

REGULAR MEETING NOTICE/AGENDA OF THE SPOKANE CITY COUNCIL

MEETING OF THURSDAY, AUGUST 29, 2024, 11:00 A.M. – CITY COUNCIL CHAMBERS

A regular meeting of the Spokane City Council will be held at **11:00 A.M. on Thursday, August 29, 2024**, in City Council Chambers - City Hall 808 W. Spokane Falls Blvd. The meeting can also be accessed live on CityCable5 and streamed online at <https://my.spokanecity.org/citycable5/live/> and <https://www.facebook.com/spokanecitycouncil> or by calling 408-418-9388 and by using access code 2491 436 7432.

The meeting will be conducted in a study session format and will be open to the public both virtually and in person. No legislative action will be taken. No public testimony will be taken, and discussion will be limited to appropriate officials and staff.

Executive Session

At any time during or after the regular Study Session Agenda, the City Council may choose to adjourn into Executive Session for the purpose of discussing privileged legal matters. This portion of the meeting would be closed to the public pursuant to RCW 42.30.110.

Agenda:

[Climate Planning Update - Maren Murphy \(45min\)](#)

[Housing Community Development 2025-2029 Consolidated Plan Update - CHHS Staff \(30min\)](#)

AMERICANS WITH DISABILITIES ACT (ADA) INFORMATION: The City of Spokane is committed to providing equal access to its facilities, programs and services for persons with disabilities. The Spokane City Council Chamber in the lower level of Spokane City Hall, 808 W. Spokane Falls Blvd., is wheelchair accessible and is equipped with an infrared assistive listening system for persons with hearing loss. Headsets may be checked out (upon presentation of picture I.D.) at the City Cable 5 Production Booth located on the First Floor of the Municipal Building, directly above the Chase Gallery or through the meeting organizer. Individuals requesting reasonable accommodations or further information may call, write, or email Risk Management at 509.625.6221, 808 W. Spokane Falls Blvd, Spokane, WA, 99201; or mLOWmaster@spokanecity.org. Persons who are deaf or hard of hearing may contact Risk Management through the Washington Relay Service at 7-1-1. Please contact us forty-eight (48) hours before the meeting date.

Spokane Climate Element

COMMUNITY ENGAGEMENT PLAN – FINAL DRAFT

AUGUST 2024

Prepared for the City of Spokane by:

FUNDED BY WASHINGTON'S

The WA Department of Commerce climate planning grant is supported with funding from Washington's Climate Commitment Act. The CCA supports Washington's climate action efforts by putting cap-and-invest dollars to work reducing climate pollution, creating jobs, and improving public health. Information about the CCA is available at www.climate.wa.gov.

Community Engagement Plan

The City of Spokane is undertaking a periodic review of the Comprehensive Plan as required by the Washington State Growth Management Act (GMA), due in 2026. The last periodic review occurred in 2017, known as Shaping Spokane. The GMA requires local governments to create and broadly disseminate a Public Participation Plan during the periodic review process. Legislation passed and signed into law through [HB 1181](#) in 2023 added a climate goal to the GMA and requires local comprehensive plans to have a Climate Element with resilience and greenhouse gas emissions mitigation sub-elements. The City of Spokane is eligible for up to \$700,000 in grant funding from the WA Department of Commerce for climate planning efforts through 2029, with an emphasis on the periodic update due in 2026.

The Final Draft Climate Resilience Community Engagement Plan (referred to herein as the CEP) will support the more general Periodic Update process by emphasizing engagement discussions around climate planning. This document recognizes the nuances required for successful and equitable engagement around climate impacts and environmental justice. This CEP provides a high-level direction for climate engagement, identifies values and priorities, and outlines examples of key tactics and opportunities for engagement as the process gets underway.

Engagement is a fluid, fluctuating process that requires adaptive strategies to make sure the project team - the City of Spokane and consultants - are reaching communities and gathering meaningful input. The CEP outlines the City's guiding principles, objectives, participants, and strategies for how the project team plans to engage Spokane community members to meaningfully participate in this planning process. It is intended as a guidepost and "living document" and we will continue to refine the detailed activities, with input from key stakeholders, as we go.

CLIMATE PLANNING

This CEP outlines how the project team plans to engage a diversity of communities in Spokane around the climate planning as a part of HB 1181 requirements. Spokane's Climate Planning includes two sub-elements:

Greenhouse Gas emissions sub-element: must include goals and policies to reduce emissions and vehicle miles traveled, including developing a local emission inventory; conducting a Vehicle Miles Traveled Per Capita study; and projecting emission reductions to inform the adopted comprehensive plan goals and policies.

Resilience sub-element: must include goals and polices to improve climate preparedness, response, and recovery efforts, including data to explore expected local climate impacts; auditing existing plans and policies for climate resilience opportunities, gaps, and barriers; assessing climate vulnerability and risk; and developing and prioritizing science-based climate resilience goals and policies for comprehensive plans.

In crafting engagement for this climate planning effort, it is essential to reject "one-size-fits-all" approaches. Rather, our processes and plans must effectively engage impacted communities

through models of public facilitation that elevate community voices and priorities, and adjust based on the needs, perspectives, and realities of community members and the organizations that represent them. Climate is fundamentally an issue of equity, and the CEP incorporates equity, environmental justice, and climate justice as foundational lenses in the planning process. Climate planning must also maximize economic, environmental, and social co-benefits and prioritize environmental justice and climate justice to avoid worsening environmental health disparities. Our engagement efforts will ensure that historically underrepresented and overburdened communities are included early and continuously, particularly within those most affected by climate change.

Engagement Objectives

Through our engagement, the project team intends to meet the following objectives:

Inclusive and Intentional outreach: Ensure everyone who lives and works in Spokane has the opportunity to engage in the planning process by maximizing outreach efforts. Focus on inclusivity and building relationships with historically underserved and marginalized communities.

