

WASHINGTON STATE

Joint Aquatic Resources Permit Application (JARPA) Form^{1,2}

USE BLACK OR BLUE INK TO ENTER ANSWERS IN THE WHITE SPACES BELOW.

US Army Corps
of Engineers
Seattle District

AGENCY USE ONLY

Date received: _____

Agency reference #: _____

Tax Parcel #(s): _____

Part 1—Project Identification

1. Project Name (A name for your project that you create. Examples: Smith's Dock or Seabrook Lane Development) [help]
Bluff Road Restoration Project

Part 2—Applicant

The person and/or organization responsible for the project. [\[help\]](#)

2a. Name (Last, First, Middle)			
Robin Bekkedahl			
2b. Organization (If applicable)			
Avista Corp			
2c. Mailing Address (Street or PO Box)			
PO Box 3727			
2d. City, State, Zip			
Spokane, WA 99220			
2e. Phone (1)	2f. Phone (2)	2g. Fax	2h. E-mail
(509) 495-8657	()	()	Robin.bekkedahl@avistacorp.com

¹Additional forms may be required for the following permits:

- If your project may qualify for Department of the Army authorization through a Regional General Permit (RGP), contact the U.S. Army Corps of Engineers for application information (206) 764-3495.
- If your project might affect species listed under the Endangered Species Act, you will need to fill out a Specific Project Information Form (SPIF) or prepare a Biological Evaluation. Forms can be found at <http://www.nws.usace.army.mil/Missions/CivilWorks/Regulatory/PermitGuidebook/EndangeredSpecies.aspx>.
- Not all cities and counties accept the JARPA for their local Shoreline permits. If you need a Shoreline permit, contact the appropriate city or county government to make sure they accept the JARPA.

²To access an online JARPA form with [\[help\]](#) screens, go to http://www.epermitting.wa.gov/site/alias_resourcecenter/jarpa_jarpa_form/9984/jarpa_form.aspx.

For other help, contact the Governor's Office of Regulatory Assistance at 1-800-917-0043 or help@ora.wa.gov.

Part 3—Authorized Agent or Contact

Person authorized to represent the applicant about the project. (Note: Authorized agent(s) must sign 11b of this application.) [\[help\]](#)

3a. Name (Last, First, Middle)			
Bekkedahl, Robin, L			
3b. Organization (If applicable)			
Avista Corp			
3c. Mailing Address (Street or PO Box)			
1411 E Mission, PO Box 3727			
3d. City, State, Zip			
Spokane, WA 99220			
3e. Phone (1)	3f. Phone (2)	3g. Fax	3h. E-mail
(509) 495-8657	()	()	robin.bekkedahl@avistacorp.com

Part 4—Property Owner(s)

Contact information for people or organizations owning the property(ies) where the project will occur. Consider both **upland and aquatic** ownership because the upland owners may not own the adjacent aquatic land. [\[help\]](#)

- Same as applicant. (Skip to Part 5.)
- Repair or maintenance activities on existing rights-of-way or easements. (Skip to Part 5.)
- There are multiple upland property owners. Complete the section below and fill out [JARPA Attachment A](#) for each additional property owner.
- Your project is on Department of Natural Resources (DNR)-managed aquatic lands. If you don't know, contact the DNR at (360) 902-1100 to determine aquatic land ownership. If yes, complete [JARPA Attachment E](#) to apply for the Aquatic Use Authorization.

4a. Name (Last, First, Middle)			
Jones, Garrett			
4b. Organization (If applicable)			
City of Spokane Parks and Recreation			
4c. Mailing Address (Street or PO Box)			
808 W Spokane Falls Blvd			
4d. City, State, Zip			
Spokane, WA 99201			
4e. Phone (1)	4f. Phone (2)	4g. Fax	4h. E-mail
509-363-5462	()	()	gjones@spokanecity.org

Part 5–Project Location(s)

Identifying information about the property or properties where the project will occur. [\[help\]](#)

- There are multiple project locations (e.g. linear projects). Complete the section below and use [JARPA Attachment B](#) for each additional project location.

