Introduction

Last CA Update April 4, 2019

• Briefly review charrette products
  • Survey results
  • 3 Scenarios and Draft Preferred Scenario*
• Briefly review Draft Vision Statement
  • Overarching plan guidance
• Discuss Planning Boundaries Alternatives
  • Development Standards Overlay
  • Planning Study Area
• Overlay Strategy
• Action Plan Policy
• Review of Key Focus Areas
  • Concepts, gaps, and other issues
Review Process to Date

• January – March 2019
  • Focus interviews, North Bank tour, online survey, 3 day charrette
  • Identified assets and challenges
  • Established priorities/themes for future growth and development
  • Developed 3 Scenarios and selected Preferred Scenario
Survey

Assets
- Spokane River
- Spokane Arena
- Centennial Trail
- Restaurants
- Civic Theater

New Assets
- Walkability
- Restaurants
- River Access
- Green Space
- Arts and Culture

Issues Include
- Bike/Ped Routes
- River View/Access
- Connectivity
- Public Safety
- Housing
North Bank

North River Dr walking west from Holiday Inn Express towards Riverfront Park.

Boone Avenue at Normandie, looking North.

Civic Theater
North Bank Views

Howard Street, north and south

Downtown, from Boy Scout Way (City Ticket Lot)
The North Bank is a vibrant, walkable and truly authentic urban neighborhood with a wide range of housing, complemented by shopping, dining, entertainment and recreation on the Spokane River, and intuitive connections to Downtown and surrounding neighborhoods.
Policy Considerations

- Strong branding required to create identity for the district as it becomes a major driver of tourism.
- Recruitment of new facilities, expansion of programming, and gaining national attractions critical to growth and development.
- **Core areas require active ground floor uses to enliven streets and encourage pre- and post-event shopping and dining.**
- Public art program to animate the district and contribute to the brand.
- Emphasize historic building re-use and preservation.
**Concept B: Walkable Urban Neighborhood**

**Policy Considerations**

- The concept may require tax increment financing aligning with planning area to create additional incentive for housing development.
- Public-private partnerships for new or innovative housing types, could improve project feasibility.
- **Require strategic mid-block connections on certain blocks to improve connectivity.**
- **Communicate residential vision to property owners and developers.**
- **Require active street frontages in key strategic locations to serve a neighborhood.**
Policy Considerations

- Evaluate, identify and protect view corridors.
- Negotiate easements to extend existing trail networks and require publicly-accessible open spaces in private developments along the Spokane River.
- Integrate green and complete street amenities in all infrastructure projects.
- Design streetscapes to facilitate biking, walking and other recreation.
- Plan for north/south connections using greenways.
- Evaluate tree inventory. Explore requirements for ground-floor public amenities in private development.
- Incentives for green building, LEED, and sustainability mechanisms.
Participants at the March workshop sessions selected the preferred concept as a synthesis that drew on the most important elements of A, B, and C concepts.

**Planning and Design Principles**

- Balance land use intensity through changes to the North River Overlay standards, strategic infrastructure investment, and policy.
- Assess incentive zoning provisions to ensure that incentives are stacked appropriately for a walkable urban neighborhood.
- Assess existing regulations to ensure that innovative housing types are allowed.
• Market dynamics appear to favor residential development in the North Bank area and will dictate higher intensities of development (to achieve more units) where land values are higher—likely closer to the Spokane River or other key assets.

• **Revise and simplify North River Overlay boundary, relate it to the original purposes of preserving physical and visual access to the Spokane River and Downtown:**

• Eliminate arbitrary inclusions and exclusions of parcels.
  • Evaluate tiered requirements depending on a property’s distance from river or proximity to identified and designated view corridors.
  • Align Overlay boundary with other existing planning and regulatory boundaries, such as the Downtown Plan boundary and/or along zoning boundaries.
  • Consider designating a larger North Bank Planning Area (or Subarea) that conveys policy guidance without additional regulatory provisions.

• **Activate street frontages where high levels of pedestrian activity and commerce are anticipated.**

• **Underground utilities throughout the North Bank through incentive programs and as utility infrastructure is upgraded.**
Planning and Design Principles (continued)

- Identify necessary improvements to the street network to improve accessibility and intentional connectivity to Downtown and neighborhoods.
- Implement Spokane’s adopted complete street standards when capital projects are built. These standards may need future revision to better support future North Bank development. Sidewalks and pedestrian lighting are priorities.
- **Implement the Howard St. “string of pearls” green street concept to emphasize the northern pedestrian and bicycle connection to the River and the core of Downtown.**
- Incorporate recreation infrastructure, including amenities for cyclists, with priorities such as continuous shared-use trail north side of the Spokane River, protected bike lanes on Post St./Lincoln St. and Howard St., and bike facilities on Boone. **Mid-block connections should be designed to accommodate bicycle use.**
- **Expand area where there are no minimum parking requirements to fit entire North River Overlay, or another expanded geography, as appropriate, to incentivize residential development.**
- Design and deploy a branded wayfinding system for the North Bank.
Planning and Design Principles (continued)

