

## West Plains Dreamlines

1. Draw a dot where you live (origin). If you live off the map, draw the dot closest to where you ENTER the study area (i.e. I-90 and US 2 interchange).
2. Draw an X, on three different locations, where you travel most often in the West Plains.
3. Highlight the route you take from your home and/or origin to destination (i.e. home to work or work to lunch spot).
4. Pretend you are solely in charge of transportation decisions in the West Plains. Draw in new transportation corridors or improvements that you would recommend to address your travel needs. Observe existing and proposed constraints such as Fairchild property, airport runways, and I-90.
5. On the back or on another sheet of paper tell us why you placed the new routes and/or improvements where you did, include any notes or comments to clarify your proposals.
