Report on the findings of the Rental Housing Research Stakeholder Group May 2015 to July 2016

Report to the Landlord Association June 24, 2016

This report was prepared by Alexander Scott, representative of the Landlord Association of the Inland Northwest, for the Rental Housing Research Stakeholder Group. The report presents the views of the author.

Alexander Scott is the Principal Consultant of Strategem Business Consultants. Strategem Business Consultants assists organizations in Strategic Planning, Financial Systems, Management Reporting, Financial Management, Business Process Improvements and Human Resource Management. The company has assisted clients in the USA, Australia and Africa in City Government, Public Services, Health, Retail, Manufacturing, Technology and Mining.

June 25, 2016

Appreciation

As a community-based process, many people deserve recognition and thanks for their significant contributions that make up this report. Thanks go to primary participants, the Landlord group (Kevin McKee, Steve Corker, Alexander Scott, Eric Besset, Patty Webster, Cicely Bradley, Heleen Dewey, Chris Bornhoft), the Tenants group (Phillip Smith, Cesar Stoddard, Ron Toston, Sarah Turner, Gretchen Chomas, Terri Anderson), Neighborhood group (Julie Banks, Arielle Anderson, Sarah Tosch, Ron Myers, Cathy Gunderson, Traci Swank, Daniel Marshall), and City officers (Heather Trautman, Melissa Wittstruck, Suzanne Trusko, Jackie Caro, Sarah Kintner, Daniel Clark).

A special thanks to Roger Trainor, Ron Davenport, Keith Reekie, and the other members of the Landlord Association who attended many meetings, provided their perspectives and insights and supported the process fully.

Thank you also to the many members of the public who added their voices to the process.

Certainly this is not a comprehensive list, so a blanket thanks to all the participants in this 14-month project who contributed over 1,500 hours collectively.

Executive Summary

This report was prepared for the Landlord Association of the Inland Northwest (LLA) by Alexander Scott as the representative of the Landlord Association at the City of Spokane's Rental Housing Research Stakeholder Group.

The City of Spokane's Community Assembly sought to identify issues associated with residential rental housing units, resources and existing policies, ordinances and organizations, and to identify the gaps in issues and resources. The City's Code Enforcement and Neighborhood Services managed the process and assisted Landlord, Tenant, and Neighborhood representatives who assisted voluntarily through a 14 month process. Presentations were made by City of Spokane Police Department, Fire Department, Building Services, Code Enforcement, City Attorney, regional Health Department, and housing agencies. A panel of attorneys gave a presentation about the Washington State Landlord Tenant Act and discussed court and eviction processes. Each stakeholder group also presented their own issues and concerns.

The landlord, tenant, and neighborhood stakeholders volunteered their time and energies, and our appreciation extends to those participants, to the Chair, Julie Banks, and the City's staff led by Heather Trautman.

A list of the issues raised from each of the meetings and presentations is summarized in a matrix aimed at identifying KEY THEMES, to gain a better understanding of the issues raised and to present possible solutions.

It is clear that landlords, tenants, neighborhoods, City departments and housing agencies are struggling to provide sufficient affordable housing within the City of Spokane. There are enormous community benefits to be gained from building healthy communities, with affordable and fit-for-purpose housing as one of is pillars. Simultaneously, the challenges of low income, poor behavior by landlords and tenants, the cost of maintaining aging properties, and shrinking government housing funding is shifting the burden of providing housing to private landlords. It is essential that our law-makers and the community have a sound understanding of all aspects of housing and the implications that arise from creating new laws or ordinances.

The KEY THEMES identified from a methodical review of the data presented are these ten:

- 1. <u>Use a Holistic approach</u> to address the underlying issues requiring affordable rental accommodation poverty and low income, employment, mental health, incarceration and availably of rental housing
- 2. Increase Employment Income, average family income, reduce poverty and increase affordable housing
- 3. Modify unproductive behavioral actions of landlords, tenants, and neighborhoods
- 4. <u>Change the existing adversarial approach</u> to dispute resolution between landlords, tenants, and public agencies
- 5. Co-ordinate resources to assist tenants, landlords, and agencies in the rental housing process
- 6. Improve understanding of legislation relating to residential rental accommodation
- 7. Develop and share the understanding of the methods, costs and funding sources to **extend the useful life of existing aging houses**
- 8. <u>Improve data collection and analysis</u> associated with rental properties, including ownership, contact details and problems encountered in residential rental processes
- 9. Modify the systems and scope of existing City departments, stakeholder groups and housing agencies to better service rental needs
- 10. Thoroughly investigate and <u>understand the implications of any new Legislation and Ordinances</u> before implementation

The KEY THEMES analysis undertaken herein has been a methodical approach linking every issue from every meeting into a theme. The KEY THEME analysis approach gives additional insight into the issues and forms a basis from which further information can be gleaned before taking actions. Such investigations may best be undertaken by the City with the collaboration of its various departments and with existing housing agencies. Possible solutions are proposed in the analysis of each theme.

Project Charter: The Goal

To identify issues associated with rental housing units, resources and existing policies, ordinances and organizations that are related to housing unit rentals, and identify the gaps in issues and resources of rental housing.

Background

The Community Assembly indicated an interest in researching and understanding the current conditions for rental housing units in the City of Spokane. The Community Assembly asked the Public Safety Committee to work towards identifying issues associated with rental housing units, resources and existing policies, ordinances and organizations that are related to housing unit rentals, and to identify the gaps in issues and resources of rental housing.

The Public Safety Committee convened a stakeholder group to review existing conditions regarding rental housing in Spokane and make recommendations or solutions, if needed. The Public Safety Committee identified researching rental housing units as a goal of the Committee for 2015. The Public Safety Committee Chair, Julie Banks, chaired the Rental Housing Research Stakeholder Group. The intent is that the Rental Housing Research Stakeholder Group presents its findings to the Community Assembly.

The Process

The process following is outlined via the 11 Appendices. For the various Agenda, Minutes, and presentations, please refer to the City of Spokane website: https://my.spokanecity.org/neighborhoods/community-assembly/standing-committees/ (Select Public Safety Committee – Rental Housing Research Stakeholder Group)

Stakeholders representing the City of Spokane's various neighborhood groups, tenant groups and landlord groups attended meetings from May 2015 to June 2016. While 5 representatives were expected from each group, the voluntary nature, length of time and other commitments meant individual participants could not attend all meetings, resulting in a loss of continuity. As a note for future community groups, it may be more beneficial to establish shorter term project timelines or smaller focused goals and to report on those separately.

The City of Spokane's Code Enforcement staff provided assistance to the group by facilitating meetings, preparing agendas, taking minutes, co-ordinating presenters, collating information, storing information on the City of Spokane web pages. The Director of Neighborhood Services and Code Enforcement, Heather Trautman, is commended on her personal contributions and also for that of her team to ensure the success of the project. Without the resources, support and guidance from the City, the Stakeholder Group would not have been able to undertake its tasks.

Appendix 1 - rental-housing-project-scope-2016-04-01. The Rental Housing: Issues, Resources and Gaps Work Plan outlines the Goal, Background, Work Plan, Guiding Principles, Participant Roles, Ground Rules for Meetings and Selection of a Voting Model.

Appendix 2 - Timeline rental-housing-timeline-2015-11-10. The initial project timeline was revised on several occasions. The final Timeline is included meetings from May 2015 to September 2016. Presentations were made by the following agencies and community representatives:

- Spokane Police Department
- Spokane Regional Health
- City of Spokane Building Department
- City of Spokane Code Enforcement Department
- City of Spokane Fire Prevention Bureau
- City of Spokane Attorney

- Spokane Low Income Housing Consortium
- Spokane Housing Authority
- Panel discussion by: Attorney Jose Trejo and Attorney Tom McGarry
- Landlord Stakeholder Group
- Neighborhood Stakeholder Group
- Tenant Stakeholder Group

Appendix 3 - Programs assisting tenants, neighborhoods and landlords is a list of programs providing assistance to tenants, neighborhoods and landlords.

Appendix 4 – Data – Demographics, Housing includes information relating to:

- Population demographics
- Income / Poverty
- Housing stock
- Investment in Rental Properties, Contribution to City of Spokane Income, Rental Income as % of GDP.

A brief commentary is made on the statistical data.

The landlord, tenant and neighborhood groups each made a group presentation to highlight their issues and concerns. The key issues, resources, conclusions and recommendations are listed in this report.

- Appendix 5 Presentation Landlord Stakeholder Group 20160322
- Appendix 6 Presentation Tenant Stakeholder Group 20160510
- Appendix 7 Presentation Neighborhood Stakeholder Group 20160426

Survey Tools and National Research information in included in:

- Appendix 8 Survey and Research data sources
- Appendix 9 Article How Long do Buildings Last

Appendix 10 – Matrix Issues and Themes: Issues brought up at each meeting, from presentations, questions and minutes was numbered and referenced to ensure completeness. These issues were cross referenced into common themes from which to draw conclusions.

Appendix 11 – Key Theme by #: KEY THEMES are those considered most important or contentious or that have an immediate impact on housing and community well-being. Each key theme describes the problem, assesses the impact (who and what is impacted), rates the importance (rating the importance of the issue with a higher score indicating higher importance), identifies existing laws that impact or mitigate the issue, identifies additional information required, possible solutions, and how easily can the solutions can be implemented.

MINOR THEMES are those that are considered of lesser importance or which the Group did not have opportunity to comment upon given timing and knowledge and can be gleaned from Appendix 10.

Data Highlights

Appendix 4 - Data - Demographics, Housing: The following points are highlights from the data presented:

- 47% of housing are rental properties
- Average of 2.5 persons per household 99,944 people live in rental properties
- 19.9% (42,201) people in poverty are concentrated in rental housing
- Investment in rentals exceeds \$3 BILLION
- Property taxes generate \$39 million, utilities \$33 million (10% of City budget)
- Rental Income generated is over \$297 million (12% of Spokane GDP)
- Low profitability of residential housing especially for small landlords (return after setting aside costs of long term repairs)
- Aging infrastructure (large number of very old rental properties)
- High cost of investment relative to the rental income (after accounting for replacement cost)

Comments on data

Rental housing is extremely important to Spokane's social wellbeing. 47% of Spokane's housing units are rental properties, accommodating approximately 100,000 people.

Rental housing is extremely important to Spokane's economic wellbeing. Investment in rental residential housing property exceeds \$3 billion. Property taxes and utilities from rented housing totals \$72 million (10% of the City budget). Rental income equates to 12% of Spokane's gross domestic product.

Poverty and low family income is a great challenge for our community well-being. 42,000 people, 20% of Spokane's population, are classified as living under the poverty threshold. People living in poverty are concentrated in rental housing. Hillyard, North Central, West Central and East Central are predominantly rental housing areas. Low family income has implications for where people can afford to live, what standard of housing they can afford and has implications for health and education.

The lack of government funding for housing is shifting the burden of providing affordable housing to private landlords. Federal and State Government funding for accommodation has reduced over the past decade. There is less government owned housing and support for low income tenants is mainly through financial aid, channelled through housing agencies offering section 8 voucher programs.

Lack of affordable housing, poor quality housing, and social health attitudes adds to declining community health standards and to the poor academic performance of school children. The Spokane Health Department presentation suggested that landlords are deliberately providing poor quality of housing, and that mandatory property inspections are essential to improve the quality of housing. Landlords believe this view is unfair and incorrect as it ignores social health issues, individual choices and puts an unfair onus on property providers for social health.

The cost of keeping aging housing to an appropriate level and to new building standards will become prohibitive and result in fewer affordable homes available for rent. Spokane's rental housing is VERY OLD. 73% of properties are over 25 years old, 60% is over 55, and 27% is over 85. The cost of extending the life of very old properties requires repairs of the house, its foundations, internal support structures, sewers, septics, plumbing and electrical wiring. Technical obsolescence such as lead paint and asbestos contributes to major replacement costs. Increased compliance such as mandatory registration and mandatory inspection for health and functionality standards brings additional costs that landlords will either pass on to the tenant or the property will not be a viable as a rental property.

Summary of Landlord, Tenant and Neighborhood presentations.

