

R - INFORMATION FILES - R

Radiators - Can go to the WTE or transfer stations for recycling or check with recycling buy back centers.(Link to Spokane County Recycling Centers)

Radiator Fluid - Antifreeze – Residential Drain radiator into a one gallon (or up to 5 gallon) container. This should be taken to the HHW area at the transfer stations or the WTE plant for **free drop-off**. They can pour it for you if you need your containers returned.
NEVER POUR DOWN STORM DRAINS OR INTO GUTTERS.

Commercial Drop Off. – Link to SRSWS or DOE Hazardous contractors list

Radiator Flush - New, Unused. In this concentration it is hazardous and should be taken to a Household Hazardous Waste Drop Site.

Railroad Ties - SEE DEMO-WASTE-

Graham Road Recycling Disposal Facility – 244-0151

Railroad ties may also be taken to the WTE plant or the transfer stations as garbage.

Recycling Centers- Link to Spokane County Recycling Centers

Recycling Equipment -

Recycling Equipment Manufacturing 487-6966 6512 N. Napa
Western Systems & Fabrication 922-1300 2403 University Rd.
Interstate Batteries 534-0676 5417 E. Trent, Spokane.

Rendering - See Animal Carcasses. For Livestock: Baker Commodities, 535-5435 or 1(800) 551-0501., 4423 E. Hutton Ave., Spokane

Rubber Cement - Deliver to a Household Hazardous Waste Drop Site

Rug Cleaners (containing solvents)- Deliver to Household Hazardous Waste Drop Site.

Rust Remover (containing phosphoric acid) - deliver to the Household Hazardous Waste drop site at the WTE plant or transfer stations. If empty, rinse container before discarding.

S - INFORMATION FILES – S

Scrap Metals – Link to Spokane County Recycling Centers

Septic Tank Degreasers (Cesspool Cleaner Containing Organic Solvents) - DO NOT USE any cesspool or septic tank degreaser containing organic solvents; most solvents will pass through the system unchanged and enter the ground water. To minimize your need to use a degreaser, collect kitchen fat in cans and place in trash instead of flushing it down the drain. Deliver it to a Household Hazardous Waste Drop Site at the WTE plant or transfer stations.

Septic Tanks - Disposal Of Household Hazardous Waste -

Anything placed in the septic tank will eventually percolate down into the ground water. Things such as solvents, grease, oil etc. shouldn't be disposed of in the septic tank. Always read labels for biodegradability and if hazardous deliver to a Household Hazardous Waste Drop Site.

Shampoo For Head Lice - containing the insecticide lindane, deliver it to a Household Hazardous Waste Drop Site.

Sheetrock (Drywall Or Plasterboard) - Drop off at the WTE plant and transfer stations or Graham Road Landfill 244-0151.

Recycling Options:

Greenacres Gypsum & Lime Co., -924-5550 17900 E. Euclid, Greenacres.

Unpainted sheetrock **ONLY** for a fee. They also sell the fertilizer that they make from the sheetrock.

Other Options For Disposal

Sulphur dioxide is formed when sheetrock is burned. Businesses with dedicated loads of sheetrock may take it to the Northside landfill Mon. - Fri., 8-4 **ONLY**. Sheetrock may be taken to the WTE facility or the transfer stations and the materials will be back hauled to the Northside landfill by the city.

If you want to put it in your garbage can - the can must not weigh over 85 lbs. and the sheetrock can't stick out of the can more than 2-3 inches.

Shoe Dye - Deliver to a Household Hazardous Waste Drop Site.

Shoe Polish - containing petroleum distillates. Discard dried out cans.

Smoke Detectors (Ionization Type) - Return to manufacturer or retailer. May dispose of in regular trash. If the unit has been physically damaged pick it up with your hand inside of a plastic bag, turn the bag inside out and seal it. Household Hazardous Waste Drop Sites will not accept radioactive materials.

Soil (Contaminated)

Updated 2012

Graham Road Recycling & Disposal Facility- 244-0151 See Demolition Waste

Able Clean-up Technologies, Inc. -466-5255 www.ablecleanup.com

Soil (Non-Contaminated) See Demolition Waste
