

Letter of Award

To: Sgt. Tom Lee
From: Craig N. Meidl - Chief of Police
Date: September 5, 2017
Re: Chief's Citation Award to Team 12

Sgt. Lee,

Team 12 has been nominated to receive the Chief's Citation Award. This award is intended to recognize members of a team or unit for participating in an incident, event, or series of events, or project which has a substantial, positive impact on the community or police department. It must be superior in nature and further the department's mission and overall effectiveness. When the Special Awards Committee reviewed this nomination, it was clear that Team 12 is most deserving of this award.

Since the beginning of the 2017 markup, Team 12 leads all 16 patrol teams in Comp Stat reporting. From January 15th to May 25th, Team 12 had 93 Comp Stat shift briefings entered into Smart Force. This number dwarfs that of any other patrol team. The second highest number of entries by any other team is 41. Numbers alone do not justify an award, but along with the quantity, there is plenty of quality.

Team 12 is a north side power shift team. When looking at calls for service, this is the busiest shift and side of town. This calls-for-service demand limits the ability to focus on proactive contacts, yet Team 12 finds a way to make proactive contacts a priority. When reviewing the bulk of these 93 reports, they are based off self-initiated contacts (traffic stops, bike stops, etc.) which are often made in designated hot spot areas. Several of these contacts have resulted in arrests of suspects for various property crimes that have become an area of emphasis for the PSA captains. Other contacts may not result in enforcement, but the officers take the time to document important intelligence that is passed on to the precincts, crime analysis and the other patrol teams. It is clear in reading these reports that the officers of Team 12 are paying attention to the information being disseminated by other entities and are closing the loop of information. Their efforts are the model for other patrol teams when looking at hot spot and intelligence led policing efforts.

An increase in this type of enforcement comes with a risk of damaging relationships with certain members of our community or an increase in citizen complaints. In reviewing both use of force and citizen complaints, Team 12 members have had neither a use of force nor citizen complaint associated with their proactive efforts during this markup.

Sgt. Lee, as a member of Team 12, I am honored to present you with the Chief's Citation Award. You will be recognized at our annual awards ceremony and your team will be presented with a plaque. A copy of this document will be placed in your personnel file.