Landlord Stakeholder Group Presentation

Background:

- Much of Spokane's rental woes are about high poverty, aging infrastructure and high reliance on privately provided accommodation (landlords)
- **Poverty** 19.9% of people living below the poverty line, assuming that these people rent, and 44% of rental properties are to those under the poverty line.
- Large number of aging properties rental properties will become re-purposed if unprofitable or too cumbersome leading to further housing pressures
- **Poor data collection** by existing public agencies don't capture accurate complaints data so unknown full extent of the renter/landlord or property condition problems
- **Ineffective agencies** existing systems in place and in effective. It is more cost effective to strengthen existing systems rather than bring in new systems
- Rent increases Additional costs pushed to the tenant or less rental housing
- No incentive programs encourage housing investment
- No meditation systems Problem resolution is limited, combative, costly and takes a long time

Specific Concerns of landlords:

- 1. Low income (can't afford housing and housing standards need to be low)
- 2. More aging properties (old properties require costly replacements)
- 3. Fewer rental properties (if repairs and compliance become costly, rentals become unviable and unavailable)
- 4. Lack of affordable housing (lack of govt. funding, low vacancies, insufficient properties, who will fund)
- 5. B.A.D. Neighborhoods, Landlords, Tenants behaviors:
 - Breaching Rules: Acting against legislation (Landlord Tenant Act), Condoning criminal or illegal activities
 - Antisocial Behavior: Condoning unsafe behavior in property, not reporting unsafe matters
 - Damage to Property: Unclean or unhygienic property (waste, debris); Condemned properties;
 Sub-standard housing
- 6. Existing compliance systems don't work
- 7. Mandatory Inspections are ineffective, costly and won't resolve issues

Comments on issues to be addressed:

- 1. Collect appropriate data on tenant / landlord / building issues
- 2. Improve the economy Increase the number of jobs to increase income, reduce high poverty levels
- 3. Reduce high reliance on private rentals and low rent properties, stimulate home ownership
- 4. Legislators and City department should work with landlords are key stakeholders to providing housing solutions. Don't implement Ordinances that will reduce investment and in turn reduce the number of available rental properties
- 5. Understand that increasing compliance costs will be passed to tenants
- 6. Look for ways to encourage and landlords to continue investing
- 7. Look for ways to avoid costly evictions
- 8. Implement low cost and accessible mediation
- 9. Rental properties are aging and will reduce as repairs compliance increases
- 10. Build good neighborhoods which provide social cohesion
- 11. Lack of accurate data on tenant / landlord / building issues
- 12. Existing agencies are ineffective to resolve problems

Tenant Stakeholder Group Presentation

Issues:

- 1. Spokane tenants are rent burdened. Low income tenants have few housing options.
- 2. There is not enough subsidized low income housing in Spokane.
- 3. There is a fear of unreasonable evictions by tenants.
- 4. There is a lack of data collection on rental housing and tenant assistance in Spokane.
- 5. Substandard housing is a health hazard for the tenants and neighbors.
- 6. Substandard rental housing is costly for all Spokane residents including tenants.
- 7. Healthy and stable housing is good for tenants, landlords and neighborhoods.

Resources:

- 1. Resources to assist tenants in Spokane are scarce, limited or nonexistent.
- 2. Landlord Tenant Act regulates rental property in Spokane (repairs, housing condition, discrimination, retaliation.
- 3. City of Spokane Code Enforcement, Building Department, SPD, Fire Department, Spokane Regional Health District.

Recommendations:

- 1. Spokane should adopt a Housing Security Ordinance that will eliminate no cause evictions.
- 2. Spokane should establish a rental registry and inspection program.
- 3. Spokane should adopt provisions in the Landlord-Tenant Act to provide relocation assistance to tenants and hold landlords accountable.
- 4. Spokane should establish an Office of Tenant Services to enforce notice requirements, assist tenants and collect data, and offer tenant education classes.
- 5. Spokane should offer no cost mediation to landlords and tenants in disputes that would otherwise result in legal action.
- 6. Spokane should provide financial assistance for small scale landlords who require repair due to malicious destruction to property that would otherwise remove the property from the rental market.
- 7. Spokane should increase the number of subsidized low income rental housing in Spokane

Neighborhood Stakeholder Group Presentation

Top issues regarding rental housing in Spokane neighborhoods

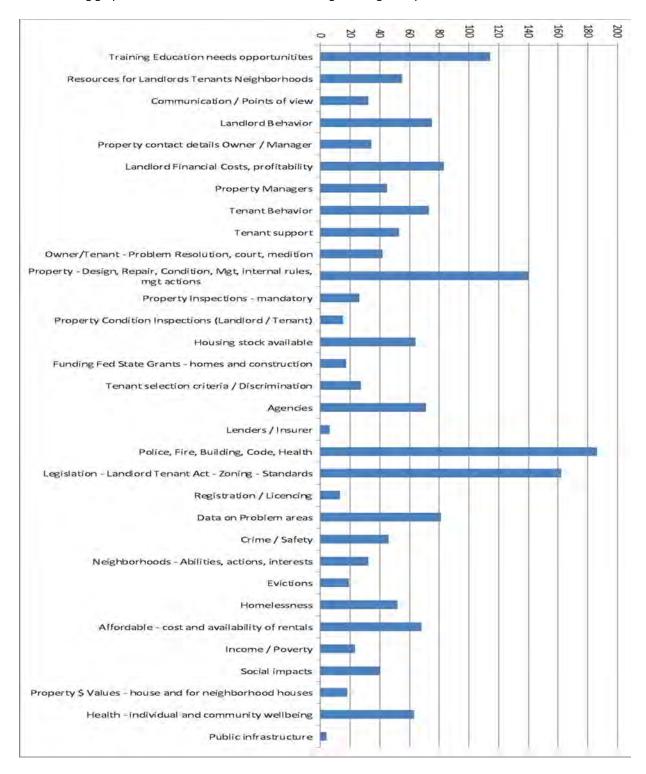

- 1. Negative impacts of poorly maintained rental properties
 - Health
 - Safety
 - Property value
 - Quality of life
- 2. Absentee landlords
 - Inability to contact responsible parties
 - No oversight
 - Delayed response to property issues
 - Neighborhood erosion due to lack of accountability
 - Owner = manager?
- 3. Transiency within neighborhoods
 - Lots of moving
 - Hard to get to know neighbors
 - Loss of mutual trust between neighbors
 - Lack of stability for children
 - Loss of sense of neighborhood security and identity
- 4. Lack of legal protection/recourse for neighbors
 - Only recourse available is filing a complaint with code
 - Enforcement
 - Only addresses external issues
 - Difficulty in identifying accountable party
 - Fear of retaliation from filing complaint

Conclusion:

- 1. The #1 gap in mitigating the top issues regarding rental housing for neighborhoods is ACCOUNTABILITY.
- 2. It is unclear whom to hold responsible for poorly maintained rental properties.
- 3. Without a local contact for absentee landlords there is no ability to resolve issues with rental properties.
- 4. Frequent movers in and out of neighborhoods diminishes social capital for all generations.
- 5. Neighbors have no resources, beyond Code Enforcement, to remedy negative impacts.
- 6. Neighbors need a process for mediation with tenants and/or landlords to mitigate negative impacts.

Analysis of identified issues

The following graph shows often issues were raised during meetings and presentations.

Key Themes

Key themes are those considered most important, contentious, or that could have an immediate impact on housing and community well-being. Each key theme is described more fully using a template, to enable a complete understanding of the problem, its impact, and to provide possible solutions. The current analysis is done with limited knowledge and should be analysed by the organisations mentioned.

The following key themes and recommendations could be used by applicable stakeholders to develop appropriate solutions:

- 1. Use a Holistic approach to address the underlying issues that make affordable rental accommodation necessary
 - a. Poverty and low income (increase family income)
 - b. Employment opportunities (increase family income)
 - c. Mental health and incarceration (providing accommodation options)
 - d. Availably of affordable rental housing (having many housing choices)
- 2. Increase employment, average family income, reduce poverty and increase housing affordability
- 3. Modify unproductive behavioral actions of landlords, tenants and neighborhoods
 - a. B.A.D. landlord behavior impacts and options
 - b. B.A.D. tenant behavior impacts and options
 - c. neighborhood options
- 4. Change the existing adversarial approach to dispute resolution between landlords, tenant, public agencies
- 5. Co-ordinate resources to assist tenants, landlords and agencies in the rental housing process
- 6. Improve understanding of legislation relating to residential rental accommodation
- 7. Property Issues develop and share the understanding of the methods, cost and funding sources to extend the useful life of existing aging houses
 - a. Poor property conditions impact on individual health, cost to the community, existing inspection regimes
 - b. Aging housing
- 8. Improve data collection and analysis associated with rental properties ownership, contact details in case of emergency, and code and other violations encountered with the property
- 9. Modify the systems and scope of existing City departments, stakeholder groups and housing agencies to better service rental needs
 - a. Organizational issues change focus of existing City Departments existing scope and systems are ineffective, high costs of compliance, new compliance systems must be effective, affordable
 - b. Use supporting agencies in the process landlord, tenant and not-for-profit housing agencies
- 10. Thoroughly investigate and understand the implications of any new legislation and ordinances prior to enacting the new rules
 - a. Applicable legislation
 - b. Landlord / tenant problem resolution alternatives mediation and court actions
 - c. Evictions
 - d. Just-Cause ordinance
 - e. Nuisance ordinance
 - f. Mandatory Inspections

Minor Themes

Minor themes are those that are considered less important and are not commented upon given the lack of time or lack of knowledge. Further information can be gleaned from the *Appendix 10 Matrix Issues and Themes*.

Conclusion

This research process was a significant task and in some sense too large to expect from a voluntary group of stakeholder representatives who are doing this ancillary to their normal working lives. Specific and focused outcomes with shorter timeframes are more appropriate to seek input from voluntary participants.

The purpose of the Rental Housing Research Stakeholder Group was to identify issues associated with rental housing units, resources and existing policies, ordinances and organizations that are related to housing unit rentals, and identify the gaps in issues and resources of rental housing. This outcome has been largely achieved thought this report.

Appendix 10 - Matrix and Themes identifies the issues raised, group those into themes and shows the frequency those items were mentioned.

Appendix 11 - Key Themes by # identifies 10 KEY THEMES. These are described, assessed for importance, and possible solutions are proposed.

A key observation during this process is that there is opportunity for collaboration, education and alternative dispute resolution which can greatly improve the relationships between landlords, tenants, (agencies and government). Collaboration would be of enormous symbolic and functional benefit so that we as a community can reach solutions to our housing issues.

Landlords are seeking assistance from the City of Spokane to identify funding sources, investment incentives, resource support, collaboration with City Government and agencies, and no new compliance costs in order to play an active role in providing rental housing and support affordable housing in the future.

It is recommended that the LLA takes initial steps to work with tenants and the City to demonstrate its willingness to be part of developing lasting and transformative solutions. This can initially be achieved by reaching out to the Tenant Union to get a bi-partisan understanding of the proposed just-cause-eviction recommendations. The Landlord Association should seek representation as a "Significant-Industry-Stakeholder" on City of Spokane's Community Housing and Human Services Board.

Rental Housing: Issues, Resources and Gaps

<u>Project Charter (Goal):</u> The Community Assembly has indicated an interest in researching and understanding the current conditions for rental housing units. The Community Assembly has asked the Public Safety Committee to work towards identifying issues associated with rental housing units, resources and existing policies, ordinances and organizations that are related to housing unit rentals, and identify the gaps in issues and resources of rental housing. The Public Safety Committee has decided to convene a stakeholder group to review existing conditions regarding rental housing in Spokane and make recommendations or solutions, if needed.

Background

The Community Assembly has requested that the Public Safety Committee research the issues, resources and gaps related to rental housing units. The Public Safety Committee has identified researching rental housing units as a goal of the Committee for the 2015 year.

Work Plan

Task 1: Research/Study Issues

- Convene Stakeholder Group
 - Develop a broad stakeholder group to garner sufficient participation to ensure the recommendation is viable.
- Coordinate with guest speakers to learn and identify issues
 - Coordinate with service providers to develop an understanding of the resources currently provided in Spokane.
- Generate a list of identified issues currently associated with rental housing units

Task 2: Identify programs/policies/ordinances/programs that may solve identified issues

- Connect issues with potential solutions
 - a. Collect information on existing policies, ordinances and programs related to rental housing units.

Task 3: Explore gaps between the issues and existing solutions

- Identify gaps with issues that have no identified solution
- Develop recommendations based on gaps in issues and solutions

Guiding Principles (For Stakeholders)

Stakeholders involved in the process will be asked to review and adhere to several guiding principles. These principles are meant to create a conducive work environment:

Collaborate between City Departments, speakers, and other stakeholders

Facilitate a process to review current issues and solutions proposed/implemented in other municipalities.

Create a distinct environment that provides for input from a broad spectrum of representatives and produces an option that is viable and benefits the Spokane community.

Mitigate issues of common concern.

Recommend solutions if necessary.

Participant Roles:

Stakeholder Members-will represent the area of expertise you have been asked to participate for (neighborhood, tenant or landlord) and vote accordingly:

- 1. Attend the meetings. If you are not able to attend, please work with the staff on an alternate to participate to ensure consistent participation;
- 2. reviewing in a timely manner the workgroup notebooks and other materials circulated by Office of Neighborhood Services;
- 3. engage each other in a productive dialogue during the issue discussions; and
- 4. work toward consensus recommendations where possible;
- 5. ensure considerate inclusion of diverging views;
- 6. consider the "real world" aspects of implementing workgroup recommendations.

| Rental Housing Issues Stakeholder Group | Name |
|---|---------------------------------|
| Chair, Public Safety | Julie Banks |
| Neighborhoods | |
| West Central | Arielle Anderson/Sarah Tosch |
| East Central | Ron Myers |
| Logan | Daniel Marshall/Jon Martinez |
| Chief Garry Park | Cathy Gunderson/Betty Kraft |
| Hillyard | |
| Tenants | |
| Disability | Alfredo Llamedo |
| Minority, Market Rate | Ron Toston |
| Student | |
| Low Income, MF/SF | Gretchen Chomas/Jonathan Barnes |
| Tenants Union of Washington | Terri Anderson |
| Landlords | |
| Landlord Association | Alexander Scott |
| National Association of Residential Property Managers | Eric Besset/Debbie Peak |
| Spokane Housing Ventures | Patty Webster |
| Spokane Housing Authority | Cicely Bradley/Val Mcnell |
| Smaller Scale Landlord | Heleen Dewey/Chris Bornhoft |

General Meeting Attendees- will observe meetings, allowing the stakeholder members and ONS staff to address the various topics on the agenda. Meeting attendees may provide comment when recognized by a stakeholder on issues addressed during the meeting. General meeting attendees will not be given a vote at the table.

