

Memorandum

South Gorge Trail

6/18/21

To: Residents, Employers, and Employees

From: LaRiviere Inc.

Avista Gas department has decided to replace their steel main in Wilson Avenue. The new location for the gas main will be under the proposed new sidewalk on the north side of Wilson. This work is expected to take 10 days and will begin on Monday June 21st.

After the Avista crews have finished, LaRiviere will begin installing sanitary sewer mains on Maple south to Wilson, and on Wilson from Cedar to Ash. After the sanitary main is completed, LaRiviere will install a new storm line in Wilson. A new water main will be installed in Wilson and after that a new Clean Water Distribution main will be installed.

This is a lot of underground utility work in a narrow corridor. Access to homes will be maintained in the evenings, but there may be moments where a delay cannot be avoided.

The wall crew will continue stacking block, installing the reinforcement grid, and backfilling each layer of block.

Landscaping crews will continue their work and should begin installing trees and bushes soon.

Please keep in mind this is construction and things are likely to change on a day to day basis. We will do our best at keeping the public updated on any significant changes that may arise.

We understand that this may be a short-term inconvenience and we hope to work together with you in a professional and amicable manner for the long-term improvement of the surrounding areas. Please know that each day during this project, we will be mindful of the impact we are having on the surrounding businesses and neighborhoods, while staying focused on the benefits of the completed

Demi Sanders, Public Relations.
