CONSTRUCTION NOTICE WEEKLY UPDATE

South Gorge Trail

October 22nd, 2020

To: Residents, Employers, and Employees

From: LaRiviere Incorporated

Date: October 22nd, 2020

LaRiviere will continue to work in two areas on the South Gorge project.

Sandifur Park- LaRiviere has received the go ahead to use equipment on top of the tank. This means that LaRiviere can begin grading and shaping the parking are and push to make the paving date of November 6th. Crushed rock will be delivered in the next week. The stairs have been delivered and the WDFW ramp area will begin next week.

Water Avenue, Elm Street, Main Street- We will continue placing the 30in storm-line and related structures on the easement property and in Main Avenue. Avista will be onsite early next week to hold onto the giant pole while our pipes crews dig next to it. We will also be starting in the Elm Street swale placing drywells. We will also begin excavation on the ash area in the swale and hauling the material off.

Arborist- The arborist work is completed now and there should be no further need to reduce the lanes on Clarke Avenue this year.

We understand that this may be a short-term inconvenience and we hope to work together with you in a professional and amicable manner for the long-term improvement of the surrounding areas.

Please know that each day during this project, we will be mindful of the impact we are having on the surrounding businesses and neighborhoods, while staying focused on the benefits of the completed project. If you have any questions, concerns, ideas or observations please feel free to contact us as follows:
