

Local Agency Vertical Clearances within the City of Spokane

Printed: 3/16/2026

The following Vertical Clearance Data is a guide for vertical clearances, but because of physical changes to roadways and other possible inconsistencies due to natural phenomena (expansion and contraction of roadway facilities due to temperature, natural or unnatural material deposition on the pavement, other transient and lasting unforeseen events, etc.), new construction, pavement overlays, lane reconfiguration, etc., it cannot be guaranteed.

As stated on all permits in accordance with state law, the operator is responsible to identify, navigate and clear all obstructions. It is the responsibility of the permit applicant to check, or pre-run, the proposed route and provide for safe maneuvers around the obstruction or detours as necessary.

Note that the lane in which the maximum and minimum clearances occur are not listed. This must be determined by the operator. In accordance with state law, the owner or operator of a vehicle or combination of vehicles shall exercise due care in determining that sufficient vertical clearance is provided upon the public roadways where the vehicle or combination of vehicles is being operated. Due to the variations in structure clearance partially cataloged, such users should not assume that clearance is in excess of what is posted and should utilize check and pre-run methods to assure safe passage.

Please send any questions or concerns for the Street Department Bridge Inspection Team to:

Email: streetsinfo@spokanecity.org

Call: (509) 232-8800 during normal working hours

Call: (509) 625-7733 after hours assistance

Mail: City of Spokane Street Department 901 N Nelson St Spokane WA 99202-3769