Office of Neighborhood Services (ONS)-will provide neutral, goals-focused support. Staff will facilitate the meetings, be a technical resource to the workgroup, preparing the stakeholder's recommendations, develop and disseminate project information, enforce stakeholder agreed ground rules, prepare agendas and meeting packets, ensure effective use of time.

| Staff Resources | |
|--------------------|--|
| Name | Role |
| Suzanne Tresko | Staff Liaison to Public Safety Committee |
| Heather Trautman | Director of Neighborhood Services and Code Enforcement |
| Melissa Wittstruck | Neighborhood Housing Specialist |
| Daniel Clark | ONS Intern |

Ground Rules for Meetings

The ground rules for the stakeholder meetings are simple, and designed to help the process forward in a considerate, productive manner:

- 1. Treat each other, the organizations represented on the stakeholder members with respect and consideration at all times put any personal differences aside.
- 2. Work as team players and share all relevant information. Express fundamental interests rather than fixed positions. Be honest, and tactful. Avoid surprises. Encourage candid. frank discussions.
- 3. Ask if you do not understand.
- 4. Openly express any disagreement or concern you have with all workgroup members.
- 5. Offer mutually beneficial solutions. Actively strive to see the other's point of view.
- 6. Share information discussed in the meetings with only the organizations/constituents that you may represent, and relay to the stakeholder group the opinions of these constituents as appropriate.
- 7. Speak one at a time in meetings, as recognized by the facilitator.
- 8. Acknowledge that everyone will participate, and no one will dominate.
- 9. Agree that it is okay to disagree and disagree without being disagreeable.
- 10. Support and actively engage in the workgroup decision process.
- 11. Do your homework! Read and review materials provided; be familiar with discussion topics.
- 12. Stick to the topics on the meeting agenda; be concise and not repetitive.
- 13. Make every attempt to attend all meetings. In the event that a primary workgroup member is unable to attend, that member is responsible for notifying Office of Neighborhood Services about alternative arrangements.

Select a Voting Model

Consensus – the stakeholders work toward consensus on issues. A unified recommendation, though there may be more than one recommendation proposed.

Voting – one vote for each stakeholder (5 tenants, 5 neighborhoods, 5 landlords) Chair will be a non-voting member. With this model a majority of votes at a meeting moves the action item forward. There may be majority and minority recommendations with this model.

Appendix 3 - Programs assisting tenants, neighborhoods and landlords

| | Program Organization | Summary of assistance provided |
|----|---|--|
| 1 | C.O.P.S. Block Watch and Neighborhood Observation Patrol | Allows neighbors and volunteers to become the eyes and ears of law enforcement in their neighborhoods |
| 2 | C.O.P.S. Code Enforcement Reporting | Assists citizens with reporting code violations |
| 3 | C.O.P.S. Crime Free Multi-Housing Program | Program for landlords of multiple units to help reduce crime in and around their rentals |
| | C.O.P.S. Safe Streets | Provides support and guidance to neighbors of nuisance properties |
| | | Enforces city building codes by inspecting and approving new building construction; and offers safety inspections in existing |
| 5 | City of Spokane Building and Developer Services | buildings to tenants or homeowners for a fee. |
| | | |
| 6 | City of Spokane Code Enforcement | Enforces land use complaints; and city health and safety codes and ordinances; in buildings deemed unsafe or uninhabitable |
| | | Section of Spokane Municipal Code outlining civil and criminal remedies available for properties with consistent criminal |
| 7 | City of Spokane Nuisance Property Ordinance | activity that may result in the building being ordered vacated for a year |
| 8 | Gonzaga Center for Law and Justice, University Legal Assistance | Free legal representation, advice, and counseling to low-income persons 60 years of age and older |
| 9 | Landlord Association of the Inland Northwest Landlord Education and Legal F | Legal advice, witness program, forms and books, and landlord classes for association members |
| 10 | Northwest Justice Project CLEAR Hotline | Toll-free hotline that provides legal assistance to low-income individuals |
| 11 | Rental Housing Association of Washington Member Resources | Tenant screening, landlord education, and forms for association members |
| | - | |
| | | Provides assistance for improvements or repairs to increase energy efficiency in owner occupied homes or renter occupied |
| 12 | SNAP Weatherization Program | homes with the owner's permission. Also checks for home safety hazards including carbon monoxide, lead, & asbestos |
| 13 | SNAP/Living Green DIY Minor Home Repairs | Workshop teaching minor home repairs |
| 14 | SNAP/Living Green Healthy Homes | Workshop to reduce home allergens |
| | Solid Ground Tenant Services | Informational website and phone line that provides tenant counseling and resource referral services |
| 16 | Spokane County Bar Association Volunteer Lawyers Program | Free legal assistance to low income residents |
| | · · · · · | Conducts site inspections to ensure compliance with code and safety requirements as part of the issuance of sprinkler |
| 17 | Spokane Fire Department Permit System | operating permits for commercial and residential buildings 5 units or larger |
| 18 | Tenants Union Tenants Rights Hotline and Walk-In Clinics | Free phone and walk-in counseling services from trained non-attorney tenant counselors |
| | | |
| | | Emergency assistance for individuals under TANF, State Family Assistance, or Refugee Cash Assistance. AREN provides |
| 19 | Washington DSHS Additional Requirements for Emergent Needs (AREN) | emergency rental or relocation assistance, and covers repairs when there is a health risk and it is more expensive to move |
| 20 | Washington Landlord Association Member Services & Advice Line for Landlor | Forms and screening services for association members. Advice line for association members and tenants |
| 21 | Washington Law Help | Guide to free civil legal services for low-income persons and seniors |
| 22 | Washington State 211 | Referrals to rental assistance resource agencies |
| 23 | Washington State Bar Association Moderate Means Program | Housing-related legal representation for moderate income families |
| | | Revised Code of Washington covering legal requirements and responsibilities of landlords and tenants related to the leasing of |
| 24 | Washington State Landlord Tenant Act | residential property in the State of Washington |
| 25 | Washington Web Lawyer Legal Advice | Free online legal advice to low income residents via messaging system from volunteer attorneys |
| 26 | EPA | |
| 27 | FULCRUM | |

Major concerns

high reliance on privately provided accommodation (landlords)

 ${\bf Poverty}$ - 19.9% of people living below the poverty line, assuming that these people rent, and 44% of rental properties are to those under the poverty line.

Large number of aging properties - rental properties will become re-purposed if unprofitable or too cumbersome leading to further housing pressures

Poor data collection - by existing public agencies don't capture accurate complaints data so unknown full extent of the renter/landlord or property condition problems

Ineffective agencies - existing systems in place and in effective. It is more cost effective to strengthen existing systems rather than bring in new systems

Rent increases - Additional costs pushed to the tenant or less rental housing

No incentive programs - $\mbox{encourage}$ housing investment

 $\mbox{\bf No}$ meditation systems - Problem resolution is limited, combative, costly and takes a long time

Specific concerns

- 1. Low income
- 2. More ageing properties
- 3. Less rental properties
- 4. Lack of affordable housing
- 5. B.A.D. Neighborhoods
- 6. B.A.D. Landlords
- 7. B.A.D. Tenants
- 8. Existing compliance systems don't work
- Mandatory Inspections are ineffective, costly and won't resolve issues

1. Low income

Population - 212,067

Low household income levels (Spokane \$43,694 US \$51,939)

Unemployment 6.4%

High poverty (19.9% Persons below poverty line 42,201)

High proportion of rentals (47% Rented properties 39,616)

Low home ownership (Spokane 53%, US 63.8%)

30% of owners pay 30%+ for housing costs (2014)

52% of renters pay more than 30% of Household income for rent (2014)

44% of renter units live under poverty line

Need for economic growth, more jobs, job security, higher paying jobs

2. More Ageing Properties

60% of rentals are over 55 years old

73 % of rentals are over 25 years old

17% of properties are "below average"

No data on "not suitable for rental"

Property complaints data non existent:

2014 - 5 of 39,616 properties (Code enforcement)

- Ageing properties cost more to repair
 Rents must include some costs toward repairs

Unprofitable properties will be repurposed Eventually older houses will be decommissioned as rentals What support is available to keep the properties as rentals (tax breaks)

3. Less Rental Properties available

LESS: Private Housing available as owners sell out

- · Increase in housing prices means properties can be sold after recession
- · Rental Property Investment is high risk and low return
- · Housing stocks is ageing increased repair costs
- · Increased business risks due to more compliance
- · Rents are not keeping up with operating and replacement costs
- Improved economy means landlords are more selective
- · Landlords move to more friendly investment environments (S. Valley)

- Increasing cost of repairs of older properties Relatively low rents, few property condition complaints Very little new housing in City of Spokane
- Fewer rentals as older properties are not profitable and are retired
- Incentives to keep property stocks available Landlords will be more selective in tenant quality

4. Less Affordable Housing

LESS: Govt. owned housing - reliance on Private Housing

MORE: Demand for Affordable Housing from Impoverished 19.9%

- ase in levels of poverty All Ages 2015 76,910 or 16.32%. City of Spokane 19.9%
- Rent 1 bed West Central \$463, Hillyard \$442 (12% of GHI)
- · Rent 2 bed West Central \$599, Hillyard \$648 (18% of GHI)
- · Rent 3 bed West Central \$805, Hillyard \$799 (22% of GHI)
- Rent 4 bed West Central \$907, Hillyard \$898 (24% of GHI)

MORE: Demand for Agencies such as Spokane Housing Ventures, Charities

Fight poverty / Increase jobs / Assist home buyers / Increase govt. assistance/ Encourage private housing by supporting Landlords and reducing obstacles

5. B.A.D. Neighborhoods

Criminal activities / Illegal habitation (squatters) / Illegal activities (drugs,

Antisocial Behavior:

Unsafe neighborhoods / Gangs / Unsafe / Threats

Rubbish (streets, verges, houses) / Vacant properties (foreclosures, inability to repair) / Damaged buildings (boarded up properties). High home ownership and secure tenants strengthens community

- Conclusions:

 Lack of pride and social cohesion, Unsocial behavior, more property damage, more lawlessness, health and safety, property prices decrease,
- owners wont invest in housing

 Empower Code Enforcement and Police to deal with these issues

6. B.A.D. Landlords

Breaching Rules: Acting against legislation (Landlord Tenant Act), Condoning criminal or illegal activities

<u>Antisocial Behavior:</u> Condoning unsafe behavior in property, not reporting unsafe matters

<u>Damage to Property</u> Unclean or unhygienic property (waste, debris); Condemned properties; Sub-standard housing

No Empirical Data about the number type and nature of complaints. Take action on the few bad landlords already known to the City Legislation and Code Enforcement systems available but ineffective • Many services and avenues (unknown?) • Issues are not reported but the systems are in place

- Conclusions:

 Focus on a few bad landlords will require broad expensive solutions that don't fix the underlying issues

 City to provide support and work with Landlord Association
 Landlords training
 Make mediation available.

7. B.A.D. Tenants

Breaching Rules: Acting against legislation (Landlord Tenant Act), Condoning criminal or illegal activities.

<u>Antisocial Behavior:</u> Condoning unsafe behavior in property, not reporting unsafe matters

<u>Damage to Property</u> Unclean or unhygienic property (waste, debris); Condemned properties; Substandard housing: Damaging property with inability to repair

No Empirical Data about the number type and nature of complaints. / Difficulty to force tenants to comply (privacy, legislation) / Expensive to enforce compliance or evictions / Long time to resolve and terminate tenants / Limited ability to recover damages from tenants / Few support avenues available to Landiords / Cant manage tenants behavior – health, hygiene / Tenants cant pay for damage / Tenants cant afford to move – themselves or possessions

Conclusions:

Landlords cannot absorb costs. Reduced quality of buildings or reduced amount of buildings for rent. Costs will be passed back to tenants tenant training. Make mediation available.

8. Existing Systems Ineffective

Landlord Tenant Act - provides remedies and support (litigation based)

Code Enforcement - limited data, jurisdiction, resources

Building department - limited data, jurisdiction, resources

Police - unable to resolve behavior issues

Fire Department - process allows for inspections but many recurring issues

Health Department - reporting and information systems exist

Courts – expensive, takes a long time, credit history, angry people, damage to property and people, public humiliation

Mediation limited and expensive

Very few options but to go to court

- Conclusions:

 Refocus and empower code existing enforcement systems to deal with major issues

 "Pareto principle" 80% of problems are resolved with 20% effort

 Implement training and mediation for Landdords and fernants.

 Reduce costs and time to resolve unlawful detainer actions

9. Mandatory Inspections are ineffective, costly and won't resolve issues

No Empirical Data about the number type and nature of complaints

No register of issues, bad landlords and bad tenants

Mandatory inspections cannot resolve behavioural problems, poverty

Who will undertake inspections? What will be inspected? When will the inspections be done?

