

2010

WASHINGTON STATE

Joint Aquatic Resources Permit Application (JARPA) Form¹

USE BLACK OR BLUE INK TO ENTER ANSWERS IN WHITE SPACES BELOW.

US Army Corps of Engineers Seattle District

AGENCY USE ONLY

Date received:

Agency reference #:

Tax Parcel #(s):

Part 1—Project Identification

1. Project Name (A name for your project that you create. Examples: Smith's Dock or Seabrook Lane Development) [help]²

Upriver Park Project

Part 2—Applicant

The person or organization responsible for the project. [help]

2a. Name (Last, First, Middle) and Organization (if applicable)

Avista Corporation c/o Robin Bekkedahl

2b. Mailing Address (Street or PO Box)

P.O. Box 3727

2c. City, State, Zip

Spokane, WA 99220

2d. Phone (1)

(509) 495-8657

2e. Phone (2)

()

2f. Fax

(509) 495-4582

2g. E-mail

robin.bekkedahl@avistacorp.com

Part 3—Authorized Agent or Contact

Person authorized to represent the applicant about the project. (Note: Authorized agent(s) must sign 11b. of this application.) [help]

3a. Name (Last, First, Middle) and Organization (if applicable)

3b. Mailing Address (Street or PO Box)

¹Additional forms may be required for the following permits:

- If your project may qualify for Department of the Army authorization through a Regional General Permit (RGP), contact the U.S. Army Corps of Engineers for application information (206) 764-3495.
- If your project might affect species listed under the Endangered Species Act, you will need to fill out a Specific Project Information Form (SPIF) or prepare a Biological Evaluation. Forms can be found at http://www.nws.usace.army.mil/PublicMenu/Menu.cfm?sitename=REG&pagename=mainpage_ESA
- If you are applying for an Aquatic Resources Use Authorization you will need to fill out and submit an Application for Authorization to Use State-Owned Aquatic Lands form to DNR, which can be found at http://www.dnr.wa.gov/Publications/aqr_use_auth_app.doc
- Not all cities and counties accept the JARPA for their local Shoreline permits. If you think you will need a Shoreline permit, contact the appropriate city or county government to make sure they will accept the JARPA.

²To access an online JARPA form with [help] screens, go to

http://www.epermitting.wa.gov/site/alias_resourcecenter/jarpa_jarpa_form/9984/jarpa_form.aspx .

For other help, contact the Governor's Office of Regulatory Assistance at 1-800-917-0043 or help@ora.wa.gov.

3c. City, State, Zip			
3d. Phone (1)	3e. Phone (2)	3f. Fax	3g. E-mail
()	()	()	

Part 4–Property Owner(s)

Contact information for people or organizations owning the property(ies) where the project will occur. [\[help\]](#)

- Same as applicant. (Skip to Part 5.)
- Repair or maintenance activities on existing rights-of-way or easements. (Skip to Part 5.)
- There are multiple property owners. Complete the section below and fill out [JARPA Attachment A](#) for each additional property owner.

4a. Name (Last, First, Middle) and Organization (if applicable)			
Avista Corporation c/o Bekkedahl, Robin L.			
4b. Mailing Address (Street or PO Box)			
PO Box 3727			
4c. City, State, Zip			
Spokane, WA 99220			
4d. Phone (1)	4e. Phone (2)	4f. Fax	4g. E-mail
(509) 495-8657	()	(509) 495-4582	robin.bekkedahl@avistacorp.com

Part 5–Project Location(s)

Identifying information about the property or properties where the project will occur. [\[help\]](#)

- There are multiple project locations (e.g., linear projects). Complete the section below and use [JARPA Attachment B](#) for each additional project location.

5a. Indicate the type of ownership of the property. (Check all that apply.) [help]
<input type="checkbox"/> State Owned Aquatic Land (If yes or maybe, contact the Department of Natural Resources (DNR) at (360) 902-1100)
<input type="checkbox"/> Federal
<input checked="" type="checkbox"/> Other publicly owned (state, county, city, special districts like schools, ports, etc.)
<input type="checkbox"/> Tribal
<input checked="" type="checkbox"/> Private
5b. Street Address (Cannot be a PO Box. If there is no address, provide other location information in 5p.) [help]
Site is accessed from Mission Avenue from the intersection of Upriver Drive (which is expected to be vacated).
5c. City, State, Zip (If the project is not in a city or town, provide the name of the nearest city or town.) [help]
Spokane, Washington 99202
5d. County [help]
Spokane

5e. Provide the section, township, and range for the project location. [\[help\]](#)

¼ Section	Section	Township	Range
SW	9	25	43

5f. Provide the latitude and longitude of the project location. [\[help\]](#)

- Example: 47.03922 N lat. / -122.89142 W long. (NAD 83)

47.672089 lat/-117.388825 long Google Earth

5g. List the tax parcel number(s) for the project location. [\[help\]](#)

- The local county assessor's office can provide this information.

