywide and regional interest as well as affording a pleasant environment and open space in which to engage in active and passive recreation.

The Parks and Recreation Department currently exceeds these level of service standards with 1.28 acres of neighborhood parks per 1,000 people, 1.61 acres of community parks per 1,000 people, and 3.08 acres of major parks per 1,000 people.

Parks and Recreation 2017 - 2022

Parks and Recreation/Golf**Golf -- Computer/Hardware Replacement Funding**

PKS-2016-143

Executive Summary

Computer, hardware and software replacement will be needed in Golf to sustain point of sale transactions at each City operated golf course. 2017 will focus on hardware replacements and IT infrastructure at all four courses.

Project Justification

Golf computer/hardware replacement has not been funded for years.

This project meets the following comprehensive plan goals and/or policies:

PRS 3, 4, 5, 6, 7 CFU 1, 3

Location

Other Location

All 4 Golf Courses -- Creek at Qualchan, Downriver, Esmeralda and Indian Canyon

Project Status

Active

Proposed

External Factors

Golf revenue and funding

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

***Status definitions**

- Unidentified: Funding source has not yet been determined
- Identified: Funding source has been found, but not yet requested
- Applied: Grant or loan application has been submitted, or budget has been requested
- Awarded: Grant or loan has been offered but the contract has not yet been signed or budget has not yet been approved by Council
- Encumbered: Project contract has been signed and funds have been allocated to spend on the project

Funding amounts in red reflect sources that are unidentified, identified, or anticipated.

Parks and Recreation/Golf**Golf -- Equipment Leasing**

PKS-2013-69

Executive Summary

5 Year Lease/Purchase for golf turf equipment including wide deck fairway mowers, utility carts, rough mowers, and putting green mowers. 2017 will have \$93,790 in lease agreements with TORO and RMT for the most urgent replacements of golf equipment.

Project Justification

Catching up for multiple years of reduced funding for turf equipment.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 4, 5, 7 CFU 1, 5

Location

Other Location

All 4 Golf Courses -- Creek at Qualchan, Downriver, Esmeralda and Indian Canyon

Parks and Recreation/Golf**Golf -- Equipment Purchases**

PKS-2013-66

Executive Summary

Various equipment purchases throughout the golf system. In 2017, \$46,210 is earmarked for Qualchan for the purchase of a rough mower for the golf fairways.

Project Justification

Equipment replacement has lagged behind in recent years.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 4, 5, 7 CFU 1, 5

Location

Other Location

All 4 Golf Courses -- Creek at Qualchan, Downriver, Esmeralda and Indian Canyon

Project Status

Active

Ongoing

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Parks and Recreation/Golf**Golf - Esmeralda Irrigation System Upgrade**

PKS-2016-140

Executive Summary

Complete update of the irrigation system for the golf course. The system was installed in the 1950's with few improvements over the years.

Project Justification

The current system requires 'night waterman' to manually water the course when golfers are not present. This system is very inefficient. Water pressure is extremely low and does not allow for enough water to fully operate the irrigation system

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 3, 4, 6, 7 CFU 1, 3, 5

Location

Esmeralda Golf Course

Esmeralda Golf Course -- 3933 E. Courtland Ave

Parks and Recreation/Golf**Golf -- Fleet Replacement Funding**

PKS-2013-60

Executive Summary

Vehicle fleet replacement is needed at all four golf courses. 2017 will focus on Indian Canyon trucks used to transport golf equipment to the mechanic shop.

Project Justification

Golf vehicle replacement has not been funded for years. The last vehicle purchase for any of the four golf courses was in 2011.

This project meets the following comprehensive plan goals and/or policies:

PRS 3, 4, 5, 6, 7 CFU 1, 3

Location

Parks and Recreation/Parks**Adm - Computer/Hardware Replacement - System Wide**

PKS-2012-291

Executive Summary

This project is to enable personal computers, printers, software and other computer-related equipment to be replaced on a regular cycle or as needed. The focus for 2017 will be RFP POS Software and Comprehensive Registration Management Software to be used by all areas of Parks & Recreation.

Project Justification

The Parks and Recreation Department's personal computers and other equipment is vital for communication, reporting, irrigation control, accounting, payroll, inventory, registrations, ticketing, etc. This equipment has a limited life and need to be replaced on an ongoing basis.

This project meets the following comprehensive plan goals and/or policies:

Parks and Recreation/Parks**Ops - Comstock Park Irrigation**

PKS-2012-332

Executive Summary

Automate manual irrigation system. Work scheduled to be completed by Park Ops staff in cooperation with city Water Dept.

Project Justification

More efficient and effective watering.

This project meets the following comprehensive plan goals and/or policies:

PRS 1, 2, 4, 5, 6, 7 CFU 1, 5

Location

Comstock Park

Comstock Park - 29th and Post

Project Status

Active

Proposed phase of project with Water Department started in 2016.

External Factors

N A

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Parks and Recreation/Parks**Ops - Manito Japanese Garden Pond**

PKS-2012-292

Executive Summary

Design and build Japanese Garden Pond filtration/skimmer system and leak repairs. Project design funds have been established for 2019 but no project construction funds have been identified.

Project Justification

In addition to water leakage, the Japanese Garden Pond requires continued use of potable city water to flush out fish waste, move debris off surface, and keep from freezing in winter. This is an unsustainable use of city water.

This project meets the following comprehensive plan goals and/or policies:

Parks and Recreation/Parks

Ops - Manito Upper Parking Lots Improvements

PKS-2012-293

Executive Summary

Enlarge Upper Manito Parking Lot near playground to more than double parking capacity. Also, renovate the gravel parking lot near the Conservatory to modern standards. Funding for DESIGN ONLY has been found at this time.

Project Justification

With addition of the splash pad in 2010 use of the southernmost area of the park has increased dramatically. Also, parking near the Conservatory is very limited. Overflow from both parking lots are causing problems with nearby street-side parking.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 3, 4, 6, 7 CFU 1, 3, 5

Location

Manito Park

Manito Park - Tekoa and 25th

Parks and Recreation/Parks**Rec - Minnehaha Trail Head/Parking Lot**

PKS-2012-302

Executive Summary

This project will provide a parking area and trail head on the east end of Minnehaha Park for trail access to Beacon Hill for hiking and biking. It will reduce the need for the informal trail head access at Esmeralda Golf Course.

Project Justification

From the Beacon Hill plan the main parking area to access Beacon Hill was identified as Esmeralda Golf Course. Esmeralda is not a trail head location and by establishing a trail head parking area at Minnehaha we will be able to use the restroom that is already in place and have a better user experience for Beacon. Minnehaha will be the major access point o Beacon for mountain biking, hiking and trail running.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 3, 5, 6, 7 CFU 1, 5

Location

Minnehaha Park

Minnehaha Park - Euclid and Havana

Project Status

Active

Proposed

External Factors

None

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Parking would not need plowing since trails are not open for hiking or bike riding when snow covered.

Parks and Recreation/Parks**Rec - Mission Adaptive Ball Field/Restroom and Lighting**

PKS-2014-42

Executive Summary

Install new universal baseball field site amenities, dugouts, ADA pathways, synthetic turf, fencing and seating. Phase 2: added ADA rest room, pathways, expanded parking area with turnaround and lights.

Project Justification

There are no ADA accessible baseball fields for the physically impaired. This field would fill the need. Phase 2: a new restrooms that are ADA accessible.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 3, 5, 6, 7 CFU 1, 5

Parks and Recreation/Parks**Rec - Sekani Access Road/Parking Improvements**

PKS-2013-136

Executive Summary

Camp Sekani is a 238 acre multi-use park with scenic topography and proximity to the Spokane River. Usage of the park area is increasing and needs improved accessibility and parking. Emergency access is a major concern at this location.

Project Justification

Current access is provided by a difficult to maintain dirt/gravel road. Also, storm water management and additional parking is needed. Safety and emergency access is an issue.

This project meets the following comprehensive plan goals and/or policies:

PRS 2, 3, 4, 6, 7 CFU 1, 3, 5

Parks and Recreation/Parks**Rec - Shade/Safety Structures - Merkel and Franklin**

PKS-2013-133

Executive Summary

At DMC Softball complex playground we want to protect the children playing from sun exposure and foul balls. At Franklin spectators in the stand are over exposed to both sun and foul balls coming from adjacent fields. 2017 will focus on Franklin softball complex upgrades.

Project Justification

Sun over exposure and the risk of created by unaware children and spectators is a serious issue.

This project meets the following comprehensive plan goals and/or policies:

PRS 4, 7 CFU 1

Location

Other Location

Franklin and Dwight Merkel softball complexes

Project Status

Parks and Recreation/Parks**UF - Finch Arboretum Master Plan**

PKS-2012-335

Executive Summary

The Finch Arboretum is a valuable asset to Parks and a plan for future development and maintenance is needed. This project would involve hiring a firm specializing in arboreta to work with Parks staff to develop a master plan. 2017 will be the first of a three-phase plan.

Project Justification

It is important to have a guide for future improvements to the Arboretum so projects will be congruent with the Arboretums mission.

This project meets the following comprehensive plan goals and/or policies:

PRS 1, 2, 3, 4, 5, 6, 7 CFU 1, 3, 5

Location

Finch Arboretum

Finch Arboretum -Woodland Blvd and F

SPOKANE POLICE DEPARTMENT

Spokane Police Department

Department Goals

The mission of the Spokane Police Department is to demonstrate excellence in policing by working in partnership with the community we serve to: 1) Prevent and reduce crime, the fear of crime, and improve the quality of life for our residents and visitors; 2) To fully implement all of the Use of Force Commission and DOJ-COPS recommendations; 3) Provide high quality police services to all of our residents and visitors; and 4) Create a work environment in which we recruit, train, and develop an exceptional team of employees.

Contact Information

Craig Meidl, Interim Assistant Chief

Name	Title	Telephone	email
Sarah Lynds	Deputy Director Police Business Services	509.625.4056	slynds@spokanepolice.org

Services Provided

The Spokane Police Department provides law enforcement services to the City of Spokane. There are approximately 400 employees at the Department; 311 of these are commissioned police officers. The annual budget of the Spokane Police Department is \$56.7 million and is almost solely funded through the General Fund, which is collected from local property and sales tax.

Background

Patrol officers in our Field Operations Bureau are responsible for responding to citizen calls to 911 and Crime Check 24 hours a day, 7 days a week. In addition to these citizen calls, which range from domestic violence to vehicle collisions to burglary, officers also conduct self-initiated community policing activities. Patrol assets include K9, Traffic, and the Police Anti-Crime Team. SPD detectives investigate serious crimes such as homicide, robbery, domestic violence, and sex crimes. The Explosive Disposal Unit, Hostage Negotiations Team, SWAT, and Dignitary Protection Units provide specialized responses to calls involving advanced training and skills.

Neighborhood Resource Officers are assigned to three police precincts geographically located in the North, South, and Downtown areas of the City of Spokane. NROs coordinate problem-

solving solutions for on-going issues at the neighborhood level. Support units in our Strategic Initiatives Bureau include the Property and Evidence facility, which handles evidence storage for all local area law enforcement; and the Records Division, which is responsible for collecting, processing, and protecting all public records filed, including police reports, orders of protection, warrants issued by the courts, and coordinates responses to all public disclosure requests.

Finally, the Spokane Police Academy oversees the hiring and training of new and existing SPD personnel, to include the screening of applicants, conducting interviews, background investigations on all SPD applicants, advising on hiring of commissioned personnel, and assisting and coordinating the on-going training of existing personnel, including training at the Spokane Regional Firearms Range, which is utilized by local and federal regional law enforcement.

Level of Service Standard

The City of Spokane's Comprehensive Plan states the level of service standard is 1.5 officers per 1000 citizens.

Body Camera replacement/Data Storage and Taser replacement

SPD-2016-115

Executive Summary

Body Camera replacement including extended warranty. The replacement of docks to charge the cameras and the ETM maintenance of the docks. The usage and storage of videos on a hosted site. The replacement of Tasers and the cartridges for training.

Project Justification

Body Camera and Taser program began in 2014. The initial funding was a one time amount provided enough to equip the department. The equipment is in need of replacement. The usage and storage is a 3 year contract with Evidence.com, it is up for renewal in 2017 and then 2020. In addition to equipment replacement each officer in the department is recertified on the Taser every year and this requires the purchase of cartridges.

Police/---**EDU Robot Refurbishment and Cutting Unit plus Additions**

SPD-2012-232

Executive Summary

The EDU robot works remotely to approach potentially explosive devices and can travel places it is unsafe for officers to go. This robot may also be used in hostage or other high risk situations to evaluate the situation.

Project Justification

The robot is equipped with long range visual devices to include audio and video as well as infrared video. This project would replace aging electrical items of the robot to ensure it continues to achieve maximum operability as well as upgrade/replace the computer and camera electronics. Total replacement of the EDU robot is very expensive (excess of \$250,000), but since it is a crucial piece of equipment, it is more cost effective to refurbish or upgrade the existing parts of the robot to achieve a more useful lifespan.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

1100 W Mallon, Spokane, WA 99260

Project Status

Active

On-going

External Factors

Funding for this project has not been identified.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

EDU Total Containment Vessel

SPD-2012-234

Executive Summary

The EDU Total Containment Vessel is used to house and transport devices that have been deemed explosive in nature and need to be disrupted where disruption would not be feasible in the device's current location.

Project Justification

The Explosive Disposal Unit, or EDU, is responsible for responding to suspicious devices that may be incendiary or explosive in nature. The Vessel can withstand a certain amount of blast should the device detonate during transport. The Vessel can also be used with certain Weapons of Mass Destruction that are chemical in nature, such as dirty bombs, as it will vent the gases. The current Total Containment Vessel will be over 25 years old at time of replacement. In order to prevent the disruption of explosive devices in an area where detonation could jeopardize citizen safety, it is important to have a functioning Total Containment Vessel.

This project meets the following comprehensive plan goals and/or policies:

Police/---**SPD Fleet**

SPD-2012-224

Executive Summary

The SPD Fleet is composed of patrol vehicles, traffic motorcycles, detective and administrative vehicles, undercover cars, and speciality unit vehicles. These vehicles support the underlying job function of providing law enforcement services to the public.

Project Justification

Our motor vehicles are a necessary piece of equipment for department personnel to complete job functions. Patrol vehicles run 24/7/365 and therefore need to be replaced more frequently than normal vehicles. Additionally, there is the cost of commissioning the vehicle with equipment: light bars, shields, push bars, sirens, radios, computers, gun racks, etc.

SOLID WASTE COLLECTION DEPARTMENT

Solid Waste Collection Department

Department Goals

The Solid Waste Collection Department is committed to providing the citizens of Spokane with a comprehensive and cost effective waste collection system.

Our mission is to ensure the safety and health of our citizens and environment through the proper, sustainable and efficient collection and management of solid waste. The department provides a quality service to the public while maintaining the highest regulatory and environmental standards.

From curbside collection to the disposal of waste at our Waste to Energy facility, the department is dedicated to managing solid waste as efficiently as possible while continuing to reduce operational costs and improve efficiencies as opportunities arise.

Contact Information

Name	Title	Telephone	Email
Scott Windsor	Director	625-7806	swindsor@spokanecity.org
Jennifer Werner	Office Manager	625-7966	jwerner@spokanecity.org
Rick Hughes	Commercial Supervisor	625-7871	rhughes@spokanecity.org

Services

Solid Waste Collection strives to offer the most efficient refuse collection service possible. By utilizing new technologies and adapting to meet the needs of the community, we guarantee the stability of rates while providing superior customer service for citizens and a safe work environment for our employees.

The department provides separate collection of recyclable materials, and yard and food waste (organics), from the general solid waste stream. This program provides an easy way to reduce the amount of solid waste collected from Spokane residences while at the same time diverting recyclable materials for beneficial use.

The Solid Waste Collection Department supports community cleanups through funding provided to Neighborhood Services. Neighborhood Councils use these funds for solid waste collection and disposal activities that they decide to utilize.

Background

Solid Waste Collection provides citizens with convenient, dependable and courteous weekly commercial and residential solid waste collection. Citizens can choose from 32, 68 and 95-gallon carts that easily roll out to the collection point and are provided by the department to our residents.

The department also provides weekly curbside residential collection of recyclables, food scraps and yard waste. Multi-weekly collection of recyclables from businesses is also provided as requested. In the fourth quarter of 2012, the department implemented single-stream recycling. Residents of the City of Spokane were provided 64-gallon automated carts. The single-stream program has increased the amount and types of materials collected for recycling purposes and in 2015, nearly 20,000 tons of recyclables were collected and processed.

In August of 2015, the City of Spokane opened its new Spokane Central Service Center for combined Fleet/Solid Waste operations. This new facility has allowed the Solid Waste Collection Department to begin the transition from diesel powered collection vehicles to collection vehicles powered with clean burning compressed natural gas (CNG). CNG powered collection vehicles are quieter, have greatly reduced particulate emissions and reduced greenhouse gas emissions that minimize our impact to Spokane neighborhoods in the performance of our duties.

Level of Service Standard

Approximately 63,000 households and 3,000 businesses are serviced at least once a week, with timely response given to extra pickups and return trips. Over 177,750 tons of garbage was collected from Spokane residents and businesses in 2015. Almost 20,000 tons of recyclable materials and 14,500 tons of yard and food waste (organics) are currently being diverted from disposal.

SPOKANE SOLID WASTE DISPOSAL

Spokane Solid Waste Disposal

Department Goals

We believe that providing a sustainable, environmentally superior system for management of society's discards is a key factor in maintaining the high quality of life for which our area is known. We strive to provide all citizens residing in Spokane with educational recycling and disposal services that continue to put this area in a leadership position with respect to programs, planning, and results. These services should be cost effective, efficient, and

environmentally justifiable. The goals of the City of Spokane Solid Waste Disposal Department (SWD) include: 1) manage more than 50% of the waste stream through waste reduction and recycling; 2) recover the energy from our remaining non-recyclable wastes; and 3) minimize the volume of untreated wastes to be stored in landfills.

Contact Information

Name	Title	Telephone	email
Chuck Conklin	Facilities Director	625-6524	cconklin@spokanecity.org

Services Provided

SWD provides disposal services for municipal solid waste (MSW) in Spokane, which includes opportunities to recycle, and to responsibly manage household hazardous wastes. In addition, SWD provides waste reduction and waste recycling educational programs, business waste audits, comprehensive solid waste management planning services, and City-wide litter control. SWD operates as an enterprise fund, which provides services to the public for a fee and makes the entity self-supporting. The department employs 74 full-time staff, with an annual operating budget of over \$27 million.

Background

In the mid-1980s, the four publicly-owned landfills in Spokane County were almost full, and three had been designated by the EPA as Superfund sites. They were polluting groundwater and could potentially lead to contamination of Spokane's sole-source aquifer. In addition, new landfill standards were adopted by the State that would make land filling more costly and siting more difficult. After years of study, a decision was made by elected officials from the City of Spokane and Spokane County to form the Spokane Regional Solid Waste System (SRSWS).

The other Regional Cities/Towns in Spokane County and Fairchild AFB accepted an invitation to join the SRSWS and entered into Interlocal Agreements with Spokane County and the City of Spokane. The SRSWS operated as a department of the City of Spokane, and managed solid waste facilities, contracts, and programs for the benefit of all citizens residing in Spokane County.

SRSWS facilities included the Valley Transfer Station, the North County Transfer Station, and transfer facilities at the Waste to Energy Facility which were responsible for providing convenient, clean, and safe access for disposal throughout Spokane County. Citizens, commercial customers, and garbage haulers would deliver MSW to the transfer stations, where it would then be transferred to the Waste to Energy Facility for processing. Each facility included a Recycling Center which accepted a wide range of materials free of charge, a Household Hazardous Waste turn-in area, and an area for collection of yard waste.. For the convenience of the public, all facilities remained open seven days per week from 7 a.m. to 5 p.m., excluding major holidays.

In November of 2014, the Interlocal Agreements that created the SRSWS expired. Spokane County took ownership of the North County and Valley Transfer Stations and the City of Spokane took over operation of the Waste to Energy Facility from the private contractor that had been operating it since its inception; Wheelabrator Spokane. The Waste to Energy Facility still accepts waste from the transfer stations, but no longer receives any waste from Spokane Valley or Liberty Lake as they have opted to bypass the facility and send their waste to a landfill. The Waste to Energy facility now processes approximately 240,000 tons of municipal solid waste (MSW) per year through combustion. This process not only reduces the volume of waste by 90%, but also recovers ferrous metals and generates electricity, which generates revenue and offsets tipping fees.

SWD is responsible for City-wide waste reduction, reuse, and recycling planning and education programs for residents, schools, and businesses. SWD uses a variety of informational materials and advertising media, a website, hands-on presentations, and community events involving public participation. These materials/events emphasize the connection of waste reduction, reuse, recycling, and proper waste disposal to sustain a healthy, quality environment.

Level of Service Standard

The level of service (LOS) for MSW requiring disposal is 3.53 pounds per capita per day, based on the latest available statewide data. This means that on average, SWD should be able to accept 3.53 pounds of MSW for every person within Spokane. Although some citizens generate less or more MSW requiring disposal, and while generation varies seasonally, this is an accepted average which can be used for planning purposes. On an annual basis, this equals approximately 317,000 tons.

The Waste to Energy Facility has a minimum annual capacity to process 248,200 tons of MSW, and currently processes approximately 240,000 tons of MSW per year, so there is still plenty of room to grow. Additional waste received which is not suitable for combustion, is transferred via intermodal containers to the Regional Disposal Company landfill in Klickitat County for disposal. This intermodal transfer system has a variable but high capacity, limited only by the availability of containers, and can easily handle MSW quantities which exceed the capacity of the Waste to Energy Facility, if required.

Spokane Solid Waste Disposal Project Reports

Begin Year

Solid Waste Disposal/---**Ash House Refurbishment**

SWD-2016-144

Executive Summary

Repairs and replacement of the Ash House siding and structural elements.

Project Justification

The corrosive nature of ash management creates a harsh atmosphere in the Ash House. We do regular work to patch holes as they begin to form in the siding, but at a certain point, full scale replacement of siding is needed. It takes about ten years to get to the point where repairs are no longer the practical solution. Additionally, these funds will also be used to complete structural repairs to Ash House I-beams, which are the structural framework of the building; temporary repairs have already been instituted.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

In planning stage.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Solid Waste Disposal/---**Component Cooling Tube Bundle Replacements**

SWD-2016-73

Executive Summary

This project is to replace the cooling system components within the WTE. Tube bundles that are the core of the cooling system are failing and need to be replaced. We plan to do one bundle each year for 3 years. The cost represents the purchase and replacement costs.

Project Justification

Tubes in each bundle are failing and need to be replaced.