Open, Transparent, and Accessible Process: Maintain a planning process that is open, transparent, culturally sensitive, and accessible to all community members.

Strengthening Community Relationships: Develop new and strengthen existing community relationships to foster a collaborative environment.

Authentic Public Input: Solicit and integrate public feedback meaningfully into the plan development, ensuring that community input can genuinely influence outcomes.

Equitable Community Engagement

Equitable engagement aims to reach and engage with as many people as possible, while centering people who experience the first and worst consequences of climate change.

Guiding Principles

To strive for an equitable public participation process, the following guiding principles will be a continual foundation for planning and in facilitating engagement activities.

Guiding Principle	Description
CREATE CLEAR EXPECTATIONS	Clear expectations of the purpose of each community engagement activity shall be built with the public. Whether the purpose is to inform, gain feedback, or seek suggestions, participants will be provided clear directives of how their engagement will impact the work being done.
MAKE IT CONVENIENT	Community engagement must be convenient if it is to avoid creating an unnecessary roadblock to open and robust communication. Not all activities will be convenient for all participants, but an effort will be made to meet a diverse range of needs.
FOSTER PEER TO PEER CONVERSATIONS	Rather than creating a transactional form of community engagement, this principle encourages conversations between City staff and the public, but also between members of the public, to generate greater understanding and build upon each person’s lived experiences.
IMPLEMENT ACCESSIBILITY STANDARDS	Accessibility for persons with physical and/or cognitive disabilities will be a guiding principle when planning any engagement activity.
ENSURE LANGUAGE ACCESS FOR ALL	According to the 2020 5-year American Community Survey, there are 16,732 Spokane residents who speak a language other than English, and Spokane’s immigrant population grew by 9% since 2010. On October 16, 2023, the Spokane City Council approved ORD C36449 , which established a language access program within the Spokane Municipal Code . The Planning Department will evaluate language access needs and, where feasible, provide the opportunity for both language translation and interpretation, including American Sign Language.
COMPENSATE PUBLIC EFFORTS	As stated by the Washington Office of Equity in their guidance on community compensation , compensation can help remove a significant barrier to public participation for populations for which participation in public meetings may be a significant economic burden due to work schedules, family care commitments, or other fixed obligations. Compensation can include stipends, but also wrap-around services like paid childcare and transportation support. During the periodic review, the

Guiding Principle	Description
	City will evaluate existing compensation policies and implement the guidance of the Office of Equity to ensure a more robust and equitable public participation process. Compensation should apply to Tribal engagement as well.
BUILD PARTNERSHIPS	Community based organizations (CBOs) and representatives of these organizations can be particularly helpful partners and collaborators because of their roles as trusted partners throughout the community. They also bring broader community perspectives, not only the perspectives of individual community members.
TRIBAL ENGAGEMENT	New changes to the Growth Management Act (GMA) implementing HB 1717 (2022) allows tribes to voluntarily participate in the City’s comprehensive planning process (RCW 36.70A.040). This also requires local jurisdictions to work with tribes to coordinate urban growth. Tribes must opt-in to coordinate with the jurisdiction (RCW 36.70A.110).

Climate Justice Principles

In addition to the guiding principles described above, climate engagement will implement the following climate justice focused principles to ensure appropriate and equitable public participation. WA Department of Commerce provides guidance for climate justice in the [Summary Report: Climate Justice in Growth Management](#). Aligning with this guidance, the City will identify the overburdened communities and vulnerable populations in their scopes of work to determine if proposed Climate Planning Element measures are equitable. The climate justice guidance outlines four principles in the Just Transition Framework for climate strategies that will guide the City’s engagement efforts.

Climate Justice Principle	Description
CENTER THOSE DISPROPORTIONATELY IMPACTED IN GOVERNANCE	New models of participatory governance — or “co-governance” between government leaders and agencies and impacted communities — are necessary to meaningfully address these gaps in community leadership and shared governance. Key cornerstones of co-governance include a) establishing government commitment to the self-determination of communities; b) supporting communities to build their capacity to effectively participate (in government processes); c) developing shared governing power in principles and in process; and d) demonstrating equitable processes and results.
RESTORE COMMUNITY CONNECTIONS TO PLACE	A place-based approach focuses policy, programmatic interventions, and innovations in specific geographic areas that are suffering from environmental and social injustices to ensure no community is sacrificed to climate impacts or to suffer emissions disproportionately. This priority is integrated by placing greater value

Climate Justice Principle	Description
	on and by centering in public engagement processes the values, cultures, aspirations, hopes, and experiences of the communities impacted by their plans and actions.
CREATE LIVELIHOODS WITHIN A HEALTHY ENVIRONMENT	A regenerative economy is one that prioritizes sustainable living and working within ecological limits. Support movement toward a regenerative economy by prioritizing the needs of communities.
TRANSITION TO RENEWABLE RESOURCES AND ENERGY	A key cornerstone of a Just Transition is enabling strategies to ensure energy is first conserved, and that energy generation is renewable and equitable. Planning for the use of renewable energy sources and transitioning away from non-renewable sources can reduce social and environmental harms.

Metrics for Success

Periodically after engagement milestones, the project team will summarize engagement themes and feedback heard from community members. The project team will track our success at meaningfully and authentically engaging community members by the following metrics for success:

- **Quantitative Metrics**
- Total number and demographics of individuals engaged (gathered via optional survey after each engagement that includes anonymous demographic questions)
 - Total number of responses by activity
 - Survey responses
 - Geographic distribution of attendees
 - Events represented at
 - Drop-in session attendees
 - Focus group attendees
 - Social media engagement
- Subscribers to Community Update e-newsletter
 - Comments on draft plan

- **Qualitative Metrics**

- Document the richness of feedback received during one-on-one conversations and small group discussions.
- Assess the extent to which community members felt heard and valued during interactions.
- Capture key themes and insights from open-ended feedback and in-depth discussions.
- Track the development of new relationships and strengthening of existing ones, particularly with historically underserved communities.