What are the Costs? For the City of Spokane / For the Tenant / For the Landlord

Costs will eventually be passed on to tenants

More stringent screening of tenants, industry register of problem tenants / eviction registers

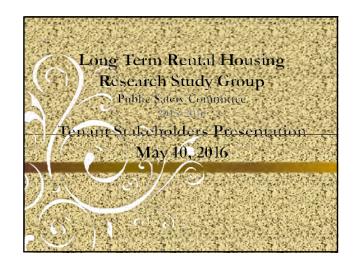

Landlords will reduce number of rental properties or affordable rentals

Conclusions: • Refocus as

- oricisions. Refocus and empower existing systems. Implement training and mediation. Costs will be passed onto Tenants Tenants will have less privacy in the home

Conclusions for Spokane

- 1. Lack of accurate data on tenant / landlord / building issues
- 2. Low income, high poverty and high unemployment
- 3. High reliance on private rentals, low home ownership
- 4. Rental investment over \$3billion, 10% of City taxes and utilities revenue
- 5. Rental income is 12% of Spokane's GDP
- 6. Increasing costs will be passed to tenants
- 7. Look for ways to encourage and landlords to continue investing
- 8. Look for ways to avoid costly evictions
- 9. Implement low cost and accessible mediation
- 10. Rental properties are ageing and will reduce as repairs compliance
- 11. Build good neighborhoods which provide social cohesion
- 12. Lack of accurate data on tenant / landlord / building issues
- 13. Existing agencies are ineffective to resolve problems

Issue 1

Spokane tenants and are rent burdened. (cont.)

- Costly for tenants to move-approximately \$2000-\$3000 for rental applications, background check, deposits, first and last month rent, missed work, and moving costs.
- Vacancy rate is very low: 2% in subsidized housing and 3.7% in market rate housing (Spokane Low Housing Consortium).

Issue 3

Eviction and reasonable fear of eviction by tenants.

- Washington Residential Landlord-Tenant Act provides for a no cause termination and eviction with a 20 day notice. Tenants are aware that they can be forced to move for no reason whatsoever.
- Fear of eviction prevents tenants from requesting repairs to improve housing conditions. (Oregon Community Alliance of Tenants, 2013)

Issue 1:

Spokane tenants and are rent burdened. Low income tenants have few housing options.

- 43% of Spokane residents rent their homes. (Project materials: Rental Housing Data, May 26, 2015)
- 55.4% of tenants in Spokane pay more than 30% of monthly income for rent and 47.1% pay more than 35% (U.S. Census Bureau: 2010-2012 American Communities Survey)
- Rent eats first. Tenants must pay rent first which leaves little left to make repairs when the landlord fails to respond to requests.

Issue

Not enough subsidized low income housing in Spokane

- Only 12 out of 100 very low and extremely low income tenants are able to obtain subsidized housing in Spokane. (SLIHC)
- Subsidized rental units require annual condition inspections.
- Market rate rental housing has no condition inspection requirement.

Issue 3

Eviction (cont.)

- Tenants who cannot move within 20 days can be evicted even if they are current in rent and never violated a rental agreement.
- Tenants with families feat a CPS referral and removal of their children if they are evicted.

 Evictions cause poverty by creating barriers to future housing, creating job instability, establishing
 - an eviction action on a tenant's record, and making tenants ineligible for subsidized housing.

Issue 4

Lack of data collection on rental housing and tenant assistance in Spokane.

- No city department collects data on rental properties or landlord/tenant actions.
- The city of Spokane does not have a department of tenant services to answer questions or assist tenants.
- There is no way of knowing if a tenant moves, is evicted or remains after the problem is solved once they receive a notice to terminate.

Substandard housing is a health hazard for the tenants and neighbors. (Spokane Regional Health District presentation).

- Substandard housing causes illnesses and injuries to itenants and familles.
- Children living in unhealthy homes suffer from illness, injury and depression that negatively impact education.
- Substandard property can attract rodents and pests and associated risks.
- Tenants living in substandard housing risk exposure to lead and other environmental hazards.

Issue 6

Substandard rental housing is costly for all Spokane residents including tenants.

- Spokane Police Department responds to a higher number of incidents in substandard rental property
- Fire Department reports fire hazards on substandard rental property.
- Building Department does not currently have a budget to inspect rental property, purchasers of building permits pay for those inspections.
- Homelessness is costly to all Spokane residents and financially devastating for tenants.

Issue

Healthy and stable housing is good for tenants, landlords and neighborhoods

- Tenants contribute to diversity and vibrancy of neighborhoods.
- Tenants spend money in their neighborhoods and contribute to local economy.
- Tenants who have stable housing in a healthy home.
 environment have a greater chance of success in employment and education.
- Tenants who feel safe and stable are more likely to stay in their neighborhoods and become involved with their community.

Resource 1

Resources to assist tenants in Spokane are scarce, limited or nonexistent.

- Legal resources at no cost for tenants is limited to the Center for Justice and the Northwest Justice Project.
- The statewide CLEAR legal line is difficult to access and tenants often do not receive legal representation.
- Volunteer lawyers, available at unlawful detainer court do not represent tenants and only negotiate move out dates. (landlord attorney presentation)
- Financial rental assistance is available to homeless individuals and families but not available to pay the rent to prevent eviction. (Spokane Homeless Coalition)

Resource 1

Resources to assist tenants in Spokane are scarce, limited or nonexistent.

- Tenant education classes and workshops are not widely available, many tenants are not aware they exist.
- Tenants rights information is available to tenants but difficult to find and access. Two statewide tenant rights hotlines are located outside of Spokane.
- Mediation services are available but only for a fee.

Appendix 6 – Presentation Tenant Stakeholder Group

Resource 2

Landlord Tenant Act regulates rental property in Spokane

- If damage is caused by tenant, the landlord can serve a 10 day notice.
- All other repairs are the responsibility of the landlord but tenant must initiate and enforce remedies.
- The only remedy a tenant has is to follow the Act and
- pay for repairs and deduct from rent.

Resource 2, cont. Landlord Tenant Act, cont.

- Most repairs that tenants request are not housing condition issues. When landlords refuse to make those repairs, tenants have no city agency to call.
- Provisions to terminate the rental agreement with a 20 day notice require no reason. The only defense to a 20 day notice is retailed to a 16 ministron, the tenant
- day notice is retaliation or discrimination; the tenant must prove these defenses which is difficult to impossible to do.

Resource 3

City of Spokane Code Enforcement, Building Department, SPD, Fire Department, Spokane Regional Health District

- Tenants risk eviction if they report conditions that result in the building being condemned so tenants are incentivized to stay quiet.
- There is no registry of rental property to fostercommunication between city agencies and landlords
- All of these agencies recommended a rental inspection program to fully address rental housing issues.

Gaps in Resources to Address Issues:

- No laws protecting tenants from no cause rental termination and eviction
- Inadequate legal representation for tenants in unlawful detainer actions
- Inconsistent and insufficient tenant assistance programs
- Not enough subsidized affordable housing for low income tenants
- No registration or inspection of market rate rental property

Gaps in Resources to Address Issues, cont.

- No reporting agency to review notices to tenants and establish records and statistics
- Tenant education classes and workshops do not reach enough tenants. Tenants are not prepared when they are served with a notice of need repairs.

Recommendations:

- Spokane adopt a Housing Security Ordinance that will eliminate no cause evictions.
- Spokane establish a rental registry and inspection program
- Spokane adopt provisions in the Landlord Tenant Act to provide relocation assistance to tenants and hold landlords accountable;
- Spokane establish an Office of Tenant Services to enforce notice requirements, assist tenants and collect data, and offer tenant education classes;

Recommendations, cont.:

- Spokane offer no cost mediation to landlords and tenants in disputes that would otherwise result in legal action.
- Financial assistance for small scale landlords who
 require repair due to malicious destruction to
 property that would otherwise remove the property
 from the rental market.
- Increase subsidized low income rental housing -Spokane.

APARTMENT

"Current occupancy in the Spokane region is at historical highs, averaging over 98% in some areas."

Mitch D.Swenson CCIM

Kim Sample

Jason J. Jackson ARM

Apartment Market Remains Robust.

Spokane is experiencing a boom time for apartment owners. With over 2,200 new units coming on the market in the last three years, including 707 new units in 2013, it would be expected that the strong occupancy rates seen for the last two years would have begun to trend down with supply finally catching up and surpassing demand. However, this has not been the case. In a limited survey, current occupancy in the Spokane region was found to be at historical highs, averaging over 98% in some areas.

All of this new construction has also led to an increase in overall rental rates, although there is a divide between new apartment rents and older apartment rents; sometimes as much as \$0.25 per square foot. The increase in new construction rents has allowed many owners of existing properties to raise rents. A rising tide lifts all ships.

Despite low interest rates that usually drive single-family home demand, a large segment of the population now have a preference for the flexibility and upgraded amenities that come with renting versus owning. We expect this apartment demand to continue, but with another 874 units currently permitted or under construction and another 1,087 units planned, it seems inevitable that we will see supply catch up with demand sometime next year. Rental rates should still remain strong throughout 2015.

Spokane County

Within the last 12 months we have seen continued upward trending in rents, despite historically high levels of new construction. Concessions were practically non-existent. Property owners and developers are still viewing this as a green light to build more apartments, and lenders are still on board.

Average rents for all unit types for March 2014 in the Spokane area were \$739. By summer 2014, average rents had risen to \$842. This hike is largely due to new construction coming online at considerably higher rental rates. The increase in rents was nearly \$0.10 per square foot.

The average overall vacancy rate in March 2014 was 3.5%, which dropped to 2% by summer (well below the 5% vacancy rate viewed by many as a point of equilibrium). Looking at unit type, the lowest vacancies seen were studio units at 0.0% and three-bedroom/two-bath units with vacancies at 1.4%.

Apartment sales in Spokane County totaled \$66,000,000 in 2014. A few larger sales helped increase the sales volume for the year. Those larger sales included the sale of the 210-unit Eagle Rock Apartments, the 132-unit Rock Creek Apartments in Cheney, and the 196-unit Canyon Bluff

Health Effects of End of Tenancy Notice *September 11, 2013*

Background:

The Oregon Landlord Tenant Act (State Chapter 90) states that in a month-to-month rental, the landlord and tenant are not required to give a reason or cause for ending a tenancy and that either party may terminate the tenancy with at least 30 days written notice if the renter has lived in the rental unit for less than a year. The right for a landlord to end an eviction in this manner is legally known as a no cause eviction. In a no cause eviction, a tenant has two possible defenses, which are retaliation or discrimination. No cause evictions create a simple avenue for landlords to practice illegal retaliation and discrimination because either of these defenses is a difficult task. In contrast, in the case of a for-cause eviction, the landlord must give a valid reason for the eviction and a tenant has the right to many defenses to prevent eviction. Because of the lack of protections in no cause eviction controls, tenants on month-tomonth tenancies are constantly at risk for arbitrary eviction. Many tenants put off asking their landlords for necessary repairs because they fear eviction and therefore remain in unsafe and unhealthy housing in order to maintain some stability for their families. Just cause eviction controls (JCEC) are laws that protect renters by ensuring that landlords can only evict with proper cause, such as a tenant's failure to pay rent or destruction of property. As a result, JCEC promote healthy and stable housing.

Review of Existing Research:

The Health Department conducted a review of current research examining the health effects of no cause eviction and retaliation on renters in Multnomah County. Based on this review, the Health Department identified the following concerns about no-cause eviction and its impacts on healthy housing:

- The number of tenants who receive no cause evictions are underrepresented in the court's record-keeping process.
- Discrimination and retaliation are the only defenses available for a no cause eviction and are difficult to prove.
- Tenants on month-to-month leases who have lived in their property for less than a year are afraid to ask for repairs because they fear eviction.
- When tenants are afraid to ask for repairs, they often remain in unhealthy housing.
- Numerous studies show that low-income communities, women, and minorities make up a large number of individuals evicted.
- Children are vulnerable to the health effects affected by no-cause eviction.
- The abuse of no case evictions places monetary burdens on low-income people and on society.
- By providing families with greater residential stability, just-cause eviction can reduce stress and adverse health conditions.

_

¹ See ORS 90.427.

The number of tenants who receive no cause evictions are underrepresented in the court's record-keeping process.

A forcible entry detainer (FED) is a court action by a landlord against a tenant to remove the tenant from the rented dwelling. FED records do not accurately depict the severity of the nocause issue. Out of 2,166 evictions over a four-month period, 4.7% filed in Multnomah County courts were no cause evictions. However, data collected from a recent survey by the local tenant advocacy organization, Community Alliance of Tenants, demonstrates that 89% of callers who received a no cause eviction reported that they did not receive a FED notice, and 86% of those callers did not believe their no cause eviction was justified. Additionally, 50% of people that called 211, local phone service connecting people with community resources and social services, in February 2013 indicated that they had a housing issue, and 11% of those callers reported experiencing no cause eviction.

FED data reports no demographic information and therefore fails to tell the story of who is being evicted and why these evictions are happening. "In the actual legal process, tenants move out and give up the battle at many different stages," so there is no way to accurately depict the gravity of the hidden problem of no cause evictions.

Discrimination and retaliation are the only defenses available for a no cause eviction and are difficult to prove.

Testimonials from tenants reveal that after asking for repairs, it is not uncommon to be issued a no cause eviction notice by a landlord that would rather illegally get rid the tenant than fix the issue as requested. Once the no cause notice is issued, the tenant could raise a defense of retaliation as the underlying reason behind the eviction, but this has not been an effective tool for many Multnomah County residents in the past. However, in the 2013 Elk Creek caseⁱⁱ, the Oregon Supreme Court recently held that to prove retaliation under ORS 90.385, a tenant must establish that the landlord served the notice of termination because of the tenant's complaint. Overall, if the tenants' complaints were one of the factors that the owner considered in making her decision to evict, and the owner would not have made that decision "but for" the tenants' complaints, then the owner was prohibited from making that decision. Because this is a very new decision, there is no proof that this new ruling will operate in a way that eliminates the fear associated with retaliation and no cause eviction.

Tenants on month-to-month leases are afraid to ask for repairs because they fear eviction.

211 callers during the month of February 2013 were asked the question, "[h]ave you ever delayed requesting assistance with a problem at your home because you feared being evicted?" 414 out of 4,233 (11%) of individuals who answered this question answered "yes." Additionally, individuals who were previously evicted were five times more likely to delay requests for repairs for fear of eviction. 62% of Community Alliance of Tenants (CAT) survey believed they were given no cause evictions because of retaliation. Substandard housing is the number one reason tenants call CAT's Renter Rights Hotline.

When tenants are afraid to ask for repairs, they remain in unhealthy housing.

The most recent review of the Community Asthma Inspection Referral (CAIR) database, which is used to manage family information related to housing and health, reveals that only 20% of approximately 350 families indicated that they were "very comfortable" approaching their landlord for repairs. According to this data, families who reported they were not comfortable

approaching their landlord are 30% more likely to have mold in their apartment, are twice as likely to have cockroach infestations, 60% more likely to report their housing is making them and their family sick, and twice as likely to report poor or bad health. Families who ask for repairs are often confronted with a no cause eviction. For example, a low-income family of five shared their story with the CAT Renter Rights Hotline about how they were to live in an ant and mice infested house with a shower was broken for two months and the stove burners that did not work properly for over a week. They requested that the landlord make the needed repairs, which were never completed. After sending a letter requesting a reduction in rent, the landlord responded by immediately posting a 30 day no cause move-out notice on their front door.

Numerous studies show that low-income communities, women, and minorities make up a large number of individuals evicted.

Of tenants reporting no cause eviction on a recent CAT survey, 68% were women. In a recent study in Milwaukie, Wisconsin, poor black women are disproportionately at risk for eviction; making up 30% of those evicted, but only 9.6% of the population. Frior to just-cause eviction controls being passed in Oakland, [F]our out of five '30 day-no Cause' evictions (78%) [were] minority households.

Even though American Indian or Alaskan Native callers only made up 4.1% of 211 callers in February, they made up 18% of callers reporting eviction. According to the Coalition of Communities of Color Unsettling Profile, Native Americans and African Americans face extremely high disparities in homelessness, compared to other ethnic groups in Multnomah County.

Children are vulnerable to the health effects caused by no cause eviction.

Neighborhoods with a high percentage of children face increased evictions. Children who are uprooted from their homes because of eviction face mental health problems, developmental delays, and increased levels of stress and depression, which often leads to violence. ED court data does not include demographic information, but studies have shown that when demographic data is collected independent of court records, children are highly represented in the eviction process. In a Milwaukie, WI study, sixty-two percent of tenants who appeared in court lived with children. Over a third of them were women who lived with children and no other adults.

The abuse of no case evictions places monetary burdens on low-income people and on society.

Besides the tremendous costs tenants face when forced to move, there are also various costs imposed on society as a result of no cause evictions. These costs include court and marshal/sheriff services, storage of tenants' property, help for the newly homeless, and even emergency foster care and hospitalization in some cases.^{ix}

By providing families with greater residential stability, JCEC can reduce stress and adverse health conditions.

No cause eviction results in a significant disruption of educational, religious, social and employment connections that tenants have created in their communities. In many cases, no cause eviction may lead to homelessness. Strong social relationships protect health in multiple ways. Neighbors, friends, and family offer support that "buffer[s] stressful situations, prevents damaging feelings of isolation, and contributes to a sense of self-esteem and value. Also, seniors and disabled individuals, or others with severe health problems are at risk of fatal

health complications if forced to suddenly move from stable living arrangements. In the 211 study, disabled and special needs households made up 14% of callers who reported eviction.

Recommendations:

Based on the Health Department's review of current research examining the health impacts of no cause eviction, it is reasonable for the Multnomah County Board of Health to consider the following policy actions:

- Change the language in the OR Landlord Tenant Act (ORLTA) so that no cause evictions are replaced with language about just cause eviction controls
- Encourage cities within Multnomah County to require landlord licensing
- Pass a city ordinance requiring mandatory reporting of evictions
- Attach a requirement to the business license that requires landlords to report evictions
- Pass an ordinance as the Board of Health requiring landlord licensing and mandatory reporting
- Increase education geared towards landlords and tenants
- Monitor the current Oregon Supreme Court ruling to identify if retaliation can be successfully tried in the court
- Fund Community Alliance of Tenants Renter's Rights Hotline

Intro to Spokane Neighborhood Long Term Rental Stakeholder group

Increasing the availability of healthy, safe and sustainable long-term rental housing improves the livability and economic viability of the overall community.

Characteristics of a Great Neighborhood include:

Has a variety of functional attributes that contribute to a resident's day-to-day living (i.e. residential, commercial, or mixed-uses)

Accommodates multi-modal transportation (i.e. pedestrians, bicyclists, drivers)

Has design and architectural features that are visually interesting

Encourages human contact and social activities

Promotes community involvement and maintains a secure environment

Promotes sustainability and responds to climatic demands
Has a memorable character (American Planning Association)

Neighborhoods Represented

East Central - Ron Myers

West Central - Sarah Tosch

Emerson-Garfield - Jonathan Martinez

Chief Garry Park - Cathy Gunderson

Hillyard - Tracy Swank

Rockwood - Julie Banks

Top issues regarding rental housing in Spokane neighborhoods

- 1. Negative impacts of poorly maintained rental properties
- 2. Absentee landlords
- 3. Transiency within neighborhoods
- 4. Lack of legal protection/recourse for neighbors
- 1. Negative impacts of the poorly maintained rental properties
 - 1. Health
 - 2. Safety
 - 3. Property value
 - 4. Quality of life

Health (CDC)

Mold:

Triggers allergic responses

Triggers immune responses (asthma, congestion, eye irritation, coughing, runny nose, infections, etc.)

Cockroach infestations:

Triggers asthma and other respiratory conditions

Rats and mice:

Bites transfer parasites and disease Feces transfer hantavirus

Mosquitoes: spread a variety of diseases

Lead: Respiratory diseases, brain damage and developmental disabilities - children are HIGHLY susceptible

Safety

Injuries due to structural damage

Plumbing

Electrical burns, shocks, fires

Lack of egress for emergency escapes and access

Mounting piles of yard debris

Property value

Neighborhoods that are littered (with solid waste) will soon start to experience other problems, such as graffiti, unkempt rights-of-way and a general decline of the physical appearance in the area. Property values in littered neighborhoods can be lowered by as much as 15 percent. Source: Gwinnett Clean & Beautiful

Neighbors with "annoying pets, unkempt yards, unpleasant odors, loud music, dangerous trees and limbs, or poorly maintained exteriors, can lower home values by more than 5 to 10 percent" according to the **Appraisal Institute**.

61% of code complaints for solid waste over the last two years were from renter occupied houses. Source: Spokane Office of Neighborhood Services

68% of zoning violation complaints (outdoor storage, yard sales, recreational camping, home business regulations, signs, residential fencing, setback area, accessory structures) over the last two years were from renter occupied houses. Source: Spokane Office of Neighborhood Services

Quality of life

Unsafe for children to play outside

Inability to enjoy one's yard

Lack of sense of security in one's home

Loss of sense of community:

Social ties among neighborhood residents, often referred to as "bonding social capital," contributes to the likelihood that individuals will move beyond their diverse self-interests toward mutually beneficial collective actions.

When a group of neighbors informally keep an eye on one another's homes, that's social capital in action.

Harvard Kennedy School

2. Absentee landlords

Inability to contact responsible parties

No oversight

Delayed response to property issues

Neighborhood erosion due to lack of accountability

Owner = manager?

Of the 820 sites identified as apartments in the Spokane Fire Department's permit system, about 42% of the owners do not live in the city. Source: Fire Marshal Mike Miller, Spokane Fire Department

3. Transiency within neighborhoods

Lots of moving

Hard to get to know neighbors

Loss of mutual trust between neighbors

Lack of stability for children

Loss of sense of neighborhood security and identity

Frequent and unwanted moves lead children to experience disruptions in home life or educational instruction. (Astone and McLanahan. 1994. Family Structure, Residential Mobility, and School Dropout: A Research Note.)

The authors also speculated that residential mobility leads to a loss of social capital in children.

Frequent (sic) residential mobility negatively affects education outcomes for low-income children and creates unstable school environments that adversely influence not only highly mobile children but their teachers and stable classmates as well. (Crowley, 2003. The Affordable Housing Crisis: Residential Mobility of Poor Families and School Mobility of Poor Children.)

4. Lack of legal protection/recourses for neighbors
Only recourse available is filing a complaint with Code Enforcement

Only addresses external issues

Difficulty in identifying accountable party

Fear of retaliation from filing complaint

Conclusion:

The #1 gap in mitigating the top issues regarding rental housing for neighborhoods is ACCOUNTABILITY.

It is unclear who to hold responsible for poorly maintained rental properties.

Without a local contact for absentee landlords there is no ability to resolve issues with rental properties.

Frequent movers in and out of neighborhoods diminishes social capital for all generations.

Neighbors have no resources, beyond Code Enforcement, to remedy negative impacts.

Neighbors need a process for mediation with tenants and/or landlords to mitigate negative impacts.

Ground Rules for Meetings

The ground rules for the workgroup meetings are simple, and designed to help the process forward in a considerate, productive manner:

- I. Treat each other the organizations represented on the stakeholder members, and the workgroup itself with respect and consideration at all times put any personal differences aside.
- 2. Work as team players and share all relevant information. Express fundamental interests rather than fixed positions. Be honest, and tactful. Avoid surprises. Encourage candid, frank discussions.
- 3. Ask if you do not understand.
- 4. Openly express any disagreement or concern you have with all workgroup members.
- 5. Offer mutually beneficial solutions. Actively strive to see the other's point of view.
- 6. Share information discussed in the meetings with only the organizations/constituents that you may represent, and relay to the stakeholder group the opinions of these constituents as appropriate.

 \triangleright

Ground Rules for Meetings (cont'd)

- > 7. Speak one at a time in meetings, as recognized by the facilitator.
- 8.Acknowledge that everyone will participate, and no one will dominate.
- 9. Agree that it is okay to disagree and disagree without being disagreeable.
- 10. Support and actively engage in the workgroup decision process.
- 11. Do your homework! Read and review materials provided; be familiar with discussion topics.
- ▶ 12. Stick to the topics on the meeting agenda; be concise and not repetitive.
- 13. Make every attempt to attend all meetings. In the event that a primary workgroup member is unable to attend, that member is responsible for notifying Office of Neighborhood Services about alternative arrangements.

Survey Resources and Rental Housing Research

Rental Housing Research Stakeholder Group

Survey Resources

▶ Informal Survey Tools:

- ▶ Google Forms
 - → Free
- Unlimited questions and responses
- Numerous question types (i.e., Multiple Choice, Likert Scale, Yes/No, Open-Ended)
- View response summaries and individual responses in real time
- Survey Monkey
 - ▶ Similar features as Google Forms
 - Limited to 10 free questions and 100 free responses
 - ▶ Paid features include text analysis of open-ended responses, statistical significance, randomization, and unlimited questions/responses
 - Audience feature that provides access to audience survey respondents

÷

Survey Resources

- ▶ City of Spokane subscription to survey tool
 - ▶ Usefulness would depend on type of survey and questions
 - ▶ Results not statistically significant
 - ▶ Free

▶ Local Professional Research Firms

- Statistically significant research including: online/phone polling, and focus groups
- Cost prohibitive: \$5-10k

...

Survey Resources

- Discussion regarding survey

Rental Housing Research Summary

- While there is a lack of specific research on the structural condition of homes in Spokane, there is data available documenting the condition of housing on a national level
- ▶ Research Examples:
- American Housing Survey (U.S. Census Bureau)
- Portland Quality Rental Housing Workgroup: Final Recommendations (2008)
- American Healthy Homes Survey: Lead and Arsenic Findings,
 Department of Housing and Urban Development (April 2011)
- Eviction and the Reproduction of Urban Poverty, American Journal of Sociology (Matthew Desmond, Harvard University)

....