This project meets the following comprehensive plan goals and/or policies:

Capital Facilities and utilities

Location

WTE Plant Facility

WTE Component cooling

Project Status

Solid Waste Disposal/---**Distributive Control System (DCS) Upgrade**

SWD-2016-147

Executive Summary

Upgrade of the DCS system.

Project Justification

The Distributive Control System (DCS) is system used to control the functioning of the whole Waste to Energy operation. The system is what was originally installed during the facilities original construction in the early 1990's. It is outdated with parts and support become increasingly obsolete. The facility will have to update the entire DCS to ensure continued operations of critical equipment. Without a functioning system the facility will not operate. This project is to update this control system.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

In planning stage.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Solid Waste Disposal/---**Filter Fabric Baghouse Change #1**

SWD-2016-148

Executive Summary

Replacement of fabric filters in Fabric Filter Baghouse #1

Project Justification

The fabric filters are made of Gortex fabric, which allow them to effectively remove particulates, some metals and aid in D/F removal for compliance with environmental regulations, but they have a functional life of only 5-6 years. The last baghouse filter change out on this unit was done in 2016.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

Solid Waste Disposal/---**Front end loader and other mobile equipment**

SWD-2015-67

Executive Summary

Purchase a new front end loader to be used at the WTE Facility for refuse receiving on the tipping floor.

Project Justification

As time goes by the facility's front end loader used to receive refuse, and other mobile equipment, is becoming more and more unreliable. Planned equipment replacement is scheduled to take place when maintenance costs exceed new equipment costs.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

This purchase has been scheduled.

External Factors

Each year we will evaluate the replacement schedule based on condition of the loader and other mobile equipment.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Solid Waste Disposal/---**Grizzly Belt Hood/Ducting**

SWD-2016-145

Executive Summary

Replacement of the Grizzly Belt Hood and associated ducting system.

Project Justification

The corrosive nature of ash management creates a harsh atmosphere in the Ash House. The Grizzly Hood and ducting are part of the ash management system, but has corroded to the point where repair is no longer viable and replacement is needed. The hood and ducting needs to be replaced for effective operation and management of the ash system.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Solid Waste Disposal/---**Lime Slurry Tank Rehabilitation**

SWD-2016-146

Executive Summary

Rehabilitation of the Lime Slurry Tank

Project Justification

Chemical tanks must be inspected monthly for secondary containment integrity. The Lime Slurry Tank is inspected as part of the facility's Spill Prevention, Control and Countermeasure Plans (SPCC). It has been identified and verified that the Lime Slurry Tank and the secondary containment system is compromised. This must be fixed to be in compliance with SPCC regulations. This can only be done during a cold iron, which is scheduled for 2017.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Solid Waste Disposal/---**SDA and Penthouse Work**

SWD-2016-151

Executive Summary

SDA and Penthouse upgrades and Rehabilitation

Project Justification

The SDA and Penthouse exist in an environment that is highly corrosive. The lances and hoses feeding the lime slurry to the SDA and into the lances plug up with caustic deposits over time and must be cleaned with strong acid, creating the corrosive atmosphere. The SDA and Penthouse work will entail floor rehabilitation to the Penthouse as well as heater upgrades and repair to the SDA and SDA hoppers.

Solid Waste Disposal/---**Superheater Replacement #1 Boiler**

SWD-2015-36

Executive Summary

Unit #1 Super-heater pendants are scheduled to be replaced in Q3 2015. The Super-heaters should last 3-4 years going forward. The next replacement would be 2019

Project Justification

Super-heater pendants are subject to high heat, corrosion and erosion. At the current operating conditions we expect they should have a 3-4 year life expectancy.

This project meets the following comprehensive plan goals and/or policies:

Capital Facilities and utilities

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

In planning stage

External Factors

While outages are scheduled in advance they may shift due to varying reasons; availability of contractor and materials.

Solid Waste Disposal/---**Superheater Replacement #2 Boiler**

SWD-2015-35

Executive Summary

Unit #1 Super-heater pendants are scheduled to be replaced in 2016. The Super-heaters should last 4-years going forward.

Project Justification

The pendant tubes are ultrasonically tested for thickness each outage. This testing determines which tubes need to be replaced over the course of each outage. Recent testing indicates these tubes are at a point where it becomes too costly and time consuming to continue repairing them.

This project meets the following comprehensive plan goals and/or policies:

Capital Facilities and utilities

Solid Waste Disposal/---**Valve Work/Upgrades**

SWD-2016-150

Executive Summary

Upgrading, maintaining, and replacing the valve system at the WTE Facility.

Project Justification

There are hundreds of valves that provide for the safe and functional operation of the WTE Facility. Many of those can be changed during a typical outage, or during normal operations with proper Lock out-tag out (LOTO) isolation. Some cannot and require proper timing and a large capital investment to replace or repair. The facility is getting by, but there are multiple large bypass and safety valves that need to be replaced for the effective operation of the facility.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

In planning stage.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Solid Waste Disposal/---**WTE - Boiler Generating Section Tube Replacement**

SWD-2012-345

Executive Summary

The boilers of the WTE Facility has a generating section that transforms the heat from combustion into steam. The generating section in the boiler has been repaired throughout its life and is in now at the point where it is in need of being replaced.

Project Justification

The generating section is 20+ years old and is in need of tube replacement.

This project meets the following comprehensive plan goals and/or policies:

Solid Waste Disposal/---**WTE - Crane Retrofit**

SWD-2012-337

Executive Summary

The two cranes at the WTE Facility are heavily used. At least one operates 24 hrs./day and is necessary for the WTE Facility to operate.

Project Justification

The cranes manage all the solid waste brought to the WTE Facility. The current cranes are over 20 years old, and parts are obsolete and have limited availability. This retrofit will update controls, reduce energy usage, and replace worn parts, thereby ensuring reliable operation of the plant.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

Project scheduled.

External Factors

Availability of contractors. Only one crane can be retrofitted at a time, since at least one crane must always be in service.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Solid Waste Disposal/---**WTE - Periodic Turbine Overhaul**

SWD-2013-15

Executive Summary

Steam turbines require periodic overhauls to repair seals and bearings and check and repair any damage to turbine blades or the turbine shaft. This overhaul is typically done every 4 to 5 years.

Project Justification

Internal wear and damage in the turbine must be repaired in order to assure continuing safe, reliable, efficient operations.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Project Status

Active

Project planned.

External Factors

WTE outage scheduling.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Solid Waste Disposal/---**WTE - Re-tube Boiler Economizer Section**

SWD-2012-347

Executive Summary

The boilers of the WTE Facility has an economizer section that captures more energy and transforms that extra heat from combustion into steam. The economizer section in the boiler has been repaired many times throughout its service life but is now at the point where it is in need of being replaced.

Project Justification

The economizer section is 20+ years old and is in need of tube replacement.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

WTE Plant Facility

Solid Waste Disposal/---**WTE - Turbine Overhaul & 1st Stage Blade Replacement**

SWD-2012-342

Executive Summary

Inspection of the turbine that converts steam into electricity during 2010 indicated a need to overhaul the turbine and replace blades in the first stage. This work was deferred until such time that the impacts on electrical generation and revenues will be minimized.

Project Justification

Internal damage in the turbine must be repaired in order to assure continuing safe and reliable operations.

This project meets the following comprehensive plan goals and/or policies:

Location

WTE Plant Facility

STREET DEPARTMENT

Street Department

Department Goals

The overall transportation goal within the City of Spokane is to develop and implement a transportation system and a healthy balance of transportation choices that supports economic vitality, as well as improves mobility and quality of life of all residents.

Contact Information

Street Department:

Mark Serbousek, Director, 232-8800, mserbousek@spokanecity.org

Integrated Capital Management:

Katherine Miller, Principal Engineer, kemiller@spokanecity.org

Services Provided

From a capital projects perspective, the Street Department is responsible for monitoring the conditions of the existing transportation system which includes the City's public streets, bridges, and traffic control devices. When new facilities are needed, Capital Programs supports the Street Department by obtaining grants and loans to finance the design and construction of the capital project. Capital equipment replacement such as vehicles are also monitored by the Street Department and replaced as needed.

Background

Spokane has approximately 2098 lane miles of paved streets. Arterial streets account for approximately 760 of the total lane miles. The Street Department manages its pavements by regularly assessing their condition and performing routine maintenance as far as budget constraints will allow. When the roadway conditions exceed Street Department maintenance options, the roadway is ready for a capital project such as a partial/full reconstruction of the roadway.

On occasion new streets are needed such as the City's Martin Luther King Jr. Way roadway that recently opened. New street alignments and/or street widening are needed as population grows and when new development (or redevelopment) requires new access, additional capacity or better connectivity. When Capital improvements are identified as being needed, both the Street Department and Capital Programs coordinate to ensure the new facility meets both the Comprehensive Planning goals and functions within the existing street system.

The Street Department also oversees the traffic signal system which consists of over 250 signals throughout the City. Capital projects are also needed to keep pace with advances in signal system and ITS technology.

The Street Department is responsible for maintaining the safety of the traveling public. Most safety issues require a minor fix. However, when a safety issue is identified that requires an improvement that results in a capital project, the Street Department and Capital Programs coordinate to ensure the safety project is funded as soon as possible.

Equipment and vehicle replacement falls under capital expenditures when purchased. The Street Department oversees their equipment and vehicle inventory, replacing as needed.

Level of Service Standard

The City has a transportation level of service policy for auto vehicle traffic (ADMIN 0370-08-01). State law requires the City to have transportation LOS standards defined in the Comp Plan, but leaves it up to the City to define what they are. The policy describes these requirements to some degree. The City will likely review these standards during the Chapter 4 update.

Streets	
Signalized intersections	
Arterial, downtown, CBD.	LOS F, not to exceed 90 seconds of delay
Development Proposals	LOS F, not to exceed 85 seconds of delay
Principal or Minor Arterials	LOS E
Collector Arterials	LOS D
Unsignalized Intersections	LOS E

The City has used Alternative Delivery, both General Contractor/Construction Management and Design-Build, for construction of several projects in the past. These projects were selected because of complexity of the work, compressed schedule or overall magnitude of the project. The following projects in this program have been identified for possible Alternative Delivery construction contracting:

- Howard Street Bridge
- Post Street Bridge
- Downtown Streets associated with STA's Central City Line
- TJ Meenach Rebuild
- N. Monroe Lane Reduction
- Manito Boulevard and 57th Avenue (associated with water line replacement)
- Cochran Basin facilities and conveyance

Streets/Bridge Rehabilitation**Post Street Bridge Replacement**

STR-2012-26

Executive Summary

Reconstruct the bridge, including foundation, superstructure, and full deck. New bridge will continue to support utility mains including sewer trunk-line and water transmission mains.

Project Justification

The current structure is deteriorating and needs to be replaced. A type, size, and location study is underway, and will address all modes of travel.

This project meets the following comprehensive plan goals and/or policies:

This project meets 50 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

Post St. Crossing at Spokane River.

Project Status

Active

Project Number: 2001041 Project needs have changed. A Type, Size, & Location Study is being conducted to determine project scope prior to any further funding requests.

External Factors

Actual project scope is not known at this time. a very small percentage of the funds needed to complete the project has been acquired.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Funding amounts in red reflect sources that are unidentified, identified, or anticipated.

Streets/Capital Improvements**1st Ave, Erie St to Altamont St.**

STR-2015-5

Executive Summary

This is a residential grind and overlay pavement preservation project. The work will include minor subgrade repair, crack sealing, modifying ADA ramps, striping (as necessary) and traffic control. This project will also include a sewer line replacement in the street from Napa to Crestline.

Project Justification

This section of road is deteriorating and needs repair. This street is also within the 'Target Improvement Area'.

This project meets the following comprehensive plan goals and/or policies:

This project meets 25 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

1st Ave, Erie St to Altamont St.

Project Status

Active

Project number: 2014118
2016 and Phase 2 2017.

CN planned for two phases, with completion of Phase 1 in

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Capital Improvements**1st Avenue, Maple St to Bernard St**

STR-2016-25

Executive Summary

Construct full depth roadway, repair sidewalk, provide for bike lanes, and upgrade lighting. Project will be integrated with utility work to include replacement of water distribution main from Madison to Howard Streets.

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

This project meets the following comprehensive plan goals and/or policies:

This project meets 51 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

First Avenue between Maple Street and Bernard Street.

Project Status

Active

Project number:2016091

Design 2019; Construction 2020

External Factors

The Levy program was predicated on use of grant funds to maximize functionality of the program. Such grant expectations are shown below as 'Levy Match' with an 'Unidentified' status until grants are in place.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Capital Improvements**37th Ave from Regal to East City limits**

STR-2012-61

Executive Summary

Design & ROW of roadway to current City of Spokane standards. Project includes separated sidewalks, left turn pockets, bike lanes, and stormwater facilities. A water line will also be included.

Project Justification

This is a main corridor running across Spokane's south side. There are three schools adjacent to this roadway. The current roadway is mainly a 2-lane section. It is part of our master bike plan and sidewalk is missing in many areas.

This project meets the following comprehensive plan goals and/or policies:

This project meets 59 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

37th Ave, Regal to East City Limits

Project Status

Active

Project number: 2006167

Currently in design with Right of Way is being purchased.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Capital Improvements**4th Avenue, Sunset Hwy to Maple St**

STR-2016-30

Executive Summary

Construct full depth roadway, repair sidewalk. This project will also replace a segment of the water distribution main, and provide for stormwater separation.

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

This project meets the following comprehensive plan goals and/or policies:

This project meets 34 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

4th Avenue between Sunset Hwy and Maple Street

Project Status

Active

Project number: 2016095

Design: 2021; Construction: 2022

External Factors

The Levy program was predicated on use of grant funds to maximize functionality of the program. Such grant expectations are shown below as 'Levy Match' with an 'Unidentified' status until grants are in place.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$2,000	\$2,000	\$2,000	\$2,000	\$2,000	\$2,000	\$36,000

Streets/Capital Improvements**Five Mile Road, Lincoln Road to Strong Road**

STR-2015-11

Executive Summary

Complete a full depth roadway replacement for 4600 feet of roadway from Lincoln Rd to Strong Rd. Place missing sidewalk and update existing ADA Ramps. Install bike lanes and build a roundabout at Strong and 5-mile road.

Project Justification

This section of road is deteriorating and is in need of rehabilitation.

This project meets the following comprehensive plan goals and/or policies:

This project meets 40 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Five Mile Road, Lincoln Road to Strong Road

Project Status

Active

Project number: 2015056

CN is scheduled for 2016 as a Levy project.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Capital Improvements**Fort George Wright, Government Way to River**

STR-2016-31

Executive Summary

Construct full depth roadway and repair sidewalk. Project will also replace the water distribution main, and provide stormwater separation. Incorporation of the area plan as much as feasible.

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

This project meets the following comprehensive plan goals and/or policies:

This project meets 49 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Fort George Wright between Government Way and the Spokane River

Project Status

Active

Project number: 2016096

Design: 2020; Construction: 2021

External Factors

A planning effort around Land Use is currently underway. This includes consideration for safety, STA routing, and future development potential. Initial results point to a very different cross section than what exists today. Traffic signals are also under consideration to accommodate future system requirements. Incorporate these planning efforts as project is chartered for design. The Levy program was predicated on use of grant funds to maximize functionality of the program. Such grant expectations are shown below as 'Levy Match' with an 'Unidentified' status until grants are in place.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Capital Improvements**Havana St, 57th Ave to 37th Ave Water & Street**

STR-2014-16

Executive Summary

This project will install a 36-inch water main in Havana Street from 57th Ave to 37th Ave. Integrated Storm water improvements and complete streets elements are also included. Placement of bicycle lanes along the roadway are also under consideration.

Project Justification

Current water line is deteriorating and needs replacing. Bike lanes will be installed to provide a 1-mile bicycle corridor and connect Ben Burr trail at south Myrtle St. to the bike lanes on 37th Ave.

This project meets the following comprehensive plan goals and/or policies:

This project meets 34 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2 and TR 4-10.

Location

Other Location

Havana Street from 57th Ave to 37th Ave.

Project Status

Active

Project number: 2014079

Currently in Design, construction planned for 2016-2017

External Factors

Bicycle facilities are under consideration with the 'Link Spokane' update to the Transportation chapter of the Comprehensive Plan.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Capital Improvements**Indiana Ave, Division St to Perry St.**

STR-2015-7

Executive Summary

Complete full-depth replacement of approximately 3,200 feet of roadway incorporating stormwater swales between existing sidewalk and curb and a 2-lane travel way with parking & bike lanes on each side of street. Swale areas will be constructed between existing trees. Integrated W/Water & Stormwater.

Project Justification

This section of road is deteriorating and needs repair. This is also a collector street to the Avista campus and experiences a significant level of truck traffic. Trolley rails will be removed as well, MS4 flows will be reduced by incorporating swales.

This project meets the following comprehensive plan goals and/or policies:

This project meets 45 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Indiana Ave, Division St to Perry St.

Project Status

Active

Project number: 2014134 and 2014150

Streets/Capital Improvements**Main Avenue, Bernard to Pine - Parking Pilot**

STR-2016-32

Executive Summary

Lane reconfiguration of Main Avenue to accommodate diagonal parking in the center of the street between Browne and Division streets. Re-striping of lanes extends to Bernard and Pine streets. Project also includes installation of pedestrian crossing mid-block between Browne and Division.

Project Justification

The project is meant to increase parking capacity in the vicinity of Main Ave at Division St. This is a pilot to test the use of center parking, in an effort to improve economic opportunity in the project vicinity.

This project meets the following comprehensive plan goals and/or policies:

This project meets 49 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Main Avenue from Bernard Street to Pine Street

Project Status

Streets/Capital Improvements**Mission Ave, Division St to Hamilton St.**

STR-2015-15

Executive Summary

This preservation project will replace the surface of 0.6 Mi of Mission Avenue and improve modal service by upgrading ADA ramps, concrete landing at transit stops, improved median pass-throughs. Asphalt in planter strips will be replaced with vegetation.

Project Justification

This section of road is deteriorating and needs repair.

This project meets the following comprehensive plan goals and/or policies:

This project meets 20 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

Mission Ave, Division St to Hamilton St.

Project Status

Active

Project number: 2014092

CN Planned for 2017

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Capital Improvements**Monroe/Lincoln Couplet**

STR-2013-105

Executive Summary

Rebuild the full depth roadway section on Monroe and Lincoln Streets from 8th Ave. to Main Ave. Minor curb replacement will occur as necessary. Street trees will be added/replaced where possible. Sight distance to be addressed at the 7th Ave Intersection. This project is integrated W/Stormwater.

Project Justification

The purpose of this project is to rebuild and extend the life of this segment of Monroe and Lincoln Streets.

This project meets the following comprehensive plan goals and/or policies:

This project meets 16 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2, 4, 5, 6, 7, 9, AND 10.

Location

Other Location

Monroe & Lincoln Corridor from 8th Ave to Main Ave

Project Status

Active

Project numbers: 2012115 & 2014107
2017

Project under design with construction planned for 2015-

External Factors

Phase 1 of this project will incorporate stormwater improvements in coordination with CSO reduction efforts.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Capital Improvements**North Monroe Corridor Revitalization**

STR-2012-448

Executive Summary

This study will define the scope of streetscape, transportation and infrastructure improvements to stimulate revitalization of the North Monroe business district and improve local economic vitality. There will be multiple phases to the project, including the existing funded phase north of Indiana.

Project Justification

The aims of this project are to improve the corridor's visual image and pedestrian environment, improve traffic flow capacity and work with STA's High Performance Transit Network to help move people, customers and goods along the corridor, and address core business infrastructure needs including water, sanitary sewer, and storm water.

This project meets the following comprehensive plan goals and/or policies:

This project meets 53 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Streets/Capital Improvements**Pettet Drive Reconstruction**

STR-2016-42

Executive Summary

Project will reconstruct Pettet Drive full depth, storm water management with construction of MS4 Elimination facility, construct bio-retention swales for storm water treatment, construct a mixed-use trail on along the bluff-side of Pettet Drive.

Project Justification

The proposed MS4 facility is part of the Integrated Clean Water Plan (ICWP) to reduce levels of toxins entering the Spokane River. This project is also being integrated with a Street project to reconstruct Pettet Drive deteriorating pavement, and to construct a mixed-use trail in accordance with Spokane's Master Bike Plan, and Spokane's Master Pedestrian Plan.

This project meets the following comprehensive plan goals and/or policies:

This project meets 40 goals in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Pettet Drive between TJ Meenach Drive and Augusta Avenue

Project Status

Active

Project number: 2015099

Design 2015; Construction 2016

External Factors

Project will be constructed to coordinate with the Bloomsday Run to minimize negative impact to event.

Maintenance

Streets/Capital Improvements**Riverside Drive - Phase II & III**

STR-2012-36

Executive Summary

Design and construct an extension of future Riverside Drive beginning at Sherman Street and running easterly to Trent Avenue at Perry Street. Project to include 5ft bike lanes and separated sidewalks.

Project Justification

The university master plan calls for a more pedestrian friendly environment. The new alignment of Riverside Drive will allow major vehicle to be routed around the campus and allow for the downgrading of Spokane Falls Blvd which runs through the center of campus.

This project meets the following comprehensive plan goals and/or policies:

This project meets 50 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

Extension of Riverside Drive beginning at Sherman St running easterly to Trent ave at Perry St.

Project Status

Active

Project is a little behind schedule due to ROW negotiations, Phase 2 was split into two sub phases, The west half of the project (Phase 2a) will begin construction in June-2015, the east half (Phase 2b) will be bid in the fall and constructed in spring of 2016. Roadway should be open to traffic by September-2016.

External Factors

Right of way process

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Capital Improvements**Rowan Ave, Driscoll St to Monroe St**

STR-2015-8

Executive Summary

Pave roadway to full depth. Repurpose roadway with two 11-foot travel lanes and bike lanes from Driscoll to F St. and two 11.5'-foot travel lanes and bike lanes from F St to Alberta St. and remove parking. Swales will be built on Driscoll to collect Stormwater. Integrated with water and Stormwater.

Project Justification

This section of road is deteriorating and needs repair. Reduction of MS4 stormwater flow will be achieved through bypass to swales.

This project meets the following comprehensive plan goals and/or policies:

This project meets 47 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Rowan Ave, Driscoll St to Monroe St

Project Status

Active

Project numbers: 2014135 & 2014152 Phase 1 to be constructed in 2015 and Phase 2 will be constructed in 2016

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$4,500	\$4,500	\$4,500	\$4,500	\$4,500	\$4,500	\$27,000

Streets/Capital Improvements**Sharp Avenue Pervious Asphalt Pilot Project**

STR-2015-4

Executive Summary

A low impact development stormwater project will be constructed in Sharp Avenue to determine viability of permeable pavements within the traveled lanes. The project will also include bioretention swale, street trees, and standard pavement. Curb extensions will also be installed. This project is integrated with storm water, Wastewater, and Water

Project Justification

This project will reduce the amount of pollutants going into the Spokane River. Transportation elements include the installation of curb extensions and the transition from present striping to the proposed alignment.

