2023 Mobile Speed Feedback Report

2023 Mobile Speed Feedback Report

Executive Summary

This report includes speed feedback data from mobile speed signs deployed during 2023. The report and data provided includes:

- Location information and map
- Length of time sign was collecting data at location
- Number of vehicles tracked by speed sign while in location
- Percentage and number of vehicles traveling over posted speed limit
- Average speed of traffic that were tracked by the mobile speed sign

Overview of 2023 Mobile Speed Feedback Program:

The mobile speed sign program provides five data-collecting mobile speed sign (white) trailers and three non-data collecting mobile speed sign (blue) trailers to be placed in neighborhoods for eleven days within a two-week period. An effort is made to evenly distribute the speed signs across all neighborhoods. The locations were based on requests from neighborhood councils. Some auxiliary location requests were accepted, dependent on trailer availability. This season, we partnered with the Street Department to deploy and set up trailers.

Data Overview

The data in this report is not 100% accurate:

- The trailers are not able to collect data from vehicles in the outside lane on multi-lane streets, only the vehicle closest to the trailer.
- When cars are traveling close together, the trailer may collect data from the first vehicle and last vehicles, and not each and every following vehicle.
- The mobile speed feedback signs are solar powered and depending on time of year and sign placement data collection may be off.
- The trailers may collect data from walkers and bicyclists.