American Housing Survey

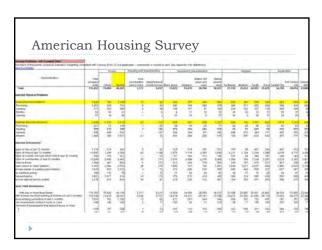

- ▶ Conducted every other year by the U.S. Census Bureau
- Collects national and metropolitan area data on a rotating basis (25 metropolitan areas each year)
- Comprehensive housing unit data includes, type, size, age, neighborhood amenities, physical problems, and deficiencies.
- Data for responses available by type:
- National
- City
- ▶ Tenure (renter or owner occupied)
- Demographic (race, income, age)
- Location within city v. metro area v. outside metro area

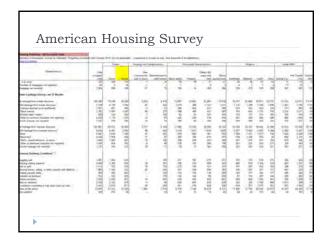

•

American Housing Survey

- How the American Housing Survey may be useful:
 - Provides data on general and specific structural characteristics and deficiencies
 - Responses separated by owner v. renter occupied allows for comparison of data
 - Examples:
 - ▶ Exposed wiring
 - ▶ Signs of rodents
 - Water leakage
 - ▶ Broken/boarded up windows

...

Portland Quality Rental Housing Workgroup

- ▶ Portland City Council issued a Resolution to:
 - "explore the issue and extent of substandard rental housing conditions in Portland and the role of public policies and programs in addressing incidents of substandard housing"
- Resolution directed the creation of a workgroup representing low-income tenants, property managers and property owners, local housing enforcement agencies and public health officials.
- In its research of issues related to substandard housing, the workgroup conducted a landlord study and focus group

Portland Quality Rental Housing Workgroup

- Owner and Manager Survey
 - Online survey of 233 property owners and managers in Portland
 - Survey addressed issues including:
 - Notifying tenants about lead paint
 - ▶ Pest contro
 - Landlord knowledge and training
 - ► Tenant education
 - ► Eviction experience
 - City inspection at request of tenant

•

Portland Quality Rental Housing Workgroup

- ▶ Landlord Focus Group Discussions
- Discussions with 15 small landlords and onsite property managers
- Expanded the discussion of issues covered in the Landlord and Property Management Survey
- Focus group report includes a summary of discussion for each issue and sampling of individual responses

•

American Health Homes Survey

- American Healthy Homes Survey: Lead and Arsenic Findings, Department of Housing and Urban Development (April 2011)
 - Conducted from June 2005 through March 2006
 - Measured levels of lead, lead hazards, allergens, arsenic, pesticides, and mold in homes nationwide
 - Contains estimates of contaminants for subpopulations of housing including, region, age of housing, demographics, income, owner vs. renter occupied, etc.

Þ

Eviction Study

- Eviction and the Reproduction of Urban Poverty, American Journal of Sociology (Matthew Desmond, Harvard University)
 - Used statistical and ethnographic analysis to explore the prevalence and ramifications of eviction in the lives of the urban poor
 - Gathered statistics from eviction records in Milwaukee between January 2003 and December 2007
 - Desmond gathered ethnographic data by living in mobile home park and inner city boarding house. He observed the relationships between landlords and families being evicted
 - Provides insight into the relationship between landlords and tenants, reasons and factors for evictions, and touches on issues related to substandard housing

•

Additional Research Discussion

- > What additional research or data would the stakeholder group find useful?
 - Please see Annotated Bibliography for additional research, studies, and reports.

Connecting Issues with Potential Solutions

- Work Plan
 - Task I: Research/Study Issues

 - Convene Stakeholder Group
 Develop a broad stakeholder group to garner sufficient participation to ensure the recommendation is viable.

 - Coordinate with guest speakers to learn and identify issues
 Coordinate with service providers to develop an understanding of the resources currently provided in Spokane
 - Generate a list of identified issues currently associated with rental housing units
 - ▶ Task 2: Identify programs/policies/ordinances that may solve identified

 - Task 3: Explore gaps between the issues and existing solutions

 - Identify gaps with issues that have no identified solution
 Develop recommendations based on gaps in issues and solutions

Connecting Issues with Potential Solutions: Example Matrix

Annotated Bibliography

Advancing Healthy Housing: A Strategy for Action. Rep. Federal Healthy Homes Work Group, 2013. Web. 6 Apr. 2016.

http://portal.hud.gov/hudportal/documents/huddoc?id=stratplan_final_11_13.pdf.

This report outlines the goals and priorities related to the promotion of healthy housing identified by the Healthy Homes Work Group, a federal interagency group which includes the Department of Housing and Urban Development, Centers for Disease Control, National Institute of Environmental Health Sciences, Department of Agriculture, Environmental Protection Agency, Department of Energy, Department of Labor, and the National Institute of Standards and Technology.

There are useful statistics regarding the health of housing in the U.S. as well as an outline of goals, strategies, existing programs, and resources provided by federal agencies.

"American Community Survey (ACS)." *American Community Survey (ACS)*. U.S. Census Bureau, n.d. Web. 06 Apr. 2016. https://www.census.gov/programs-surveys/acs/>.

"American FactFinder." *American FactFinder*. U.S. Census Bureau, n.d. Web. 06 Apr. 2016. http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml>.

The American FactFinder is a tool provided by the U.S. Census Bureau. It provides census data as well as data from other surveys conducted by the Census Bureau. There is some general housing data available that is specific to Spokane.

American Healthy Homes Survey: Lead and Arsenic Findings. Rep. U.S. Department of Housing and Urban Development, Apr. 2011. Web. 12 Apr. 2016. http://portal.hud.gov/hudportal/documents/huddoc?id=AHHS_Report.pdf.

"The American Healthy Homes Survey (AHHS), conducted from June 2005 through March 2006, measured levels of lead, lead hazards, allergens, arsenic, pesticides and mold in homes nationwide. This report includes estimates of the prevalence and levels of lead in paint, dust and soil, and arsenic in dust and soil, both for all housing and for important subpopulations of housing defined by region, age, urbanization, presence of children under age 6, housing type, owned vs. rented, Government support, income, race and ethnicity. The report provides a comparison with the findings on the prevalence of lead-based paint and lead-based paint hazards from the National Survey of Lead and Allergens in Housing (NSLAH), conducted in 1998-1999."

"American Housing Survey (AHS)." *American Housing Survey (AHS)*. U.S. Census Bureau, 2013. Web. 06 Apr. 2016. https://www.census.gov/programs-surveys/ahs.html>.

"The American Housing Survey (AHS), the most comprehensive housing survey in the U.S., provides up-to-date information on the size and composition of the housing stock in our country. As the population increases, so does the demand for housing. This survey

delivers much needed information about the types of homes in which people are now living and the characteristics of these homes, as well as the costs of running and maintaining them.

National data are collected every other year and metropolitan area data are collected on a rotating basis. The AHS is sponsored by the Department of Housing and Urban Development (HUD) and conducted by the U.S. Census Bureau."

The AHS provides data on numerous housing subjects. Of particular help to the stakeholder group may be the data it collects on specific structural conditions and defects. While Spokane was not one of the metropolitan areas in the survey, national and regional data is available as well as data for Seattle. The data is also broken up to allow comparison between the characteristics of renter and owner occupied homes.

America's Rental Housing. Rep. Joint Center for Housing Studies of Harvard University, 2015. Web. 6 Apr. 2016.

http://www.jchs.harvard.edu/sites/jchs.harvard.edu/files/americas_rental_housing_2015 _web.pdf>.

Report issued by the Joint Center for Housing Studies of Harvard University on the current status of the rental market. While this report does not address the physical condition of rental housing, it addresses trends and the issue of affordability in the current rental housing market.

The Community Listening Project. Rep. DC Consortium of Legal Services Providers, Apr. 2016. Web. 5 May 2016. http://www.lawhelp.org/files/7C92C43F-9283-A7E0-5931-E57134E903FB/attachments/A4B5C44F-8B88-4B76-97A9-FF648F7C7EB9/clp-final-april-2016.pdf

Research study combining qualitative and quantitative data to identify barriers that prevent low-income residents of Washington DC from getting out of poverty. The report identifies housing as the biggest problem facing low-income residents. Appendix K includes data on a range of housing issues including data surveying the housing conditions of survey respondents.

Desmond, Matthew. "Eviction and the Reproduction of Urban Poverty." *American Journal of Sociology* 118.1 (2012): 88-133. Web.

"Combining statistical and ethnographic analyses, this article explores the prevalence and ramifications of eviction in the lives of the urban poor. A quantitative analysis of administrative and survey data finds that eviction is commonplace in inner-city black neighborhoods and that women from those neighborhoods are evicted at significantly higher rates than men. A qualitative analysis of ethnographic data based on fieldwork among evicted tenants and their landlords reveals multiple mechanisms propelling this discrepancy. In poor black neighborhoods, eviction is to women what incarceration is to

men: a typical but severely consequential occurrence contributing to the reproduction of urban poverty."

Desmond's article provides a quantitative and qualitative picture of the challenges facing low income renters and landlords of low rent market rate properties. He has recently released a book titled *Evicted*, which provides a deeper account of his research on eviction.

Final Recommendations. Rep. Quality Rental Housing Workgroup, 22 Sept. 2008. Web. 6 Apr. 2016. http://oregonon.org/files/2009/03/qrhw_report_final2.pdf>.

At the request of the Portland (OR) City Council, a workgroup was created to study habitability issues related to rental housing. Based on their research, the workgroup submitted a report of recommendations. These recommendations address many of the issues raised by this stakeholder group. In addition, the Appendix provides information regarding identifying issues, as well as survey and focus group questions.

Jacobs, David E., and Andrea Baeder. *Housing Interventions and Health: A Review of the Evidence*. Rep. National Center for Healthy Housing, Jan. 2009. Web. 6 Apr. 2016. http://www.nchh.org/Portals/0/Contents/Housing%20Interventions%20and%20Health.p df>.

This report is an exhaustive review of healthy housing intervention research. It attempts to identify methods of intervention and assess their effectiveness on improving housing health. These interventions are categorized in five areas: Interior Biological Agents, Interior Chemical Agents, External Exposures, Structural Deficiencies, and the Intersection Between Housing and Community.

Odds Against Tomorrow: Health Inequities in Spokane County. Rep. Spokane Regional Health District, May 2012. Web. 6 Apr. 2016.

https://www.srhd.org/documents/PublicHealthData/HealthInequities-2012.pdf.

This comprehensive report on health in Spokane includes a chapter which addresses the impact of neighborhoods and the physical environment on health. It lists health rates in select categories by neighborhood.

Spokane Housing and Economic Report. Rep. Applied Development Economics, Inc., Nov. 2015. Web. 6 Apr. 2016.

http://www.downtownspokane.org/flipbook/Housing2015/Report.pdf.

This report provides a recent analysis of Spokane's residential market. The appendix contains maps of the city's housing units and occupancy status.

The Surgeon General's Call to Action to Promote Healthy Homes. Rep. Office of the Surgeon General (US), 2009. Web. 6 Apr. 2016.

http://www.ncbi.nlm.nih.gov/books/NBK44192/.

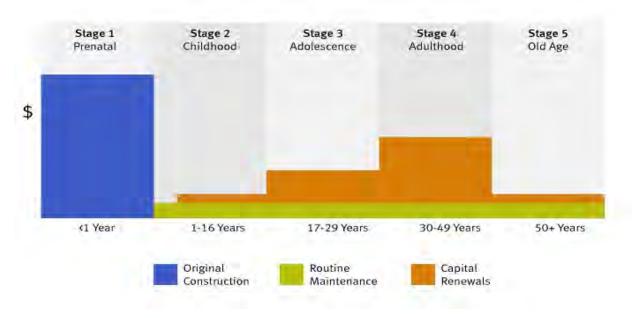

"This *Call to Action* presents an overview of issues that contribute to our nation's unhealthy housing. It also urges a dynamic and coordinated effort to improve housing factors that affect health and describes features that make a house and its surrounding property healthy. A series of mutually supportive and mutually necessary coordinated actions are outlined in this document. They call on people from many walks of life to join in a discussion about healthy homes issues; to make informed, shared, and compassionate decisions; and to develop imaginative and realistic solutions that will help ensure that safe, healthy, affordable, and accessible homes are available to everyone in the United States."

Posted on January 28, 2015 Written by David Albrice (http://rdh.com/long-buildings-last/)

We have tracked 1,651 buildings over a 20+ year period and have identified five life stages. These stages apply to all sectors: commercial, residential, industrial, institutional and municipal.

Every building is unique. The need for maintenance, repairs and asset renewals varies depending on many factors, including: the quality of construction, design details, exposure conditions and the standard of care given by the owners and their facility management team.

Notwithstanding the differences between individual buildings, it has been determined that many buildings follow a similar pattern as they pass through different stages in their respective life cycles. In this regard, five general life cycle stages have been identified and, using the analogy of the human body, they are summarized conceptually in the figure below.

Although these life cycle stages are generalizations they enable owners and managers to anticipate future capital renewal requirements and to make informed decisions about budgeting and other resources for maintenance, repairs and asset renewals.

From the figure we see that maintenance costs are generally consistent over the life a building; however, asset renewal expenditures vary dramatically at different times, particularly during facility life Stage-3 and Stage-4. The requirements for effective stewardship of the facility are similar for all types of property, whether it is a high-rise building, low-rise building, fire station or office building. We can categorize the life stages as follows:

- "Pre-Natal" (under 1 year). During this stage, the building is in the process of being handed over from the
 developer to the first owners. The assets are new and are covered under a variety of warranties.
 Maintenance requirements are focused on cleaning activities and periodic inspections
- "Childhood" (1-16 years). During this period, the owners have assumed full responsibility for all the maintenance, repairs and long-range renewal planning for the building. With two years of expenditure experience, the owners have established a preventive maintenance program and are allocating monies to the long-range reserve fund. The owners are starting to address some relatively small renewal projects, which are addressed in more detail in the next section.
- "Adolescence" (17-29 years). It is during this 3rd stage that the owners may find that the maintenance budgets established during the 2nd life stage are no longer adequate to address the impending replacement of building assets that have deteriorated and reached the end of their useful service lives. This phase is represented by a noticeable increase in the number of capital renewal projects. This life stage often compels owners to seriously reconsider their historical budgeting practices and to make more

Posted on January 28, 2015 Written by David Albrice (http://rdh.com/long-buildings-last/)

- reasonable funding allocations for asset renewals as the building moves through life Stage-3 and into Stage-4.
- Adulthood (30 to 49 years). The largest and most expensive of all asset renewal projects tend to occur
 during the 4th life stage. As a result, significant funds will need to be reinvested in the building and the
 standard operating and maintenance budgets will need to be revisited. Some of the assets have been
 replaced over the preceding 30-40 years and the owners and manager are now operating a building with
 assets at a variety of different ages. There is no longer a single baseline and the facility managers are
 tasked with tracking the different assets.
- Old Age (50 plus years). At this juncture, all the major assets have been through one renewal cycle. Therefore life Stage-5 is essentially a return to life Stage-2. The owners must now prepare for the next cycle of asset renewals as the building moves beyond its 50th anniversary and embarks upon the next 50 years of operations.

We will now explore each of the five life-cycle stages in further detail, paying particular attention to maintenance, repair and renewal requirements at each stage.

1. "Pre-Natal" Stage (Under 1 year)

The first life stage of a building occurs up to the end of the first (or second year), depending on the types of warranties on the project.

- Maintenance. The primary focus at this stage is to conduct the prescribed maintenance to preserve the
 warranties on the new assets, which also includes inspections to identify any warranty defects. During this
 stage, some young strata corporations struggle to establish appropriate maintenance procedures,
 including a full slate of maintenance service contracts and maintenance log-books to demonstrate that
 the necessary due diligence is being done.
- **Repairs.** Under normal circumstances, the owners should not be incurring any significant costs for repairs during this very young stage of the building's life. When repairs are necessitated, they can be controversial and may result in disputes with the developer and other parties over whether or not these are covered by the warranties. It is important that the owners receive advice from their consultants on how to differentiate between legitimate warranty defects, normal wear and tear and other such matters.
- **Renewals.** Barring any unusual circumstances, there should not be any asset replacement projects during this early stage in the life of the building. If an asset requires replacement then it has likely occurred as a result of premature failure, misuse or abuse by the owners, force majeur or perhaps some insurable loss.

The "pre-natal" stage essentially ends when the initial one-year, 15-month, and/or two-year warranties have expired. The additional longer-term warranties, such as five- and ten-year warranties, are addressed as part of the building's transitions into the "childhood stage".

2. "Childhood" Stage (2-16 years)

The second life stage of a building can be considered to start on, or about, the 2nd anniversary and extends until about the 16th year. In very general terms, the childhood stage is characterized by the following:

Maintenance. Standard operating and maintenance budgets are typically adequate to operate the
building. The strata corporation has now been through two years of teething procedures and should have
established the necessary and sufficient preventive maintenance program. Maintenance tasks are focused
on a combination of cleaning activities, inspection activities and small miscellaneous repairs. The owners
must be careful not to become complacent during this life stage of the building – large expenditures are
looming on the horizon and preparations made at this early stage will mitigate the impact of these.

Posted on January 28, 2015 Written by David Albrice (http://rdh.com/long-buildings-last/)

- **Repairs.** During the first five years, the owners should continue to focus its efforts on preserving the remaining warranties on the assets. A number of relatively small repair projects will arise but these should not have any major impact on the operating budget.
- Renewals. Even the best-designed buildings, using the best quality materials, contain a few assets that have short lives. During Stage-2 the owners will be confronted with a few assets that require replacement. These are typically small projects of relatively low capital cost. However, since these are the first renewal projects in the building, the owners may be taken by surprise and may not be able to put the projects into their proper perspective. These renewal projects do not necessarily mean that the building has problems rather, the owners must understand that some assets have short service lives. The owners/managers may choose to seek the advice of professionals to determine appropriate scopes of work and obtain competitive bids.

Listed below is a summary of some of the renewal projects that may occur during the second stage in the life cycle of a facility:

- Water Heaters. Many building owners are familiar with the replacement of gas-fired water heaters.
 Unfortunately, some facilities have undergone multiple water heater replacements during the first 16 years of a building's life and consideration is sometimes given to replacement of the short life water heaters with a more durable system such as a boiler and storage tanks.
- Circulating pumps. Low-rise and high-rise buildings are equipped with one or more very small fractional
 horsepower circulation and recirculation pumps that distribute domestic hot water through the building.
 Since these pumps run continuously, they are often replaced on a 3-10 year cycle, depending on the
 quality of the pump.
- **Gate Motors.** The vehicular entrances to parking garages are usually high traffic locations that sustain wear from repetitive cycling of the doors. Depending on traffic loads, these are typically replaced every 3-10 years.
- **Exterior Repainting**. Some of the exterior cladding and finishes, particular wood trim, wood siding and wood fences will require repainting/restaining to preserve their integrity and aesthetic appearance. The frequency and scope of repainting projects is determined by exposure conditions.

Some additional projects that may occur during this stage are: exterior sealant renewals, balcony membrane resurfacing, hallway carpeting replacement and sump pump overhauls.

It is important to recognize that the short-life assets (ie., those assets with useful service lives of 10 years or less) will continue to require cyclical replacement during all the subsequent life cycle stages of the building. These projects can be a nuisance and frustrating for the owners; however, they do not seriously impact the financial bottom line when we consider the big-picture view over the life a building.

3. "Adolescence" Stage (17-29 years)

The third life stage of a building is represented by a dramatic shift in the number of challenges that face the owners. During the earlier life stages, the owners were able to respond to problems as they arose from time-to-time. The 3rd life stage requires owners to be even more vigilant and to take additional care to be proactive in the management of the assets. The significant increase in the number of asset renewal projects at this life stage is not necessarily indicative of problems with the building but rather necessitated by the age of the assets, many of which will now be nearing the end of their design service lives.

This stage in the building's life cycle is characterized by following:

How Long do Buildings Last?

Posted on January 28, 2015 Written by David Albrice (http://rdh.com/long-buildings-last/)

- Maintenance. Maintenance continues to be focused on all critical assets such as sump pumps, elevators, fire alarm systems and roofs. In addition, particular attention must be paid to exterior sealants and the various service penetrations through the walls and roofs.
- **Repairs.** This is the stage at which different types of obsolescence start to occur. For example, some assets, particularly electronic components, may be prone to technological obsolescence and are no longer manufactured, making it difficult to find replacement parts. The different forms of obsolescence and how to manage them will be discussed in a future information bulletin.
- Renewals. Many assets are designed with a 20-25 year useful service life and are therefore considered to be mid-life assets. This is one of the primary reasons why reserve fund studies include a 30-year planning horizon (ie., the window into the future). This enables the owners to anticipate and prepare for the majority of the asset replacement projects. The ability of owners to fund these capital expenditures can have a significant impact on the future lifespan of the building.

Listed below is a summary of the types of renewal projects that may occur during the third stage in the life cycle of a building:

- **Re-Roofing.** Many flat (low slope) roofs, and some pitched roofs, have a useful service life of approximately 20-25 years. Even the best roofs, with good maintenance, will still need to be replaced during this life stage.
- *Elevator Modernization*. Elevator systems generally require modernization of the control equipment after about 20 years.
- **Heating Boilers.** Many boilers are designed with an approximate 20-year service life and it is not uncommon for owners to replace the boilers at this stage in the life of the building.
- Plumbing Distribution Systems. Many building with copper plumbing distribution pipes have undergone
 re-piping or relining projects. Some strata corporations have installed acid neutralization (water filtration)
 systems to mitigate the deterioration of the copper pipes.

Some additional projects during this stage include: exterior sealant replacement, replacement of failed sealed glazing units, and overhaul of sump pumps.

In some cases, a few of the projects that would typically occur in life stage 3 may be delayed until the 4th life stage. However, the ability to achieve the full service life from the assets will depend on the quality of the maintenance that the owners have performed during the first 30 years of the building's life.

4. "Adulthood" Stage (30-49 years)

The fourth stage of a building starts at about 30 years. Some of the shorter life assets (that were first replaced in life stage 1) will now require their second round of renewal. The owners and their property manager are now challenged with a facility containing a range of assets of different ages and deteriorating at different rates. Stage 4 of the building life cycle is characterized by the following attributes:

- **Maintenance.** Maintenance during this stage is essentially no different from the earlier life stages. The owners continue to focus on the maintenance of all critical systems. The quality of the preventative maintenance program will help mitigate the rate of deterioration of some of the assets.
- Repairs. Functional obsolescence, style obsolescence and legal obsolescence need to be managed
 carefully at this stage. Also, the factors impacting the deterioration of assets will be discussed in an
 upcoming bulletin.
- **Renewals.** At this stage the owners will encounter the largest and most expensive of the asset renewal projects, such as the replacement of the windows and wall cladding assemblies.

The KEY THEMES identified are:

- 1. <u>Use a Holistic approach</u> to address the underlying issues requiring affordable rental accommodation Poverty and Low Income, Employment, Mental Health, Incarceration and Availably of Rental Housing
- 2. Increase Employment Income, average Family Income, reduce Poverty and increase Housing Affordability
- 3. Modify unproductive behavioral actions of Landlords, Tenants and Neighborhoods
- 4. <u>Change the existing adversarial approach</u> to dispute resolution between Landlords, Tenant, public agencies
- 5. Co-ordinate resources to assist tenants, landlords and agencies in the rental housing process
- 6. Improve understanding of legislation relating to residential rental accommodation
- 7. Develop and share the understanding of the methods, costs and funding sources to **extend the useful life of existing aging houses**
- 8. <u>Improve data collection and analysis</u> associated with rental properties, including ownership, contact details and problems encountered in residential rental processes
- Modify the systems and scope of existing City departments, stakeholder groups and housing agencies to better service rental needs
- 10. Thoroughly investigate and <u>understand the implications of any new Legislation and Ordinances</u> and Legislation before implementation

10A Mandatory Registration of all Rental Properties

10B Mandatory Inspections of all Rental Properties

10C Just Cause Eviction

10D Discrimination of tenants – Source of Income

10E Discrimination of tenants - Criminal Convictions

| Issue No: | Issue Name: |
|-----------|--|
| 1 | Use a holistic approach to address the underlying issues requiring affordable rental accommodation |
| | Poverty and Low Income |
| | Employment |
| | Marginalised tenants - Mental Health, Incarceration and eviction history |
| | Availably of Rental Housing |

Where was the issue raised:

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Spokane has a high demand of Affordable Housing because a large number of tenants in the City of Spokane cannot find accommodation that is affordable to their financial resources or to their life circumstances. Spokane has a low Average Family Income, 20% of people live under the poverty line, 55% of tenants pay more than 30% of Household Income on Rent and Utilities.
- Non-government accommodation for marginalized tenants such as those with Mental Health and history of Incarceration and Eviction history is challenging to the individual and requires Landlords to take addition risks of non-payment and property damage often leading to costly evictions processes and property damage.
- Public Affordable Housing is dwindling as State and Federal government resources have been reduced.
- Private Affordable Housing is dwindling because the Aging Housing stock is becoming more costly to repair, additional risks through high number of poverty and increasing legislation and compliance is seeing a reduction of available Affordable Housing. Small Scale Investors provide a significant proportion of Affordable Rental Housing and are shifting their investments into alternative options and outside the City of Spokane to achieve better rental returns.

What is the impact:

Homelessness, increased marginalization of people, poor society

Who does it affect:

Low Income, marginalized people, landlords, tenants, community, children

| How important is the issue: (Risk) | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 8 |
| SAFETY (1=not important / 10-immediate threat to life) | 5 |
| COST (1=High Cost / 10=Low Cost) | 8 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 5 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 7 |

What laws or programs currently mitigate the issue:

Washington Landlord Tenant Act, Homeless programs, Housing agencies

What additional information is required:

A multi-faceted and collaborative approach will require involvement by government, City departments, business groups, Greater Spokane Incorporated, Education Facilities, landlords groups, tenants and neighborhoods.

What are possible solutions:

Taking shortcuts or developing does not address the root cause of problems.

The City of Spokane should take a LEADERSHIP approach to identify key participants and to establish an ONGOING collaborative forum and a HOLISTIC approach to resolve Affordable Housing

How easily can the solution be implemented:

Very easily. The City has a variety of Boards and Commissions to undertake strategic and operational overviews of issues important to the future of the City. Each Board Charter should include "Building Better Communities through Affordable Housing".

| Issue No: | Issue Name: | l |
|-----------|--|---|
| 2 | Increase Employment Income, average Family Income, reduce Poverty and increase Housing | l |
| | Affordability | l |

Where was the issue raised:

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Low employment income does not allow families to prosper, to find suitable accommodation, and increases reliance on limited public housing
- Increased Average Family Income through full-time employment, higher disposable income provides stability in the home, contribution to society and a reliance on public support systems (health and housing)
- Increased Average Family Income reduces financial stress and being one paycheck away from a disaster

What is the impact:

Low employment and low wages will keep Spokane in a constant reactive spiral. An aging population adds to the future burden.

