Our vibrant downtown!

• Downtown Spokane connects people to great shopping, entertainment and dining.

• We carefully balance many needs in order to move people and goods efficiently, supporting our business district and creating livable neighborhoods.

• We install, maintain and monitor paid parking, loading, and short-term access in business districts as well as restricted parking zones in residential areas.
Did you know?

- Most city blocks have four block faces – north, south, east, and west (see chart).
- As of September 1, once the maximum timestay at a meter has been used, the vehicle needs to be moved to a different block face.
- If you think you may need more time than a parking meter allows, seek out one of our many off-street parking options.
- Visit ParkSimple.org for more information about parking downtown.
