____(SPCO) Combined (Sprinkler and Standpipe – common riser)
____(SPRE) NFPA 13D Residential System (one and two family dwelling)
____(SPRR) NFPA 13R Residential System (four stories or less)

REQUIRED BY:

____Fire ____Insurance ____Other

The Fire Department will require a hydrostatic test of all systems containing 6 or more heads and a 24-hour air test and trip test of the dry systems. The completed installation shall pass a visual inspection and hydrostatic test witnessed by a representative of the Fire Prevention Bureau. Please call your Fire Inspector / Deputy Fire Marshal at least 24 hours in advance to schedule inspections or tests.

Note:
The issuance of a permit based upon plans specifications, data and other reports shall not prevent the Fire Prevention Bureau from thereafter requiring correction of deficiencies. Any deficiencies found during field inspection, testing, or Fire Company Surveys must also be corrected.

In addition to a Sprinkler System Equipment permit issued by the Fire Department, permits and inspections are required from Engineering Services and the Water Department for taps, meters and underground work. Underground water main installers/servicers must be licensed by the State of Washington as Level U or Level 3 contractors.

All work shall comply with all applicable codes and standards, including NFPA 13, 13R, 13D, 231, 20 and 24 and the Spokane Municipal Code.

Low-pressure supervision is required for all dry pipe sprinkler systems and for pre-action sprinkler systems.

Contractors Certificate of Completion shall be provided to the Fire Inspector / Deputy Fire Marshal at the end of the test.

PROJECT NARRATIVE: (Including *specific* scope, building, floor, suite, system, and location of work)

Building 1

Building 2

Building 3

Building 4

Building 5