Participants

The CEP will seek to engage a diversity of residents, community groups, non-profit organizations, businesses, and others, with particular emphasis on identifying and engaging overburdened community organizations and members — people who experience the first and worst consequences of climate change. Engagement will also seek participation from those with technical expertise, cultural perspective, and/or lived experience.

Participant Groups

We will engage various participant groups, both internal and external, throughout the project. Some participant categories include implementation leads, community-based organizations and groups, City department leads and staff, utilities, development staff, and other typical participant groups.

[Appendix A](#) includes potential participant details organized by participant category, potential groups, and anticipated engagement level. To gain further insight into potential participants, demographic data in [Appendix B: Spokane Community Profile was used](#) to inform the approach.

Tailored Approaches

Three priority groups have been identified whose engagement will be tailored to collaborate and ensure that the climate planning results in community-driven policy.

ADVISORY COMMITTEES

Engagement for climate planning in the Periodic Update will prioritize an external **community advisory board in coordination with the Mayor's Office**, and internal **City Technical Advisory Committee (CTAC)** to support co-creation in climate planning. The focus includes analyzing climate information, reviewing key deliverables, providing recommendations on climate focus and equity, and developing climate goals and policies. The advisory board and CTAC could also provide recommendations on goals with near-term due dates; actions that can be implemented readily; strategies for longer-term actions; and a structure for ongoing monitoring and evaluation. The committees will meet 3-5 times throughout June 2025, coinciding with key deliverables and milestones.

Community Advisory Board Expertise and Members

Members of the community advisory board will be established in coordination with Mayor's Office and will include a diverse group of community members and agency partners in addition to planning and public works professionals. The focus of the community committee meetings will be to support the collaboration and development of the Climate Element in accordance with the WA Dept. of Commerce guidelines that centers equity and co-creation in policy development and implementation. A key focus of the process will identify and build partnerships with overburdened community organizations and members, along with others, to learn from their technical expertise, cultural perspective, and lived experience. The committees will include members with a variety of expertise. Appendix A. Participant Group Details

PARTNERSHIPS WITH COMMUNITY-BASED ORGANIZATIONS

A guiding principle around climate engagement includes developing and deepening partnerships with Community-Based Organizations (CBOs) with the goal of establishing and building trust. A list of potential CBOs to collaborate with is detailed in Appendix A. Participant Group Details. Through collaboration with CBOs, we will gain insights into community events, authentic engagement methods, and the resource needs of targeted participants. Due to the nature of such partnerships, City staff cannot anticipate the specific events or other engagement efforts that will be deemed appropriate through deliberate community collaboration. As such, climate engagement will incorporate flexibility to ensure the capacity to be responsive.

Support Community Participants

Climate planning acknowledges equity in participation as a critical component and will explore community compensation of who individuals who serve on the community committees, namely those whose participation is not a paid position within an organization, by:

- Paying a stipend for participation in meetings.
- Hosting accessible and convenient meetings and providing food and family-friendly activities.
- Offering meeting translation services and ensuring engagement materials are available in multiple languages and formats.
- Asking what support is needed to authentically participate.

Community-Based Organizations and representatives of these organizations can be particularly helpful partners and collaborators because of their roles as trusted partners in overburdened communities. They also bring broader community perspectives, not only the perspectives of individual community members. Partnerships with CBOs should also consider compensating organizations to participate meaningfully in development, implementation, and evaluation of engagement efforts.

Tribal and Native American Engagement

Spokane is home to over 25,000 Native Americans from a variety of U.S. Tribes and First Nations of Canada. Between the 2010 and 2020 U.S. Census, the City’s Native community has grown by about 10,000 people, now reaching over 25,000 in total. Special emphasis in climate planning guidance includes Tribal engagement. Tribal engagement encompasses all levels of Tribal communication and partnership, from formal government-to-government consultation to informal coordination. The City of Spokane is currently considering a Tribal Consultation Ordinance to guide the City’s tribal government-to-government engagement process. In addition, the City is proposing to establish a Native American Community Council as a means of more effectively engaging the City’s urban Native American community.

Local tribal governments with aboriginal territories on or near the City of Spokane include the Spokane Tribe, Kalispel Tribe, Coeur d’Alene Tribe, and Colville Tribe. Each of these tribal governments may have a direct interest in the City’s climate planning effort and may request formal consultations on a government-to-government basis with the City of Spokane.

The City’s climate planning efforts will also engage with Spokane’s urban Native American communities through conversations focused on information sharing and provide opportunities to hear about their climate impacts, experience, concerns, and community needs. The City recognizes the importance of working with Native American groups that are not Tribal governments, such as the American Indian Center, Native Project, Spokane Tribal Network, the Upper Columbia United Tribes, and perhaps the Native American Community Council once it is established (see Appendix A. Participant Group Details).

Collaborative planning with local Tribal governments and the urban Native American communities at all levels can help identify mutual priority actions and strategies that can inform and integrate climate planning efforts and facilitate information sharing of existing resiliency actions and plans. KAI will assist the city to define working relationships, identify key contacts, identify common goals and similar efforts, develop culturally appropriate outreach opportunities, and facilitate meetings and consultations with Tribes to voluntarily participate in the City’s climate planning. KAI will work directly with the Mayor’s Office to identify both formal and informal Tribal and Native American community engagement opportunities early on, which is critical to developing relationships, building trust, and fostering collaboration.