5a. Indicate the type of ownership of the property. (Check all that apply.) [help]			
<input checked="" type="checkbox"/> Private <input type="checkbox"/> Federal <input checked="" type="checkbox"/> Publicly owned (state, county, city, special districts like schools, ports, etc.) <input type="checkbox"/> Tribal <input type="checkbox"/> Department of Natural Resources (DNR) – managed aquatic lands (Complete JARPA Attachment E)			
5b. Street Address (Cannot be a PO Box. If there is no address, provide other location information in 5p.) [help]			
3515 S Inland Empire Way			
5c. City, State, Zip (If the project is not in a city or town, provide the name of the nearest city or town.) [help]			
Spokane, WA 99224			
5d. County [help]			
Spokane County			
5e. Provide the section, township, and range for the project location. [help]			
¼ Section	Section	Township	Range
SW	31	25N	43E
5f. Provide the latitude and longitude of the project location. [help]			
<ul style="list-style-type: none"> Example: 47.03922 N lat. / -122.89142 W long. (Use decimal degrees - NAD 83) 			
47.6222846 N lat / - 117.432265 W long			
5g. List the tax parcel number(s) for the project location. [help]			
<ul style="list-style-type: none"> The local county assessor's office can provide this information. 			
35312.0002;35313.0003;35313.0002;35313.0016;35314.0005;35314.0007;34061.0002;34061.0067;35313.0007			
5h. Contact information for all adjoining property owners. (If you need more space, use JARPA Attachment C.) [help]			
Name	Mailing Address		Tax Parcel # (if known)
Avista Corporation c/o Robin Bekkedahl	P.O Box 3727 E. 1411 Mission Avenue		
	Spokane, WA 99220		
5i. List all wetlands on or adjacent to the project location. [help]			
None			
5j. List all waterbodies (other than wetlands) on or adjacent to the project location. [help]			
Hangman Creek			

5k. Is any part of the project area within a 100-year floodplain? [help]
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Don't know
5l. Briefly describe the vegetation and habitat conditions on the property. [help]
The area is dominated by Ponderosa pine with an understory of grasses, primarily bulbous and Canada blugrass, Idaho fescue; forbs, such as western yarrow, arrowleaf balsamroot and low densities of shrubs, primarily serviceberry, and snowberry. There are also areas with few or not trees or shrubs. Other land uses are evident throughout this area. The area is generally underdeveloped in nature.
5m. Describe how the property is currently used. [help]
The property includes a combination of City of Spokane Conservation Lands, private lands, two track dirt roads, and an easement for the Avista transmission line. Mountain bikers, hikers, trail runners, dog-walkers and other recreationists use the trail system that bisects the area.
5n. Describe how the adjacent properties are currently used. [help]
Properties located north of the property include High Drive Road and the Comstock residential neighborhood. South of the project area is the Hangman Creek and Highway 195. Directly to the west is the Sunset Substation. The Qualchan golf course is south of the area and the creek is generally considered the western boundary.
5o. Describe the structures (above and below ground) on the property, including their purpose(s) and current condition. [help]
The property currently has a transmission line on the property. The transmission line is owned and operated by Avista for the delivery of electricity.
5p. Provide driving directions from the closest highway to the project location, and attach a map. [help]
From the City of Spokane go westerly on I-90 and take Highway 195 south to the Cheney Spokane Road exit. Go to the overpass over the highway and then over the first bridge crossing Hangman Creek.

Part 6–Project Description

6a. Briefly summarize the overall project. You can provide more detail in 6b. [help]
The project consists of immediate restoration on a 1.5 mile unplanned road that was done on April 10 th and 11 th . The agencies agreed that immediate action to restore the road needed to be completed in May to prevent further damage. The plan was to restore the area to prior contours including the slope, trail network, and cover with native plants. Erosion control measures, site surveys, cultural survey, draft restoration plan was initiated, and a community meeting was held.
6b. Describe the purpose of the project and why you want or need to perform it. [help]
The purpose and agreed upon focus of the Bluff Road Restoration Plan is to restore the areas that were damaged by the unplanned road cut on the City Parks and private properties. The Plan includes restoration to the prior slope, trail network, and cover with native plants. The project had areas of minor, moderate, and high disturbance to the ground. Portions of the road cut were identified as crossing through a Geologic Hazardous Zone and wetland buffer per the City of Spokane Critical Area Ordinance. Immediate restoration efforts were

needed to preserve the existing native vegetation that was disturbed and to prevent noxious weed growth in the disturbed area. Since this is a recreational area, the City and private property owners do not want this to become a heavily traveled area during the summer/fall recreational months.

6c. Indicate the project category. (Check all that apply) [\[help\]](#)

- Commercial
 Residential
 Institutional
 Transportation
 Recreational
 Maintenance
 Environmental Enhancement

6d. Indicate the major elements of your project. (Check all that apply) [\[help\]](#)

<input type="checkbox"/> Aquaculture	<input type="checkbox"/> Culvert	<input type="checkbox"/> Float	<input type="checkbox"/> Retaining Wall (upland)
<input type="checkbox"/> Bank Stabilization	<input type="checkbox"/> Dam / Weir	<input type="checkbox"/> Floating Home	<input type="checkbox"/> Road

Other: Road Restoration

6e. Describe how you plan to construct each project element checked in 6d. Include specific construction methods and equipment to be used. [\[help\]](#)

- Identify where each element will occur in relation to the nearest waterbody.
- Indicate which activities are within the 100-year floodplain.

