

29th Avenue Safety and Access Project

Spokane Matters 2.0, District 2
Dana Dalrymple, Spokane Public
Library

Original Objective

To study 29th Avenue from Grand Boulevard to Ray Street to evaluate options to increase mobility for all along the route.

- This turned out to be a bigger issue than this group could handle by itself.
- Neighborhood representatives meeting
- Reevaluation of group objective after official city traffic study was commissioned

New Objective

To support the 29th Avenue Traffic Study by gathering useful data:

- Creating and distributing a survey to measure how pedestrians, bike riders, and transit users believe 29th Avenue performs - <http://bit.ly/29thASAP>

New Objective

To support the 29th Avenue Traffic Study by gathering useful data:

- Doing a walking/biking survey of the actual streetscape itself - recording places where the sidewalks need repair or better handicapped access, looking at sight lines and traffic speeds, seeing how crossings perform. We'll take notes and digital photos. Ann Fennessey of Rockwood NC will coordinate.