This project meets the following comprehensive plan goals and/or policies:

This project meets 37 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Streets/Capital Improvements**Sprague Avenue Investment Phase II - Browne St to Sherman St**

STR-2016-69

Executive Summary

Fulfill the intents of the South University District Sprague Corridor Investment Strategy by implementing the 3-lane section on Sprague through placement of streetscape and updating traffic signals. Landscaping will facilitate integrated stormwater disposal, as possible.

Project Justification

The purpose of this project is to improve transportation for all modes and thus promote a vibrant livable community.

This project meets the following comprehensive plan goals and/or policies:

This project meets 59 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Sprague Avenue - Browne Street to Sherman Street

Project Status

Active

Application phase seeking design and construction funding.

External Factors

This project is not yet fully funded for design and construction. The City is actively applying for grants to move this project forward.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Impact Fee Projects**Hamilton St. Corridor Enhancement Project**

STR-2013-109

Executive Summary

Construct traffic signal modifications to accommodate protected or protected/permitted signal phasing for left-turn movements and to improve coordination and traffic flow.

Project Justification

This is an impact fee project intended for congestion mitigation.

This project meets the following comprehensive plan goals and/or policies:

Chapter 4, TR 2, 3, 4, 5, 6, 7, and 10

Location

Other Location

Hamilton St from Sharp Ave to Desmet Ave

Project Status

Active

Currently in design for construction in 2017

External Factors

If impact fee revenue does not grow to fulfill the budget requirements, this project schedule may be delayed.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Neighborhood**Traffic Calming Program**

STR-2014-23

Executive Summary

Program installs traffic calming measures in response to neighborhood applications for calming needs.

Project Justification

This program fulfills the redlight traffic calming ordinance.

This project meets the following comprehensive plan goals and/or policies:

This project meets 27 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2 and TR 4-10.

Location

Other Location

Citywide

Project Status

Active

This annual program is run in coordination between Office of Neighborhood Services, Integrated Capital Management, and Streets.

External Factors

Includes \$200,000 for Sprague Ave, as approved by council in 2014. This is shown in the expenditure summary for the 'Sprague Ave Rebuild-Sprague Corridor Investment Strategy' project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Neighborhood**Transportation Benefit District (TBD) Sidewalk Program**

STR-2016-33

Executive Summary

Sidewalk improvements (generally infill) at locations noted above.

Project Justification

To fulfill the requirements of the TBD sidewalk program, which conducts sidewalk infill and ADA compliance.

This project meets the following comprehensive plan goals and/or policies:

The noted locations meet between 11 and 14 goals in Chapter 4 of the Comprehensive Plan, specifically in TR 1-7 and 9.

Location

Other Location

Locations: Driscoll Blvd - Wellesley to Bismark; Pettet Dr - Mission to Westpoint; Arthur St - 30th to 43rd; Francis Ave - Sutherlin to Assembly; 37th Ave - Latawa to Manito; 11th Ave - Arthur to Perry; Driscoll Blvd - Alberta to Garland; E. Hilliard - Central Ave to Francis Ave; and Division St - Cozza to Magnesium. The Cincinnati Greenway project also uses TBD funding, as shown in the Pedestrian and Bikeways section.

Project Status

Active

Project numbers: Various

Design and Construction: 2016 through 2023.

External Factors

Costs shown below are for TBD projects that have not yet received matching grant dollars. When grants are received, individual project pages will be created in the Pedestrian and Bikeways section of this program. Presently, this includes the Cincinnati Greenway and Regal/Bemiss/Shaw Pedestrian Safety projects.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Pedestrian and Bikeways**2016-2017 ADA Ramp Replacement Project**

STR-2015-164

Executive Summary

A two year ADA ramp placement project to construct missing ramps within the Downtown and Council District areas. Initial locations for 2016. 2017 projects will be identified by 2016 utilizing a similar process of working with Council members and the Pedestrian Master Plan to identify project locations. The intent is to balance the work within the Downtown area and the Council Districts.

Project Justification

ADA compliance is a federal mandate.

This project meets the following comprehensive plan goals and/or policies:

This project meets 23 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Various locations in the Downtown Core and all three council districts

Streets/Pedestrian and Bikeways**Addison and Standard Bicycle and Pedestrian Corridor**

STR-2014-20

Executive Summary

Complete a 5-mile bicycle-pedestrian corridor from Holland Ave at Colton St. Along Colton, Addison, and Standard, connecting to existing bike lanes at Buckeye and Division to the South. This project adds new bike lanes, transition improvements at intersections and adds missing sidewalk.

Project Justification

This is a 5-mile bicycle corridor that is on the city's Master Bike Plan and sits between two major north/south vehicle corridors. Adding bicycle and pedestrian facilities provides a safer alternative for pedestrians and cyclist.

This project meets the following comprehensive plan goals and/or policies:

This project meets 31 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2 and TR 4-10.

Location

Other Location

Addison and Standard streets from Buckeye Ave to Holland Ave.

Project Status

Active

Project number: 2013162 CN planned for 2015; complete 2016

Streets/Pedestrian and Bikeways**Ben-Burr Trail Connection to the Centennial Trail**

STR-2012-71

Executive Summary

Multi-use trail covering 4 sections. Underhill Park to Liberty Park, Planned bike facility on 5th Ave to Liberty Park, Liberty Park to Erie/Riverside Dr. Extension & Centennial Bridge at Gonzaga to old Brown Building Supply property.

Project Justification

The city is committed to connecting the trail system and provide multimodal transportation throughout the region while increasing the safety of pedestrians and bicyclist.

This project meets the following comprehensive plan goals and/or policies:

This project meets 35 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

Ben Burr Trail between Fiske St and the Centennial Trail.

Project Status

Active

Project number: 2010091

Design complete. Construction in 2016 Complete construction in 2017.

External Factors

This project will likely combine with stormwater CSO reduction efforts. These may include work on Erie street adjacent to the trail construction.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Pedestrian and Bikeways**Bike Route Signing and Striping**

STR-2012-63

Executive Summary

Striping and conversion of signs to MUTCD standards

Project Justification

Bicycle lane signing and striping standards have changed. This project is intended to bring our bicycle lanes up to MUTCD standards throughout the city.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Citywide

Project Status

Active

This is an ongoing project that is accomplished during every construction season as need arises.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Streets/Pedestrian and Bikeways**Bike Share Feasability Study**

STR-2016-14

Executive Summary

This project will complete the preliminary engineering phase of a paid bike-share program for the City of Spokane. The scope of work will include a feasibility study with a forecast for user demand, financial assessment, risk analysis, operating model and recommendation of how to proceed.

Project Justification

The project will make bicycle riding more accessible to residents, workers, students, and visitors in the city core. The bike-share stations will be located at several key destinations including Riverfront Park, STA Plaza, the downtown library, the U-District, etc, within a 2-mile radius.

This project meets the following comprehensive plan goals and/or policies:

This project meets 31 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Streets/Pedestrian and Bikeways**Centennial Trail, Mission Ave Gap Phase 1**

STR-2015-14

Executive Summary

This project will make a safety improvement where the Centennial Trail crosses Mission Avenue by implementing item such as landscaped buffer strip between R/R ROW and the trail, enlarged islands, enhanced ADA ramps, colored/textured crosswalks, countdown timers, and wider sidewalks/path on Mission.

Project Justification

This existing at-grade crossing is presently dangerous because of the volume of vehicles, bicyclists, and pedestrians and the physical complexities of the crossing. The actual crossing location is often confused with the railroad tracks. Separation of pedestrian facilities from the traveled way is important to comfort and safety.

This project meets the following comprehensive plan goals and/or policies:

This project meets 40 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Centennial Trail at Mission Ave, through Mission Park next to BNSF R/R tracks across Mission and East toward Avista

Project Status

Active

Project number: 2014095 CN is scheduled for 2017

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Pedestrian and Bikeways**Centennial Trail, Mission Ave Gap Phase 2**

STR-2016-77

Executive Summary

This project will make a safety improvement where the Centennial Trail crosses Mission Avenue. This project will implement the recommendations of the feasibility study to bridge over Mission Avenue and eventually tunnel under the railroad tracks.

Project Justification

This existing at-grade crossing is presently dangerous because of the volume of vehicles, bicyclists, and pedestrians and the physical complexities of the crossing. The actual crossing location is often confused with the railroad tracks. Separation of pedestrian facilities from the traveled way is important to comfort and safety.

This project meets the following comprehensive plan goals and/or policies:

This project meets 40 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Centennial Trail at Mission Ave, through Mission Park next to BNSF R/R tracks across Mission and East toward Avista

Project Status

Active

Project number: 2014095 CN is scheduled for 2017

External Factors

This project will fall after phase 1 which will install surface improvements. Phase 3, tunneling under the railroad tracks may occur before or after this bridging phase.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Pedestrian and Bikeways**Cincinnati Greenway**

STR-2016-12

Executive Summary

Perform Greenway street enhancements to include construction of new sidewalks where none exist, update ADA compliance, provide distinctive Greenway information/directional signage, provide marked separate/shared bike lanes, modify traffic signage and install traffic calming elements.

Project Justification

This project will be Spokane's first Greenway street, intended to promote healthy and safe non-motorized transportation options to access a variety of key destination points. This greenway corridor was selected and prioritized by a citizen advisory committee brought together specifically for that purpose in 2012.

This project meets the following comprehensive plan goals and/or policies:

Project meets 53 out of 85 goals within chapter 4 of the Comprehensive Plan.

Streets/Pedestrian and Bikeways**Division St, 3rd Ave to Spokane Falls Blvd**

STR-2015-12

Executive Summary

This project is intended to improve the pedestrian safety and traffic flow on Division street with Curb extensions, ADA curb ramps, traffic signal adjustments, merge area adjustment between 4th and 2nd, on-street parking improvements, pedestrian lighting, streetscape and sidewalk improvements.

Project Justification

Investments in the Division corridor will enhance accessibility between city and regional centers. The project will improve transportation quality and efficiency. This project has been included in several downtown focused investment studies.

This project meets the following comprehensive plan goals and/or policies:

This project meets 50 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Streets/Pedestrian and Bikeways**Downtown Bicycle Network Completion**

STR-2013-89

Executive Summary

Complete the on-street bicycle facilities in downtown Spokane, according to the adopted Master Bike Plan, with adjustments as necessary.

Project Justification

While it is illegal to ride bicycles on the sidewalks downtown, the on-street facilities were greatly lacking. This project will complete a functional bicycle network in the downtown core.

This project meets the following comprehensive plan goals and/or policies:

This project meets 31 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Downtown core of Spokane

Project Status

Active

Project numbers: 2011074, 2014154, 2016076
which includes Main Ave and Spokane Falls Blvd.

Final phase of this project will be completed in 2015

Streets/Pedestrian and Bikeways**Fish Lake Trail - Phase 3**

STR-2012-68

Executive Summary

Phase 3a includes paving the trail from Scribner Rd to Queen Lucas Lake (2.1 miles) and complete design and ROW in preparation for phase 3b which includes the remaining paving to Fish Lake and bridge construction. Construction funding for phase 3b has not yet been obtained.

Project Justification

This trail will complete the gap that will provide 11 miles of trail connecting the City of Spokane and the City of Cheney. This system is identified in the Comprehensive plan as a corridor to preserve and improve.

This project meets the following comprehensive plan goals and/or policies:

This project meets 32 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

Fish Lake Trail, Scribner Rd to Fish Lake

Project Status

Active

Project number: 2010048 Project phasing continues. Phase 3a under construction to pave to Queen Lucas Lake. Phase 3b will complete design and RW efforts for remaining segment of the trail.

External Factors

Funding for CN of phase 3b is not yet secure. Negotiations with BNSF for aerial rights for bridges will take some time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Pedestrian and Bikeways**Fish Lake Trail to Centennial Trail Connection**

STR-2016-22

Executive Summary

Design study to determine best route option for the Fish Lake trail extension.

Project Justification

Study to review various trail routes and determine best option for project design and construction. This route will complete the connection between the existing Fish Lake Trail terminus and the Centennial Trail.

This project meets the following comprehensive plan goals and/or policies:

This project meets 35 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Fish Lake Trailhead at Milton/Lindeke to Centennial Trail via Sandifur Bridge.

Project Status

Active

Project number: 2016089

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Streets/Pedestrian and Bikeways**Millwood Trail, from SCC to Felts Field**

STR-2014-29

Executive Summary

Design and a Multi-use Path from Spokane Community College to Felts Field along the Spokane River.

Project Justification

The city is committed to connecting the trail system and provide multimodal transportation throughout the region.

This project meets the following comprehensive plan goals and/or policies:

This project meets 34 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-8 and TR 10.

Location

Other Location

From Spokane Community College to Felts Field.

Project Status

Active

Project number: 2014059

Project is in Design. Will seek federal funding for CN.

External Factors

Study will determine feasibility option for routing the trail through Spokane Community College Campus.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Pedestrian and Bikeways**Parking Environment Improvement Program**

STR-2016-71

Executive Summary

Improve the parking environment in the downtown core by installing such things as street furniture, way-finding kiosks, street trees, lighting and electrical needs, new tree grates, and by placing new sidewalk or replacing sidewalk in poor condition.

Project Justification

Parking revenue will improve the atmosphere of downtown. Thus inviting more use and improving the downtown core of Spokane.

This project meets the following comprehensive plan goals and/or policies:

This project meets 23 goals or policies in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 3, 4, 5, 6, 7, 9, and 10.

Location

Other Location

Downtown Core

Project Status

Active

This program participates in downtown core projects. Refer to the following projects: 1st Ave - Maple to Bernard; 4th Ave - Sunset to Maple; Main Ave - Bernard to Pine; Riverside Ave - Maple to Monroe; Sprague - Cedar to Browne.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Pedestrian and Bikeways**South Gorge Trail**

STR-2015-13

Executive Summary

This project includes approx 1.3 mi of mixed use trail along the north side of Spokane River. The trail is a mixture of a 10 ft wide paved asphalt or concrete path and will begin at the south end of the Sandifur Bridge and end near Glover Field connecting to a widened Sidewalk along Main Ave.

Project Justification

This project upon completion will provide a key trail link between People's Park and Glover Field Park, with eventual connection to downtown Spokane. The project will also reconstruct Clarke Avenue street and replace the street's water main that are in disrepair and in need of replacement.

This project meets the following comprehensive plan goals and/or policies:

This project meets 50 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

North side of Spokane River from Sandifur Bridge to Glover Field through the 'Peaceful Valley' Neighborhood.

Project Status

Active

Project numbers: 2014091 - Phase 1, Clarke Ave Improvements; 2016059 Phase 2, South Gorge Trail Completion Phase 1 to be designed and constructed in 2016; Phase 2 to be designed and constructed in 2017, with funding will be sought through grant opportunities.

External Factors

Phase 2 of this project will rely heavily on award of grant funding through the Recreation and Conservation Office (RCO). The Levy program was predicated on use of grant funds to maximize functionality of the program. Such grant expectations are shown below as 'Levy Match' with an 'Unidentified' status until grants are in place.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Pedestrian and Bikeways**Sprague Ave at Sherman St Pedestrian Plaza**

STR-2013-113

Executive Summary

Construct a plaza connecting the south landing of the University District Gateway Bridge to East Sprague with a distinctive plaza entrance. The Plaza will prioritize pedestrian, bicycle, and transit modes of transportation.

Project Justification

Tie the Gateway Bridge to Sprague Avenue and open up opportunities for development and investment at this connection hub. The plaza also provides a functional alternative for the STA Medical Shuttle to quickly connect students to the Medical District.

This project meets the following comprehensive plan goals and/or policies:

This project meets 27 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2 and TR 4-10.

Location

Other Location

Sprague Ave at Sherman St to the south landing of the University District Gateway Bridge

Project Status

Active

Project number: 2015150 Design in 2016 for construction in 2017/2018.

External Factors

This project will need to be coordinated with the University District Gateway Bridge, and delivery of the final product should be such that the bridge and plaza can be opened to traffic as one.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Pedestrian and Bikeways**Sunset Highway Bike Path - Royal to Deer Heights - Design**

STR-2016-13

Executive Summary

The 3.2-mile project will improve the ped/bike connections along Sunset Hwy. Project will connect to a year-2018 bicycle lane project at Royal St., and continue west as a bike lane and shared-use path. Strategic sidewalk segments will provide transit stops locations and pedestrian street crossings.

Project Justification

This project will provide a direct bicycle connection to businesses along US 2. Generators on the corridor include restaurants, hotels, a casino, a nearby university, airport and recreational activities. The project will also create a complete bike connection to downtown Spokane and regional bike network.

This project meets the following comprehensive plan goals and/or policies:

This project meets 41 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Sunset Highway between Royal Street and Deer Heights

Project Status

Active

Project number: 2016087 Design 2017

External Factors

Planned construction of Capital Project on Sunset Highway within this project's limits.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Pedestrian and Bikeways**U-District Pedestrian & Bicycle Bridge**

STR-2016-74

Executive Summary

Construct a Pedestrian and Bicycle Rail Overpass Bridge within the University District.

Project Justification

With the current growth of River point Campus there is a need for students to move to and from housing, shopping, classes and local services. Connectivity to the south is lacking. The U-district ped/bike bridge will provide the connectivity needed and also help revitalize the Sprague district.

This project meets the following comprehensive plan goals and/or policies:

This project meets 27 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2 and TR 4-10.

Location

Other Location

From E Riverside & Sherman to EWU Campus

Project Status

Active

Project number: 2009105, 2012119 Design and ROW Complete. Construction planned for 2017.

External Factors

Delivery of construction is based on the availability of funding within the State Budget. Also, this project must coordinate with the Sprague at Sherman Pedestrian Plaza project which will connect the south landing of the bridge with Sprague Avenue and Transit.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Streets/Safety**Barnes Road from Phoebe to Strong Road**

STR-2013-176

Executive Summary

The proposed project will construct a new section of Barnes Road between Phoebe and Strong Road. Separated sidewalk on one side, drainage facilities along the backsides of the curbs, two lanes for vehicular traffic, a bike lane going uphill and shared-use on the downhill side of the roadway

Project Justification

A connection between the Indian Trail area and 5-Mile Prairie has been sought for many years because of the safety concerns of having very limited access in and out due to the topography of the area. Constructing Barnes Road will greatly improve access.

This project meets the following comprehensive plan goals and/or policies:

This project meets 22 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 3, 2, 4, 5, 6, 7, 8, AND 10.

Location

Other Location

Barnes Road will be constructed between Phoebe and Strong Road.

Project Status

Active

Project number: 2013146 Project has been authorized for design and will move to construction when design and ROW are prepared.

External Factors

Funding opportunities have allowed this project to move forward.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Safety**Browne St/Division St Couplet, 3rd Ave to Spokane Falls Blvd**

STR-2012-97

Executive Summary

Install countdown pedestrian timers at 14 signalized intersections, place new curb ramps where required to bring up to current ADA standards, and place curb extensions where feasible.

Project Justification

Countdown pedestrian timers will provide pedestrians with the time remaining before the light changes, allowing them to determine if they have time to cross safely. Curb extensions will reduce the distance pedestrians must travel to clear the crosswalk.

This project meets the following comprehensive plan goals and/or policies:

This project meets 49 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Brown and Division Streets from 3rd Ave to Spokane Falls Blvd

Project Status

Active

Project number: 2011103 Phase one of this project is the countdown timer portion and was installed in 2013. The remaining work to be done is bumpouts/curb ramps at Main and Division which will be constructed in 2016.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Safety**Crestline Street Lane Reduction**

STR-2015-2

Executive Summary

This project will restripe a 4-lane road to 2 lanes with a Two Way Left Turn Lane. Bike lanes will be added for the entire length of the project.

Project Justification

This project is intended to improve safety for pedestrians and cyclists by changing lane configuration, and installing bike lanes as proposed on the master bike plan.

This project meets the following comprehensive plan goals and/or policies:

This project meets 34 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Streets/Safety**Greene Street at Ermina Avenue Intersection Improvements**

STR-2016-78

Executive Summary

Install a traffic signal and adjust traffic lanes/medians as necessary to incorporate left-turn phasing on all legs of the intersection. Signal will be incorporated into the communication system along Greene Street.

Project Justification

This project will improve safety for pedestrian crossings of Greene Street as well as improve traffic flow into and out of the SCC campus and the neighborhood. Traffic flow along the corridor is also expected to improve by incorporating communication between signals, which is limited now by distance between signals.

This project meets the following comprehensive plan goals and/or policies:

This project meets 32 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1, 2, and 4 - 10.

Location

Other Location

Greene Street at Ermina Avenue

Project Status

Active

Design has begun and will be prepared for construction funding. Applications for construction funding are underway.

External Factors

Applications for construction funding have begun, but as of yet only design funding is in place for the project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Safety**Maxwell-Mission Avenue Lane Reduction**

STR-2015-1

Executive Summary

This project will re-stripe a 4-lane road to 2 lanes with a Two Way Left Turn Lane (TWLTL). Bike lanes and/or wide lanes will be added for the entire length of the project. The TWLTL may be left out in a couple of blocks where on-street parking is needed and road width is insufficient for both.

Project Justification

This project is intended to improve safety for pedestrians and cyclists by changing lane configuration, and installing bike lanes as proposed on the master bike plan.

This project meets the following comprehensive plan goals and/or policies:

This project meets 35 goals as established in Chapter 4 of the Comprehensive Plan.

Streets/Safety**Monroe Street Lane Reduction and Hardscape**

STR-2015-3

Executive Summary

This project will change North Monroe Street from 5 lanes to 3 lanes. The restriping will start just north of Indiana and continue to the top of the hill near Kiernan Street. Hardscape improvements such as wider sidewalk, street furniture, stormwater facilities, curb extensions, medians, and a HAWK signal will be confined to the 13-block area between Knox and Cora. Pedestrian lighting will be installed along the south half of the corridor.

Project Justification

This project is intended to improve safety for pedestrians and cyclists by changing lane configuration in order to reduce likelihood of collisions, and to improve the pedestrian zone by providing a wider sidewalk.

This project meets the following comprehensive plan goals and/or policies:

This project meets 54 goals in Chapter 4 of the Comprehensive Plan. Specifically in TR 1-10.

Location

Other Location

Monroe St. From Indiana Ave. To Kiernan Ave.

Project Status

Streets/Safety**Regal, Bemiss, Shaw Pedestrian Safety**

STR-2016-8

Executive Summary

Sidewalk and bumpout construction within the vicinity of two elementary schools and one middle school. The project will support safe walking routes and improve separation of vehicle traffic from pedestrian traffic. Also included are similar facilities to improve crossings near the community center

Project Justification

This project will construct sidewalk where none exist to provide a safe walking route for elementary school children to and from their schools. In addition, curb bumpouts will be constructed to enhance safety by shortening street crossing distances and providing a bigger space between vehicles and pedestrians.

This project meets the following comprehensive plan goals and/or policies:

This project meets 38 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Location

Other Location

Various sidewalk locations near Regal Elementary, Shaw Elementary, and Bemiss Elementary.

Project Status

Active

Streets/Safety**Ridgeview Elementary Pedestrian Safety**

STR-2016-23

Executive Summary

Construct new sidewalk to facilitate pedestrian travel to and from Ridgeview Elementary School.

Project Justification

Currently there is no sidewalk along this project's proposed routes, which are primary school pedestrian routes. This project will provide the needed sidewalks. In addition, curb bumpouts will be constructed to enhance safety by shortening street crossing distances and providing a buffer space between vehicles and pedestrians.

This project meets the following comprehensive plan goals and/or policies:

This project meets 38 of the 86 Transportation goals as specified in Chapter 4 of the Comprehensive Plan.

Streets/Vehicle**6 wheel Flusher/deicer/plow #426215 2006 Freightliner/OMCO**

STR-2012-273

Executive Summary

Replacement of an existing 6 wheeled 2200 gallon flusher/deicer/plow following industry standards for replacement. During the winter months this vehicle can operate 24/7 conducting snow and ice control. We review every piece of equipment to determine the proper need when replacing.

Project Justification

This is a 6 wheel tanker truck used as part of our sweeping team to flush the roadway helping the city meet the PM 10 Air Quality Standard. During the winter it is a deicer/plow truck.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

901 N.Nelson

Project Status

Active

Anticipated replacement in 2019

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Streets/Vehicle**Regenerative Air Sweeper #427475 2009 TYMCO**

STR-2014-83

Executive Summary

Vehicle replacement regenerative high dump sweeper to maintain PM 10 standards

Project Justification

Replacement of an existing high dump regenerative air sweeper following industry standards for replacement. We review every piece of equipment to determine the proper need when replacing.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

901 N. Nelson

Project Status

Active

Anticipated replacement in 2020

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

WASTEWATER MANAGEMENT DEPARTMENT

Wastewater Management Department

Department Goals

We believe that clean water is fundamental to life itself. Because of this vision, Wastewater Management will: 1) serve the regional community by protecting public health, property and the environment; 2) provide efficient service, both now and in the future, by utilizing sound financial and natural resource management practices; 3) enlist the support of the public and align our organizational structure for the attainment of this vision; 4) continue to give the customer the best service value in the Pacific Northwest; and 5) recognize that our employees, as members of this community, are the key to success.

Services Provided

The City of Spokane's Wastewater Management (WWM) Department provides sewer collection, wastewater treatment, and stormwater management. The WWM Department is an enterprise fund, which provides goods or services to the public for a fee and makes the entity self-supporting. The department employs over 170 full-time and regular part-time staff, with an annual operating budget of over \$42 million dollars (excluding major capital expenditures).

Background

Sanitary collection system: The City operates and maintains over 470 miles of sanitary sewer lines, 400 miles of "combined" sanitary and storm sewer lines, twenty-eight sewage lift stations and fourteen river crossings. The Sanitary collection system contains projects related to collecting sanitary sewage and conveying it to the Riverside Park Water Reclamation Plant (RPWRP).

Stormwater: The City operates and maintains over 350 miles of storm drain pipes and over one hundred stormwater outfalls to the river. Stormwater contains infrastructure projects related to the collection, treatment and disposal of runoff resulting from either rain and/or melted snow.

Combined Sewer Overflow (CSO) Abatement: The City is under a NPDES Permit issued by the Washington State Department of Ecology. This permit requires the City of Spokane to complete improvements by 2017 to the combined sewer system to control the number of overflows that will discharge to the Spokane River from the City's CSO regulator structures. CSO Abatement projects will reduce overflows to the Spokane River from the individual CSO basins to no more than one year on average. Most of these projects include construction of off-line storage tanks for temporary retention of mixed sanitary sewage and storm water. The City is working diligently to meet a 2017 Department of Ecology NPDES Permit deadline for completion of CSO abatement projects. Design costs include environmental documentation and property acquisition

Total Maximum Daily Load (TMDL) Compliance: Washington State law requires the City to meet water quality standards of the Spokane River by enhancing treatment of wastewater generated by its wastewater treatment plant (RPWRF). Presently, TMDL requirements for phosphorus and dissolved oxygen are being developed, with other requirements planned for the future. The Spokane River and Lake Spokane do not have enough dissolved oxygen (DO) during the months of March through October to meet current Water Quality Standards (WQS). To comply with WQS, Total Maximum Daily Load (TMDL) requirements need to be met to return the river to a healthy condition. The Department of Ecology has determined the maximum TMDL for nutrients affecting DO in the Spokane River and Lake Spokane. The NPDES permit for the RPWRF was issued on June 23rd 2011 and included the implementation plan needed to meet the TMDL. The new permit will contain more stringent effluent limitations for phosphorus, ammonia and carbonaceous biological oxygen demand and will address reclaimed water use.

Riverside Park Water Reclamation Facility (RPWRF): The City's wastewater treatment plant treats approximately an average of 40 million gallons of wastewater each day. Discharge from the RPWRF into the Spokane River must meet the City's NPDES Permit. Capital projects will improve the City's treatment of wastewater prior to discharge to the Spokane River. The sequence of these projects is intended to allow full operation of the facility during construction. The projects have been organized into "Packages" based on priority of the work, physical sequence, locations and logistics, and to combine work of specialists for design efficiency.

Level of Service Standard

The level of service (LOS) for sanitary sewage processing is 100 gallons per capita per day (GPCD). This means that the city must plan to be able to accommodate 100 gallons of sanitary sewage per day for every person in the service area. Although some citizens may generate less or more sanitary sewage, this is an accepted average that can be used for planning purposes.

The RPWRF has the capacity to process approximately 44 million gallons per day (MGD) of regionally generated sanitary sewage. Of the 44 MGD, the city has, through interlocal agreements, transferred 10 MGD to Spokane County to serve unincorporated urban areas that are on septic systems and over the aquifer. This leaves the city with control of 34 MGD of RPWRF capacity. Of the 34 MGD, the city has about 2.3 MGD in surplus to serve future population growth. This will accommodate about 23,529 persons. Currently, the RPWRF is processing an average of 40.7 MGD of regional sanitary sewage. This includes about 9.6 MGD that are associated with variable flow. Variable flow is water that infiltrates or inflows into the system and is not associated with sanitary sewer users. The city continues to make improvements to the sewer collection system to limit the amount of variable flow.

The level of service (LOS) for stormwater is to design public right-of-way for a 10-year rainfall frequency, prevent flooding of property during a 25-yr 24-hour rainfall event, and prevent damage to buildings for a 100-year rainfall event.

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 12 Doomsday Hill, Pettet Drive at Nora Avenue.**

WWM-2014-8

Executive Summary

Design and construct a storage facility for CSO Basin 12 to control combined sewer flows to the main sewer interceptor pipeline and reduce overflows to the Spokane River.

Project Justification

The purpose of this project is to meet Ecology regulations to reduce the discharge of untreated sewage to the Spokane River to one discharge per year using a 20 year moving average. To meet this regulation, peak combined sewage flows will be stored and gradually sent to the RPWRF. The outflow will be conveyed to a new pipe.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Pettet Drive, Nora Avenue, TJ Meenach

Project Status

Active

Design complete; Project Bid 1/20/16; Construction Start 3/09/16

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 14 Green Infrastructure**

WWM-2014-9

Executive Summary

Storm gardens will be constructed within CSO Basin 14 to remove stormwater from the combined sewer system.

Project Justification

The purpose of this project is to meet Ecology regulations to reduce the discharge of untreated sewage to the Spokane River to one discharge per year using a 20 year moving average. The outfall pipe also needs to be repaired.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

West Central Neighborhood

Project Status

Active

Preliminary design is underway.

External Factors

Green infrastructure was determined by the Integrated Plan to be the most cost effective solution. Feasibility of green infrastructure implementation is being evaluated. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 23**

WWM-2015-167

Executive Summary

Construction of a vault, pipelines and control valves were identified for CSO Basins 23. A green infrastructure solution is currently being evaluated for this basin.

Project Justification

The 2013 CSO Plan Amendment determined that large storage facilities would not be necessary in CSO Basins 23; however, the flow control needs to be changed. This project includes new flow control vaults, weir, and hydroslide valves as recommended the CSO analysis. Because of this basin's proximity to CSO Basin 14 and 15, green infrastructure may provide a cost effective solution and is being evaluated.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

CSO 23 - Cedar and Ide

Project Status

Active

Preliminary design work is underway for CSO Basin 23.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 24 Control Facility**

WWM-2012-90

Executive Summary

Construction of a 1.9 MG storage facility will control overflows from CSO 24 Basin. This facility will include tank and associated pipelines sized to meet overflow requirements.

Project Justification

This project is necessary to meet Department of Ecology regulations and for a cleaner river.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

1st and Adams (10 S Adams)

Project Status

Active

The project is scheduled to begin design in 2016. Construction is anticipated to begin in 2017.

External Factors

None known.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 25 Control Facility**

WWM-2016-9

Executive Summary

CSO Basin 25 project will construct a 17,000 gallon storage tank and regulator in Main Avenue to meet the overflow requirements. A portion of the stormwater from Main Avenue will be separated, treated and infiltrated around Glover Field.

Project Justification

This project is necessary to meet Department of Ecology regulations and for a cleaner river.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Cedar and Main

Project Status

Active

Design will begin in 2016. Construction is anticipated to begin in 2017.

External Factors

Construction of this project will need to be coordinated with the stormwater separation work in CSO basin 25 as well as the improvements to Glover Field and the Spokane River Gorge Trail. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 26 Control Facility**

WWM-2016-10

Executive Summary

CSO Basin 26 currently overflows to the Spokane River through the outfall near Lincoln and Spokane Falls. This project will construct a 2.1 MG storage tank and regulator north of Spokane Falls between Lincoln and Monroe to meet the overflow requirements as well as tank surface improvements.

Project Justification

This project is necessary to meet Department of Ecology regulations and for a cleaner river.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Cedar and Main

Project Status

Active

Design will begin in 2016. Construction is anticipated to begin in 2017.

External Factors

Construction of this project will need to be coordinated with other projects in the immediate vicinity of the tank. These include Riverfront Park improvements and other downtown construction projects.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 33-1 Liberty Park**

WWM-2012-77

Executive Summary

Design and construct a storage facility for CSO Basin 33.

Project Justification

The purpose of this project is to meet Ecology regulations to reduce the discharge of untreated sewage to the Spokane River to one discharge per year using a 20 year moving average. To meet this regulation, flow stormwater peak combined sewage flows will be stored and gradually sent to the RPWRF.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Near 2nd Avenue and Perry Street

Project Status

Active

Design is underway. Construction is expected to start in 2016.

External Factors

Right of way from WSDOT (I90) is required for the selected site. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 34 Control Facility, Lee and Sprague**

WWM-2014-11

Executive Summary

Construct a 1.4 MG storage tank and regulator along with associated piping.

Project Justification

This project reduces combined effluent from entering the Spokane River, as well as protecting the interceptor from overcharging.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Crestline Street North of Sprague Avenue.

Project Status

Active

Project is in pre-design.

Wastewater Management/Combined Sewer Overflow Abatement**CSO Basin 41**

WWM-2015-166

Executive Summary

A vault, pipelines and control valves will be constructed for CSO Basin 41. Storage will be provided via large diameter pipes.

Project Justification

The 2013 CSO Plan Amendment determined that large storage facilities would not be necessary in CSO Basins 41; however, the flow control needs to be changed. This project includes new flow control vaults, weir, and hydroslide valves as recommended the CSO analysis.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Rebecca and Upriver

Project Status

Active

The project is currently in design.

Wastewater Management/Combined Sewer Overflow Abatement**CSO Outfall Repair**

WWM-2014-33

Executive Summary

Repair the existing CSO outfall pipes.

Project Justification

Many of the City CSO outfalls to the Spokane River and Latah Creek pipes area made of corrugated steel that begun to corrode. Other pipes many need to lined or other repairs. Repair of outfall pipes has not incorporated into most of the CSO storage projects to expedite construction. Existing outfalls are being evaluated to determine necessary repairs.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

CSO outfall pipes

Project Status

Active

Outfall pipes are being evaluated

External Factors

The work needs to be constructed during low river times of the year.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Combined Sewer Overflow Abatement**I03 NW, Northwest Blvd & TJ Meenach.**

WWM-2014-12

Executive Summary

Design and construct a 1,240,000 gallon interceptor protection storage facility.

Project Justification

I03 is the main interceptor draining most of the Northeast Portion of the City of Spokane. (Sometimes referred to as the Cochran Basin). Whenever a storm occurs, the sewer system becomes inundated and overflows into the Spokane River. Because there is no overflow to relieve flow to the interceptor, the storage facility is being construction to protect the pipe and allow more combined sewer to be conveyed to the RPWRF.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Northwest Boulevard and T.J.Meenach Drive.

Project Status

Active

Project is in design.

External Factors

The final location of this tank is under determination.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Combined Sewer Overflow Abatement**I04 M Bosch's Lot, Bridge Avenue, Monroe to Lincoln.**

WWM-2014-13

Executive Summary

Construct a interceptor protection storage facility with associated piping and control devices.

Project Justification

I04 is the main interceptor draining most of the north portion of the City of Spokane. Whenever a storm occurs, the sewer system becomes inundated and overflows into the Spokane River. Because there is no overflow to relieve flow to the interceptor, the storage facility is being construction to protect the pipe and allow more combined sewer to be conveyed to the RPWRF.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Between Monroe and Lincoln streets North of Bridge Avenue.

Project Status

Active

Construction has begun on this project.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Wastewater Management/Combined Sewer Overflow Abatement**I07 Control Facility**

WWM-2016-11

Executive Summary

Construct a 180,000 gallon interceptor protection tank along with control structures and associated piping. The tank will be constructed on recently purchased property at Napa and Riverside.

Project Justification

Because there is no overflow to relieve flow to the interceptor, the storage facility is being construction to protect the pipe and allow more combined sewer to be conveyed to the RPWRF.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Napa and Riverside

Project Status

Active

Project is in pre-design.

Wastewater Management/Combined Sewer Overflow Abatement**Wall Street Combined Sewer**

WWM-2015-44

Executive Summary

Construction of a combined sewer line to route flows from Spokane Falls Blvd. to Main Ave. The surface will be constructed of concrete.

Project Justification

Enables storage of Spokane Falls Blvd. flows in CSO 26 control facility. The pipeline portion of the project will be constructed in 2015. In 2016, the surface of the street will be constructed.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Wall Street, between Main Ave. and Spokane Falls Blvd.

Project Status

Active

Construction of the underground pipeline is complete. Construction of the surface elements will be in 2016.

External Factors

Coordination with Urban Outfitters construction.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/NLT Phase 1**Next Level of Treatment (NLT) - Phase I**

WWM-2015-85

Executive Summary

Membrane Filtration is required at the Riverside Park Water Reclamation Facility to meet the Waste Discharge Permit issued by Ecology. NLT Phase I chooses the membrane system and designs and constructs facilities needed to support NLT.

Project Justification

Membrane Filtration is needed to remove nutrients such as phosphorus to achieve compliance with Ecology's Total Maximum Daily Load (TMDL) for dissolved oxygen in the Spokane River and Long Lake. Phase 1 projects include a chemical storage building, polymer system upgrade, boiler replacement, filtrate pump station and yard piping, primary clarifier 5, storm water clarifier 5 and 6, aeration basin modifications, and chemically enhanced pretreatment as well as associated design costs, program management, construction management, sales tax, and GCCM required contingencies.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.1 - Level of Service; CFU 1.2 - Operational Efficiency; CFU 1.3 - Maintenance

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

Project is in design, construction is slated to start in 2016

External Factors

The TMDL requires compliance in 2021.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/NLT Phase 2

Next Level of Treatment (NLT) Phase II

WWM-2015-86

Executive Summary

Membrane Filtration is required at the Riverside Park Water Reclamation Facility to meet the Waste Discharge Permit issued by Ecology. NLT Phase II provides design, construction management and construction of the Membrane Facility, followed by startup; and commissioning.

Project Justification

This project is required to achieve compliance with Ecology's Total Maximum Daily Load (TMDL) for dissolved oxygen in the Spokane River and Long Lake by the removal of phosphorus. Phase 2 projects include splitter box and yard piping, drum screens, flash tanks, mixers, NLT system purchase and delivery, and NLT balance of plant as well as associated design costs, program management, construction management, sales tax, and GCCM required contingencies.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.1 - Level of Service; CFU 1.2 - Operational Efficiency; CFU 1.3 - Maintenance; 1.6 Regulation Changes

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

Design has started.

External Factors

The TMDL requires compliance in 2021.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$150,000	\$150,000	\$0	\$300,000

Maintenance Comments

A variety of chemicals are used to clean the NLT membrane facility.

Wastewater Management/Package C

Digester Facility #3 & Modifications to #4,#5

WWM-2012-126

Executive Summary

Construction of one additional approximately 2.8 million gallon anaerobic digester. The new digester will be integrated into the digester gallery for operation. The project also includes the Solids Pumps Recycle

Project Justification

Currently the plant has two digesters, where the solids removed from the wastewater influent is taken for further biological processing. One is operated as the primary with the other as secondary. It is necessary to run both continually in order to properly treat the solids and meet operations and permitting requirements. The plant currently has no backup and cannot take either existing digester off line for maintenance nor emergency. The new digester will allow for rotating operation through three vessels, allowing for both maintenance functions and redundancy as required by our NPDES permit.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

RPWRF - 4401 N. A.L. White Parkway

Project Status

Active

Construction scheduled to start in 2014.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Wastewater Management/Plant Operations**Air Handling Units Supply and Exhaust (non-occupied)**

WWM-2016-122

Executive Summary

Replacement and upgrade of Air Handling Units Supply and Exhaust fans for non-occupied areas.

Project Justification

These fans supply air and ensure air exchanges, necessary for a safe work environment, to spaces in the plant where staff goes, but is not permanently stationed (non-occupied). The existing fans were installed in the 70's and are at the end of their service life. Several have quit working or are under performing. Units will be prioritized and replaced in sequence of greatest need.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

In planning stage, prioritizing individual elements.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**Backup Deaerator Tank**

WWM-2016-120

Executive Summary

Purchase and installation of a second Deaerator Tank

Project Justification

The plant boilers need deaerated water to operate properly. A deaeration tank removes dissolved oxygen and other gases from water before it is used in the boiler system. Currently there is only one deaeration tank and no redundancy. If the tank fails, the boilers shut down and therefore the plant shuts down, and the NPDES permit would be violated. This purchase will provide needed reliability and redundancy.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

In planning stage. Inspection of the existing deaerator tank is scheduled to determine the urgency of the installation of the second system.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Plant Operations**Biosolids Hauling Truck Pup**

WWM-2012-346

Executive Summary

Replacement of equipment necessary to transport Biosolids generated at the Riverside Park Water Reclamation Facility. Equipment being replaced is two Biosolids Dump Truck Pups (trailer).

Project Justification

Biosolids generated at the Riverside Park Water Reclamation Facility are applied to private farmland in accordance with Federal and State regulations. Replacement of Biosolids hauling equipment is necessary to maintain the reliability necessary to meet Biosolids application regulations. These Dump Truck Pups are coupled with the planned replacement of the dump trucks themselves. They last about 5 to 6 years, given the long miles, rough dirt roads and their use in farm fields.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

The purchase of this equipment has been scheduled.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

Maintenance and equipment downtime will be lower with the purchase of new more reliable equipment.

Wastewater Management/Plant Operations**Biosolids Hauling Trucks (Dump)**

WWM-2016-127

Executive Summary

Replacement of equipment necessary to transport Biosolids generated at the Riverside Park Water Reclamation Facility. Equipment being replaced is for two Biosolids Dump Trucks.

Project Justification

Biosolids generated at the Riverside Park Water Reclamation Facility are applied to private farmland in accordance with Federal and State regulations. Replacement of Biosolids hauling equipment is necessary to maintain the reliability necessary to meet Biosolids application regulations. This project is the purchase of two dump trucks to replace trucks that have reached the end of their service lives. Trucks are used in rough conditions; daily use, long miles, rough dirt roads and fields. Their service life is approximately 5 to 6 years.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Wastewater Management/Plant Operations**Biosolids Tractor**

WWM-2015-111

Executive Summary

Replacement of equipment necessary to apply biosolids generated at the Riverside park Water Reclamation Facility. Equipment being replaced is a biosolids Tractor.

Project Justification

Biosolids generated at the Riverside Park Water Reclamation Facility are applied to private farmland in accordance with Federal and State regulations. Replacement of biosolids application equipment is necessary to maintain the reliability necessary to meet biosolids application regulations. The tractor used to spread the solids in the farm fields is used in rough conditions, and heavily, due to the daily requirements of our permits. The service life of this tractor is anticipated to be around 5 to 7 years before replacement is necessary.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

In the planning stage. Equipement purchase has been scheduled.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Wastewater Management/Plant Operations**Clarke Street Lift Station Modifications**

WWM-2016-129

Executive Summary

Modifications to the wet wells at the Clarke Street Lift Station

Project Justification

The existing wet well at this lift station allows for grease, oil, and plastics to accumulate on the surface of the water. This accumulation becomes a thick, hard layer over time and has to be manually removed and hauled away. This is an expensive, hazardous procedure which has to be done every 2-3 years. The planned modifications to the lift station will eliminate this accumulation, and therefore eliminate the manual removal of the sludge - reducing costs and increasing safety.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Clarke Street Lift Station

Project Status

Active

This project is in the design phase.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**CSO SCADA Implementation**

WWM-2016-125

Executive Summary

This project will build a SCADA (Supervisory Control and Data Acquisition) network for real-time monitoring and active control of many of the CSO (Combined Sewer Overflow) facilities.

Project Justification

Through the monitoring and control capabilities this project will create, the City will be able to maximize interceptor efficiency, minimize overloading the plant during storm events, and minimize the risk of CSO overflows to the river.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This project is in the planning and design phase.