35093.0005; 2103; 2104; 2006; 1317; 0006; 0004

5h. Contact information for all adjoining property owners. (If you need more space, use JARPA Attachment C.) [\[help\]](#)

Name	Mailing Address	Tax Parcel # (if known)
City of Spokane Parks Department	808 W. Spokane Falls Blvd	35093.0006; 35093.0004
	Spokane, WA 99201-3317	
BNSF Railway	2301 Lou Menk Drive	35084.3220
	Fort Worth, TX 76131	
Riverview Village	1801 E Upriver Drive	35095.0212
	Spokane, WA 99207	

5i. List all wetlands on or adjacent to the project location. [\[help\]](#)

The wetlands are considered as a part of the floodplain area.

5j. List all waterbodies (other than wetlands) on or adjacent to the project location. [\[help\]](#)

Spokane River

5k. Is any part of the project area within a 100-year flood plain? [\[help\]](#)

Yes No Don't know

5l. Briefly describe the vegetation and habitat conditions on the property. [\[help\]](#)

There are two primary vegetative communities. One community includes riparian vegetation, which consists of primarily naturalized non-native trees and shrubs above the naturally scoured shoreline from the edge of Upriver Drive southeast toward the river. The second community consists of landscaping that includes trees, shrubs and lawn consistent with Avista's campus between Upriver Drive and the western edge of the Project. The vegetation located at the LID Mission Swale is mainly native vegetation and will not be disturbed. The Upriver Park Habitat Management Plan addresses the specifics regarding vegetation removal, focusing on replacement of non-native trees and shrubs with native plants suited for the riparian buffer.

5m. Describe how the property is currently used. [\[help\]](#)

The project is located northeast of the Upriver Drive/Mission Avenue to North Center Street between the Avista campus and the Spokane River. The existing land uses within the project area consist of the Upriver Drive, Avista and a narrow corridor of non native vegetation paralleling the Spokane River. This project will eliminate the barriers by vacating and removing Upriver Drive within the project area, reduce the asphalt area with green open space, remove the jersey barriers, provide better view sheds of the river and create a more pleasant area for the public to use.

5n. Describe how the adjacent properties are currently used. [\[help\]](#)

The project area is located in a more developed area with the Avista campus bordering to the northwest, a multi family residential area and retirement community to the north, a rail road track within near proximity to the west, the Centennial Trail, Mission Park to the southwest, Witter pool to the south, Mission bridge to the southeast and the Spokane River to the southeast. Although Mission Park is in close proximity to the river, there is no unobstructed and easy access for the users, since the railroad bisects the area between the park and the river. The site, once enhanced will offer another area of the river that the public can safely access by water, foot or by bicycles to enjoy.

5o. Describe the structures (above and below ground) on the property, including their purpose(s). [\[help\]](#)

The project area has a 10 foot to 20 foot length of gabion wall near the middle of the reach will be opened and reformed to allow pedestrian access from the Centennial Trail to the existing Shoreline Trail, an existing dirt path through the riparian area along the Spokane River. An existing reach of jersey barriers along Upriver Drive will be removed to open views of the shoreline and river.

5p. Provide driving directions from the closest highway to the project location, and attach a map. [\[help\]](#)

Take I-90 heading east or west and take the Hamilton Street exit. Travel approximately 1.1 miles north on Hamilton to Mission Avenue and go easterly .37 miles to Upriver Drive. One of the project terminus is at this intersection. Go northerly .37 miles at the intersection of Upriver Drive to North Center Street to the other project terminus.