Who does it affect:

The entire Community.

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 10 |
| SAFETY (1=not important / 10-immediate threat to life) | 8 |
| COST (1=High Cost / 10=Low Cost) | 3 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 3 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 10 |

What laws or programs currently mitigate the issue:

GSI and the City is currently working on this.

What additional information is required:

The City of Spokane can provide this information.

What are possible solutions:

Improved Economic Development in the region is considered the single most important factor that will increase Employment Income – through new jobs, creating full-employment, jobs that result in better pay.

Economic incentives, Specialisation (e.g. specialised high technology, health services, manufacturing)

How easily can the solution be implemented:

This is multifaceted and complex area. The City of Spokane can provide this information.

| Issue No: | Issue Name: |
|-----------|---|
| 3 | Modify unproductive behavioural actions of Landlords, Tenants and Neighborhoods |

Where was the issue raised:

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Assist and encourage Landlords to comply with the legislation, a community spirit and to provide housing that is fit-for-purpose, housing for different prices ranges, some affordable housing
- Assist and encourage Tenants to comply with the rental agreements, pay rents in-full and on-time, reduce evictions, reduce antisocial behavior and maintain property in good condition
- Assist and encourage Neighborhood communities to develop community spirit and community well-being by having avenues to report crime, report code violations and to encourage healthy communities through mutual support for the disadvantaged

What is the impact:

Poor community outcomes, poor health outcomes, community confrontation, marginalisation of certain groups, discrimination, misguided and ineffective housing programs

Who does it affect:

Landlords + Tenants + Community at large

| How important is the issue: | Score |
|--|-------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 7 |
| SAFETY (1=not important / 10-immediate threat to life) | 7 |
| COST (1=High Cost / 10=Low Cost) | 7 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 7 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 7 |

What laws or programs currently mitigate the issue:

Existing Washington Landlord Tenant Act, Existing HUD regulations, existing City Ordinances relating to property and community behavior, existing Policing laws, existing Fire Rules

What additional information is required:

Data – initial and ongoing data on the nature and incidences relating to owner / tenant violations to identify the root cause of problems and targeted and effective solutions

What are possible solutions:

Develop collaborate relationships and cross functional problem solving forums between City Departments and key community stakeholders

Use EXISTING departments and agencies to collect data on problem issues.

Use a collaborative approach between stakeholder groups to identify data trends and to have longitudinal measures

Enforce EXISTING Codes and Ordinances to fix behavior that are unproductive and deviant.

Identify recurring properties with infractions and work with those owners for acceptable solutions.

Assist and work with Landlord Association, Spokane Realtors and Property Managers to develop voluntary industry self-management strategies and KPI'S.

Develop database on problematic tenancy trends and develop strategies to fix unproductive behavior.

How easily can the solution be implemented:

Very easily.

Use existing City departments and resources.

The City has several Commissions and Boards dealing with housing, community wellbeing and business which can use a collaborative approach to deal with Landlords, City Departments and housing agencies. These committees should include representatives of Private Housing Industry (landlords) to ensure a balanced perspective to problem resolution.

| Issue No: | Issue Name: |
|-----------|--|
| 4 | Change the existing adversarial approach to dispute resolution between Landlords, Tenant, public |
| | agencies |

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Dispute resolutions have few mediation options
- Noncompliance leads quickly to court actions
- High financial cost of evictions and court actions
- Evictions and court actions impact tenant getting another rental
- Landlords choose not to evict due to high court costs impacts residents and community, property damage

What is the impact:

Enables alternative, quicker and less costly problem resolution

Who does it affect:

Landlords, Tenants, Housing Agencies, Tenant Agencies, City departments - Police, Fire, Code Enforcement, Health, Building and Court system

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 7 |
| SAFETY (1=not important / 10-immediate threat to life) | 7 |
| COST (1=High Cost / 10=Low Cost) | 5 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 7 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 7 |

What laws or programs currently mitigate the issue:

Washington Landlord Tenant Act

What additional information is required:

Data to identify the nature and frequency of disputes arising from properties (owned vs rented), landlords vs tenants.

Determine which can be resolved through alternative problem resolution strategies with the last resort being court action

What are possible solutions:

- Establish low cost, accessible mediation services or alternative problem resolution forums
- Implement training for Landlords, Tenants and Community about rental issues
- Foster communications forums where Landlords, Tenants and Community can share experiences and resolve problems
- Develop collaborative approach so that Landlords and Tenants and Agencies PREFER a win-win solution, possibly through training, education and developing mutual respect.

| Issue No: | Issue Name: |
|-----------|---|
| 5 | Co-ordinate resources to assist tenants, landlords and agencies in the rental housing process |

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Resource services for tenants are not well known, misunderstood or un-accessible
- Include in training systems and programs for Landlords and Tenant
- Establish a central platform (possibly internet site) where resource groups, supporting programs or other suppliers to advertise their services
- Co-ordinate information of resources available by organizations to tenants, landlords and community
- Establish accredited training programs for tenants and landlords
- Encourage voluntary training certification of Landlords
- Encourage voluntary training certification of Tenants
- Encourage all tenants to have completed training as part of tenant screening process
- Centralized web based rental housing complaints system that refers problems to agencies.

What is the impact:

Lack of knowledge of legislation or good practices means that people are unknowingly acting doing the wrong thing

Poor knowhow, systems, methods and lack of know how is inefficient, wastes time and resources Overlapping and inefficient service provision offered between City departments, government and other agencies Delays in resolving problems which escalate quickly and become needlessly costly

Who does it affect:

Landlords, tenants, housing, agencies, City departments in the rental housing process

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 5 |
| SAFETY (1=not important / 10-immediate threat to life) | 5 |
| COST (1=High Cost / 10=Low Cost) | 7 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 7 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 5 |

What laws or programs currently mitigate the issue:

Existing programs and services offered by several City departments, public housing agencies, tenant groups, charities.

What additional information is required:

Identify existing services offered by various agencies, scope contact details, availability. Identify gaps

What are possible solutions:

Identify methods of better promoting housing related services

Identify what services could be combined to become more cost effective and efficient

Develop a collaborative approach to delivering services across the City/Region

| Issue No: | Issue Name: |
|-----------|---|
| 6 | Improve understanding of legislation relating to residential rental accommodation |

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Develop on-line training programs that explain the Landlord Tenant Act and housing legislation
- Develop personalized training programs that explain the Landlord Tenant Act and housing legislation
- Develop training programs that explain the responsible, profitable and accountable landlord principles
- Develop training programs that explain the responsible and accountable tenant principles

What is the impact:

Lack of knowledge of legislation or good practices means that people are unknowingly acting doing the wrong thing

Lack of knowledge means you can't enforce your rights

Inappropriate problem resolutions, duplication of laws/ordinances/rules over-complicates and makes problem resolutions costly and takes a long time

Who does it affect:

Landlords, Tenants, Housing Agencies, community at large

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 7 |
| SAFETY (1=not important / 10-immediate threat to life) | 7 |
| COST (1=High Cost / 10=Low Cost) | 7 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 7 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 7 |

What laws or programs currently mitigate the issue:

Washington Landlord Tenant Act

Landlord Association Training

Responsible Renters Training by certain Spokane organisations

What additional information is required:

Identify organisations that can develop those services

What are possible solutions:

Promote and support organisations that develop and deliver competency based training to Landlords, Tenants and Housing Agencies.

| Issue No: | Issue Name: |
|-----------|---|
| 7 | Property Issues - Develop and share the understanding of the methods, cost and funding sources to |
| | extend the useful life of existing ageing houses |

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

Develop training program to assist landlords to:

- Identify the acceptable building standards for rental properties for Public Assisted funding and for Market based rentals
- Understand Whole-of-life costing of rental properties
- Undertake a building condition "health impact" assessment and structural-property-condition report
- Develop a future asset maintenance plan for the building
- Review the feasibility of keeping the property as a viable rental house within the State / City legislation and building standards
- Identify funding sources for undertaking future maintenance and capital repairs

What is the impact:

Improve property standards

Reduction in properties for rent – those that are uneconomical to bring to standard

Increase homes for sale

Who does it affect:

Landlords, tenants, community

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 7 |
| SAFETY (1=not important / 10-immediate threat to life) | 7 |
| COST (1=High Cost / 10=Low Cost) | 3 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 4 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 8 |

What laws or programs currently mitigate the issue:

Code enforcement, Fire Inspections, Building Codes

What additional information is required:

Cost of undertaking inspections, compliance costs, how such a system could work

What are possible solutions:

Promote and support organisations that develop and deliver competency based training of the methods, cost and funding sources to extend the useful life of existing ageing houses

Promote and support organisations that can provide advisory or remedial services to assist houses at risk of being lost due to repairs or foreclosure

Fund and develop a Community Landbank who can acquire, remediate at risk properties to make these available for public housing

| Issue No: | Issue Name: |
|-----------|--|
| 8 | Improve data collection and analysis associated with rental properties physical including ownership, |
| | contact details and problems encountered in residential rental processes |

Presentations to the Rental Housing Stakeholder Research Group

City department presentations (Police, Fire, Building, Code Enforcement, Health); Tenant Presentation, Neighborhood Presentations

Describe problem:

- City departments don't know which properties are rented or owner occupied
- City departments don't know the immediate contact details for the property owner
- Limited data of problems associated with Owner vs Rental properties
- Property Owners contact details are not available to City departments cannot contact the owner to make repairs or address problems
- Code enforcement doesn't track by property type
- Assist in determining housing needs

What is the impact:

Ability to accurately identify issues problems opportunities relating to the property.

Who does it affect:

City departments, housing agencies and planning departments

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 7 |
| SAFETY (1=not important / 10-immediate threat to life) | 7 |
| COST (1=High Cost / 10=Low Cost) | 8 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 8 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 8 |

What laws or programs currently mitigate the issue:

County Property Records database currently has the owners name and mailing address. The database identifies some aspects of land use. The information is publicly available at

http://cp.spokanecounty.org/scout/propertyinformation/

Business licence registration already existing within Washington State and the City

What additional information is required:

- Emergency contact details for Owner
- Further identifications of property use (rental vs owner occupied)

What are possible solutions:

- Spokane County Property Records to be expanded to include a new designation for property use (Owned vs Rented). Simple and low cost.
- Spokane County Property Records to be expanded to obtain emergency contact details for all properties (Owned and Rented). Simple and low cost.
- City departments to have a reporting system that can look across various systems to reporting on properties / complaints / inspections. Also known as Data-Mining systems or tools

| Issue No: | Issue Name: |
|-----------|---|
| 9 | Modify the systems and scope of existing City departments, stakeholder groups and housing |
| | agencies to better service rental needs |

Presentations to the Rental Housing Stakeholder Research Group

Describe problem:

- Police departments is unable to resolve certain crimes without extending scope and abilities
- Fire department (FD) unable to efficiently resolve problems identified during inspections
- Improving scope and ability of FD to undertake inspections and to negotiate or incentivize or penalize repeat safety offenders would reduce number of repeat safety incidences.
- FD is complaint driven. An alternative risk based approach should be considered instead of mandatory inspections.
- Building Department does not record building code violations by owner vs rental property so unable to determine who is responsible
- Code enforcement doesn't

What is the impact:

Inefficient and ineffective services, overlapping services

Who does it affect:

Landlords, Tenants, City departments, Community

| How important is the issue: | <u>Score</u> |
|--|--------------|
| URGENCY (1=Nice to have / 5= Not urgent / 10=Critical to be done NOW) | 7 |
| SAFETY (1=not important / 10-immediate threat to life) | 5 |
| COST (1=High Cost / 10=Low Cost) | 5 |
| EASE of IMPLEMENTATION (1=Difficult to implement 10=Easy to implement) | 5 |
| RISK OF FAILURE or INACTION (1=High risk / 10=Low Risk) | 5 |

What laws or programs currently mitigate the issue:

- Spokane Police Dept already has established operational and investigation guidelines
- Spokane Fire Dept. already has an inspection plan limited to multifamily properties (more than 3 living units)
- SFD currently has inspection guidelines and penalty provisions
- Spokane Building Department already has an operational complaints based system to investigate building code violations and for life risk issues
- Spokane Code Enforcement already has operational complaints based system to investigate code violations and for life risk issues.

What additional information is required:

- Determine what elements each department is not able to meet and why.
- Spokane Code Enforcement took 5 weeks to remove a motor vehicle which was being systematically
 dismantled from a public road. Code enforcement cannot meet its CURRENT responsibilities and adding
 another layer of enforcement will be impractical.
- What is the scope of the Property Inspections? How will a property inspection work who will do it and how much will it cost. Determine what is to be done and the cost before legislating.
- Why not consider a Risk-based approach?

What are possible solutions:

- In some instances the various departments are functioning appropriately.
- In some instances an increase in scope of operational abilities will enable the department to better deal with infractions
- City departments to have a reporting system that can look across various systems to reporting on properties / complaints / inspections. Also known as Data-Mining systems or tools