Wastewater Management/Plant Operations**Digester Feed Lobe Pump Conversion**

WWM-2012-354

Executive Summary

Conversion of progressive cavity pumps to lobe pumps for the digester feed system

Project Justification

The digester feed system is currently supplied by progressive cavity pumps, which are not only at the end of their service life but are difficult and expensive to maintain. The existing pumps were installed in the early 1990's, and cost approximately \$15 thousand per year to maintain. Converting this system to lobe pumps will increase efficiency as well as reducing maintenance to approximately \$3 thousand per year.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Wastewater Management/Plant Operations**Headworks Building and Grit Chambers Odor Control System**

WWM-2016-130

Executive Summary

Construction of odor control system for the Headworks Building and the Grit Chambers.

Project Justification

The Headworks Building is where raw wastewater enters the AWWTP. The wastewater then passes into the grit chambers next. The wastewater has only begun the treatment process at this point and carries with it strong odors. This project will construct air handling systems which will scrub the odors from the air exiting the Headworks and the Grit Chambers. This is one of the last areas of the plant to have odor control installed.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This project is in the planning phase. Previous designs will also be evaluated and updated.

External Factors**Maintenance**

Wastewater Management/Plant Operations**ICP (Inductively Coupled Plasma Mass Spectrometry)**

WWM-2016-119

Executive Summary

Purchase of updated laboratory equipment

Project Justification

This analyzer is used to detect metals in the wastewater coming into the plant. This item is for a future replacement which will incorporate improved analytic capabilities by newer technology and will provide better detection limits allowing for better monitoring of permit requirements. This equipment has a useful life of 8-10 years before becoming obsolete, either through age and use or technology improvements which render it no longer useful.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This equipment purchase has been scheduled.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**Lift Station Truck**

WWM-2015-77

Executive Summary

Lift Station Truck

Project Justification

The City operates 29 sewage pump stations which must successfully and continuously prevent the backup of sewage to RPWRF for treatment. The heavy duty vehicle transports maintenance workers, tools, and parts to pump stations in need of emergency repair 24/7, as well as planned maintenance. The truck used for this task gets heavy use and high mileage, and has a predicted replacement cycle of approximately 8-10 years. The existing truck is no longer reliable for this task and will be used at the plant itself for onsite needs. The truck that is used at the plant now is even older and less reliable, with maintenance costs becoming unsustainable.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

Purchase anticipated in 2017

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**Perforated Plate Guide Modifications**

WWM-2016-128

Executive Summary

Modification of the guides for the perforated plates in the AWWTP Headworks.

Project Justification

The perforated plates in the plant headworks rotate through the influent stream and screen out debris that would otherwise be carried into the plant treatment process. These plates wear out about every 3 years, but through the modification of the guides, the wear on them is much less and is expected to nearly double their useful life, saving hundreds of thousands of dollars over that time. Four of the systems have already been modified; this project will modify the remaining two.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This project has been scheduled and is in the planning phase.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**Perforated Plate Replacement**

WWM-2012-400

Executive Summary

Replacement of perforated plates in the Headworks of the AWWTP.

Project Justification

The perforated plates screen out all debris larger than three centimeters from the wastewater flow into the plant. This helps reduce the treatment load traveling through the plant as well as wear and tear on the plant pumping equipment. These plate are wear items and have to be replaced periodically, about every three years. With the modifications to the guides, detailed in the previous project description, these plate are expected to last 5-6 years going forward.

This project meets the following comprehensive plan goals and/or policies:

Wastewater Management/Plant Operations**Plantwater Gallery Crane Redesign and Replacement**

WWM-2016-131

Executive Summary

The crane that is used to remove and replace equipment from the plantwater gallery is poorly designed, at the end of its service life, and does not meet current standards or needs. This project will replace the existing crane system with one that meets both needs and standards.

Project Justification

The existing crane is from the 1970's original construction. It is insufficient to lift the loads required of it. It is unreliable and does not meet standards for safety. The design does not allow for proper movement of heavy equipment. A new crane with a new rail system will bring the system back into compliance with regulations.

Wastewater Management/Plant Operations

Plantwater Screening System Upgrade

WWM-2015-112

Executive Summary

Upgrading the plantwater screening system which recycles water for use within the plant.

Project Justification

Water at the end of the treatment process is recirculated back through the plant for uses that do not require potable water quality, such as wash-down water to clean out the insides of process basins. It is necessary, however, to screen this water to remove any small debris that may have entered the system so as to not damage pumping equipment. The screening system is almost 15 years old, worn, nearing the end of its service life and is in need of scheduled replacement.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This project has been scheduled.

Wastewater Management/Plant Operations**Plant-wide Fiber Replacement (Post NLT)**

WWM-2015-78

Executive Summary

Replacement of Plant Fiber Optic Cables

Project Justification

RPWRF treatment process components are controlled via the Supervisory, Control, and Data Acquisition (SCADA) system. Fiber optic cable is the link between the SCADA computers the dispersed Operator Interfaces, control, and monitoring devices. The existing fiber cables are a technologically outdated multi-mode fiber which has also become brittle and caused several problems. The fiber needs to be replaced in order to ensure reliable communications between all of the process components and our SCADA system. NLT Phase 2 will be wired with newer single-mode fiber, which is what will be used for this upgrade as well. Once complete, the fiber system plant-wide will be consistent and reliable.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

Replacement and upgrade of critical fiber communication linkage between SCADA system and facility process components is in the planning and design phase.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Plant Operations**Plant-wide Supply Fan Upgrade/Replacement (Occupied Spaces)**

WWM-2016-121

Executive Summary

Upgrading and replacing HVAC supply fans.

Project Justification

This project will replace HVAC (Heating, Ventilation, and Air Conditioning) fans throughout the treatment plant that supply air to the occupied spaces; where staff work areas are. The existing fans were part of the original plant construction done in the 1970's and are now at or beyond the end of their service lives. They are breaking down, no longer running efficiently, and do not supply the volumes of filtered air needed. Existing fans will be replaced, three or four per year over the next four years, until all are upgraded.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This project is in the planning and scheduling phase, with upgrade/replacement priorities being established.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**Remote SCADA for Lift Stations**

WWM-2016-124

Executive Summary

SCADA (Supervisory Control and Data Acquisition) Systems for Lift Stations

Project Justification

This project, to be completed at the end of a currently running pilot program, will install hardware and software that allows for secure communications between remote facilities. Full implementation will be for integrating lift stations and combined sewer overflow (CSO) facilities into a SCADA (supervisory control and data acquisition) system, which will allow for remote monitoring and operational control of the numerous sewer lift stations throughout the city.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

A pilot project is currently underway, with the full implementation being planned and designed.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Plant Operations**Seal Discrete Auto-analyzer**

WWM-2016-118

Executive Summary

This will be the purchase of new, improved laboratory equipment.

Project Justification

The Discrete Analyzer analyzes numerous contaminants, including ammonia and nitrogen, which are monitoring requirements for the NPDES permit. Improved technology allows the lab personnel to test at lower detection limits of contaminants. New analyzer equipment will be needed to keep us in compliance.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility

Project Status

Active

This equipment purchase has been scheduled.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Plant Operations**Serpentex Biosolids Conveyor Rebuild**

WWM-2012-354

Executive Summary

Rebuild of the Serpentex Biosolids Conveyor Systems

Project Justification

This conveyor system moves solids from the Belt Filter Presses to the Biosolids Trucks for transport to the field application sites. Many parts of the equipment wear out over time and through use. A more complete rebuild of the equipment is needed every 10 to 15 years. The rebuilding of the conveyors is necessary to ensure that Biosolids can be removed, transported from the RPWRF, and compliance with permitting is maintained.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Riverside Park Water Reclamation Facility Process Building

Project Status

Active

This project has been scheduled and is in the planning phase.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

The rebuild of the Serpentex conveyors will reduce routine maintenance activities.

Wastewater Management/Right of Way Operations**Bio-Infiltration System Rehabilitation**

WWM-2012-22

Executive Summary

Replaces soils and vegetation (grass) of existing bio-infiltration swales to restore proper function. Study of effective rehabilitation will be performed in 2017 and 2018.

Project Justification

'Bio-Infiltration Systems' or grass percolation areas are commonly known as 'grassy swales' or "208 swales". The City maintains approximately 10 acres of grass percolation areas along arterial streets that treat and dispose of stormwater. City staff performs regular maintenance in order to maintain the effectiveness of these facilities. Bio-infiltration systems are expected to need rehabilitation about every 20 years. This project provides for this substantial rehabilitation efforts along arterials. The purpose of this project is to restore and retain stormwater treatment and infiltration capacity.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

These rehabilitation projects will occur throughout the City.

Project Status

Active

This is an ongoing project.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Maintenance Comments

This project is a maintenance cost for existing infrastructure.

Wastewater Management/Right of Way Operations

City Wide On- Going Cure In Place Pipe (CIPP) Project

WWM-2012-4

Executive Summary

Rehabilitation of damaged pipe using a polyester felt liner impregnated with a resin that hardens when heated. This method of pipeline rehabilitation reduces the typical open trench excavation and paving by relining the pipe lines in place and usually within two days per location.

Project Justification

Many of the City's sewer lines are approaching 75-100 years of age. As deteriorated pipelines are identified by inspecting sewer lines with remote TV inspection cameras the CIPP(cured in place pipe) is a method that rehabilitates these damaged pipe using a polyester felt liner impregnated with a resin that hardens when heated via steam or hot water. Essentially, CIPP constructs a new pipe within a damaged pipe without resorting to excavating. Many of the existing older sewers are made of vitrified clay that is susceptible to cracking and/or infiltration at the joints. Excavation to replace sewer pipes in congested streets is very expensive, so using CIPP is a cost-effective method to rehabilitate these types of pipes. The purpose of this project is to reduce operation and maintenance costs by replacing damaged and leaking pipes.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

This project will occur throughout the City.

Project Status

Active

This is an ongoing infrastructure rehabilitation project.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Right of Way Operations**Closed Circuit Television Inspection Truck 2022**

WWM-2016-111

Executive Summary

This truck is used to inspect all new Storm and Sanitary sewer pipes as well as routine inspection of existing infrastructure for blockages and structural condition.

Project Justification

To maintain the capacity and integrity of the wastewater collection system.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency and CFU 5.4 Groundwater

Location

Other Location

909 E. Sprague

Project Status

Active

Replacement vehicle

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Wastewater Management/Right of Way Operations

Large Line Rehabilitation from Hydrogen Sulfide Damage

WWM-2012-276

Executive Summary

Line large sewer pipes that have been damaged by hydrogen sulfide or are at risk of failure and must be rehabilitated to prolong their service life. The most cost effective method to date to accomplish this rehabilitation is with the CIPP (cured in place pipe) process.

Project Justification

Hydrogen sulfide is a gas that is generated by the decomposition of wastewater and is eroding many of the concrete sewer pipes within the City. This erosion is occurring to the extent that pipes are collapsing and or being structurally compromised because of it. These pipes which are eroded will be lined with the CIPP method which is an inert material. Other pipes may need to be lined to limit risk due to other project construction, infiltration or severe cracking and identified repairs due to structural holes within the pipes.

This project meets the following comprehensive plan goals and/or policies:

Sewer pipes could be damaged or destroyed by NSC construction work

Location

Other Location

These projects occur throughout the City.

Project Status

Active

The project was started in 2013. The first large lines were completed in 2015 and Wastewater Management (WWM) is currently researching best practices for reducing the Hydrogen Sulfide problem.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Right of Way Operations

Lift Station Repair and Upgrade Fund

WWM-2016-41

Executive Summary

Wastewater Management owns operates and maintains several (27 and counting) lift stations throughout the City. Many of these lift stations are in need of various age related repairs. This fund provides money to make those repairs and upgrades.

Project Justification

Lift stations are a critical part of the City's wastewater infrastructure. Located at low points, the lift stations are required to 'lift' sanitary sewage to an elevation that it can flow via gravity to the RPWRF. If the lift stations stop functioning, the sewage backs up into Citizens homes and or flows out manholes onto streets and the ground. Upgrading these stations with new pumps, electrical controls and monitors allows the uninterrupted service to those homes and businesses connected to them.

This project meets the following comprehensive plan goals and/or policies:

CFU 1: Adequate Public Facilities and Services.

Location

Other Location

Miscellaneous locations throughout the City.

Project Status

Active

This project will be ongoing.

External Factors

None at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Right of Way Operations**North Side Service Truck 2017**

WWM-2012-429

Executive Summary

This vehicle is used for maintaining the collection system and is responsible for responding to citizen and emergency calls throughout the day.

Project Justification

To maintain the capacity of the existing infrastructure.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency and CFU 5.4 Groundwater

Location

Other Location

909 E. Sprague

Project Status

Active

Replacement Vehicle

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Right of Way Operations**River Inflow and Infiltration (I/I) Reduction**

WWM-2014-113

Executive Summary

This project will use CIPP (cured in place pipe) techniques to reline pipe along the Spokane River that infiltrate river water during normal and high river flows.

Project Justification

The City has found by line monitoring that portions of the interceptor system along the river built prior to 1950 allow River water via increased ground water levels to flow through joints and cracks into the City system. This project will use CIPP (cured in place pipe) techniques to reline these pipe sections. With the next level of treatment currently under design for the Riverside Park Water Reclamation Facility and the CSO projects, reducing non wastewater flows is essential to the economical design of these projects. Additionally if this water does not enter the interceptor system it will not require treatment and thus plant costs are lowered. Specialized equipment may be necessary to investigate potential areas of inflow and or infiltration along with sophisticated monitoring equipment. To date several million gallons of water per day has been removed from the interceptor system especially during high river flows.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

citywide along the Spokane River

Project Status

Active

ongoing

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**Browne Avenue Sewer Improvements**

WWM-2016-133

Executive Summary

The first project provides additional sewer capacity in the vicinity of Browne from 6th to 3rd Avenue. The 2nd project extends the City main in 2nd Ave from McLellan 250ft east to relieve the over capacitized sewer in Browne from connections in 2nd Avenue

Project Justification

The area of Browne and 2nd have had a history of rain related back ups into businesses for years, and these two projects will provide additional capacity for these businesses and relief the rain related capacity issues.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 Adequate Public Facilities CFU 3 Coordination CFU 5 Environmental Concerns NE1 Water Quality

Location

Other Location

Browne Avenue between 6th and 3rd Avenue, and in 2nd Avenue from McClellan to 250 feet east.

Project Status

Active

The project is currently in the conceptual and preliminary design stage.

External Factors

None known.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**Collection System Planning**

WWM-2014-96

Executive Summary

Develop a 20 year sanitary system collection system.

Project Justification

The last 20 year plan for the sanitary collection system was completed in the 1990s, before the CSO program began. With the construction of CSO facilities, the operation of the collection will change. The plan will identify risks and opportunities for infill development. Instrumentation control between CSO facilities and lift stations will be included.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

citywide

Project Status

Active

Wastewater Management/Sanitary Collections System**Hayford Road Forcemain Replacement**

WWM-2016-38

Executive Summary

The existing 8-inch PVC forcemain was installed in 1985. This project will replace this PVC pipe with an 8-inch ductile iron pipe. The length of the forcemain is approximately 950 feet. Pavement patching will occur in Hallett Drive as necessary.

Project Justification

Older PVC forcemain are prone to cracking and splitting. Replacing these pipes with ductile iron, increases the life expectancy of the forcemain and reduces the risk of the pipe failure.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 Adequate Public Facilities and Services

Location

Other Location

The forcemain is located on Hallett Drive near the intersection with Westbow Road.

Project Status

Active

This project will begin design in 2017.

External Factors

None known at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**High Drive Sewer Upsizing**

WWM-2016-76

Executive Summary

Replace existing sewer main with a larger pipe.

Project Justification

With the construction of CSO Basin 20 Control Facility, the outfall pipe to Latah (Hangman) Creek will be abandoned. Currently, 2 pipes (18-inch and 42-inch) join into a single 18-inch pipe and when flows exceed the capacity of this pipe in High Drive, the combined sewer overflows. Without the overflow pipe, the existing pipe will be over pressured or sewage would flow out of the manhole. The pipe from approximately 29th Avenue to 21st Avenue will be replaced with a larger pipe to prevent pipe damage or Sanitary Sewer Overflow (SSO).

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

High Drive, from 29th Avenue to 21st Avenue.

Project Status

Active

Preliminary design

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**Joint City-County Marion Haye Intertie**

WWM-2012-277

Executive Summary

This project will construct a gravity sewer pipe from North Pointe lift station to Spokane County's Marion Haye Lift Station.

Project Justification

This project will reduce operation and maintenance costs by eliminating a lift station.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

North Spokane

Project Status

Active

The start of this project is pending the completion of two other projects. Construction on this project is expected to start in 2018 with design in 2017.

External Factors

Completion of the Broad Avenue cross over and the Broad Avenue and Assembly connection point are necessary for construction of this project. Council action is required to approve Enterprise Fund Rates in order to fully fund this project. A portion will be constructed in Rowan Avenue.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Sanitary Collections System**NE Pump Station Gravity Line Sewer Upgrade & relocation**

WWM-2015-59

Executive Summary

This project will be the permanent replacement of a damaged sewer.

Project Justification

The existing gravity sewer is damaged from Hydrogen Sulfide and a temporary reroute will be constructed in 2016. The new pipe will be relocated as necessary and sized for future growth in 'The Yard' planning area.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Hillyard area, from Ferrall and Crown to Haven & Broad

Project Status

Active

Preliminary design

External Factors

The pipe route will necessarily cross the proposed NSC alignment at a point that will provide for future maintenance requirements

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**NSC Sewer Line Conflicts**

WWM-2015-58

Executive Summary

The rerouting of existing wastewater pipelines that will be in conflict with the future NSC construction. This reroute construction will initially be funded from City funds and then WSDOT will reimburse the City upon completion.

Project Justification

To maintain facility function and access.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Along the future North Spokane Corridor(NSC) from Wellesley to the Spokane River.

Project Status

Active

Preliminary.

External Factors

Project needs to be completed ahead of WSDOT NSC project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**Post Street Bridge Rehabilitation**

WWM-2013-138

Executive Summary

Replacement of the old 54-inch steel pipe with 450 feet of 60-inch ductile iron pipe within the Post Street Bridge. Sewer must continue to flow during construction.

Project Justification

The Post Street Bridge, located immediately north of City Hall, carries a 54-inch sewer interceptor that transports sewage from the south side of the river to the north side. The bridge needs a significant rehabilitation and included with this project is replacement of the 54-inch steel pipe with 450 feet of 60-inch between the river banks. This project will construct the bridge as well as the pipeline. The type of bridge selected will determine the way to support the pipe during construction.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Post Street Bridge

Project Status

Active

Design on the project is planned to start in 2015.

External Factors

This project is dependant on the reconstruction of the Post Street Bridge. If the bridge project is delayed or accelerated this project would have to follow suit. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System**Private Sewer Retrofit Fund**

WWM-2012-11

Executive Summary

Repairs and upgrades of private sewers and the connection of septic tank systems to the City's sewer system.

Project Justification

Private sewers have been built in many locations in the City, but have not been maintained. Often property owners do not know they are connected to a private sewer line. These sewer present a risk to all City citizens if leakage and failures occur. In some locations, properties are still on septic tank systems. This project would retrofit existing private sewers to be part of the City's sewer system as directed by the Director of Utilities.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

This project will occur throughout the City.

Project Status

Active

This is an ongoing maintenance project.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System

Rossmoor Ridge Forcemain Replacement

WWM-2016-40

Executive Summary

The existing 4-inch PVC forcemain was installed in 1990. This project will replace this PVC pipe with a 4-inch ductile iron pipe. The length of the forcemain is approximately 1,200 feet. Pavement patching will occur in Kensington Drive.

Project Justification

Older PVC forcemain are prone to splitting and failure. Replacing these types of pipes with ductile iron, increases the life expectancy of the forcemain and reduces the risk of the pipe failing and the spillage of sewage on the ground.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 Adequate Public Facilities and Services

Location

Other Location

The forcemain is located in northwest Spokane in Kensington Drive, near the intersection of Kensington Drive and Cedar Road.

Project Status

Active

This project will begin design in 2018.

External Factors

None known at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Sanitary Collections System**Spotted Rd to Geiger Blvd Sewer Replacement**

WWM-2015-60

Executive Summary

Replace 1500 feet of 12-inch sewer pipe that is receiving a large amount of infiltration.

Project Justification

Wastewater operations is having increasing difficulty with maintaining this line in order to keep it flowing at capacity due to the line having sags, hydrogen sulfide deterioration, and infiltration and inflow (I & I) robbing capacity and depositing solids in the sag spot areas.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Spotted Road to Allman Road.

Project Status

Wastewater Management/Sanitary Collections System**Sundance III Forcemain Replacement**

WWM-2016-35

Executive Summary

The existing 4-inch PVC forcemain was installed in 1988. This project will replace this PVC pipe with an 4-inch ductile iron pipe. The forcemain is approximately 750-feet long. Pavement patching will occur in Comanche Drive where necessary.

Project Justification

Older PVC forcemain are prone to splitting and failing. Replacing these pipes with ductile iron, increases the life expectancy of the forcemain and reduces the risk of the pipes failure which prevents sewerage spilling to ground.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 Adequate Public Facilities and Services

Location

Other Location

The forcemain to be replaced is on North Comanche Drive between Ridgecrest Drive and Shawnee Avenue.

Project Status

Active

This project will begin design in 2020.

External Factors

None known at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Sanitary Collections System

TJ Meenach Parallel Siphon

WWM-2015-83

Executive Summary

Construct a new siphon pipeline parallel to the existing siphon under TJ Meenach Drive, including upstream and downstream vaults, drain appurtenances, and providing for emergency relief to the system in the event of a major break between this location and the Wastewater Treatment Plant.

Project Justification

The existing single barrel siphon pipe conveys most of the Cities major interceptor sewer flows to RPWRF. The existing siphon pipe has sharp angles, very steep sections, which makes it impossible to clean and or repair. All siphons are vulnerable to plugging, which can cause back ups, structural damage and complete failure. This project will construct a parallel siphon sewer pipe to provide redundancy, and thus the ability to clean and repair either pipeline while still maintaining flow in the redundant pipeline.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

TJ Meenach from Pettet Drive to Riverview Drive

Project Status

Active

Preliminary design

External Factors

This project will be constructed with the TJ Meenach Levy project. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Wastewater Management/Stormwater**4th Avenue (Sunset to Maple)**

WWM-2016-48

Executive Summary

This project will provide stormwater separation along both sides of 4th Avenue with bioretention areas between the sidewalks and back of curb.

Project Justification

This project will reduce stormwater flows to the CSO system.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

4th Avenue between Sunset and Maple

Project Status

Active

The project is in the planning stages.