Part 6–Project Description

6a. Summarize the overall project. You can provide more detail in 6d. [\[help\]](#)

Avista is proposing to vacate Upriver Drive for the sole purpose of developing Upriver Park (Park) for public use, providing public river access for non-motorized boaters and for realigning the Centennial Trail adjacent to the river. The proposed three (3) acre area will be developed as a Park to encompass and improve this reach of the Centennial Trail and improve existing access to the River. The Centennial Trail will be realigned and expanded to twelve feet (12') to accommodate the pedestrian and bicycling traffic. Two (2) entry areas will be integrated in the park on the north and south sides. Other elements will likely include, a brick arch, park benches, signage, picnic tables, bike racks, kayak stands, lighting and a concrete type amphitheater seating area at the north entry/plaza. A 10 foot to 20 foot length of gabion wall near the middle of the reach will be opened and reformed to allow pedestrian access from the Centennial Trail to the existing Shoreline Trail, an existing dirt path through the riparian area along the Spokane River. An existing reach of jersey barriers along Upriver Drive will be removed to open views of the shoreline and river. The project will remove only non-native vegetation and enhance ecological functioning, as these will be replaced with native vegetation between the new trail and the river. Irrigation will be installed, as appropriate, to establish the native vegetation. Landscaping on the west side of the trail away from the river will provide a more managed park setting, with lawn, trees and shrubs consistent with nearby City parks. Managing the vegetation will assist in eliminating illegal camping opportunities in the immediate area and open up view sheds to the river. Public safety will be improved by the vacation of Upriver Drive by eliminating, or significantly reducing, traffic at the Upriver Drive/Mission Avenue intersection. Additionally, the development of Upriver Park will enhance public safety for Centennial Trail users by eliminating the current shared space between vehicles and trail users. As a requirement of the street vacation, Avista will modify the Upriver Drive and North Center intersection to allow a better flow of traffic for the reroute.

6b. Indicate the project category. (Check all that apply) [\[help\]](#)

- Commercial
 Residential
 Institutional
 Transportation
 Recreational
 Maintenance
 Environmental Enhancement

6c. Indicate the major elements of your project. (Check all that apply) [\[help\]](#)

- | | | | |
|---|---|--|--|
| <input type="checkbox"/> Aquaculture | <input type="checkbox"/> Culvert | <input type="checkbox"/> Float | <input type="checkbox"/> Road |

Other: Vacate and demolish Upriver Drive and construct a linear park.

6d. Describe how you plan to construct each project element checked in 6c. Include specific construction methods and equipment to be used. [\[help\]](#)

- Identify where each element will occur in relation to the nearest waterbody.
- Indicate which activities are within the 100-year flood plain.

The majority of the Upriver Drive demolition and Upriver Park construction is within the critical area including the 100 year flood plain. The activities are all within the 200 foot shoreline boundary from the Spokane River and also the 75' buffer. A summary of the activities are listed.

- Demolition of Upriver Drive;
- Realignment of the Centennial Trail;
- Removal of the non native trees and replace with native trees;
- Remove and reform a 10-20 foot length of gabion wall to allow for pedestrian access;
- Construct the north and south entry ways;
- Landscape with irrigation on the west side of the Centennial Trail;
- Install park benches, signage, picnic tables, bike racks, kayak stands, lighting and benched amphitheater seating.

6e. What are the start and end dates for project construction? (month/year) [\[help\]](#)

- If the project will be constructed in phases or stages, use JARPA Attachment D to list the start and end dates of each phase or stage.

Start date: May 2020

End date: December 2025

See JARPA Attachment D

The end date is weather dependent.

6f. Describe the purpose of the project and why you want or need to perform it. [\[help\]](#)

Avista plans to develop a linear public park known as Upriver Park (Park), situated between the intersection of Mission Avenue/Upriver Drive and North Center Street/Upriver Drive, Avista campus and the Spokane River. This area has great potential for the public to access the river in this area by creating an improved and enhanced public realm through a variety of design improvements that provide a contiguous connection. The purpose of the plan was to address the increase in demand for non-motorized boating use that Upper Falls reservoir has been experiencing in recent years, enhance public safety by eliminating and/or significantly reducing automobile traffic on Upriver Drive, and by thinning and managing the vegetation between Upriver Drive and the river, thereby eliminating illegal camping opportunities in the immediate area. The development should also greatly reduce littering and dumping in the area, and enhance ecological function, as the non-native and invasive species will be replaced with native plants. Park amenities include the Centennial Trail, shoreline path, shade structure, plazas, interpretive signs, artwork and drinking water. The purpose of the project is to further enhance passive recreation opportunities in this section in the City of Spokane.

6g. Fair market value of the project, including materials, labor, machine rentals, etc. [\[help\]](#)

\$2,000,000

6h. Will any portion of the project receive federal funding? [\[help\]](#)

- If yes, list each agency providing funds.

Yes No Don't know

Part 7–Wetlands: Impacts and Mitigation

- Check here if there are wetlands or wetland buffers on or adjacent to the project area.
(If there are none, skip to Part 8.) [\[help\]](#)

7a. Describe how the project has been designed to avoid and minimize adverse impacts to wetlands. [\[help\]](#)

Not applicable

The vacation of Upriver Drive will decrease the amount of impervious surface. The thinning and removal of the non native vegetation and planting of native vegetation will improve the ecological functioning. The park should also eliminate the illegal camping while reducing the littering and dumping.

7b. Will the project impact wetlands? [\[help\]](#)

Yes No Don't know

7c. Will the project impact wetland buffers? [\[help\]](#)

Yes No Don't know

7d. Has a wetland delineation report been prepared? [\[help\]](#)

- If yes, submit the report, including data sheets, with the JARPA package.

Yes No A Habitat Management Plan is a part of the permit application.

7e. Have the wetlands been rated using the Western Washington or Eastern Washington Wetland Rating System? [\[help\]](#)

- If yes, submit the wetland rating forms and figures with the JARPA package.

Yes No Don't know

7f. Have you prepared a mitigation plan to compensate for any adverse impacts to wetlands? [\[help\]](#)

- If yes, submit the plan with the JARPA package and answer 7g.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

Currently the wetland area is impacted by a road with gravel. As noted in the Habitat Management Plan, the soil testing in late July after waters receded indicated sandy and gravelly soils and the lack of hydric soils with no features. Since the area is vegetated within a graveled area and within an active floodplain, it is considered a Category II wetland under the Eastern Washington Wetland Rating system, under special circumstances because it is a forested deciduous wetland in a floodplain. By developing a park in this area, the current impacts will be substantially decreased and an open area containing a park will improve the area and ecological functioning.

7g. Summarize what the mitigation plan is meant to accomplish, and describe how a watershed approach was used to design the plan. [\[help\]](#)

The City of Spokane Shoreline Master Plan (SMP) designates this site as Limited Urban Environment with a 75 foot shoreline buffer from the Spokane River. The existing Upriver Drive is largely within the buffer. The section within the 75 foot shoreline buffer is designated as a critical area and is located within the Riparian Habitat Zone 2, as designated in the Spokane Municipal Code Chapter 17E.020, Fish and Wildlife Conservation Areas. The project is being processed under the more restrictive regulations of the SMP and CAO. The Habitat Management Plan addressed mitigation sequencing and no net loss of ecological functioning.

7h. Use the table below to list the type and rating of each wetland impacted; the extent and duration of the impact; and the type and amount of mitigation proposed. Or if you are submitting a mitigation plan with a similar table, you can state (below) where we can find this information in the plan. [\[help\]](#)

Activity (fill, drain, excavate, flood, etc.)	Wetland Name ¹	Wetland type and rating category ²	Impact area (sq. ft. or Acres)	Duration of impact ³	Proposed mitigation type ⁴	Wetland mitigation area (sq. ft. or acres)
None						

¹ If no official name for the wetland exists, create a unique name (such as "Wetland 1"). The name should be consistent with other project documents, such as a wetland delineation report.

² Ecology wetland category based on current Western Washington or Eastern Washington Wetland Rating System. Provide the wetland rating forms with the JARPA package.

³ Indicate the days, months or years the wetland will be measurably impacted by the activity. Enter "permanent" if applicable.

⁴ Creation (C), Re-establishment/Rehabilitation (R), Enhancement (E), Preservation (P), Mitigation Bank/In-lieu fee (B)

Page number(s) for similar information in the mitigation plan, if available:

7i. For all filling activities identified in 7h., describe the source and nature of the fill material, the amount in cubic yards that will be used, and how and where it will be placed into the wetland. [\[help\]](#)

N/A

7j. For all excavating activities identified in 7h., describe the excavation method, type and amount of material in cubic yards you will remove, and where the material will be disposed. [\[help\]](#)

N/A

Part 8—Waterbodies (other than wetlands): Impacts and Mitigation

In Part 8, “waterbodies” refers to non-wetland waterbodies. (See Part 7 for information related to wetlands.) [\[help\]](#)

Check here if there are waterbodies on or adjacent to the project area. (If there are none, skip to Part 9.)

