## Community Service

Before

After

### Service for a Better Community

**The Court Team:** The foundation of Community Court is a collaboration of court and social service professionals, dedicated to helping participants reach practical and targeted solutions.

**Areas Served:** The program is focused on addressing quality of life crimes in the downtown corridor.

*"Community courts are neighborhood-focused courts that attempt to harness the power of the justice system to address local problems. They strive to engage outside stakeholders such as residents, merchants, churches, and schools in new ways in an effort to bolster public trust in justice.*

*And they test new approaches to reduce both crime and incarceration."*

— Center for Court Innovation

### Mission & Purpose

The Spokane Municipal Community Court seeks to reduce and properly address quality of life offenses in the downtown area by utilizing a collaborative, problem-solving approach to crime.

### Principles of Community Court

- Individualized justice
- Improve quality of life for participants and the community
- Promote fair, equitable and responsive policies
- Find family and community oriented solutions
- Expand employment and education opportunities
- Community and Neighborhood improvement through sustainable environmental awareness and action