KAI will:

- Coordinate with the Mayor’s office and key planning staff at the City of Spokane to identify and contact key officials with the Spokane, Kalispel, and Couer d’Alene Tribal Governments to initiate introductory meetings, present the City’s climate planning process and schedule, discuss tribal consultation process, and engagement with the Tribal Engagement Workgroup (TEW). Introductory meetings between the mayor’s office and Tribal Governments will be scheduled in August 2024.
- Coordinate with the Mayor’s office and key planning staff at the City of Spokane to identify and contact key representatives of Native American urban organizations including The Native

Project, American Indian Community Center, Spokane Tribal Network, Upper Columbia United Tribes to initiate introductory meetings, present the City’s climate planning process, discuss engagement process, and participation on the Tribal Engagement Workgroup. Introductory meetings between the mayor’s office and urban Native American organizations will be scheduled in August 2024.

- Key staff of the mayor’s office will prepare a summary memo describing the City’s climate planning process and schedule including the establishment of the TEW. KAI and the Mayor’s office staff will formalize appointment of the TEW in August and KAI will facilitate the first meeting of the TEW immediately after the TEW is established. The TEW will meet virtually each month thereafter. KAI, the Mayor’s office, and City climate planners will coordinate monthly TEW agendas, climate planning and engagement materials, and TEW input and recommendations.
- Provide or gather technical knowledge for climate impacts and policy considerations for Tribal governments and the urban Native American communities (especially climate and health intersections).
- Review important local Tribal government documents related to climate vulnerability assessments, climate adaptation plans, and other related policies or reports.
- Ensure project climate impacts and proposed policy approaches incorporate Tribal government and urban Native American communities' perspectives and subject matter expertise identified through engagement.
- Prepare quarterly, or engagement phase-based, update reports on engagement activities, key takeaways, and major outcomes.
- Develop public presentation materials and practices for City staff to expand upon engagement with additional opportunities as appropriate.

TRIBAL ENGAGEMENT WORK GROUP

A Tribal Engagement Workgroup (TEW) will be established to help guide Tribal government and urban Native American communities’ engagement efforts, provide advice and analysis on climate impacts, and ensure effective input on the climate update for the Comprehensive Plan. The TEW will consist of 6-7 members. The three Tribal government representatives – one each from the Spokane, Kalispel, and Coeur d’Alene tribes – will be appointed by their respective tribes. There will be 3-4 representatives of the urban Native American communities appointed by the Mayor’s Office to the TEW, as discussed above. The goal is to establish the TEW in August 2024 and meet virtually every month thereafter.

KAI will take the lead to coordinate agendas, share climate planning information, take minutes, and facilitate 8 virtual meetings with the TEW each and every month beginning in August 2024. The purpose of the workgroup will be to guide the tribal engagement work to enable input on the development of the Climate Element for the comprehensive plan. Monthly reports on the tasks assigned and major accomplishments of the TEW will be prepared and provided.

Engagement Strategy

The engagement strategy is phased, broken out into four main phases. Each of the phases is supported by a mix of engagement activities to offer varying options for participation in the planning process.

	Timing	Purpose	Activities
<p>Phase 1: Understand Spokane’s current state from diverse perspectives & develop a shared community vision</p>	<p>Spring 2024 – Spring 2025</p>	<ul style="list-style-type: none"> ● Build early awareness of planning process and opportunities to participate ● Build or strengthen partner relationships ● Gather community values and visions for guiding ● Community-driven prioritization of key plan elements 	<ul style="list-style-type: none"> ● Committee meetings ● Tabling at existing events ● Community-wide survey ● Community-wide workshop ● 2 Focus groups ● Interviews with City staff ● Tribal engagement ● Project webpage, social media, and newsletters ● Constituent and partner kits
<p>Phase 2: Develop and refine draft goals and priorities</p>	<p>Summer 2025 – Summer 2026</p>	<ul style="list-style-type: none"> ● Incorporate community feedback into climate planning ● Gather input for implementation ● Share back with the community how input was incorporated ● Provide opportunity for comment on 	<ul style="list-style-type: none"> ● 2 Focus groups ● Tabling at existing events ● Tribal engagement ● Project webpage, social media, and newsletters ● Constituent and partner kits ● Online open house

		final climate planning	

Engagement Activities

Committee Meetings

Participants: Climate Resilience and Sustainability Board (CRSB) and Internal Technical Groups (City Technical Advisory Committee - CTAC).

Purpose: Facilitate collaborative analysis of climate data, understanding of impacts, and development of climate goals and policies.

Details: The strategy involves hosting one in-person meeting and two virtual meetings with the community advisory board, comprised of experts in various fields related to climate action. These sessions will focus on developing recommendations on focus areas and strategies to guide the City's climate action efforts. Additionally, one in-person meeting and three virtual workshops will be held with the CTAC to collaboratively analyze climate data, understand impacts, and develop climate goals and policies to integrate into the City's comprehensive plan. These workshops will provide a platform for technical experts within the City administration to engage in detailed discussions and provide input on the development of actionable strategies.

Roles and responsibilities: **City of Spokane** will form and establish a community advisory board, the Climate Resilience and Sustainability Board, in coordination with the Mayor's Office. Members could include planning and public works professionals, community-based organizations, community members, and leaders within overburdened communities that are most impacted by the changing climate conditions. **Cascadia** will host and facilitate the meetings.

Interviews with City Staff

Participants: Key City staff.

Purpose: Gather insights on critical climate impacts and vulnerabilities faced by each department, including lessons learned from the lived experiences of staff to concurrent document and policy review.

Details: This strategy involves conducting interviews with key City staff members from departments relevant to the Vulnerability Assessment focus areas. To streamline the process, multiple staff members from the same department will participate in joint interviews.

Roles and responsibilities: **City of Spokane** will identify key staff to interview. **Cascadia** will help develop interview materials and facilitate meetings as the budget allows.

Community-Wide Survey

Participants: Community members who live and work in Spokane.

Purpose: Gather diverse perspectives and prioritize community assets for climate resilience planning and the Climate Risk and Vulnerability Assessment.