Portions of the unplanned road are within the 200 foot shoreline area and a portion of the wetland buffer area. There were no sections of the road that were within the 100 year floodplain. The restoration of the Bluff road included the immediate installation of erosion control measures, which were completed at the end of April. This included silt fencing and straw wattles placed in areas to keep all damage contained on the road cut. Aerial and drone photography were completed to assist with the Restoration Plan. The Restoration Plan includes the Habitat Management Plan and Planting Plan, and are included as a part of this permit application. They address the items, prior land uses, habitat condition, plant replacement (including ratios to ensure survivability), and monitoring. A cultural survey was also completed on April 28th. No impacts were done to the cultural resource. Exemption from Shoreline Substantial Development Permit was approved on April 25, 2017. This allowed us and a grading permit was approved on May 12, 2017. This allowed us to start the work prior to the shoreline permits and SEPA under the provisions of WAC 173-27-040(B)(4) and SMC 17G.060. Regrading the disturbed soils back to the original topography is scheduled to be completed in May and early June. The equipment used for the project includes rubber and steel tracked excavators, a bobcat, and hand labor. Native plants will be planted in the disturbed areas in late May and June and some of the downed trees will be used for habitat, erosion control and to redirect the recreational users. An aggressive communication outreach (i.e. email, website, signage, community meetings) was developed to better distribute information during the progress of the restoration effort. The restoration effort also includes monitoring over a 5-7 year period and replacement of vegetation that does not survive.

6f. What are the anticipated start and end dates for project construction? (Month/Year) [\[help\]](#)

- If the project will be constructed in phases or stages, use [JARPA Attachment D](#) to list the start and end dates of each phase or stage.

Start date: May 15, 2017 End date: June 15, 2017

See JARPA Attachment D

6g. Fair market value of the project, including materials, labor, machine rentals, etc. [\[help\]](#)

\$75,000

6h. Will any portion of the project receive federal funding? [\[help\]](#)

- If yes, list each agency providing funds.

Yes No Don't know

Part 7--Wetlands: Impacts and Mitigation

Check here if there are wetlands or wetland buffers on or adjacent to the project area.
(If there are none, skip to Part 8.) [\[help\]](#)

7a. Describe how the project has been designed to avoid and minimize adverse impacts to wetlands. [\[help\]](#)

Not applicable

The restoration project will restore the wetland buffer area that was impacted by the unplanned road. The road is on the outer limits of both the shoreline and wetland buffer area for 1/2 mile. The wetland buffer and shoreline area are considered as one of the same, and are contained within the Habitat Management Plan and Planting Plan for restoration efforts.

7b. Will the project impact wetlands? [\[help\]](#)

Yes No Don't know

7c. Will the project impact wetland buffers? [\[help\]](#)

Yes No Don't know

7d. Has a wetland delineation report been prepared? [\[help\]](#)

- If Yes, submit the report, including data sheets, with the JARPA package.

Yes No

7e. Have the wetlands been rated using the Western Washington or Eastern Washington Wetland Rating System? [\[help\]](#)

- If Yes, submit the wetland rating forms and figures with the JARPA package.

Yes No Don't know

7f. Have you prepared a mitigation plan to compensate for any adverse impacts to wetlands? [\[help\]](#)

- If Yes, submit the plan with the JARPA package and answer 7g.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

As a part of the mitigation for the unplanned road, Avista is partnering with the City and private property owners to restore this area and to implement the Habitat Management Plan and Planting Plan, which are included in this permit application.

7g. Summarize what the mitigation plan is meant to accomplish, and describe how a watershed approach was used to design the plan. [\[help\]](#)

The mitigation plan includes restoring the slope and replacing the same vegetation with native plant species to protect the ecological functioning and result in a no net loss within shoreline and wetland buffer area. Restoration efforts are only a temporary impact that will permanently restore the area back to its original

condition. The Habitat Management Plan and Planting Plan outline the specifics regarding restoration approach.

7h. Use the table below to list the type and rating of each wetland impacted, the extent and duration of the impact, and the type and amount of mitigation proposed. Or if you are submitting a mitigation plan with a similar table, you can state (below) where we can find this information in the plan. [\[help\]](#)

Activity (fill, drain, excavate, flood, etc.)	Wetland Name ¹	Wetland type and rating category ²	Impact area (sq. ft. or Acres)	Duration of impact ³	Proposed mitigation type ⁴	Wetland mitigation area (sq. ft. or acres)

¹ If no official name for the wetland exists, create a unique name (such as "Wetland 1"). The name should be consistent with other project documents, such as a wetland delineation report.