External Factors

None known.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**5 Mile Stormwater Project**

WWM-2015-71

Executive Summary

Bio retention swales constructed along street

Project Justification

As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

5 Mile Rd from Lincoln to City Limits

Project Status

Active

preliminary design has been completed

External Factors

This is an integrated project and is tied to the construction of the Levy project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**Cochran Basin Conveyance Pipeline**

WWM-2013-137

Executive Summary

This project will construct a pipeline to convey stormwater to Cochran Basin storage, treatment, and infiltration facilities.

Project Justification

By eliminating the discharge of stormwater from the Cochran Basin, approximately 50% of the City of Spokane's stormwater discharge to the Spokane River will be removed. Approximately 90% of stormwater from this basin will be treated to meet the TMDL requirements from the Department of Ecology.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

TJ Meenach from NW Blvd to Downriver Dr to Aubrey L White Pkwy

Project Status

Active

The project is currently in the planning stage as part of the Integrated Clean Water Plan.

External Factors

Funding for Cochran Basin construction depends upon the Integrated Clean Water Plan. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**Cochran Basin Disc Golf Ponds**

WWM-2016-15

Executive Summary

This project will construct a stormwater treatment and retention facility to be integrated with the Downriver Disc Golf Course. This project will eliminate the direct discharge of stormwater to the Spokane River from the Cochran Basin.

Project Justification

By eliminating the discharge of stormwater from the Cochran Basin, approximately 50% of the City of Spokane's stormwater discharge to the Spokane River will be removed. Approximately 90% of stormwater from this basin will be treated to meet the TMDL requirements from the Department of Ecology.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Wastewater Management/Stormwater**Cochran Basin River Biofiltration Channel**

WWM-2015-109

Executive Summary

This project will construct a stormwater biofiltration channel just west of the TJ Meenach Bridge. This project will reduce the direct discharge of stormwater to the Spokane River from the Cochran Basin.

Project Justification

By eliminating the discharge of stormwater from the Cochran Basin, approximately 50% of the City of Spokane's stormwater discharge to the Spokane River will be removed. Approximately 90% of stormwater from this basin will be treated to meet the TMDL requirements from the Department of Ecology.

Wastewater Management/Stormwater**Cochran Basin TJ Meenach Pond and Connection Piping**

WWM-2016-16

Executive Summary

This project will construct a stormwater treatment and retention facility, a sedimentation vault as well as the necessary downstream piping. This project will eliminate the direct discharge of stormwater to the Spokane River from the Cochran Basin.

Project Justification

By eliminating the discharge of stormwater from the Cochran Basin, approximately 50% of the City of Spokane's stormwater discharge to the Spokane River will be removed. Approximately 90% of stormwater from this basin will be treated to meet the TMDL requirements from the Department of Ecology.

This project meets the following comprehensive plan goals and/or policies:

Location

Wastewater Management/Stormwater**East Sprague Stormwater**

WWM-2015-50

Executive Summary

Stormwater management as part of the East Sprague Avenue project.

Project Justification

As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River. In addition, stormwater will be removed from CSO Basin 34, reducing CSO to RPWRF and storage requirements. In addition, stormwater from Riverside from Lee to Perry Streets will be treated and infiltrated.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Sprague Ave from Hamilton to Altamont

Project Status

Active

Project is in design.

External Factors

Street work will be funded by the Levy funding and Transportation Grants.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**Erie Stormwater Facility**

WWM-2015-53

Executive Summary

Construction stormwater water quality treatment and infiltration facility.

Project Justification

The Union Basin outfall is known to discharge a high amount of PCBs, other toxics, and sediment into the Spokane River. This project will remove the flow to river by capturing and storing stormwater at Erie Street near Trent Avenue. This stormwater will be pumped to treat in a bio-retention facility with an on under drain. The treated stormwater can then be infiltrated via drywells.

This project meets the following comprehensive plan goals and/or policies:

CFU 1, CFU 5, NE 1

Location

Other Location

Erie and Trent Ave

Project Status

Active

This project is in pre-design.

External Factors

Construction of MLK Jr. Way/

Maintenance

Wastewater Management/Stormwater**Fort George Wright**

WWM-2016-46

Executive Summary

This project will include stormwater bioretention along the length of the project.

Project Justification

This project will eliminate untreated stormwater discharge to the Spokane River.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

The project is along Fort George Wright Drive between Government Way and the Spokane River.

Project Status

Active

The project is currently in the planning stages.

External Factors

Construction of the Levy Project

Maintenance

Wastewater Management/Stormwater**Hartson Stormwater**

WWM-2016-100

Executive Summary

The brick catch basins need to be updated as well as construction manholes at the pipe connections.

Project Justification

Hartson sidewalk project will install bumpouts and new catch basins will need to be installed. The existing system has a non-standard pipe connection that will need be upgraded with manholes.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Hartson Ave from Fiske to Thor

Project Status

Active

Planning stages

External Factors

The Hartson sidewalk project will be constructed at the same time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Wastewater Management/Stormwater**High Drive Stormwater Management**

WWM-2016-59

Executive Summary

Manage stormwater as part of the sewer main replacement.

Project Justification

This area of High Drive is part of the combined sewer system. Stormwater runoff will be separated, treated and infiltrated in the City-owned grass areas along High Drive. This project is similar to the previous stormwater projects along High Drive.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

High Drive, from 29th Avenue to 21st Avenue.

Project Status

Active

Preliminary design

External Factors

The project will be constructed with the sewer upsizing project. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Stormwater**Integrated Planning**

WWM-2016-58

Executive Summary

The project will develop a 20 year plan for wet weather systems, for both CSO and stormwater.

Project Justification

This project began to use EPA's Integrated Plan framework to leverage stormwater projects with CSO projects. On-going planning will include Link Spokane and other opportunities for integration.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

citywide

Project Status

Active

Planning for CSO is complete. Stormwater planning has not started.

External Factors**Maintenance**

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**Maple Street (Riverside to Pacific)**

WWM-2016-47

Executive Summary

The project will separate stormwater from the intersection of Maple and Pacific by re-routing the existing storm pipe to the green space to the east of Maple.

Project Justification

The project will reduce the untreated stormwater discharge to the Spokane River.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Maple Street between Riverside and Pacific.

Project Status

Active

The project is in the planning stage.

External Factors

Construction of the Levy project,

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**N. Monroe Stormwater Project**

WWM-2015-74

Executive Summary

Bioretention facilities will be constructed along the street.

Project Justification

As part of the street project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Monroe from Indiana to Cora

Project Status

Active

Preliminary design is underway

External Factors

This is an integrated project and is tied to the construction of the street projects.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**Pacific & Perry Stormwater Facility**

WWM-2015-84

Executive Summary

A series of bio-retention swales to treat and infiltrate stormwater in the area.

Project Justification

Stormwater from WSDOT, CSO Basin 33c, and the surrounding areas will be removed from the combined sewer or the City-owned outfall pipe to the Spokane River. Any flows from this pipe are the City's responsibility, including flows that originate on I90.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Perry from Pacific to 2nd Ave

Project Status

Active

The project is currently in design.

External Factors

Council approval of capital budget

Wastewater Management/Stormwater**Pettet Drive**

WWM-2015-49

Executive Summary

Stormwater bio-retention facilities with pedestrian and bike improvements

Project Justification

Stormwater will be removed from discharging directly to the Spokane River, and instead will be treated and infiltrated. Stormwater swales will be constructed at top of the hill and at the TJ Meenach intersection. Bike and pedestrian improvements will be incorporated with this project. Stormwater education sign will be placed along this route during Bloomsday.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Pettet Drive from TJ Meenach to Nora Ave

Project Status

Active

Design is complete. Project is out to bid.

External Factors

CSO Basin 12 Control Facility outfall pipeline will be constructed along this same alignment.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**Post Street Bridge Stormwater Improvements**

WWM-2016-45

Executive Summary

This project will construct stormwater bioretention adjacent to the roundabout. These bioretention areas will collect and treat stormwater from the roundabout and adjacent impervious areas.

Project Justification

Stormwater at the intersection of Bridge and Lincoln currently drains to the stormwater outfall pipe on the east end of the Post Street Bridge. This project will separate some of the flow from that stormwater outfall pipe and provide treatment.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

The roundabout will be located on the north end of the Post Street Bridge (intersection of Lincoln and Bridge).

Project Status

Active

This project is currently in the planning stage.

External Factors

The construction schedule of the Post Street Bridge could potentially affect the timing of this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Wastewater Management/Stormwater**Sharp Avenue Stormwater Improvements**

WWM-2014-72

Executive Summary

A low impact development stormwater project will be constructed in Sharp Avenue to determine viability of permeable pavements within the traveled lanes. The project will also a center bioretention swale, street trees, and standard pavement.

Project Justification

This project will reduce the amount of pollutants going into the Spokane River.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Sharp Avenue from Pearl to Hamilton

Project Status

Active

Design is underway.

External Factors

Stormwater design needs to be completed by August 1, 2014 to meet an Ecology Stormwater Grant funding design deadline.

Maintenance

Wastewater Management/Stormwater**South Gorge Trail Stormwater Project**

WWM-2015-72

Executive Summary

Bioretention swales constructed along street or in vacant parcels to manage stormwater. In addition, unregulated portions of CSO 22B will be managed as part of this project.

Project Justification

Stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River or the CSO. In addition, removing unregulated stormwater from the sewer system will protect the interceptors.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

Peoples Park to Glover Field

Project Status

Active

Design will be begin in 2015.

External Factors

This is an integrated project and is tied to the construction of the Levy project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	Total
Expected Annual Maintenance	\$0	\$0	\$500	\$500	\$1,000

Wastewater Management/Stormwater**Sunset Boulevard (Royal to Lindeke)**

WWM-2016-43

Executive Summary

The project will include construction bioretention adjacent to the road along the entire project limits. This will eliminate an MS4 outfall to Latah Creek.

Project Justification

The stormwater along the length of the project is currently managed in open ditches and piping that discharges to Latah Creek. The proposed project will manage stormwater more efficiently and will provide treatment prior to infiltration into the ground.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

The project is on Sunset Boulevard between Royal and Lindeke.

Project Status

Active

The project is currently in the planning stage.

External Factors

Construction of the Levy street project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**TJ Meenach Stormwater Project**

WWM-2015-68

Executive Summary

Stormwater management along TJ Meenach as part of the Levy Project

Project Justification

As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

TJ Meenach from Downriver Dr to Northwest Blvd

Project Status

Active

This project will begin design in 2017.

External Factors

This is an integrated project and is tied to the construction of the Levy projects.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Wastewater Management/Stormwater**WSDOT I-90 Stormwater Separation**

WWM-2015-55

Executive Summary

Capture, treat, and infiltrate stormwater from I90 that currently is conveyed into CSO Basin 34 pipelines

Project Justification

Currently at least 30 acres of stormwater from Interstate 90 are carried into the City's combined sewer system. This project would manage this stormwater in WSDOT right of way and remove from the combined sewer.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities CFU 3 Coordination CFU 5 Environmental Concerns NE 1 Water Quality

Location

Other Location

I90 at Stone St, Rebecca St and at Ray St

Project Status

Active

This project is in pre-design.

External Factors

WSDOT construction schedule and funding

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

WATER DEPARTMENT

Water Department

Department Goals

The paramount goal of City of Spokane's Water Department is "to provide affordable high quality water with excellent customer service and ample fire protection."

Through careful planning, condition assessments, asset management, continuing education and conservation, the Spokane Water Department is positioned to meet the needs of our present and future customers for many years to come. Using this approach, we have grown from our beginnings in 1894 with just 2 miles of water main and a reliance on the Spokane River for water to become the 3rd largest water

system in the state with more than 1,000 miles of water main utilizing water from the Spokane Valley Rathdrum Prairie Aquifer.

Contact Information

Services Provided

The City of Spokane Water Department delivers up to 180 million gallons of clean, safe drinking water a day to customers within our retail service area at an affordable price. This includes customers both inside the City of Spokane corporate boundaries and outside them. As required by State law, the City operates a Class A water system under the Washington State Public Water System Identification No. 83100K.

Revenues provided by service fees and water sales make the utility self-supporting, funding an operations and maintenance budget of more than \$32 million annually. Capital projects are funded through the Integrated Capital fund. Utility taxes collected on fees and water sales are a large source of revenue for the City's General Fund.

Background

The Program is organized into five elements: source well and booster pump stations, storage system improvements, transmission mains, distribution mains, and facilities and operations.. Within these elements, the department has both specific individual projects and continuing maintenance projects with large capital expenditures. Minor maintenance work is completed under the utility's operation budget and will not be found in this document.

- Source Well and Booster Pump Stations: Source wells extract water from the Spokane Valley Rathdrum Prairie Aquifer, the City's sole source for drinking water. Booster pump stations move the water across distances and to storage facilities at higher elevations providing service throughout the City.
- Storage Systems Improvements: The City's water system has several varieties of tanks and reservoirs that provide water storage. These facilities are located throughout the City, and they serve the dual purposes of balancing customers supply needs and fire protection. Well and booster pump stations keep the tanks full and full tanks supply emergency storage. In addition tanks help equalize the water pressure in the entire system.
- Transmission Mains: Pipes deliver water from the Aquifer to water customers. Large-diameter pipes that transport water across the city to storage facilities are called transmission mains. Smaller diameter pipes that carry water to residences and businesses are called distribution mains.
- Facilities: In addition to operating and maintaining the water system, the City's Water Department is responsible for several facilities, including the Upriver Dam.
- Distribution Mains: Water mains delivering service to our customers, most of which were installed prior to World War II

Level of Service Standard

The City presently has seven well sites tapping into the aquifer for its water supply source. Ideal design practice recommends that the source of supply capacity be equal to the maximum day demand (MDD), allowing stored water to be used for the peaking requirements of the system. The total system pumping capacity is 282 MGD. The highest recorded MDD is 185 MGD. Minimum level of service standards were established in the Countywide Planning Policies. According to these policies, distribution pipelines must be designed to deliver sufficient water to meet peak customer demands (peak hourly demand), this period occurring over a range of a few minutes to several hours. The flow rate must be provided at no less than 30 psi (pounds per square inch) at all points in the distribution system (measured at any customer's water meter or at the property line if no meter exists) except for fire flow conditions. By existing policy, the City of Spokane Water Department requires that the water system provide the

specified level of service at a minimum pressure of 45 psi. Water pressures of at least 45 psi have proven more satisfactory in terms of meeting the water needs for most customers.

Spending by Category Summary

Water

Category	2017	2018	2019	2020	2021	2022	Total
Distribution Mains	\$1,432,000	\$290,000	\$130,000	\$610,000	\$115,000	\$520,000	\$3,097,000

Water/Distribution Mains**1st Avenue Distribution Main Replacement (Maple to Bernard)**

WAT-2016-53

Executive Summary

The project replaces 3000 feet of cast iron distribution main. These mains were constructed between 1900 and 1976. Existing pipe sizes range from 6 inch to 10 inch. All pipe will be replaced with 10 inch pipe. The 8-inch ductile iron pipe between Walnut and Madison will remain in place.

Project Justification

The existing cast iron pipe will not likely survive the construction of the street project.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

Walnut to Bernard

Project Status

Active

The project is currently in the planning phase

External Factors

None known at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Distribution Mains**4th Avenue Distribution Main Replacement**

WAT-2016-56

Executive Summary

This project replaces 1,300 of cast iron distribution main. The main was originally constructed in 1893.

Project Justification

The cast iron pipe has reached the end of its useful life and would not likely survive the street construction project.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

4th Avenue between Sunset and Maple

Project Status

Water/Distribution Mains**Barnes Road Water Main**

WAT-2016-67

Executive Summary

This project will complete the connection from the top of Five Mile Prairie to the water system extending up Barnes Road.

Project Justification

This pipeline will provide serve along Barnes Road as well as providing a looping connection. It will also increase the level of service to existing customers on the lower portion of Barnes Road.

This project meets the following comprehensive plan goals and/or policies:

CFU 1 adequate public facilities

Location

Other Location

Barnes Road from Phoebe to Strong Road

Project Status

Active

Estimates have been completed. Design has started.

External Factors

Coordination with the road project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Distribution Mains**Boone/Maple & Ash Distribution Main Replacement**

WAT-2016-57

Executive Summary

The project replaces approximately 450 feet of 6 inch cast iron distribution main. The pipe was originally installed in 1892.

Project Justification

The cast iron pipe has reached the end of its useful and likely would not survive the construction of the street project.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

The intersection Boone/Maple and Ash.

Project Status

Active

The project is currently in the planning phase.

External Factors

None known at this time.

Water/Distribution Mains**Hartson Water Main Replacement (Fiske to Thor)**

WAT-2016-101

Executive Summary

Replace existing 10-inch cast iron pipe on Hartson Avenue between Fiske and Thor. This work will be integrated with the sidewalk improvement project as well as the storm system improvements (catch basin and manhole replacement).

Project Justification

The pipe was installed in 1924. With the construction of the sewer water upgrades, the water main will need to be replaced.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

Hartson Ave from Fiske to Thor

Project Status

Active

Planning Stages

External Factors

Hartson Ave sidewalk project

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Distribution Mains**Howard South Channel Bridge Main Replacement**

WAT-2016-19

Executive Summary

As part of the Howard Street South Channel Bridge replacement, an existing water line will be replaced.

Project Justification

The water main is necessary to provide service to Riverfront Park and the north side of the river.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Howard St South Channel Bridge

Project Status

Active

Construction to begin in 2016

External Factors

Riverfront Park bond project will be replace the existing bridge and the water line will be upgraded with this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Distribution Mains**Maple Street (Riverside to Pacific)**

WAT-2016-51

Executive Summary

The project replaces approximately 400-feet of 10-inch cast iron water main constructed in 1957.

Project Justification

The cast iron water main would not likely survive the construction of the road.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.5

Location

Other Location

The water line replacement is on Maple Street between Riverside and Pacific.

Project Status

Active

The project is in the planning phase.

External Factors

None known at this time.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Distribution Mains**Napa Distribution Replacement (2nd to Sprague)**

WAT-2016-54

Executive Summary

The project replaces 1150 feet of 16-inch cast iron distribution main that was constructed in 1895.

Project Justification

The existing pipe has reached its useful life and likely would not survive the construction of the street project.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

Napa between 2nd and Sprague.

Water/Distribution Mains**Post Street Bridge Distribution Main**

WAT-2016-49

Executive Summary

The construction of the roundabout will require replacement of 8-inch water distribution main along two legs of the roundabout.

Project Justification

The utilities need to be relocated as part of the roundabout construction

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 Coordination of Utility Installations.

Location

Other Location

The project is located on the north end of the Post Street Bridge (intersection of Lincoln and Bridge).

Project Status

Active

This project is in the planning stages

External Factors

Construction of the Post Street Bridge could potentially effect the timing of the project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Distribution Mains**Sharp Avenue Main Replacement**

WAT-2015-128

Executive Summary

Replacement of a 10-inch 1893 cast iron water main with a new 12-inch ductile iron main.

Project Justification

The existing pipe is aged to the point where failure risk is significant. Replacement is necessary to provide adequate level of service and reliability.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2 Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5 Infrastructure Maintenance

Location

Other Location

Sharp Avenue from Pearl to Hamilton

Project Status

Active

Estimates have been completed. No additional right of way is required.

External Factors

Coordination with the integrated project elements.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Distribution Mains**Sprague Avenue Rebuild - Water Main Replacement**

WAT-2016-7

Executive Summary

This project will replace existing 1962 10-inch cast iron distribution main. This water distribution main will be replaced as part of the larger integrated project.

Project Justification

This project is necessary because the existing cast iron line will not likely survive construction.

This project meets the following comprehensive plan goals and/or policies:

1

Location

Other Location

Sprague from Helena to Stone.

Project Status

Active

The project is currently in design.

External Factors

The distribution main construction could be affected by the timing of the larger integrated project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Facilities and Operations**Rebuild Generator #1 in Powerhouse #1**

WAT-2014-149

Executive Summary

Rebuilding of generator #1 in powerhouse #1 at Upriver Dam.

Project Justification

This generator has not been rebuilt in over 30 years. This project will increase asset life while improving performance and power generation.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Upriver Dam

Project Status

Active

Design in 2017. Construction in 2018.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Facilities and Operations**Upriver Dam Spillway Rehabilitation Phase 3**

WAT-2016-88

Executive Summary

The Spillway at Upriver Dam is a concrete structure that requires repair and rehabilitation to remain safe and functional. The study will include evaluation of the trunion bearings that operate the spillway and an apron membrane at the fuse plug that will connect the apron to the power channel.

Project Justification

This project is designed to rehabilitate the spillway so it will remain in safe operating condition.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Upriver Dam

Project Status

Active

Additional study and design in 2017 with Construction beginning in 2019.

External Factors

Council action is required to approve funding in order to fully fund this project.

Water/Facilities and Operations**Water Facilities Backup Power Retrofit**

WAT-2016-89

Executive Summary

Retrofitting of existing water facilities with backup power disconnect and/or on site backup generators at 9 water department facilities.

Project Justification

Backup power generators or a backup power disconnect for portable generators are necessary at water facilities to ensure water distribution during power emergencies.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Lincoln Heights 2017, Garden Park 2017, Glennaire 2017, Eagle Ridge 2018, Cedar Hills 2018, West Drive 2019, Spotted Road 2019, 5-mile 2019, Kemp 2019

Project Status

Active

Construction at 9 water facilities in 2017, 2018 and 2019.

External Factors

Council action required to approve funding to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Facilities and Operations**Water Service Replacement Program**

WAT-2013-158

Executive Summary

This would be a program designed to install sections of distribution main then reconnect service lines that are currently several hundred feet long for long services and this program will also replace current lead services with copper.

Project Justification

There are over 7,000 service lines in the service area which are in excess of 250 feet long; typically before the meter. These lines are often leaking, and a source of lost water and revenue. There are currently 483 lead services remaining in the service area that are targeted for replacement through this program.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

City wide

Project Status

Active

Ongoing. Long Service Elimination and Lead Service Replacement. Long Service Elimination annual program work started in 2014.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Source Well and Booster Pump Stations**Central Avenue Station 2nd Well Rehabilitation**

WAT-2012-48

Executive Summary

Central Avenue Well Station has two wells located at Central Avenue and Normandie Street. The Number 2 well station will be upgraded and modernized with a new building housing new pumps and motors.

Project Justification

The Central Avenue Well Station consists of two wells with two submersible pumps in each. These pumps are old, very inefficient and very costly to maintain. This project will upgrade the second of the two wells to meet current state standards, and to increase capacity, efficiency and reliability. Both wells contain older submersible style pumps which are not energy efficient and are very expensive to maintain.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 6.1 Community Revitalization ED 3.5 Infrastructure Maintenance

Location

Other Location

Central Avenue and Normandie Street in the northern portion of the City of Spokane.

Project Status

Active

Preliminary design has started.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Source Well and Booster Pump Stations**Five Mile Booster Twin**

WAT-2013-171

Executive Summary

Additional booster station in the Five Mile pressure zone.