8a. Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment. [\[help\]](#)

Not applicable

Excavation will be limited to asphalt and concrete, with limited reshaping of site soils. The intent is to leave road base material in place and re-use where possible for the new trail, entry access areas etc., in order to disturb the site as little as possible. Landscape areas on the east side of the new trail area will be provided with sufficient soil material to sustain plantings. The northern most plaza will be filled slightly to create a flat area and separate it from the Centennial Trail so that activities are not conflict. Riparian planting will be made in existing native soils, and minimal earthwork is contemplated between the trail and river except the removal of existing roadway.

Appropriate erosion control measures, which may include silt fences, straw wattles, berms, etc., will be installed, monitored and inspected during the duration of the project activities.

The vacation of Upriver Drive and the realignment/reconfiguration of the trail and entry areas will decrease the total impervious surface by 45,434 square feet (1.04 acres). The majority of the decrease of impervious surface is due to the removal of Upriver Drive. This is expected to improve natural stormwater percolation and the ecological functioning of the Spokane River.

8b. Will your project impact a waterbody or the area around a waterbody? [\[help\]](#)

Yes No

8c. Have you prepared a mitigation plan to compensate for the project’s adverse impacts to non-wetland waterbodies? [\[help\]](#)

- If yes, submit the plan with the JARPA package and answer 8d.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

The project will not impact Spokane River and therefore no mitigation plan is needed. The permit application includes a Habitat Management Plan and addresses mitigation sequencing and no net loss of ecological functioning.

8d. Summarize what the mitigation plan is meant to accomplish. Describe how a watershed approach was used to design the plan.

- If you already completed 7g., you do not need to restate your answer here. [\[help\]](#)

N/A

8e. Summarize impact(s) to each waterbody in the table below. [\[help\]](#)

Activity (clear, dredge, fill, pile drive, etc.)	Waterbody name ¹	Impact location ²	Duration of impact ³	Amount of material to be placed in or removed from waterbody	Area (sq. ft. or linear ft.) of waterbody directly affected
N/A					

¹ If no official name for the waterbody exists, create a unique name (such as "Stream 1") The name should be consistent with other documents provided.

² Indicate whether the impact will occur in or adjacent to the waterbody. If adjacent, provide the distance between the impact and the waterbody and indicate whether the impact will occur within the 100-year flood plain.

³ Indicate the days, months or years the waterbody will be measurably impacted by the work. Enter "permanent" if applicable.

8f. For all activities identified in 8e., describe the source and nature of the fill material, amount (in cubic yards) you will use, and how and where it will be placed into the waterbody. [\[help\]](#)

N/A

8g. For all excavating or dredging activities identified in 8e., describe the method for excavating or dredging, type and amount of material you will remove, and where the material will be disposed. [\[help\]](#)

N/A

Part 9—Additional Information

Any additional information you can provide helps the reviewer(s) understand your project. Complete as much of this section as you can. It is ok if you cannot answer a question.

9a. If you have already worked with any government agencies on this project, list them below. [help]			
Agency Name	Contact Name	Phone	Most Recent Date of Contact
City of Spokane Parks	Garrett Jones	(509) 363-5467	January/February 2020
City of Spokane	Tami Palmquist	(509) 625-6157	March 2020
		()	
9b. Are any of the wetlands or waterbodies identified in Part 7 or Part 8 on the Washington Department of Ecology's 303(d) List? [help]			
<ul style="list-style-type: none"> If yes, list the parameter(s) below. If you don't know, use Washington Department of Ecology's Water Quality Assessment tools at: http://www.ecy.wa.gov/programs/wq/303d/. 			
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No			
9c. What U.S. Geological Survey Hydrological Unit Code (HUC) is the project in? [help]			
<ul style="list-style-type: none"> Go to http://cfpub.epa.gov/surf/locate/index.cfm to help identify the HUC. 			
17010305			
9d. What Water Resource Inventory Area Number (WRIA #) is the project in? [help]			
<ul style="list-style-type: none"> Go to http://www.ecy.wa.gov/services/gis/maps/wria/wria.htm to find the WRIA #. 			
WRIA 57			
9e. Will the in-water construction work comply with the State of Washington water quality standards for turbidity? [help]			
<ul style="list-style-type: none"> Go to http://www.ecy.wa.gov/programs/wq/swqs/criteria.html for the standards. 			
<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not applicable			
9f. If the project is within the jurisdiction of the Shoreline Management Act, what is the local shoreline environment designation? [help]			
<ul style="list-style-type: none"> If you don't know, contact the local planning department. For more information, go to: http://www.ecy.wa.gov/programs/sea/sma/laws_rules/173-26/211_designations.html. 			
<input type="checkbox"/> Rural <input type="checkbox"/> Urban <input type="checkbox"/> Natural <input type="checkbox"/> Aquatic <input checked="" type="checkbox"/> Conservancy <input checked="" type="checkbox"/> Other Limited Urban Conservancy			