Details: The community-wide survey aims to gather insights from a diverse range of Spokane community members to inform the development of climate resilience goals and policies. The survey will be promoted extensively by the City of Spokane, with paper copies made available in central locations such as libraries and senior centers to ensure accessibility. Return postages will be provided by the City. The survey will also be promoted through social media as well as the Community Update weekly newsletter that has about 80,000 subscribers. The survey will focus on identifying and prioritizing community assets, understanding how people experience climate as individuals and a community, revealing issues faced by households due to changing climate, hazards and risks that cause concern and climate anxiety, and establishing community climate priorities. To enhance accessibility, the survey will be translated into key languages aligned with the City's Language Access Program. An incentive program, such as a raffle for a local business gift card, could be implemented to encourage participation. The survey's timeline will be strategically aligned with community workshops, allowing for cross-promotion and ensuring maximum engagement. The project team will also monitor other surveys distributed by the City to prevent engagement fatigue. The survey will remain open for at least four weeks to ensure ample community engagement and responses.

Roles and responsibilities: **Cascadia** will develop survey and analysis and can pass through raffle gift cards to community members. **City of Spokane** will lead promotion and distribution of survey.

Community-Wide Workshop

Participants: Spokane community members.

Purpose: Facilitate broad community input on climate goals, policies, and concerns.

Details: A community-wide workshop will serve as an initial touchpoint for engaging the Spokane community on climate planning efforts. The workshop will provide a platform for community members to share their perspectives, experiences, and concerns related to climate change. Key topics explored will include issues faced by households due to changing climate patterns, hazards and risks that cause concern, and priorities for community climate action. The project team will conduct outreach to inform the community about the workshop and encourage participation, including partnering with community centers and food banks for distribution of information. The

workshop will be designed to be inclusive and accessible, with efforts made to accommodate diverse needs and preferences, and stipends provided to community members for attending.

Roles and responsibilities: **Cascadia** will host and facilitate the community-wide workshop and can pass through stipend funds to community members. **City of Spokane** will lead promotion of the meeting.

Focus Groups

Participants: Key participant groups such as youth, Spanish-speaking communities, residents in higher-impact areas identified by the vulnerability assessment, and communities of color (i.e., the Marshallese community).

Purpose: Engage targeted groups in in-depth discussions to gather detailed input for vulnerability assessment and identify key vulnerabilities and risks.

Details: Focus groups will be conducted virtually and promoted to targeted communities in Spokane. The sessions will incorporate storytelling elements to resonate more deeply with participants, allowing them to share personal experiences and perspectives related to climate impacts. The aim is to foster meaningful conversations and gather rich qualitative data. These sessions are intended for participant groups typically not involved in planning processes or those facing significant impacts from plan implementation. Three to four focus groups will be organized, with groups such as youth, Spanish-speaking communities, residents in higher-impact areas identified by the vulnerability assessment, and communities of color. In-person sessions will be considered as resources allow, ensuring accessibility for all community members. Additional focus groups may be considered based on community feedback, partnerships, and timelines.

Roles and responsibilities: **Cascadia** will host and facilitate 2 focus groups. **City of Spokane** will host and facilitate the remainder and will lead promotion of all focus group meetings.

Project Webpage, Social Media, Newsletters, and Constituent and Partner Kits

Participants: Interested individuals and organizations.

Purpose: Provide a central platform for information dissemination, project updates, and engagement opportunities.

Details: The City will develop a project webpage as a central hub for directing interested individuals to more information about the climate planning process. The City will have access to [Granicus Engagement HQ](#). The webpage will provide an overview of the project, updates, upcoming engagement opportunities, and contact information. Additionally, the webpage will host project materials, including surveys and online comment periods for the draft implementation plan. Regular updates will be provided to individuals and organizations interested in climate planning through emailed newsletters. The City's social media platforms will be leveraged to build awareness of and provide information about climate planning and engagement activities. Constituent and partner kits will provide ready-to-share information and materials to elected

officials, partner agencies, and organizations at key milestones to disseminate out through various networks.

Roles and responsibilities: **City of Spokane** will lead development social media posts, newsletters, and project webpage. **Cascadia** will support content development if needed and as budget allows.

Tabling at Existing Events

Participants: Spokane community members.

Purpose: Raise awareness about the project and provide opportunities for involvement.

Details: Cascadia will develop 1-2 factsheets detailing the project overview, ways to get involved, and additional information. These factsheets will be available in English and Spanish, in both digital and printed formats. They will be distributed at various community events and locations, including food banks, farmers markets, SpoCanopy and Water Wise events, partner events, events related to universities (e.g. Gonzaga Green Drinks) and Earth Day 2025.

The project team will regularly check the [Spokane Events Calendar](#) for additional opportunities to table at existing events, distribute factsheets, and solicit community feedback. At these events, poster boards with questions designed to gather input on goals, key areas of concern, and experiences with climate impacts will be used as appropriate.

Roles and responsibilities: **City of Spokane** will lead in-person attendance at existing events. **Cascadia** will develop factsheets and engagement material.

Online Open House

Participants: Spokane community members.

Purpose: Provide an interactive platform for community members to review and provide feedback on draft documents.

Details: An online open house will be developed and published via [Konveio.com](#) for the final phase of engagement. This platform will provide up-to-date information on the draft climate planning status and allow community members to directly provide feedback or public comments on draft documents. Compared to traditional in-person open houses, this format allows individuals to participate at their convenience and take their time digesting materials. The platform supports multiple interactive features, making it easy for diverse participants to understand. To make the experience more engaging, we plan to gamify the open house, adding elements that make the process more enjoyable and fun for participants. The comment period will remain open for at least four weeks to ensure ample opportunity for feedback.

Roles and responsibilities: **Cascadia** will develop the online open house platform, and track responses. **City of Spokane** will lead promotion and distribution of the online open house.

1:1 Meetings with Tribal Governments

Participants: Tribal Government elected leaders and staff.

Purpose: Engage with Tribal leaders to incorporate Tribal government input on climate goals, policies, and concerns into the planning process. Understand existing and future Tribal policy, climate related plans, and opportunities for government-to-government collaboration.

Details: KAI will develop draft letters for the mayor's office consideration, to send to each of the four Tribal governments, informing them of the city's desire to engage in consultations and collaboration with each government. KAI will then coordinate between the mayor's office and the respective Tribe for an initial introductory meeting to provide an overview of the City's climate planning effort, timeframe, opportunities for tribal engagement and consultation, discuss representation on the Tribal Engagement Workgroup (TEW), and propose periodic meetings to provide update and input. This will create the framework for regular and consistent consultations between the city and the tribe.

Roles and responsibilities: KAI will prepare draft communications for the city, coordinate tribal – city meeting dates and locations, provide necessary briefing materials, facilitate the meetings with Tribal leaders and staff, and document meeting outcomes. The mayor's office will send the communications to the tribes, help in agenda preparation, identify and brief representatives from the mayor's office to participate in the tribal consultation meetings, make presentations, and follow up with appropriate actions.

Others as Relevant

The project team will continue to identify other engagement activities and discuss roles as relevant.

Key Messages

WHAT IS THIS PROJECT?

The City of Spokane is embarking on a comprehensive Climate Impact and Resiliency Planning project as part of our 2026 Comprehensive Plan Update. Our goal is to deepen our community's resilience that fosters an exceptional sense of unity, wellbeing, and quality of life for all people to live, work, and recreate in a clean and healthy environment.

- **Climate Vulnerability and Risk Assessment:** Identifying climate impacts, risks, and vulnerabilities to inform resilience strategies.
- **Comprehensive Plan Integration:** Updating policies to address climate change and environmental justice.
- **Community Engagement:** Actively involving Spokane residents in the planning process to ensure diverse perspectives are considered.

- **Environmental Justice:** The fair treatment and meaningful involvement of all people in the environmental laws, regulations, and policies that shape their communities. Environmental justice includes addressing disproportionate environmental and health impacts by prioritizing vulnerable populations and overburdened communities.

WHY SHOULD I PARTICIPATE IN THIS PROCESS?

Your participation is crucial for several reasons:

- **Voice Your Priorities:** Ensure your priorities about climate impacts and community needs are heard and addressed.
- **Shape the Future:** Guide the development of climate resilience policies and strategies that will protect and enhance the quality of life, wellbeing, and environment for all people in Spokane.
- **Community Resilience:** Help build a resilient Spokane to better collectively and individually withstand and adapt to climate challenges, ensuring a safer, healthier, and more equitable community for all.

HOW WILL MY FEEDBACK BE USED?

Your feedback will play a vital role in shaping our Comprehensive Plan Update by:

- **Identifying Priorities:** Helping to prioritize climate risks and community assets that need protection and enhancement.
- **Informing Policies:** Contributing to the development of climate resilience goals and policies that reflect community values and needs.
- **Guiding Implementation:** Ensuring that the actions taken are grounded in the lived experiences and insights of Spokane residents, making developed strategies more effective and community-driven.

WHERE IS THE FUNDING FOR THIS EFFORT COMING FROM?

- This work is funded through a [WA Department of Commerce](#) climate planning grant which is supported with funding from Washington's Climate Commitment Act. The Climate Commitment Act supports Washington's climate action efforts by putting cap-and-invest dollars to work reducing climate pollution, creating jobs, and improving public health. Information about the CCA is available at www.climate.wa.gov.

Timeline

Table 1 depicts the proposed timing and sequence of key engagement events as they relate to the overall project timeline (Figure 1). The proposed timeline includes gap time in between engagement milestones for the project team to summarize results from previous engagement efforts, prepare for upcoming events, and adaptively adjust strategies based on community and demographic trends. This timeline serves as a high-level overview, and Cascadia will also share a more detailed working timeline with the City, to be used for more detailed planning and implementation of activities.

Appendix A. Participant Group Details

LEVELS OF ENGAGEMENT

Adapted from the [Spectrum of Community Engagement](#) framework by Facilitating Power, the levels of engagement that will be used throughout the engagement process to meet different participation needs and overall engagement goals are defined below.

Inform	Provide the community with relevant information
Consult	Gather input from the community
Involve	Community needs and priorities are heard and actively integrated into the planning process and inform decisions
Collaborate	Community plays a critical role in planning process and decision-making
Co-Design	Community co-plans community-based events and activities and co-develops metrics and policies/actions.

PARTICIPANT MATRIX

This list is a starting point for engagement, and includes potential participants but is not exhaustive. Additional participants will be identified and partnerships fostered throughout the process. Cascadia will maintain and update a database, shared with the City, of a detailed list of contacts.

Participant & Description	Groups	Engagement Goal/Level of Engagement
Internal Participants		
Decision-makers	<ul style="list-style-type: none"> City Mayor’s Office City Council 	Consult

*Expertise considerations for community climate advisory board members:

- Developing and implementing zoning, land use, housing policy;
- Expertise with a climate nexus in:
 - transportation and public works;
 - hazard mitigation and emergency management;
 - sustainability, environment, and natural resources;
 - public health;
- Other areas of expertise as prioritized;
- Community members and leaders within overburdened and frontline communities;
- Environmental justice, climate justice, and resilience expertise and lived experience;
- Tribal governments;
- Indigenous communities and organizations, such as urban Native organizations;
- Community engagement specialists;
- Public schools and youth engagement;
- Economic and community development specialists;
- Businesses and minority entrepreneurs;
- Interested residents and neighborhood representatives;
- Legal advisors to make sure goals and policies are consistent with state and local laws; and,
- Elected officials who will provide oversight and can champion the project from beginning to end.