Project Justification

The current booster station can no longer keep up with the required load. A twin station, at a separate location, provides more redundancy and reliability than a single replacement station at a single location.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Five Mile

Project Status

Active

Planning stage

External Factors

Property may need to be purchased for the site. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Water/Source Well and Booster Pump Stations**Hoffman Well**

WAT-2013-172

Executive Summary

This project would be to determine what could be done to salvage the well and put it back in service for the City.

Project Justification

The Hoffman Well station consists of two hand dug, brick lined wells. One well has a 'kink' in it due to the ground shifting, and is not safe to use. This project would determine rehabilitation options.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Wellesley Avenue and Hoffman Street in the northern portion of the City of Spokane.

Project Status

Active

Planning stages

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Water/Source Well and Booster Pump Stations**Indian Trail In-Line Booster Station**

WAT-2015-145

Executive Summary

The construction of an in-line booster station for the Indian Trail area.

Project Justification

The Indian Trail area is served by wells a considerable distance to the east. Water pressure is lost over the long transit distance. An in-line booster station will be constructed to help move water west, increasing service levels and reliability to the area.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Northwest Spokane. Final site has not yet been selected.

Project Status

Active

Scoping estimates have been completed.

External Factors

Site selection.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Source Well and Booster Pump Stations**New Water Supply Well**

WAT-2013-174

Executive Summary

This project would site, develop, and connect a well in the central or western portion of the City to the City's existing water system.

Project Justification

Currently the city's wells all lie in the eastern portion of the City. This project would increase efficiencies of operation by not pumping water as far, and increase system reliability and flexibility by not having all the wells on one side of the City.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Central to West Spokane.

Project Status

Active

Evaluating locations.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Source Well and Booster Pump Stations**Plains System New Booster**

WAT-2012-141

Executive Summary

Design and construct a new booster station to increase supply to the West Plains area.

Project Justification

A new booster station will be constructed in the West Plains area. The new booster station will improve water service to the Plains Pressure System by providing redundancy and increased capacity. The exact location of this booster station has not been determined, but is needed in the vicinity of the existing Spotted Road Booster Station. This booster station will supply customers and the increasing demands south and west of the SIA area. Demand in the Plains System is increasing as marketable land near and around the Spokane International Airport develops. This proposed booster station will balance our system of supply by eliminating a weak link in the supply system that provides water to this area.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

North of the Spokane International Airport in the vicinity of the existing Spotted Road Booster Station.

Project Status

Active

Planning Stages

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Source Well and Booster Pump Stations**Upriver Headers**

WAT-2013-168

Executive Summary

Steel Pipe Replacement.

Project Justification

Well Electric Station was constructed in 1925. It is one of the two largest water feeds to the City. The pipes directly outside the station are old steel pipes that are in need of replacement to insure system reliability and avoid unscheduled, potentially very long outages.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

2701 N. Waterworks Street near Upriver Dam. Located in the East Central portion of the City of Spokane.

Project Status

Active

Pipes scheduled for replacement in 2020.

External Factors

Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Source Well and Booster Pump Stations**Water Capital Improvement Plan**

WAT-2016-17

Executive Summary

An analysis will be conducted by Integrated Capital Management to determine where improvements need to be made within the water system for the next 20 years.

Project Justification

This project is necessary to plan the appropriate improvements needed to keep the water system functioning as necessary.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2
Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5
Infrastructure Maintenance

Location

Other Location

City wide

Project Status

Active

This analysis work will begin in 2016.

External Factors

None known.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Source Well and Booster Pump Stations**Well Electric Well Station Evaluation**

WAT-2016-92

Executive Summary

Study to determine the feasibility of lowering the Well Electric Wells.

Project Justification

Lowering the wells will help maintain the well station capacity in later summer months and during drought conditions with the seasonal variations in aquifer levels.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Well Electric Well Station

Project Status

Active

Study in 2017

External Factors

Council action required for expenditure of fund.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Storage System Improvements**High System Tank**

WAT-2013-173

Executive Summary

This project will construct a reservoir to increase the amount of storage in the High pressure system such that it would meet state standards on its own, providing increased emergency and operational reliability.

Project Justification

The High System (pressure zone) is currently undeserved in terms of water storage, both for operational and emergency purposes. The emergency portion of the required water storage has been provided by the reservoirs further up the hill, and in the case of emergency they would backfeed down as needed. This project would allow this system to stand alone in meeting requirements.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

South Hill, Spokane.

Project Status

Active

Preliminary estimate complete; additional right of way needed.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Storage System Improvements**Qualchan Reservoir Rehabilitation**

WAT-2016-18

Executive Summary

This project will rehabilitate the outside of the Qualchan Reservoir. This rehabilitation will include structural repairs as well as upgrade to interior coating.

Project Justification

The tank has required structural repairs over the last few years.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.3 Maintenance ED 3.5 Infrastructure Maintenance

Location

Other Location

4920 S. Lincoln Way

Project Status

Active

Estimates will be developed in 2016.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Water/Storage System Improvements**SIA System Additional Reservoir**

WAT-2013-167

Executive Summary

This project will construct a third reservoir in the SIA system.

Project Justification

The two existing reservoirs in the SIA system are not of adequate capacity to fully serve the area and are located on one side of the zone. This additional reservoir will both provide adequate storage but also balance the system for smoother service and operations.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Planned for the vicinity of Highway 2 and Hayford Road. Property will need to be acquired.

Project Status

Active

Preliminary estimate complete; no additional right of way needed.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Storage System Improvements**Sunset Reservoir Rehabilitation**

WAT-2015-147

Executive Summary

Rehabilitation of the Sunset Reservoir to include sandblasting and recoating the interior and cleaning and recoating of the exterior.

Project Justification

The existing coating systems are failing. To preserve the life and value of the asset the rehabilitation needs to occur.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Sunset Reservoir; 4390 South Assembly Street.

Project Status

Active

Project selection and estimate completed.

External Factors

Council approval of the funding expenditure.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Storage System Improvements**Tank Rehabilitation Fund**

WAT-2013-163

Executive Summary

These projects will extend the service life of the reservoirs as well as limit leaking and potential contamination issues associated with the City's storage facilities.

Project Justification

The water department has 34 reservoirs. The coatings and liners used have a life expectancy of 10 to 40 years depending on tank style and materials used. A rehabilitation schedule has not been in place or followed for many years. This would be the continuation of a program started in 2014.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 5.2 Water Conservation ED 3.5 Infrastructure Maintenance

Location

Other Location

City wide.

Project Status

Water/Storage System Improvements**Thomas Mallen #2**

WAT-2012-160

Executive Summary

This project will construct a new reservoir in the Plains Pressure System.

Project Justification

This second reservoir provides needed storage in the western portion of the City's water service area. As development continues, this area is becoming under served by the existing facilities. Additional storage, both in volume and location, will address this. Furthermore, increased water supply in the area will create more operational flexibility and better customer service.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

In the vicinity of Thomas-Mallen and White Roads.

Project Status

Active

Initial estimate complete; property acquired. Construction in 2021.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Storage System Improvements**Thorpe Road Reservoir No. 2**

WAT-2012-184

Executive Summary

This project will construct a 3.5 million gallon second reservoir next to the existing one on Thorpe Road.

Project Justification

The existing reservoir serves the Low Pressure Zone and the new 3.5 million gallon reservoir will provide redundancy and additional capacity for growth in the Spokane International Airport (SIA) and Plains pressure zones on the West Plains.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Adjacent to the existing Thorpe road reservoir located West of Spokane near Thorpe Road, south of Interstate 90.

Project Status

Active

Preliminary estimate complete; no additional property needed.

External Factors

Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**16th Ave Transmission Main, Chestnut to Milton Booster**

WAT-2014-163

Executive Summary

Replacement of a 30-inch steel transmission line

Project Justification

The existing steel line is exposed and vulnerable to failure. This project would replace the steel main with a buried ductile iron pipe.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

16th Ave and Chestnut crossing Latah Creek to 15th Ave and Milton

Project Status

Active

Planning stages

External Factors

Permitting as to what time of year the creek crossing would be allowed.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**37th Avenue Water Transmission Main**

WAT-2015-124

Executive Summary

Completion of a second water transmission feed to the Brown Park Reservoirs, in conjunction with the Havana Glenrose Project.

Project Justification

This section of transmission main completes the second feed to the southern portion of the city.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2 Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5 Infrastructure Maintenance

Location

Other Location

37th Avenue from Havana to Ray Street.

Project Status

Active

Design is complete. Construction will start in 2016.

External Factors

Coordination with the other elements of the integrated project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Transmission Mains**57th Transmission Main Rehabilitation/Replacement**

WAT-2013-169

Executive Summary

This project will replace or rehabilitate the existing old transmission main.

Project Justification

The transmission main that runs from Perry to Glenrose is currently the only main feeding into or out of the Brown Park Reservoirs, who in turn feed the majority of the south hill. This main is in need of rehabilitation/replacement. An evaluation study is scheduled for 2016. The design, based on the results of the evaluation, will follow.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

57th Avenue from Perry to Glenrose.

Project Status

Active

Pipe is being evaluated.

External Factors

The 57th/Glenrose/37th project slated for construction in 2015 and 2016 would be in place to provide water service such that this main can be worked on. This project may need to be broken into as many as 3 phases for constructability. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Transmission Mains**Eagle Ridge Transmission Main**

WAT-2016-96

Executive Summary

Secondary transmission feed from the low system at the transmission main located in Thorp Road to transmission main in Qualchan Drive. this provides additional capacity into the Qualchan/Eagle Ridge systems.

Project Justification

With the continued growth of the Qualchan/Eagle Ridge area, additional capacity is required to serve customers in this area.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

From transmission main in Thorpe Road to Qualchan Drive.

Project Status

Active

Design 2018 with Construction 2019

External Factors

Council action for expenditure of funds.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Transmission Mains**Five Mile Road Water Main**

WAT-2015-119

Executive Summary

This project will replace 1972 18-inch steel and a 1972 12-inch cast iron mains with a combined 18-inch ductile iron main.

Project Justification

This project will be done as part of the integrated road project, renewing pipelines that have been degraded through years and aggressive soil conditions.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2 Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5 Infrastructure Maintenance

Location

Other Location

Five Mile Road between Lincoln Road and Strong Road.

Project Status

Active

Initial estimates have been completed. No additional right of way is anticipated to be required.

External Factors

Coordination with the integrated work, and council approval will be needed for expenditure of funds.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**Fort George Wright Transmission Main Replacement**

WAT-2016-50

Executive Summary

This project replaces approximately 3,500 feet of 12-inch distribution piping and 1,000 feet of 18-inch transmission main piping.

Project Justification

These existing lines are cast iron lines built in 1967. These pipelines likely wouldn't survive the construction of the new street.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 Coordination of Utility Installations ED 6.5 Infrastructure Maintenance

Location

Other Location

Fort George Wright between Government Way and the Spokane River.

Project Status

Active

The project is currently in the planning phase.

External Factors

Construction of the Levy street project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**Howard Street Bridge Pipe Replacement**

WAT-2015-122

Executive Summary

Replacement of the existing 1912 12-inch steel water main that crossed the Howard Street Bridge.

Project Justification

The existing main is corroded and at risk of failure. Replacement with the bridge renewal project is the best time to renew the pipeline.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Howard Street Bridge

Project Status

Active

Scoping estimates have been completed. No additional right of way is anticipated to be required.

External Factors

Coordination with the Parks Department on the bridge replacement project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**Large Diameter In-Place Condition Assessment**

WAT-2015-108

Executive Summary

Perform in-place pipeline condition assessment on identified transmission main sections.

Project Justification

This project will help determine the condition of existing pipelines; to determine the best use of funds for replacement or rehabilitation and to maximize useful life without early replacement nor undue risk of failure.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

57th Avenue from South Glennrose Road to South Perry Street and 14th Avenue from 485 feet east of South Latawah Street to East Rockwood Boulevard.

Project Status

Active

Contract for assessment in being developed.

External Factors

Council action is required to approve the use of Water Rate funds to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Transmission Mains**Manito Boulevard from 14th to 33rd Avenue**

WAT-2012-192

Executive Summary

Replace about 1.3 miles of steel transmission main with 24-inch ductile iron pipe.

Project Justification

This project replaces about 1.3 miles of 24-inch steel transmission main with 24-inch ductile iron pipe. The pipe route follows Manito Boulevard from 33rd Avenue to 21st Avenue and through Manito Park roadways to 14th Avenue. The existing steel main has had multiple repairs and is in poor condition due to age and corrosive soils.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2
 Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5
 Infrastructure Maintenance

Location

Other Location

Manito Boulevard from 33rd Avenue to 14th Avenue.

Project Status

Active

Initial Estimates are complete; no additional right of way is necessary.

External Factors

Events in and around Manito Park. Council action is required to approve Water Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**North/South Freeway Crossings**

WAT-2013-149

Executive Summary

The DOT project, the North-South Freeway, will cross two of the city's major transmission lines: one at Wellesley and one at LaCrosse. This project would be to do work in coordination with that DOT to relocate those lines and keep the system in tact.

Project Justification

This project would relocate the piping crossing the new freeway.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

North South Freeway crossings at LaCrosse and at Wellesley.

Project Status

Active

Construction will begin in 2017.

External Factors

Coordination with DOT. Council action is required to approve Enterprise Fund Rates in order to fully fund this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total
Expected Annual Maintenance	\$0	\$0	\$0	\$0	\$0	\$0	\$0

Water/Transmission Mains**Post Street Bridge Water Main**

WAT-2015-121

Executive Summary

Installation of a water main on the reconstructed Post Street Bridge.

Project Justification

The Post Street Bridge used to have a water main on it, but long ago became unserviceable. Reestablishment of a water connection across the river at this point would increase reliability and redundancy of the downtown water system.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2 Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5 Infrastructure Maintenance

Location

Other Location

Post Street Bridge

Project Status

Active

Scoping level estimates have been completed.

External Factors

Coordination with the bridge project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Transmission Mains**Ray Street Water; Well to 17th**

WAT-2015-115

Executive Summary

Replacement of 1936 steel water main 36-inch.

Project Justification

The existing transmission main is in poor shape, and at the end of it's useful life. Replacement in conjunction with the street project is planned.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

Ray Street, from approximately Hartson to 17th Ave.

Project Status

Active

Initial estimates are complete; no additional right of way is necessary

External Factors

Coordination with other departments and approval by the council for use of Water Rates funds.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Transmission Mains**Sprague Avenue Trans. and Dist. Mains (Browne to Hatch)**

WAT-2016-52

Executive Summary

This project replaces approximately 3,200 feet of 1894 cast iron transmission main.

Project Justification

The existing pipe was constructed in 1894 and is past its useful life.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

The water line replacement is on Sprague Avenue between Browne and Hatch.

Project Status

Active

The project is currently in the planning phase.

External Factors

Construction of the street project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

	2017	2018	2019	2020	2021	2022	Total

Water/Transmission Mains**Sprague Avenue Trans. and Dist. Mains (Cedar to Browne)**

WAT-2016-55

Executive Summary

This project will replace approximately 4,700 feet of transmission and distribution piping.

Project Justification

The cast iron pipe was constructed in the early 1900s and has reached it's useful life. The piping would not likely survive construction of the street project.

This project meets the following comprehensive plan goals and/or policies:

CFU 3.2 ED 6.1

Location

Other Location

Sprague between Cedar and Browne

Project Status

Active

The project is in the planning phase.

External Factors

Construction of the street project.

Water/Transmission Mains**TJ Meenach Dr. Water Transmission Main; Bridge to NW Blvd**

WAT-2015-104

Executive Summary

Replacement of 1,700 feet of 18 inch cast iron transmission main.

Project Justification

The roadway along this section is being completely reconstructed as part of other city projects, and this project will replace the aged 18-inch cast iron line with a new ductile iron water main. This will complete the renewal of the roadway system and insure system functionality for the next 100 years or more.

This project meets the following comprehensive plan goals and/or policies:

CFU 1.2 Operational Efficiency CFU 1.3 Maintenance CFU 1.5 Utility Construction Standards CFU 3.2
Coordination of Utility Installations CFU 5.2 Water Conservation CFU 6.1 Community Revitalization ED 3.5
Infrastructure Maintenance

Location

Other Location

TJ Meenach Drive from the TJ Meenach Bridge to Northwest Blvd.

Project Status

Active

Initial estimates are complete.

External Factors

Coordination with the other elements of the integrated project and council action is required to approve funding this project.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

Water/Transmission Mains**Wellesley Ave Transmission Main**

WAT-2015-118

Executive Summary

Replacement of existing 1912 and 1926 steel water main with ductile iron water main.

Project Justification

The existing main, in part or in whole, is riveted steel from the 1910's and 20's. It is beyond it's service life and requires replacement in order to provide reliability and reduce the risk of failure.

This project meets the following comprehensive plan goals and/or policies:

Location

Other Location

East Wellesley Avenue from North Perry to North Freya Street

Project Status

Active

Initial estimates completed; no additional right of way is required.

External Factors

Coordination with other utilities and streets department. This project will require council approval of funds expenditure.

Maintenance

Maintenance of capital facilities, buildings and infrastructure has an impact on a Department's operating budget, and thus routine maintenance costs for new and ongoing projects are identified in the table below.

INTEGRATED PROJECTS

Integrated Projects

Background

Maintaining the public infrastructure, from streets to sewer lines, that serves as the community backbone is one of the most important responsibilities of City government. The Citywide Capital Improvement Program is a tool to identify needs the City intends to address over the next six years from all our service areas. These needs are based on the City's Comprehensive Plan goals. Our goals are: (1) Provide

Transportation choices;
(2) Accommodate access to daily needs and regional destinations;
(3) Maximize benefits with integrated public investments; (4) Promote economic opportunity and fiscal responsibility; (5) Enhance public health and safety;
(6) Respect Natural & Neighborhood Assets

The challenge is to not only meet these goals but to also consider all the ways streets are used. Ultimately we want to broaden the traditional definition of streets from one that just considers the variety of mobility uses to a three-dimensional view that also includes below-ground connectivity for public utilities such as sewer, water and stormwater. Integrated projects are the result of looking at the street right-of-way in this new way--three-dimensionally.

Purpose of this Chapter

An integrated project is made up of multiple projects, for example a single project may incorporate replacing a water line, installing a stormwater system while the roadway is being constructed. In this example, three elements make up the integrated project (Water, Stormwater and Streets) and consequently each of those elements are shown separately within their respective chapters within this Capital Improvement Program. For accounting purposes, the individual elements are also reflected in their respective chapters. This section however is intended to show all the elements in one location to provide a complete understanding of the entire project.

Spending by Category Summary

Integrated Projects

Category	2017	2018	2019	2020	2021	2022	Total
Integrated Projects	\$23,586,022	\$26,904,217	\$16,252,000	\$10,000,000	\$10,805,000	\$3,865,000	\$91,412,239

Integrated Project Reports

Begin Year

Integrated Projects 2017 - 2022

Indiana Ave, Division St to Perry St.

IPM-2015-41

Executive Summary

Complete full-depth replacement of approximately 3,200 feet of roadway incorporating stormwater swales between existing sidewalk and curb and a 2-lane travel way with parking & bike lanes on each side of street. Swale areas will be constructed between existing trees. Integrated W/Water & Stormwater.

Project Justification

This section of road is deteriorating and needs repair. This is also a collector street to the Avista campus and experiences a significant level of truck traffic. Trolley rails will be removed as well, MS4 flows will be reduced by incorporating swales.

Location

Phase I: Indiana Ave, Division St to Dakota. Phase II: Dakota to Perry St.

Project Status

Phase 1 is scheduled for CN in 2015 and Phase 2 in 2016

37th Avenue

IPM-2015-48

Executive Summary

Design & ROW of roadway to current City of Spokane standards. Construction of a water transmission main for the southern portion of the City. And the project includes separated sidewalks, left turn pockets, bike lanes, and stormwater facilities.

Project Justification

This section of water transmission main completes the second feed to the southern portion of the City. 37th Avenue currently experiences localized flooding within the project limits causing water quality issues as well as pedestrian and motorist safety issues. This area is also prone to flooded basements. The project will implement infrastructure improvements as warranted by new development on the Moran Prairie. Hazel's Creek Stormwater Facility infiltration capacity is limited by a downstream restriction. As more capacity is necessary at Hazel's Creek, stormwater will be conveyed in a piping system downstream. This is also a main corridor running across Spokane's south side. There are three schools adjacent to this roadway. The current roadway is mainly a 2-lane section. It is part of our master bike plan and sidewalk is missing in many areas.

Location

37th Avenue from Havana to Ray Street.

Project Status

Design is underway. Project estimates have been completed.

External Factors

Project Cost

Project Title	Project Phase	Spending to Date	2017	2018	2019	2020	2021	2022	6 Year Total	Total

Barnes Road from Phoebe to Strong Road

IPM-2015-93

Executive Summary

The proposed project will construct a new section of Barnes Road between Phoebe and Strong Road. Separated sidewalk on one side, drainage facilities along the backsides of the curbs, two lanes for vehicular traffic, a bike lane going uphill and shared-use on the downhill side of the roadway

This project will complete the connection from the top of Five Mile Prairie to the water system extending up Barnes Road.

Project Justification

This pipeline will provide serve along Barnes Road as well as providing a looping connection. It will also increase the level of service to existing customers on the lower portion of Barnes Road.

A connection between the Indian Trail area and 5-Mile Prairie has been sought for many years because of the safety concerns of having very limited access in and out due to the topography of the area. Constructing Barnes Road will greatly improve access.

Location

Barnes Road, from Phoebe to Strong Road.

Project Status

Estimates have been completed.

Five Mile Road, Lincoln Road to Strong Road

IPM-2015-101

Executive Summary

This project will replace 1972 18-inch steel and a 1972 12-inch cast iron mains with a combined 18-inch ductile iron main.

Bio retention swales constructed along street

Complete a full depth roadway replacement for 4600 feet of roadway from Lincoln Rd to Strong Rd. Place missing sidewalk and update existing ADA Ramps. Install bike lanes and build a roundabout at Strong and 5-mile road.

Project Justification

This project will be done as part of the integrated road project, renewing pipelines that have been degraded through years and aggressive soil conditions.

As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River.

This section of road is deteriorating and needs repair.

Location

Five Mile Road between Lincoln Road and Strong Road.]

Project Status

Initial estimates have been completed. No additional right of way is anticipated to be required.

Havana St, 57th Ave to 37th Ave Water & Street

IPM-2015-43

Executive Summary

Bioretention swales and stormwater pipelines will be constructed in Havana Street to collect and treat street runoff; installation of a 36-inch water main in Havana Street from 57th Ave to 37th Ave. The roadway will be reconstructed, placement of: sidewalks, ADA ramps and a bike lane.