9g. What is the Washington Department of Natural Resources Water Type? [\[help\]](#)

- Go to http://www.dnr.wa.gov/BusinessPermits/Topics/ForestPracticesApplications/Pages/fp_watertyping.aspx for the Forest Practices Water Typing System.

Shoreline Fish Non-Fish Perennial Non-Fish Seasonal

9h. Will this project be designed to meet the Washington Department of Ecology's most current stormwater manual? [\[help\]](#)

- If no, provide the name of the manual your project is designed to meet.

Yes No

Name of manual:

9i. If you know what the property was used for in the past, describe below. [\[help\]](#)

The property was platted in 1886 as a subdivision known as Ross Park. Upriver Drive was included as a part of the plat. For the past 50+ years, the Avista Corporate office has resided in this area.

9j. Has a cultural resource (archaeological) survey been performed on the project area? [\[help\]](#)

- If yes, attach it to your JARPA package.

Yes No

There are no culturally significant features located on or nearby the site. Avista completed a cultural resource study of the Mission Swale located in the southeast border of the project site boundary. This document is confidential and can be obtained at the Department of Archaeology of Historic Preservation (DAHP) in Olympia, Washington. Because the area has been repeatedly disturbed and consists primarily of a roadway and roadbed built by the City, no culturally-significant resources are expected. The entire area was subject to cultural resource review during relicensing of the Spokane River Hydro Project, and no resources within the proposed project footprint were identified.

9k. Name each species listed under the federal Endangered Species Act that occurs in the vicinity of the project area or might be affected by the proposed work. [\[help\]](#)

The reference studies from the Spokane River show that there are not any threatened and endangered species within the vicinity of the project. No species listed in the US Fish and Wildlife Service May 2019 IPC report for Spokane County have been observed or identified within the project area and there are no critical habitats at this location.

9i. Name each species or habitat on the Washington Department of Fish and Wildlife's Priority Habitats and Species List that might be affected by the proposed work. [help]

A Habitat Management Plan was prepared for this project and included as a part of this permit application. The plan/report addresses the priority habitat and species listed on the WDFW website. During the site visits in 2019 only yellow-bellied marmots, waterfowl and songbirds were the only wildlife observed using the site. Forested wetlands and riparian areas are also considered by WDFW to be Priority Habitats and are present in the study immediately adjacent to the shoreline

Part 10–SEPA Compliance and Permits

Use the resources and checklist below to identify the permits you are applying for.

- Online Project Questionnaire at <http://apps.ecy.wa.gov/opas/>.
- Governor's Office of Regulatory Assistance at (800) 917-0043 or help@ora.wa.gov.
- For a list of agency addresses to send your application, click on the "where to send your completed JARPA" at <http://www.epermitting.wa.gov>.

10a. Compliance with the State Environmental Policy Act (SEPA). (Check all that apply.) [help]

- For more information about SEPA, go to www.ecy.wa.gov/programs/sea/sepa/e-review.html.

A copy of the SEPA determination or letter of exemption is included with this application.

A SEPA determination is pending with City of Spokane (lead agency). The expected decision date is April.

I am applying for a Fish Habitat Enhancement Exemption. (Check the box below in 10b.) [help]

This project is exempt (choose type of exemption below).

Categorical Exemption. Under what section of the SEPA administrative code (WAC) is it exempt?

Other: _____

SEPA is pre-empted by federal law.

10b. Indicate the permits you are applying for. (Check all that apply.) [help]

LOCAL GOVERNMENT

Local Government Shoreline permits:

Substantial Development Conditional Use Variance

Shoreline Exemption Type (explain): _____