Appendix B: Spokane Community Characteristics

This section provides background data on Spokane’s demographic characteristics, to inform an inclusive CEP for the City’s climate resiliency planning work.

Population Estimates

2025-2029 Consolidated Plan

August 29, 2024 | City Council Study Session
Community, Housing & Human Services Department

24 CFR Part 91

Presentation Overview

- Introduction of CHHS & Community Partners
- Background
 - Purpose of Consolidated Plan
 - Areas of Funding
 - Anticipated Resources
- Looking back...2020-24 Consolidated Plan
 - Goals & Outcomes
- Looking ahead...2025-29 Consolidated Plan
 - Stakeholder Engagement
 - Community Outreach
 - Timeline
- Question & Answer

Since 1975, **\$192,340,700 in Community Development Block Grant (CDBG) funds** have been used by the City of Spokane to deliver vital services and support critical investments in infrastructure based on the City of Spokane's priorities.

-HUD Seattle Regional
Field Office

Purpose of Consolidated Plan

Consolidated Plan

- Strategic plan created every 5 years
- Assists the City in determining community needs for low- to moderate- income households
- Outlines strategies to address these needs with federal funds

Helps Identify Community Needs

- Public services and facilities
- Housing and homelessness
- Community and economic development
- Infrastructure and enhancement

Regional Planning Efforts

- Planning meetings with Spokane County and City of Spokane Valley
- CLIHP Grant - ensure alignment with CoC 5-year Homeless Plan, CoS Comprehensive Plan, and other community stakeholders

Areas of Funding

① **Community Development Block Grant (CDBG) Program**

Provides resources to address housing and community development needs that benefit low- to moderate-income individuals

Eligible Activities

- Public improvements
- Public facilities
- Public services
- Rehabilitation
- Economic development

Current allocation (PY24) = \$3,046,666

Areas of Funding

② HOME Investment Partnerships (HOME) Program

Creates housing opportunities for low-income households

Eligible Activities

- Multi-family housing development
- Housing for people with special needs
- Homebuyer assistance
- Housing rehabilitation
- Rental assistance (vouchers)

Current allocation (PY24) = \$1,161,022

Areas of Funding

③ Emergency Solutions Grants (ESG) Program

Assists individuals and families to regain permanent housing after experiencing a housing crisis or homelessness

Eligible Activities

- Street outreach
- Emergency shelter
- Homelessness prevention
- Homeless Management Information System (HMIS/CMIS)

Current allocation (PY24) = \$274,772

Anticipated Resources

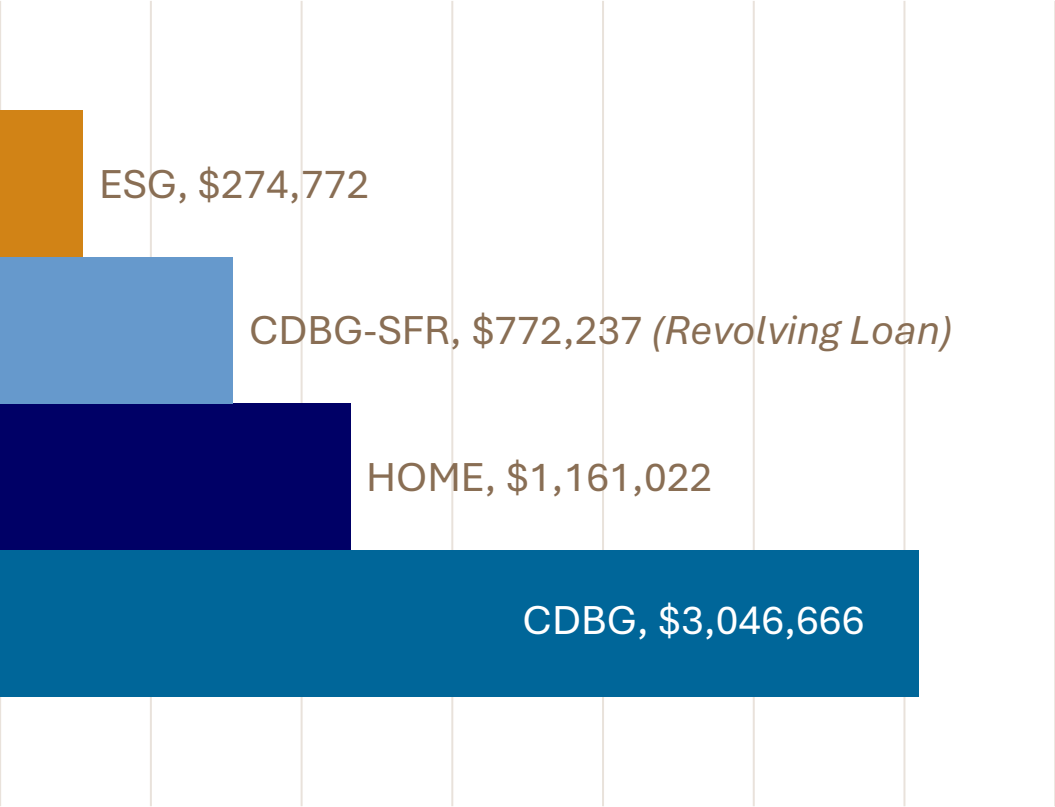

Funding Determination

- Based on formula that factors in population size, levels of poverty, and other demographic/economic data
- Funding is determined on a Program Year basis: July 1—June 30