Project Justification

This project would provide redundancy, reliability, and the opportunity to maintain other elements of the water system. Construction of the Glenrose/Havana/57th water pipeline has initiated an integrated look at Havana Street. Additions of sidewalk and associated curbs created a need for upgraded stormwater management of street runoff.

Bike lanes will be installed to provide a 1-mile bicycle corridor and connect Ben Burr trail at south Myrtle St. to the bike lanes on 37th Ave.

Location

Glenrose and 57th to Havana and 57th to Havana and 37th.

Project Status

Design is complete. Construction is underway

Monroe Street Lane Reduction and Hardscape

IPM-2015-100

Executive Summary

This project will change North Monroe Street from 5 lanes to 3 lanes. The restriping will start just north of Indiana and continue to the top of the hill near Kiernan Street. Hardscape improvements such as wider sidewalk, street furniture, stormwater facilities, curb extensions, medians, and a HAWK signal will be confined to the 13-block area between Knox and Cora. Pedestrian lighting will be installed along the south half of the corridor. Replacement of 1902 16-inch cast iron water transmission main. Bioretention facilities will be constructed along the street.

Project Justification

This project is intended to improve safety for pedestrians and cyclist by reducing road and lane width and providing a wider sidewalk. Infrastructure renewal of water main that is over 100 years old. As part of the street project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River.

Location

Monroe St. From Indiana Ave. To Kiernan Ave.

Project Status

CN planned for 2017-2018. Initial estimates have been completed; no additional right of way required.

Monroe-Lincoln Couplet, 8th Ave to Main Ave

IPM-2015-91

Executive Summary

Rebuild the full depth roadway section on Monroe and Lincoln Streets. Minor curb replacement as necessary. Street trees will be added/replaced where possible. Sight distance to be addressed at the 7th Ave Intersection. Stormwater improvements and renewal of the water mains also included.

Project Justification

The purpose of this project is to rebuild and extend the life of this segment of Monroe and Lincoln Streets. This project will construct a stormwater conveyance, treatment and infiltration facility for stormwater runoff. Components of the project include: Connection of piping to existing storm stub on 8th Avenue; Conveyance piping between 8th Avenue and 3rd Avenue; A bio-retention facility west of Monroe Street and north of I-90; An infiltration facility (drywells) located on Cedar Street between 4th Avenue and 3rd Avenue. Stormwater will be removed from the combined sewer system of CSO Basin 24. The existing water mains are at the end of their service life and need to be renewed in order to provide reliable service.

Location

Monroe & Lincoln Corridor from 8th Ave to Main Ave; Phase I is between 8th and 4th. Phase II will run between 4th and Main St.

Project Status

Project under design with construction planned for 2015-2016. Design of phase 1 is complete. Construction is underway.

Pettet Drive

IPM-2015-107

Executive Summary

Stormwater bio-retention facilities with pedestrian and bike improvements

Project Justification

Stormwater will be removed from discharging directly to the Spokane River, and instead will be treated and infiltrated. Stormwater swales will be constructed at top of the hill and at the TJ Meenach intersection. Bike and pedestrian improvements will be incorporated with this project along with roadway reconstruction. Stormwater education sign will be placed along this route during Bloomsday.

Location

Pettet Drive from TJ Meenach to Nora Ave

Project Status

Project is in pre-design.

Post St. Bridge Deck Replacement

IPM-2015-89

Executive Summary

This project will replace Post Street Bridge, install a 60-inch sewer pipe, and a new water main. Also included in this project is stormwater management in Lincoln Street from the Bridge Avenue to Sharp Avenue.

Project Justification

The Post Street Bridge, located immediately north of City Hall, carries a 54-inch sewer interceptor that transports sewage from the south side of the river to the north side. The current structure of the bridge is rapidly deteriorating and needs to be replaced. A type, size, and location study is underway to address all modes of travel as well as utility needs. A significant rehabilitation of the Post Street Bridge is planned for multi modal travel as well as replacement the old 54-inch steel pipe with 450 feet of 60-inch ductile iron pipe and manholes on both river banks. The way to support the pipe during construction has not been determined yet. The Post Street Bridge used to have a water main on it, but long ago became unserviceable. Reestablishment of a water connection across the river at this point would increase reliability and redundancy of the downtown water system. The goal of the stormwater project is to eliminate the MS4 outfall.

Location

Post St. Crossing at Spokane river

Project Status

Design on the project is planned to start in 2015.

External Factors

This is an integrated project. Funding and schedule of each project is interrelated.

Ray St, 17th Ave to 3rd Ave.

IPM-2015-92

Executive Summary

Replacement of 1936 steel water main; 36-inch.

Apply preservation treatments that may consist of crack sealing, grind and overlay, or other pavement rejuvenation techniques. Upgrades to ADA curb ramps and minor curb and sidewalk repairs are anticipated.

Project Justification

The existing transmission main is in poor shape, and at the end of it's useful life. Replacement in conjunction with the roadway project is planned.

The purpose of this project is to extend the life of this segment of Ray Street.

Location

Ray Street, from 17th Ave to 3rd Ave

Project Status

Initial estimates are complete; no additional right of way is necessary

Riverside Drive Pase II - III

IPM-2015-90

Executive Summary

Construction stormwater water quality treatment and infiltration facility.

Design and construct an extension of future Riverside Drive beginning at Sherman Street and running easterly to Trent Avenue at Perry Street. Project to include 5ft bike lanes and separated sidewalks.

Project Justification

The Union Basin outfall is known to discharge a high amount of PCBs, other toxics, and sediment into the Spokane River. This project will remove the flow to river by capturing and storing stormwater at Erie Street near Trent Avenue. This stormwater will be pumped to treat in a bio-retention facility with an on under drain. The treated stormwater can then be infiltrated via drywells.

The university master plan calls for a more pedestrian friendly environment. The new alignment of MLK Jr. Blvd will allow vehicles to be routed around the campus and allow for the downgrading of Spokane Falls Blvd which runs through the center of campus.

Location

Extension of MLK Jr. BLVD beginning at Sherman St running easterly to Trent ave at Perry St.

Project Status

This project is in design.

Rowan Ave, Driscoll St to Monroe St

IPM-2015-42

Executive Summary

Reconstruct the roadway and place two 11-foot travel lanes and bike lanes from Driscoll to F St. and two 11.5'-foot travel lanes and bike lanes from F St to Alberta St. and remove parking. Swales will be built on Driscoll to collect Stormwater. Integrated with water and Stormwater.

Project Justification

This section of road is deteriorating and needs repair. Reduction of MS4 stormwater flow will be achieved through bypass to swales.

As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River. Stormwater from

The existing water mains are old, at or beyond their service life, and need replacement to assure system reliability and reduce failure risks.

Location

Phase I: Rowan Ave, Driscoll St to Alberta. Phase II: Rowan Ave, Alberta to Monroe.

Project Status

Phase 1 to be constructed in 2015 and Phase 2 will be constructed in 2016.

Sharp Ave Pervious Asphalt Pilot Project

IPM-2015-87

Executive Summary

Replacement of a 10-inch 1893 cast iron water main with a new 12-inch ductile iron main.

A low impact development stormwater project will be constructed in Sharp Avenue to determine viability of permeable pavements within the traveled lanes. The project will also include a center bioretention swale, street trees, and standard pavement.

A low impact development stormwater project will be constructed in Sharp Avenue to determine viability of permeable pavements within the traveled lanes. The project will also include a bioretention swale, street trees, and standard pavement. Curb extensions will also be installed. This project is integrated with storm water, Wastewater, and Water

Project Justification

The existing pipe is aged to the point where failure risk is significant. Replacement is necessary to provide adequate level of service and reliability.

This project will reduce the amount of pollutants going into the Spokane River.

Transportation elements include the installation of curb extensions and the transition from present striping to the proposed alignment.

Location

Sharp Avenue from Pearl to Hamilton

Project Status

Estimates have been completed. No additional right of way is required.

South Gorge Trail, Sandifur Bridge to Glover Field

IPM-2015-96

Executive Summary

1.3 mi of mixed use trail along the Spokane River. The trail is a mixture of a 10 ft wide paved path beginning at the south end of the Sandifur Bridge and ending at Glover Field connecting to Main Ave. Bio retention swales constructed along street, and Water Main will rebuilt within Clarke Ave.

Project Justification

This project is part of a mitigation for the tribes and Peacefull Valley neighborhoods in relation to the CSO tanks being built in and near the Peaceful Valley neighborhood. Stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River or the CSO.

Location

North side of Spokane River from Sandifur Bridge to Glover Field through the 'Peaceful Valley' Neighborhood. Peoples' Park will also receive some attention.

Project Status

Project is currently being scoped and presented to the neighborhood. The CN is scheduled for 2016. Funding will also be sought through grant opportunities. Design will be begin in 2015.

TJ Meenach Dr., TJ Meenach Bridge to Northwest Blvd

IPM-2015-88

Executive Summary

Complete a full depth roadway replacement for 4,900 feet of roadway, including minor ADA Ramp replacement, stormwater management, second siphon under TJ Meenach Drive, replacement of 1,700 feet of 18 inch cast iron transmission main, a pipeline for Cochran Basin, and lift station upgrades.

Project Justification

This section of road is deteriorating and needs repair. Sewer pipe routing will be updated and improved. River access will also be improved.

As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River.

This project upgrades existing TJ Meenach lift stations to meet development flows south of the Spokane River. This upgrade may also include above-ground facilities to address the new confined space regulations.

One siphon interceptor pipe conveys most of the sewer to RPWRF. This pipe has sharp angles, which makes it impossible to clean. It is also vulnerability to being plugged, causing back up or pipe breakage. This project will construct a parallel siphon sewer pipe to add redundancy, and the ability to clean and repair the existing pipe. The roadway along this section is being completely reconstructed as part of other city projects, and this project will replace the aged 18-inch cast iron line with a new ductile iron water main. This will complete the renewal of the roadway system and insure system functionality for the next 100 years or more.

By eliminating the discharge of stormwater from the Cochran Basin, approximately 50% of the City of Spokane's stormwater discharge to the Spokane River will be removed. Approximately 90% of stormwater from this basin will be treated to meet the TMDL requirements from the Department of Ecology.

Location

TJ Meenach Dr, TJ Meenach Bridge to Northwest Blvd , to include on and off ramps on/off TJ Meenach

Project Status

Construction is scheduled for 2017

External Factors

Development along Ft George Wright will determine the size and timing of the lift station.

East Sprague Avenue

IPM-2015-47

Executive Summary

This project will fulfill the intent of the South University District Sprague Corridor Investment Strategy by implementing the 3-lane section on Sprague through placement of streetscape and updating traffic signals. Landscaping is also planned with bio-retention swales constructed along street. Stormwater management as part of the East Sprague Avenue project.

Project Justification

The purpose of this project is to improve transportation for all modes and thus promote a vibrant livable community. As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River. In addition, stormwater will be removed from CSO Basin 34, reducing CSO to RPWRF and storage requirements. In addition, stormwater from Riverside from Lee to Perry Streets will be treated and infiltrated. As part of the Levy project, stormwater will be treated and infiltrated instead of being discharged directly to the Spokane River. In addition, stormwater will be removed from CSO Basin 34, reducing CSO to RPWRF and storage requirements. In addition, stormwater from Riverside from Lee to Perry Streets will be treated and infiltrated.

Location

Sprague Avenue - Division Street to Fiske Street Sprague Ave from Hamilton to Altamont

Project Status

Application phase seeking design and construction funding. 2014 applications are for the initial phase build-out for hardscape elements, lighting and landscaping at intersections. Future applications will gather funds toward fulfilling these needs along the full corridor. Project is in design.

4th Ave, Sunset to Maple

IPM-2016-162

Executive Summary

Construct full depth roadway, repair sidewalk. Provide stormwater separation along both sides of 4th Avenue with bioretention areas between the sidewalks and back of curb.

Replace 1,300 of cast iron distribution main. The main was originally constructed in 1893.

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

This project will reduce stormwater flows to the CSO system.

The cast iron pipe has reached the end of its useful life and would not likely survive the street construction project.

Location

4th Avenue between Sunset Hwy and Maple Street

Project Status

Design: 2021; Construction: 2022

Sprague Ave, Cedar to Browne

IPM-2016-163

Executive Summary

Construct full depth roadway, repair sidewalk, provide for bike lanes, upgrade lighting.

This project will replace approximately 4,700 feet of transmission and distribution piping.

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

The cast iron pipe was constructed in the early 1900s and has reached it's useful life. The piping would not likely survive construction of the street project.

Location

Sprague Avenue from Cedar Street to Browne Street

Sprague Ave, Browne to Sherman

IPM-2016-165

Executive Summary

Fulfill the intents of the South University District Sprague Corridor Investment Strategy by implementing the 3-lane section on Sprague through placement of streetscape and updating traffic signals. Landscaping will facilitate integrated stormwater disposal, as possible.

This project replaces approximately 3,200 feet of 1894 cast iron transmission main.

Project Justification

The purpose of this project is to improve transportation for all modes and thus promote a vibrant livable community.

The existing pipe was constructed in 1894 and is past its useful life.

Location

Sprague Avenue - Browne Street to Sherman Street

Project Status

Application phase seeking design and construction funding.

Napa St, Sprague to 2nd

IPM-2016-166

Executive Summary

Construct full depth roadway, and repair sidewalks.

The project replaces 1150 feet of 16-inch cast iron distribution main that was constructed in 1895.

Also provides for stormwater separation

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

The existing pipe has reached its useful life and likely would not survive the construction of the street project.

This project will manage stormwater as part of the Levy Street project.

Location

Napa Street between Sprague Avenue and 2nd Avenue

Hartson, Fiske to Thor

IPM-2016-167

Executive Summary

Replace existing 10-inch cast iron pipe.

The brick catch basins need to be updated as well as construction manholes at the pipe connections.

Project Justification

The pipe was installed in 1924. With the construction of the sewer water upgrades, the water main will need to be replaced.

Hartson sidewalk project will install bumpouts and new catch basins will need to be installed. The existing system has a non-standard pipe connection that will need be upgraded with manholes.

Location

Hartson Ave from Fiske to Thor

Sunset Blvd, Royal to Lindeke

IPM-2016-169

Executive Summary

This project will replace the surface of 1.3 miles of Sunset Boulevard. It will also improve the modal service by incorporating a bicycle and pedestrian pathway and improving transit accessibility. Presently, this corridor offers virtually no facilities for bicycle and pedestrian travel.

The project will include construction bioretention adjacent to the road along the entire project limits. This will eliminate an MS4 outfall to Latah Creek.

Project Justification

This section of road is deteriorating and needs repair. There is a significant need and demand for pedestrian and bicycle facilities. Presently, this corridor offers virtually no facilities for bicycle and pedestrian travel.

The stormwater along the length of the project is currently managed in open ditches and piping that discharges to Latah Creek. The proposed project will manage stormwater more efficiently and will provide treatment prior to infiltration into the ground.

Location

Sunset Blvd from Royal St to Lindeke St

Project Status

CN is planned for 2017

1st Ave Maple St to Bernard St

IPM-2016-161

Executive Summary

Construct full depth roadway, repair sidewalk, provide for bike lanes, and upgrade lighting.

The project replaces 3000 feet of cast iron distribution main. These mains were constructed between 1900 and 1976. Existing pipe sizes range from 6 inch to 10 inch. All pipe will be replaced with 10 inch pipe. The 8-inch ductile iron pipe between Walnut and Madison will remain in place.

Project Justification

This section of roadway and infrastructure is deteriorating and is need of rehabilitation.

The existing cast iron pipe will not likely survive the construction of the street project.

Location

First Avenue between Maple Street and Bernard Street.

CHAPTER 3

(Placeholder for Future Chapter)

APPENDIX

ORDINANCE NO. C - C34747

An ordinance relating to the adoption and annual update of a City-Wide Six-Year Capital Improvement Program; and adopting a new chapter 7.17 to title 7 of the Spokane Municipal Code.

WHEREAS, the Countywide Planning Policies (CWPPs) adopted by the Spokane Board of County Commissioners require the capital facilities and utilities chapter to address the siting of public capital facilities, joint city and county planning within urban growth areas, and the promotion of contiguous and orderly development and provision of urban services to such development (RCW 36.70A.210(3)); and

WHEREAS, the City of Spokane has adopted a Comprehensive Plan pursuant to the Growth Management Act, Chapter 36.70A RCW, which includes provisions addressing capital facilities; and

WHEREAS, the Capital Facilities Plan shall include: (a) an inventory of existing capital facilities owned by the City, showing the locations and capacities of the capital facilities; (b) a forecast of the future needs for such capital facilities; (c) the proposed locations and capacities of expanded or new capital facilities; (d) at a minimum, a six-year plan that will finance the capital facilities within projected funding capacities and clearly identifies sources of public money for these purposes; and (e) a requirement to reassess the land use element if probable funding falls short of meeting existing needs and to ensure that the land use element, capital facilities plan, and financing plan within the Capital Facilities Plan are coordinated and consistent. Park and recreation facilities shall be included in the Capital Facilities Plan; and

WHEREAS, "Capital Facilities Plan" means the Capital Facilities Plan elements found in Chapters 4 and 5 of the City's Comprehensive Plan adopted pursuant to chapter 36.70A RCW and which is updated at a minimum every seven years; and

WHEREAS, Chapter 4 of the Comprehensive Plan, entitled "Transportation" addresses the goals and policies regarding transportation capital facilities owned by the City; and

WHEREAS, Chapter 5 of the Comprehensive Plan, entitled "Capital Facilities and Utilities," addresses the goals and policies regarding other capital facilities owned by the City, including water and sewer systems, fire and police stations, libraries, and parks; and

WHEREAS, the City seeks to provide high quality, well maintained physical systems and facilities that serve the social, economic, cultural, safety, circulation, communication and other needs of the community that are available at the time of development and which are equitably distributed; and

WHEREAS, the City seeks to encourage development in areas where adequate public facilities and services currently exist or can be provided in an efficient, affordable manner; and

WHEREAS, comprehensive capital facilities planning enables the City to invest its limited financial resources wisely and most efficiently to maximize funding opportunities by planning ahead to determine what capital facilities are necessary to maintain municipal levels of service thus allowing the City to prioritize projects, coordinate related projects, and apply successfully for a wide variety of funding sources including loan and grant opportunities; and

WHEREAS, a "Six-Year Capital Improvement Program" is a feature of the Capital Facilities Plan which consists of a six year plan for financing capital facilities within projected funding capacities, clearly identifies sources of public money for such purposes, and is updated annually to address the subsequent six year programming cycle for capital projects; and

WHEREAS, pursuant to RCW 35.77.010, the City must adopt before July 1st of each year a Six-Year Comprehensive Street Program, which includes a provisions for capital improvement programs; and

WHEREAS, the annual adoption of the Six-Year Comprehensive Street Program is one element of the City's annual update of Six-Year Capital Improvement Programs (CIPS) that also includes the Six-Year Comprehensive Wastewater Program and the Six-Year Comprehensive Water Program; and

WHEREAS, most other City departments, whether funded by general funds or enterprise funds, have capital facility needs and must plan for their development, financing, and implementation, but those departments are not currently required to prepare Six Year Capital Improvement Programs; and

WHEREAS, the City Council adopts an annual budget which incorporates funding for capital facilities projects; and

WHEREAS, the City Council and City departments cannot accurately plan for and finance capital facilities projects unless the City has a long range plan for those projects and a City-Wide Six-Year Capital Improvement Program for prioritizing and financing the capital projects identified by all City departments; and

WHEREAS, to date, the City has not adopted, on an annual basis, a City-Wide Six-Year Capital Improvement Program to facilitate the planning for financing, planning and constructing all capital facilities owned by the City; -- Now, Therefore,

The City of Spokane does ordain:

Section 1. That there is adopted a new chapter 7.17 to title 7 of the Spokane Municipal Code to read as follows:

**Chapter 7.17
City-Wide Six-Year Capital Improvement Program.**

Sections:

- 7.17.010 Annual Adoption of a City-Wide Six-Year Capital Improvement Program.
- 7.17.020 Scope of City-Wide Six Year Capital Improvement Program.
- 7.17.030 Effective Date.

7.17.010 Annual Adoption of a City-Wide Six-Year Capital Improvement Program.

- A. The city council shall adopt on an annual basis a City-wide Six-Year Capital Improvement Program.
- B. The City-wide Six-Year Capital Improvement Program shall be developed by City staff, reviewed by the City plan commission for consistency with the City's Comprehensive Plan, and presented to the City Council by June 30th of each year so that the city council can incorporate the planning and financing of capital facilities in the adoption of the annual budget.

7.17.020 Scope of City-Wide Six Year Capital Improvement Program.

- A. The City-wide Six-Year Capital Improvement Program shall coordinate the planning, financing and construction of the City's capital facilities consistent with the following guidelines.
 - 1. The City-wide Six-Year Capital Improvement Program shall encompass all City capital facilities projects regardless of the revenue source.
 - 2. Elements of the City-wide Six-Year Capital Improvement Program shall include the Six-Year Comprehensive Street Program, the Six-Year Comprehensive Wastewater Program and the Six-Year Comprehensive Water Program, as well as Six-Year Capital Improvement Programs submitted by each City department projecting the department's respective capital facilities needs, including estimated costs and proposed methods of financing, for at least the subsequent six years.
 - 3. The City-wide Six-Year Capital Improvement Program shall include the necessary maintenance, rehabilitation, and renovation of existing capital facilities.

4. The City-wide Six-Year Capital Improvement Program shall prioritize consistency with the City's Comprehensive Plan, including, but not limited to the adaptive reuse of suitable existing buildings. When adaptively reusing existing buildings, these facilities shall be renovated to the highest defined energy conservation standard justified by a net present value analysis of capital and forecast energy costs over a thirty year period or the forecast life of the building, whichever is less.
5. Should it be necessary to build new public facilities, these facilities shall be constructed to the highest defined energy conservation standard justified by a net present value analysis of capital and forecast energy costs over a thirty year period.
6. The City-Wide Six-Year Capital Improvement Program is intended to be an evolving document reflecting the current status of financing, planning and implementation of the City's Capital Facilities Plan with the intent that the programs be revised as the City completes certain projects and adds new projects.

7.17.030 Effective Date.

In order to allow City Staff ample opportunity to generate a thorough and robust City-wide Six-Year Capital Improvement Program, the first Program will at a minimum include the transportation component, the water component and the wastewater component and as many other components as possible by June 30, 2012. By June 30, 2013 all City departments with capital facilities needs for subsequent six years shall be included in a City-Wide Six-Year Capital Improvement Program.

PASSED BY THE CITY COUNCIL ON July 18, 2011.

Alexander Joe Shogan, Jr.
Council President