² Ecology wetland category based on current Western Washington or Eastern Washington Wetland Rating System. Provide the wetland rating forms with the JARPA package.

³ Indicate the days, months or years the wetland will be measurably impacted by the activity. Enter "permanent" if applicable.

⁴ Creation (C), Re-establishment/Rehabilitation (R), Enhancement (E), Preservation (P), Mitigation Bank/In-lieu fee (B)

Page number(s) for similar information in the mitigation plan, if available: _____

7i. For all filling activities identified in 7h, describe the source and nature of the fill material, the amount in cubic yards that will be used, and how and where it will be placed into the wetland. [\[help\]](#)

7j. For all excavating activities identified in 7h, describe the excavation method, type and amount of material in cubic yards you will remove, and where the material will be disposed. [\[help\]](#)

Part 8–Waterbodies (other than wetlands): Impacts and Mitigation

In Part 8, "waterbodies" refers to non-wetland waterbodies. (See Part 7 for information related to wetlands.) [\[help\]](#)

Check here if there are waterbodies on or adjacent to the project area. (If there are none, skip to Part 9.)

8a. Describe how the project is designed to avoid and minimize adverse impacts to the aquatic environment. [\[help\]](#)

Not applicable

The restoration project footprint does not extend beyond the area of the unplanned road. The distance of the shoreline that is impacted is approximately 1/2 mile and approximately 100' from the Hangman Creek OHWM. Erosion control measures, including straw wattles and silt fencing were used to contain any drainage and sediment. The existing soil textures observed on-site appear to be composed of sandy loam at the base of the

road, sand on the steeper hill then smaller pockets of clay soils near the upper part of the slope. The disturbed soils were contained back in the original road cut area and will be compacted and then reseeded with the native grass seed mixes and plants to provide for stabilization. A tackifier was also used to help keep the soil in place. Monitoring will be done on a continual basis for 5-7 years for plant survivability. The Habitat Management Plan and Planting Plan describe the methods that will be implemented to avoid impacts to the aquatic environment.

Extreme care will be taken to prevent any petroleum products or other deleterious materials from entering the water in any manner. Avista's selected contractor for this project will implement the following control measures:

- Petroleum fuel storage for project equipment will not be stored on site, but will be delivered as needed and transported to the machinery.
- Fuel transfer tanks, hoses, oil drums, etc, shall be checked regularly for drips or leak, and shall be maintained to prevent discharges.
- In the event of a discharge any petroleum product into state waters, or onto land with a potential for entry into State waters, containment and clean-up efforts shall begin immediately and be completed as soon as possible. Avista will contact Ecology at 509-329-3400 in the event of a spill.
- During project activities, all necessary measures shall be taken to minimize the disturbance of existing riparian, wetland, or upland vegetation.
- All construction debris shall be properly disposed.
- The contractor and the Avista Program Manager will be on site during the project to oversee the restoration of the project area.

8b. Will your project impact a waterbody or the area around a waterbody? [\[help\]](#)

Yes No

8c. Have you prepared a mitigation plan to compensate for the project's adverse impacts to non-wetland waterbodies? [\[help\]](#)

- If Yes, submit the plan with the JARPA package and answer 8d.
- If No, or Not applicable, explain below why a mitigation plan should not be required.

Yes No Not applicable

The Habitat Management Plan and Planting Plan incorporate the necessary practices to protect the non-wetland waterbodies. In addition to the plans, other practices include:

- Extreme care shall be taken to prevent any petroleum products or other deleterious materials from entering the water in any manner. Avista's selected contractor for this project will implement the following control measures:
- To prevent leaks of petroleum products in the waterway, no defective equipment shall be operated in or near the watercourse or adjacent areas capable of contributing surface flows to the watercourse;
- Visible floating oils, if released from the project area, shall be contained and removed from the water immediately;
- Fuel transfer tanks, hoses, oil drums, etc, shall be checked regularly for drips or leak, and shall be maintained to prevent discharges.
- In the event of a discharge any petroleum product into state waters, or onto land with a potential for entry into State waters, containment and clean-up efforts shall begin immediately and be completed as soon as possible. Avista will contact Ecology at 509-329-3400 in the event of a spill.
- During project activities, all necessary measures shall be taken to minimize the disturbance of existing riparian, wetland, or upland vegetation.
- All construction debris shall be properly disposed of.
- The contractor and the Avista Program Manager will be on site during the project.