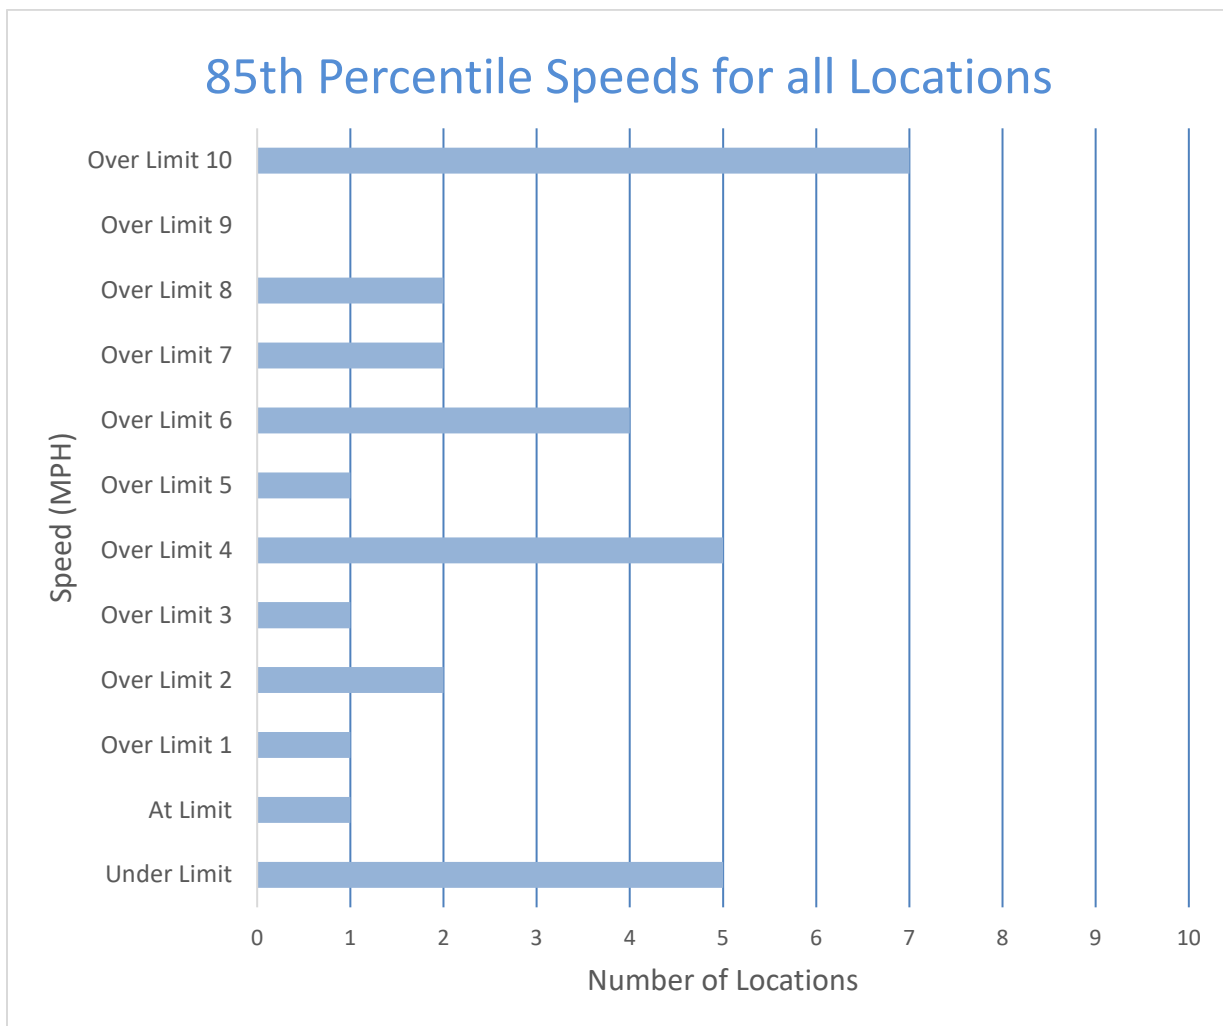

Due to these restrictions in data collection, this information is not official and is shared only as a point of interest.

Recommendations for Mobile Speed Signs:

It is recommended that future mobile speed sign use for neighborhoods.

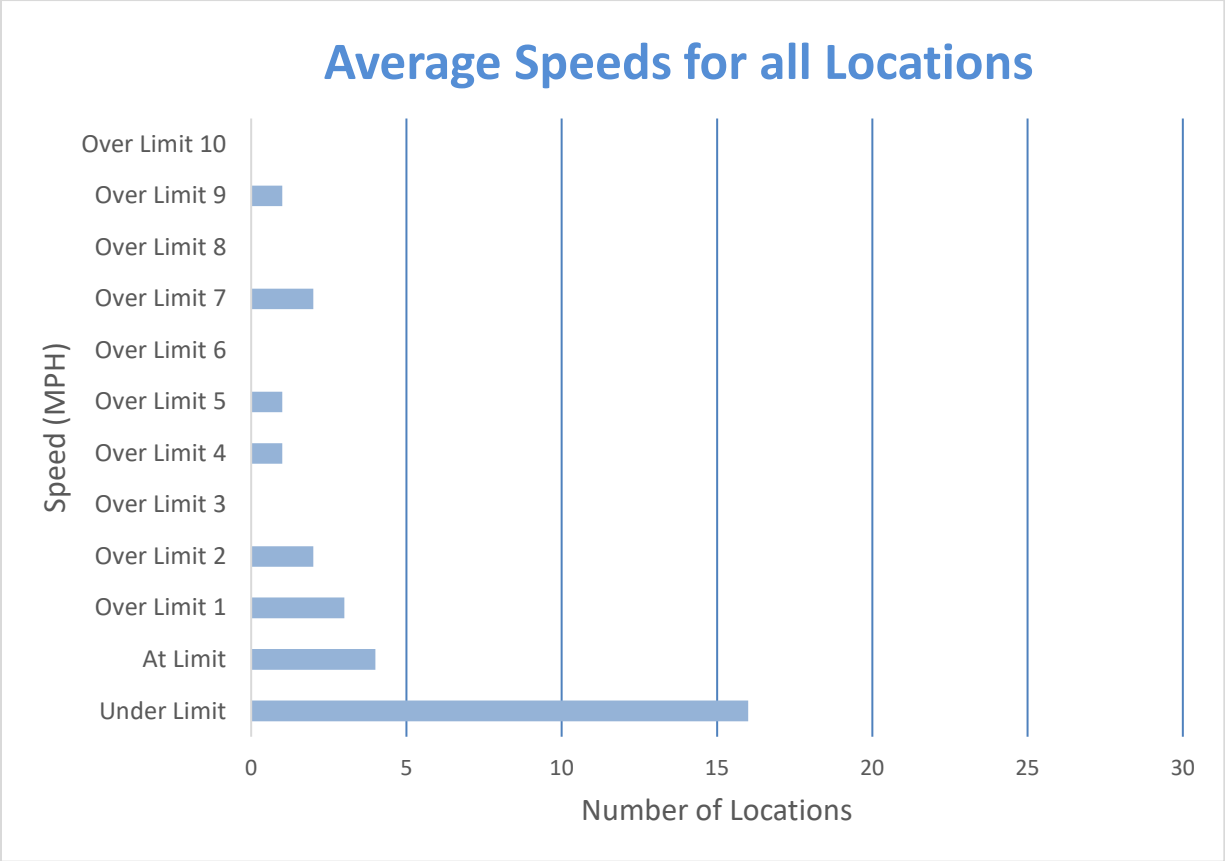

- When considering locations, scope out the area for sunlight access as the signs rely on solar panels to charge their batteries.