- Require public access to the Spokane River gorge on riverfront parcels.
- Connect parks and open spaces with other green/pedestrian infrastructure, including green streets and greenways, and existing and planned trail corridors.
- Consider strategic land acquisition for future parks development.
- Evaluate site design requirements to potentially incorporate the provision of publicly-accessible open space.
- **Encourage a site planning process to develop a Centennial Trail trailhead at the Parks Department Bosch lot on Bridge Street.**
Development Standards Overlay – Existing Boundary
Boundary Alternatives – Overlay #1

North Bank Regulatory Boundary Option 1

Monroe (current DTG-70 boundary) to Division, Post to Stevens from Boone to Sharp, thence Wall to Howard up to Maxwell on the north.
Review Key Focus Areas

Evaluate concepts, identify gaps, confirm implementation steps

Policy

• Encourage the production of a range of housing choices.
• Ensure the North Bank of Downtown continues to support event venues and their patrons by providing needed amenities.
• Improve east-west and north-south connectivity and multimodal circulation to a variety of destinations including Downtown core, neighborhoods, Spokane River gorge, and Riverfront Park.
• Create public spaces and places that make the North Bank a livable Downtown neighborhood and an attractive destination.

Development Standards to support and implement a common vision for the North Bank.

• The concept improves North Bank connectivity to the Downtown core
• The concept provides an appropriate mix of housing types
• The concept sufficiently expands shopping and dining choices
• The concept creates an accessible and safe walkable and bikeable place

Does the draft preferred concept respond to these key focus areas?
2. Mid-block Pedestrian Connections.
a. Purpose. Strategic mid-block connections are a key implementation component of the North Bank Subarea Plan intended to:
   i. Enhance the pedestrian connection between neighborhood uses and to the river.
   ii. Enhance pedestrian connectivity and circulation in areas with long block lengths.
   iii. Enhance the development character for neighborhood and residential uses.
   iv. Break up the massing of large structures and improve internal connectivity.

</tr>
<tr>
<td><strong>Required landscaping types</strong></td>
</tr>
</tbody>
</table>

Where a mid-block connection is located at the edge of a development site, the subject development must include the minimum pathway width plus the required landscaping strip on one side.
Policy 1: Tailor regulations to support and implement a common vision for the North Bank.

Maintain an overlay zone for the North Bank area as a regulatory tool to support goals identified by the community, including improving circulation for pedestrians and cyclists on both east/west and north/south axes and maintaining views and physical access to the Spokane River gorge, Riverfront Park and Downtown Spokane.

Revise the North River Overlay (NRO) District boundary with the intent to simplify the boundary and eliminate arbitrary inclusions and exclusions of parcels and clearly relate the boundary to its original purpose—preservation of access to the Spokane River and of views to Downtown Spokane and Riverfront Park. The current NRO boundary follows 1980s-era demarcations between zoning districts that are no longer applicable, as properties have been rezoned over time.
Policy 2: Encourage the production of a range of housing types in the North Bank. Communicate the residential vision to developers and property owners and develop a plan to link these stakeholders with available resources and incentives related to housing development. Some cities appoint a single point of contact for development in a given neighborhood. Centralizing resources and simplifying communication is critical to reducing barriers to entry for the development community. Review applicable incentives for housing development, such as Multifamily Tax Exemption (MFTE), and adjust the boundaries for eligible areas as necessary to ensure that the incentives are applicable throughout the NRO. Given the intent to spur housing development in the North Bank, consider whether adopted MFTE Target Areas in other parts of the City remain appropriate locations for encouraging multifamily development. There is a limit to the demand for multifamily residential in any given city, and there are benefits to creating a critical mass of residential uses in a given neighborhood; if the North Bank is going to become an urban neighborhood with Downtown-like intensities, policy tools that encourage housing development should be tailored to prioritize projects the North Bank area. Extend the boundary for the no-minimum-parking area to match the revised NRO boundary north of Boone Ave.
Draft Action Plan - Strategic Recommendations

Evaluate concepts, identify gaps and issues

Extend Complete Streets
Review Complete Streets hierarchy and design standards in Downtown Planning work

**Type V – Develop Active Storefront Complete Street Standards**

**Type VI – Develop Priority Pedestrian Complete Street Standards.**

Example: Developments along Type VI-designated streets may choose from the storefront use/design option or the stoop/landscaped frontage design option for building frontages.

*Examples of stoops/landscaped frontages.*
