

Snow Downtown

What you need to know when it snows downtown

- A dedicated crew monitors the Central Business District (CBD) continuously.
- There is a dedicated deicer to the downtown as needed.
- As inclement weather is predicted, city will determine what type of deicing measures are needed.
- If snow accumulates to a point that deicer is not effective, city crews plow snow from the curbs to the center of the roadway.
- **When the downtown area is plowed, all cars must be removed from the street from 2 am to 6 am.**
- If the weather persists and the snow berms cannot be melted effectively, snow will be removed by truck from the downtown.

Downtown Business Partners:

- Keep sidewalks clear of snow and ice
- Place the removed snow from sidewalks at the curb line
- Keep the base of meters free and clear of snow for ease of citizen use
- Snow removal adjacent to intersections should not be placed around ADA Ramps or marked crossings
- Snow from private driveways should not be placed in the public right of way (ROW)

Parking Downtown

What is the benefit of parking meters downtown?

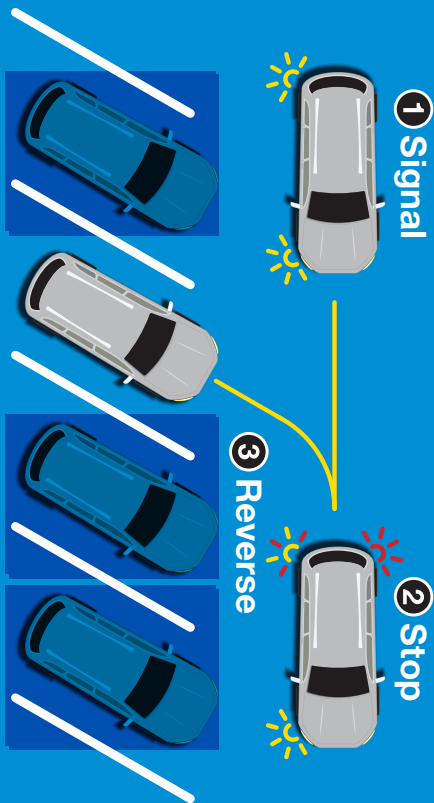

Metered parking promotes parking turnover, which accommodates more retail and entertainment patrons. Businesses benefit when new customers can easily find parking in front of their location.

Your parking dollars at work

Parking dollars help pay for downtown improvements such as:

- Sidewalk repair
- Gateway improvements
- Street trees
- Tree grates
- Enhanced pedestrian crossings
- Bike racks
- Art
- Street reconfiguration for additional parking

Back-in Angle Parking in 3 Easy Steps

The City may ticket and/or tow for failing to comply with parking restrictions.