- When considering locations, scope out the area for clear parking spaces around the proposed locations that would be near the radar range, the radar needs space to register anything moving towards it. Or place the trailer in the yard or street of adjacent property owner.
- When considering locations, *do not place* within at least a half block of a stop sign, speeds recorded will be slower than the rest of street. Nor in areas with multiple speed limits, like school or park zones.
- When considering locations, place in a safe or well-lit locations where there is less likelihood of vandalism. This year two trailers had solar panels stolen and one trailer was completely destroyed from vandalism, therefore reducing the number of trailers available during the season for deployment.
- Neighborhoods should assess bicycle lane access when determining request locations

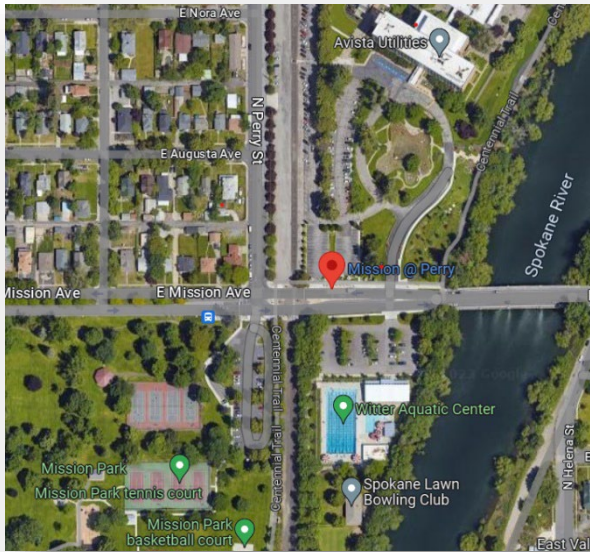

*The 85th percentile speed is the speed at or below which 85 percent of the motorists drive on a given road unaffected by slower traffic or poor weather. This speed indicates the speed that most motorists on the road consider safe and reasonable under ideal conditions. It is typically used as a guideline for the appropriate speed limit for that road.

Average Speeds for all Locations

District One:

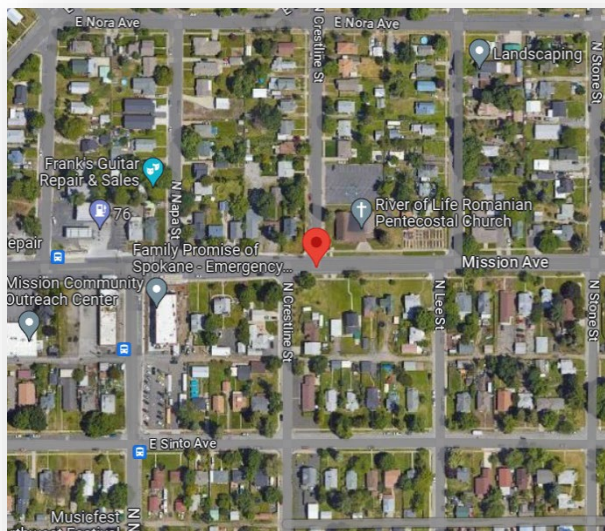

Chief Garry Park Neighborhood: Mission Avenue between S. Riverton and Helena Streets

The mobile speed sign was placed on Mission Avenue between S. Riverton and Helena streets, capturing westbound traffic. The sign was turned on June 12, 2023, and turned off June 23, 2023.

Logan Neighborhood: N. Center Road near Upriver Drive

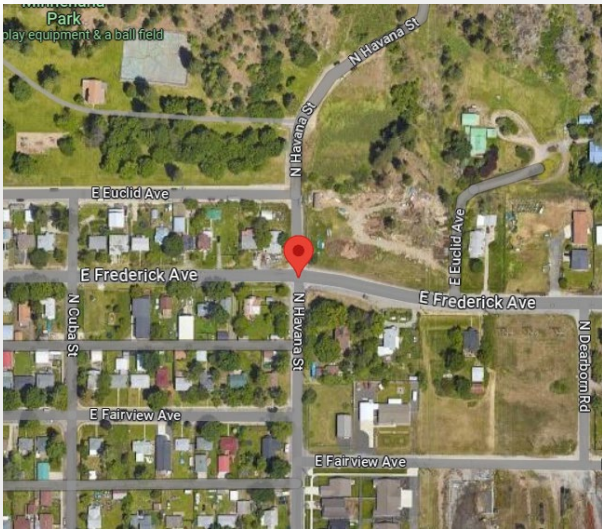

The mobile speed sign was placed on N. Center Rd. near Upriver Dr., facing southbound traffic. The sign was placed at this location from June 12, 2023, to June 23, 2023. A blue trailer was used and no data was collected.

Logan Neighborhood: Cincinnati Street near Carlisle Avenue

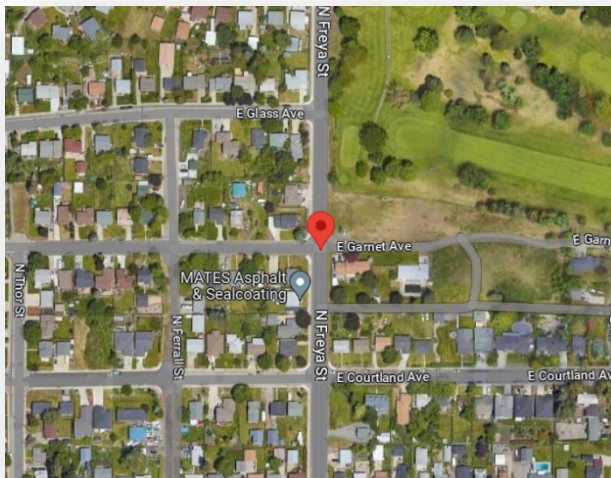

The mobile speed sign was placed on Cincinnati St. near Carlisle Ave., facing westbound traffic. The sign was turned on September 4, 2023, and turned off September 15, 2023. A blue trailer was used and no data was collected.

Minnehaha Neighborhood: Frederick Avenue near Havana Street

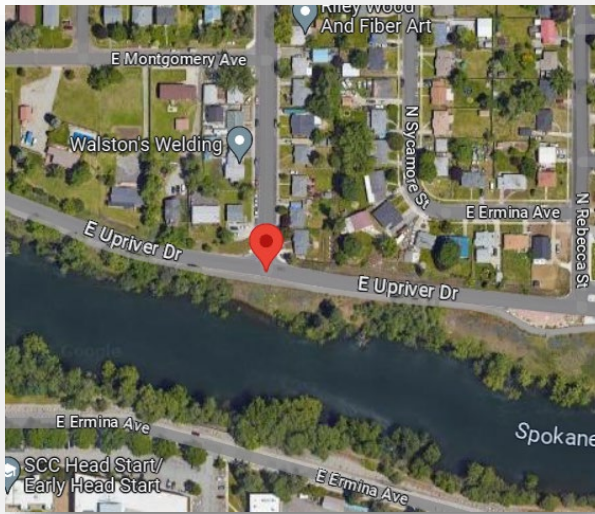

The mobile speed sign was placed on Frederick Avenue near Havana Street, facing westbound traffic. The sign was turned on May 1, 2023 and because *the trailer was vandalized, the trailer was not deployed for its entire schedule and no data was able to be collected.*

Minnehaha Neighborhood: Freya Street near Garnet Avenue

The mobile speed sign was placed on Freya Street near Garnet Avenue, facing southbound traffic. The sign was turned on May 29, 2023, and because *the trailer was vandalized, the trailer was not deployed for its entire schedule and no data was able to be collected.*

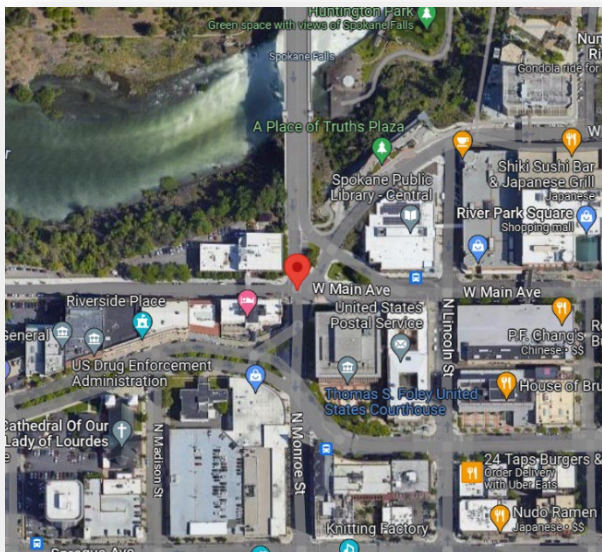

Minnehaha Neighborhood: Upriver Drive near Freya Street

The mobile speed sign was placed on Upriver Drive near Freya Street, capturing eastbound traffic. The sign was turned on June 26, 2023, and turned off on June 28, 2023. *The trailer was vandalized so data was not able to be collected for the entire deployment schedule.*
