

Construction Update

Project: Hamilton Corridor Safety Improvements

7.9.2020

- The project is on schedule.
- There are currently three projects in the Gonzaga area: a City project on Hamilton, an STA project on Cincinnati, and a WSDOT project on the Trent Bridge.
 - The City is working on installing new stop lights and turn lanes on Hamilton. The contractor is completing two intersections at a time. The contractor will be working on Mission and Desmet until mid-August. One lane in each direction on Hamilton will be maintained throughout the project, along with access to businesses. The project is slated to be completed by October, weather permitting. If the project cannot be completed by October, it will be completed the following spring.
 - Additionally, Spokane Transit Authority is making transportation access improvements on Cincinnati. More information can be found at <https://www.spokanetransit.com/projects-plans>.
 - Traffic in this area also will be impacted by a Washington State Department of Transportation Project (WSDOT) to replace the East Trent Avenue Bridge over the Spokane River just to the east of Hamilton. Information on that project is available on the WSDOT web site <https://www.wsdot.wa.gov/Projects/SR290/trentbridge/default.htm>.