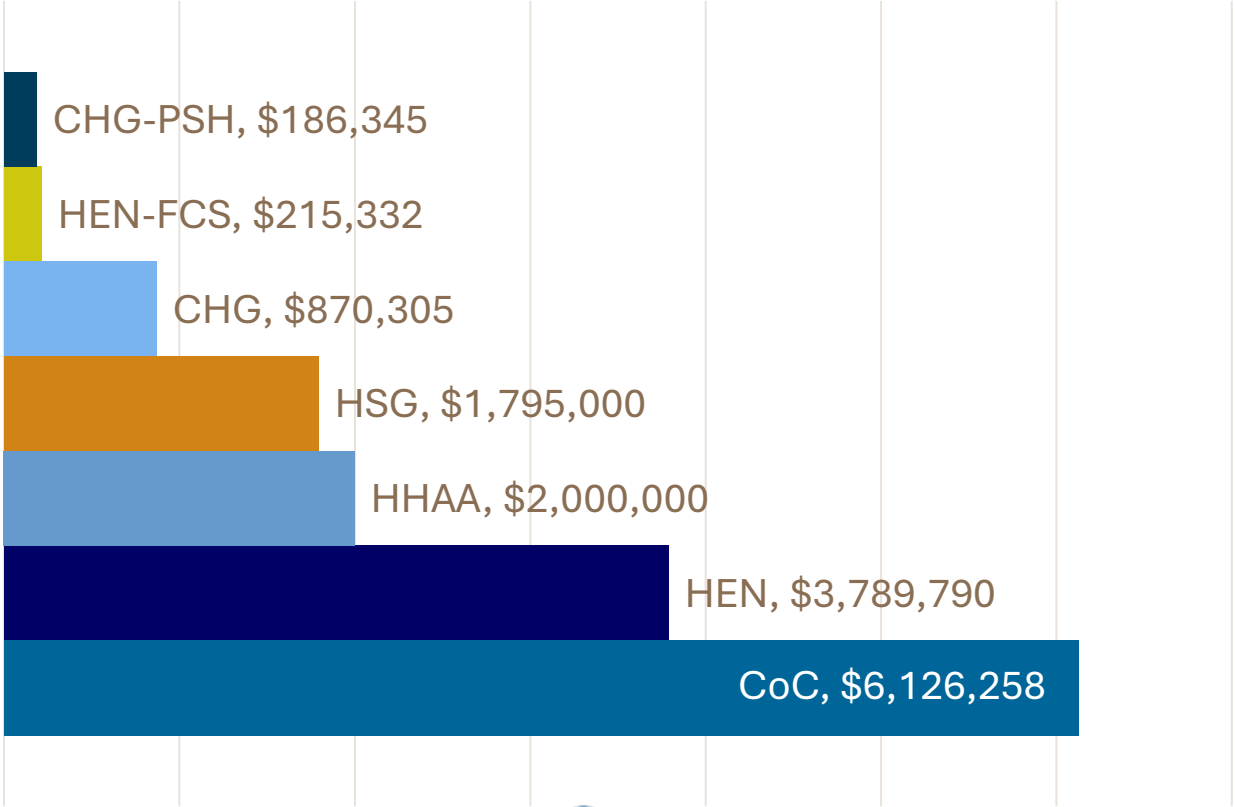

Funding	PY2025	PY2026	PY2027	PY2028	PY2029	Total
CDBG	\$3,046,666	\$3,046,666	\$3,046,666	\$3,046,666	\$3,046,666	\$15,233,330
HOME	\$1,161,022	\$1,161,022	\$1,161,022	\$1,161,022	\$1,161,022	\$5,805,100
ESG	\$274,772	\$274,772	\$274,772	\$274,772	\$274,772	\$1,373,860
Total	\$4,482,460	\$4,482,460	\$4,482,460	\$4,482,460	\$4,482,460	\$22,412,300

CHHS Funding Sources

Formula Grants

Homeless Services

Looking back...2020—24 Consolidated Plan

Priorities

1. Improve affordable housing access and availability
2. Urgent public health and safety response
3. Community-based social service planning

Looking back...2020—24 Consolidated Plan

CDBG Capital Projects

\$8,828,073
28 projects

- Apartment rehab
- Community Center improvements
- Service facility improvements

Looking back...2020—24 Consolidated Plan

CDBG Home Rehabilitation

\$8,066,247
Includes Revolving Loan Funds

- Minor Home Repair: **711**
- Single Family Rehab: **94**
- Multi-Family Rehab: **3***

*1-year pilot

Looking back...2020—24 Consolidated Plan

CDBG Public Services

\$7,346,578
68 unique projects

- Food banks: **381,941** persons served
- Dental vouchers: **3,363** provided
- Housing counseling & homeowner-ship assistance: **1,626** households served

Looking back...2020—24 Consolidated Plan

HOME

\$3,212,419

- Multi-family construction: 4 projects
- Multi-family rehab: 2 projects
- Tenant-based rental assistance: 1 program

Looking ahead...2025—29 Consolidated Plan

Stakeholder Engagement

- Internal CoS Stakeholder meeting
- External Stakeholder presentations: CoC, SLIHC, Community Assembly, Board of County Commissioners
- Consultations

Community Engagement

- Website: <https://my.spokanecity.org/chhs/programs/consolidated-plan/>
 - Community Needs Survey
 - Interactive Map – *coming soon!*
- Summer events with ONS
- Community Stakeholder meetings
- Outreach to Community Assembly & Neighborhood Councils

Consolidated Plan Timeline	2024	April	Project start-up	
		May	Regional Consolidated Plan meetings	
		June	Internal Stakeholder meeting External Stakeholder meetings: CoC, Community Assembly, SLIHC	
		July	Community Needs Survey Community events	
		August	Community Stakeholder meetings Regional Consolidated Plan meetings	
		September	Community Consultations Neighborhood Council meetings	Draft Consolidated Plan
		October	Community Needs Survey analysis October 1 – Joint Community Stakeholder meeting	
		November	PY2025 Request for Proposals	
		December	PY2025 Annual Action Plan	
	January			
	2025	February	Public Comment Period opens	
		March	Public Hearing & CHHS Board Approval	
		April	City Council Resolution process	
		May	May 16 – Consolidated Plan submitted to HUD
