

Logan Neighborhood Planning

YOU ARE INVITED! *One-Day Charrette*

- **October 13 at 9:00am-3pm**
- Fourth Memorial Church, 2000 North Standard, Spokane, WA 99207
- This meeting will consist of a presentation about the planning process followed by an open forum where you will have the opportunity to express your desires for future zoning in this study area.
- The consultant, Studio Cascade, will facilitate these meetings and assist in the creation of this study.

The **Logan Neighborhood** is beginning a new neighborhood-based planning process.

The Logan Neighborhood hopes to improve the Hamilton corridor's economic vitality and visual appearance and is spending a portion of its neighborhood planning funds to explore new approaches to zoning regulations.

This study will analyze the concept of **form-based code** along the Hamilton corridor, focusing on the portion of Hamilton Street between and including its intersections with Sharp and Mission. The final document will contain a description of the issues that make this discussion relevant, a description of form-based zoning, a draft model code, and a detailed discussion on how findings may apply to the Hamilton corridor and, by extension, to other areas in Spokane experiencing similar conditions.
