

# 2024 Point-in-Time Count

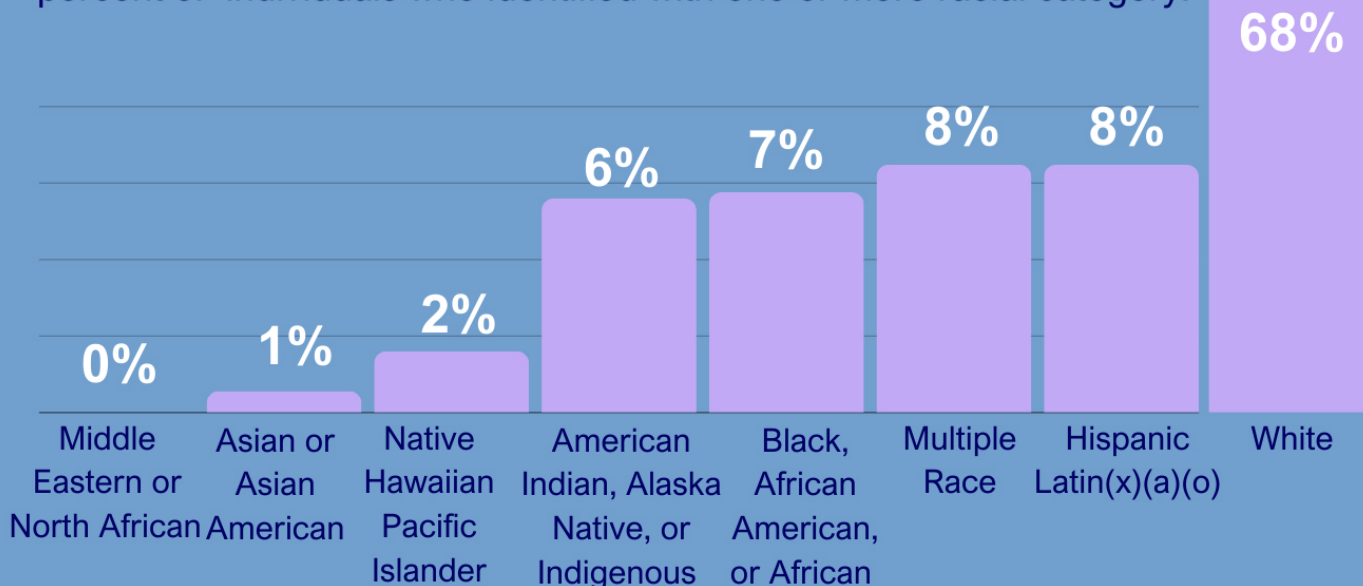

The U.S Department of Housing and Urban Development (HUD) requires the Point-in-Time (PIT) Count be completed each year to get an estimate of the number of persons experiencing sheltered and unsheltered homelessness. Spokane County executed the PIT January 22 - 27 and includes all persons staying in shelters, transitional housing and those living on the streets.

## 2,021 Individuals Experiencing Homelessness

## Race & Ethnicity

HUD requires the collection of demographic information. Below is the percent of individuals who identified with one or more racial category.

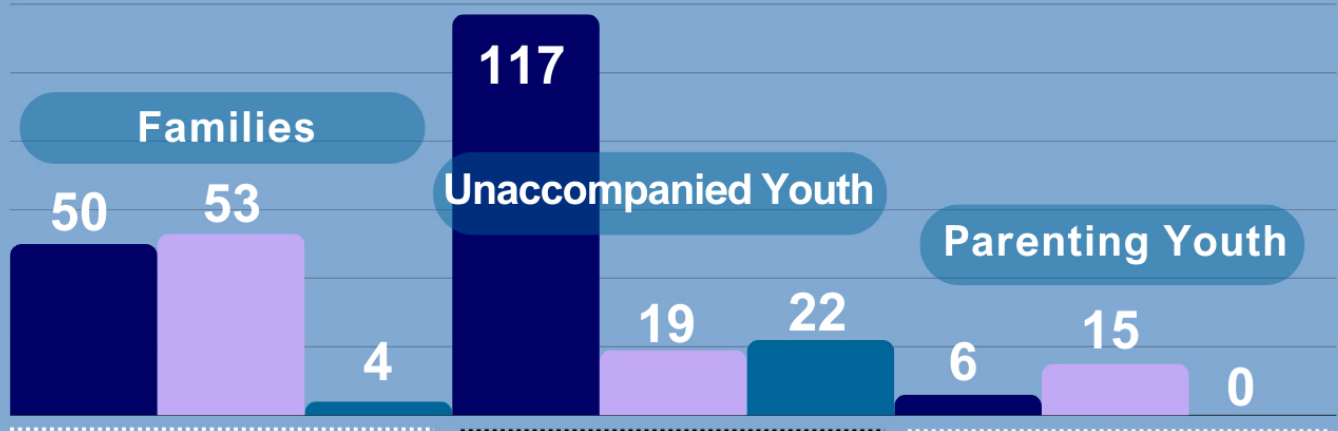

# 2024 Point-in-Time Count

## Family and Parenting Youth Households

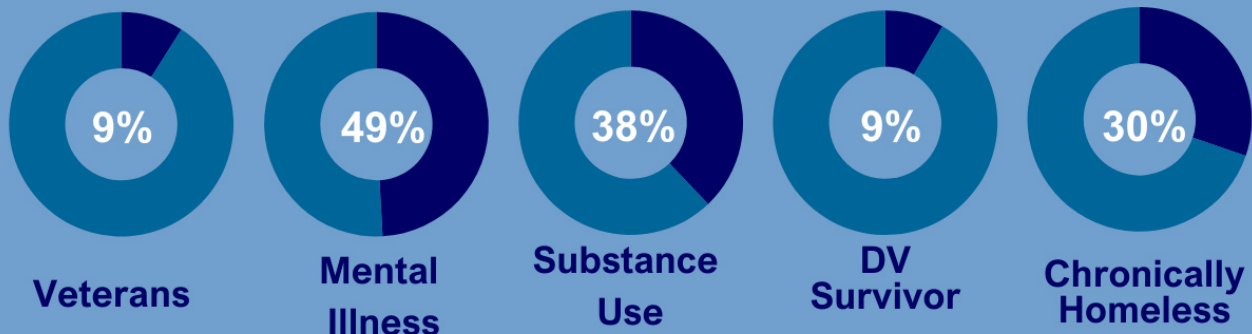

Homelessness can result in enduring adverse impacts on families, particularly affecting children and adolescents. Families include all households with at least one adult and one child. Unaccompanied youth are single young adults and minors under 24 years old. Parenting Youth are families with parents between the ages of 18-24 years old.

Emergency Shelter
  Transitional Housing
  Unsheltered

## Additional Populations

Homelessness worsens existing physical disabilities, substance use, and mental health issues by impeding access to treatments. Below is the percent of adults that identified with one or more vulnerabilities or additional population.

Thank you to all those who shared their stories and participated in this count. This project would not have been possible without the help of volunteers, regional partners, and the City of Spokane.