8d. Summarize what the mitigation plan is meant to accomplish. Describe how a watershed approach was used to design the plan.

- If you already completed 7g you do not need to restate your answer here. [\[help\]](#)

8e. Summarize impact(s) to each waterbody in the table below. [\[help\]](#)

Activity (clear, dredge, fill, pile drive, etc.)	Waterbody name ¹	Impact location ²	Duration of impact ³	Amount of material (cubic yards) to be placed in or removed from waterbody	Area (sq. ft. or linear ft.) of waterbody directly affected

¹ If no official name for the waterbody exists, create a unique name (such as "Stream 1") The name should be consistent with other documents provided.

² Indicate whether the impact will occur in or adjacent to the waterbody. If adjacent, provide the distance between the impact and the waterbody and indicate whether the impact will occur within the 100-year flood plain.

³ Indicate the days, months or years the waterbody will be measurably impacted by the work. Enter "permanent" if applicable.

8f. For all activities identified in 8e, describe the source and nature of the fill material, amount (in cubic yards) you will use, and how and where it will be placed into the waterbody. [\[help\]](#)

8g. For all excavating or dredging activities identified in 8e, describe the method for excavating or dredging, type and amount of material you will remove, and where the material will be disposed. [\[help\]](#)

Part 9—Additional Information

Any additional information you can provide helps the reviewer(s) understand your project. Complete as much of this section as you can. It is ok if you cannot answer a question.

9a. If you have already worked with any government agencies on this project, list them below. [\[help\]](#)

Agency Name	Contact Name	Phone	Most Recent Date of Contact
Department of Ecology	Jacob McCann/Shannon Petrisor	509-329-3584 and 509-329-3610	April 2017
City of Spokane	Tami Palmquist/Megan Duvall	509.625.6157 and 509.625.6543	April 2017
Spokane Tribe	Randy Abrahamson	509-258-4315	April 2017

9b. Are any of the wetlands or waterbodies identified in Part 7 or Part 8 of this JARPA on the Washington Department of Ecology's 303(d) List? [\[help\]](#)

- If Yes, list the parameter(s) below.
- If you don't know, use Washington Department of Ecology's Water Quality Assessment tools at: <http://www.ecy.wa.gov/programs/wq/303d/>.

[help] <p>The project site property has been used in the past for the City of Spokane Conservation Lands, private lands, a two track dirt path, and an easement area for the Avista transmission line. Mountain bikers, hikers, trail runners, dog-walkers and other recreationists use the area.</p>
9k. Has a cultural resource (archaeological) survey been performed on the project area? [help] <ul style="list-style-type: none"> If Yes, attach it to your JARPA package.

Yes No The cultural survey can be obtained from the Department of Archaeology and Historical Preservation (DAHP).

9l. Name each species listed under the federal Endangered Species Act that occurs in the vicinity of the project area or might be affected by the proposed work. [\[help\]](#)

There are no known species listed under the federal Endangered Species Act that will be impacted by the project.

9m. Name each species or habitat on the Washington Department of Fish and Wildlife's Priority Habitats and Species List that might be affected by the proposed work. [\[help\]](#)

There are no species or habitat on WDFW's list that will be impacted by the project. This project will help restore the existing habitat.

Part 10–SEPA Compliance and Permits

Use the resources and checklist below to identify the permits you are applying for.

- Online Project Questionnaire at <http://apps.ecy.wa.gov/opus/>.
- Governor's Office of Regulatory Assistance at (800) 917-0043 or help@ora.wa.gov.
- For a list of addresses to send your JARPA to, click on [agency addresses for completed JARPA](#).

10a. Compliance with the State Environmental Policy Act (SEPA). (Check all that apply.) [\[help\]](#)

- For more information about SEPA, go to www.ecy.wa.gov/programs/sea/sepa/e-review.html.

A copy of the SEPA determination or letter of exemption is included with this application.

A SEPA determination is pending with City of Spokane (lead agency).

I am applying for a Fish Habitat Enhancement Exemption. (Check the box below in 10b.) [\[help\]](#)

This project is exempt (choose type of exemption below).

Categorical Exemption. Under what section of the SEPA administrative code (WAC) is it exempt?

Other: _____

SEPA is pre-empted by federal law.

10b. Indicate the permits you are applying for. (Check all that apply.) [\[help\]](#)

LOCAL GOVERNMENT

Local Government Shoreline permits:

Substantial Development Conditional Use Variance

Shoreline Exemption Type (explain): Maintenance

Other city/county permits:
